Sheep and wool development schemes have been launched on the lines of the key village scheme for cattle improvement, in 250 centres in different States. The Third Five Year Plan has laid great stress on sheep and wool development programme. Out of the provision made, two training centres, one sheep breeding farm and 122 wool extension centres have been set up upto the end of 1963–64.

Research in sheep breeding is promoted in three major sheep rearing tracts, *viz.* Temperate Himalayan, North Indian Plains and in the Deccan Plateaux, to evolve strains of sheep which will yield wool for apparel and also for superior types of carpets.

In the Himalayan regions and in the western portions of the Deccan plateaux, breeding the imported Merino with the local sheep, has shown great promise. Concerted efforts are being made in the Plan period at about 200 centres in the rural areas. Each centre will comprise an ewe population of 2,000 to 3,000 which would be systematically developed as nucleus ram producing flocks. In order to introduce better genetical material in our breeding programme an appeal has been made through F.A.O to U.S.A., Australia and New Zealand for the supply of 2,750 productive sheep. New Zealand sent a gift of 413 pedigree sheep, U.S.A. 300 and Soviet Union 500. In the Indo-German project of Agricultural Development at Mandi (H.P.) 50 Merino rams were received for improving local sheep.

## GOATS

Goats form an integral part of Indian agricultural economy. The goat is the principal source of meat supply ; it also provides manure, skin, hair (Mohair) and milk. There are about 61 million goats in India as against 55 million in 1956, which is a fourth of the world's goat population. About a fifth of this is used for milk production. Annually about 17 million goats are in demand for human consumption. About 21·3 million pieces of goat skins and hides valued at Rs. 75 million are produced in India, of which skins worth about 57·2 million rupees are exported. Goats are of active habit and multiply rapidly. Goats, unlike sheep, eat up even vegetation containing high tannic acid content which other animals shun. Rajasthan has the largest goat population followed by Maharashtra, Bihar and U.P.

The important breeds of Indian goats fall under four broad groups :—Himalayan Goats are found in the hills of Kashmir, Punjab and Uttar Pradesh. These are mostly reared for mohair production and also for meat. There is also the Pashmani goat of Kashmir which produces an undercoat of very fine variety of hair which goes into the manufacture of shawls. The plain goats comprise some of the best mutton and milch animals. Some of the better known breeds are Marwari, Konor and Jamnapari. The last yields 600 lbs. in a lactation of 250 days. Deccan plateaux goats yield small quantities of milk and are mostly reared for mutton.

Results from the Punjab and U.P. have shown that selected goats yield (6 to 8 lbs. milk per day going upto even 12 lbs. in U.P.) on an average about 400 lbs. of milk per lactation of 150 days while a few went up to 700 lbs. and even higher.

Large provision has been made for sheep and goat development in the Third Five Year Plan. In addition to the establishment of 15 new sheep breeding farms, 17 farms will be expanded to produce 2,500 quality rams for use in rural areas. The production is also expected to go up from 72 million pounds to 90 million pounds. 158 sheep and wool extension centres and eight training centres are also to be set up. During the first two years of the Plan (1961-63) two training centres (one sheep breeding farm and 16 sheep and wool extension centres) have been started. A large-scale sheep shearing and grading programme linked to sheep development forms an important part of the U.N. special fund project commenced during 1963-64 in Rajasthan. Under the guidance of five Australian specialists a training school in wool grading has been started at Jodhpur. A survey of sheep and wool production in Punjab has been conducted and similar work for grading and marketing will be extended there. A Central Institute with two sub-stations was established in Rajasthan to coordinate research in wool production.

## POULTRY

There were about 117 million poultry in India in 1961, as against about 95 million five years before.

Poultry-keeping is an important subsidiary industry of the poorer classes. Indigenous poultry of low grade produce on an average 50 small-sized eggs per year.

Even at a low rate of production, the annual contribution of Indian poultry to the country's economy is not less than Rs. 100 million.

At present, the *per capita* consumption of eggs in India is only four per annum as compared with 400 in U.K., U.S.A. or Denmark.

An improved strain of poultry has been evolved at Izatnagar by selective breeding for ten generations which give an average annual egg yield of 150 and sometimes of 234 of the larger egg type.

*Poultry Development.*—To stimulate poultry development as a subsidiary industry in the rural areas, a pilot project was approved early in 1955.

The 2nd Five-Year Plan had promoted an All-India Poultry Development Scheme to establish five regional poultry farms in Bangalore, Maharashtra, Bhubaneswar, Delhi and Himachal Pradesh and 300 demonstration extension centres at a total cost of Rs. 25·88 million. These five regional poultry farms have started functioning and with the help of incubators and other poultry equipment received from T.C.M. programme, production of eggs and birds is being stepped up. 266 extension-cum-development centres were established against the Plan target of 300. The regional farms are expected to produce 2·15 million eggs and distribute 0·43 million breeding stock during 1964–65 as against 1·5 million eggs and 0·23 million birds in 1963–64.

The Third Five Year Plan provided for the establishment of fifty intensive poultry development blocks at an estimated cost of Rs. one lakh each. With the revised phased programme, the state-wise allocation is given below :—

Seven blocks out of these have been established so far (two each in Andhra, Bihar and Punjab and one in Himachal Pradesh).

The present demand in an average town of about one lakh population is about 10,000 eggs and 300 table birds per day.

The project will popularise scientific poultry farming, provide consumers with good quality products at reasonable price and give also gainful occupation to a large number of poultry keepers. In view of the difficulty in bringing eggs and poultry products from long distances, transport difficulties and inadequate cold storage facilities, etc., this project will be implemented around large towns and cities having a population of one lakh only at present.

The salient features of the projects are—(*i*) It will be run on commercial and self-supporting basis through co-operatives, (*ii*) necessary requirements such as stock, disease protection arrangements, poultry feed, equipment, technical guidance, loans, subsidy and facilities for collection grading and marketing of the produce will be provided simultaneously, (*iii*) stimulate growth of commercial enterprise and gainful occupation of about 300 poultry farmers providing a monthly income ranging from 50 to 100

rupees per month, (iv) popularise rearing of day old chicks by the poultry farmers themselves so as to provide the basis for the development of a sound poultry industry and (v) provide the consumers with fresh, clean and good quality eggs and poultry at reasonable cost.

With proper management, better feeding and housing, each hen will lay at least 144 eggs in a year against the average production of 60.

The Animal Husbandry Wing of the Indian Council of Agricultural Research has also put through in cooperation with the State Govt. schemes for raising poultry, pig and sheep. Projects for increasing goat breeding in Assam and Bihar and wool grading in Rajasthan are being extended.

State-wise distribution of poultry development blocks under the phased programme for poultry development is as follows :—

Andhra Pradesh 5 ; Assam 1 ; Bihar 3 ; Gujarat 2 ; Himachal Pradesh 1 ; Jammu & Kashmir 1 ; Kerala 3 ; Maharashtra 2 ; Madhya Pradesh 4 ; Madras 6 ; Mysore 5 ; Orissa 2 ; Punjab 3 ; Rajasthan 3 ; Uttar Pradesh 6 ; West Bengal 4.

A large commercial firm with Canadian collaboration has been started near Gungaon (Delhi) in 1962-63 and another similar one has also been started functioning in Bombay. Balanced poultry feed is manufactured by over 30 private firms.

Under a centrally sponsored scheme one Regional Duck Farm has started functioning in Bengal.

*World Food Programme Aid :*—India and the World Food Programme signed an agreement on Feb. 1, 1964 covering aid for a project for increasing production of eggs and poultry at Babugarh (U.P.). Under the agreement India will receive $ 1,71,900 (about Rs. 8·3 lakhs) from WFP of the United Nations.

*Piggery.*—Under the 2nd Five-Year Plan an All-India Piggery Development Scheme was promoted to augment food production of high nutritive value at low cost and also to improve the economic condition of Harijans who mostly are engaged in piggery activities. The scheme provided for two regional pig-breeding stations and 10 piggery units for the production and multiplication of pure-bred stud boars, by whose help the indigenous stock would be upgraded in the piggery development blocks. Pork and pork products were also to be manufactured in the bacon factories attached to the regional stations.

During the Second Plan period two regional pig breeding station bacon factories have been established at Aligarh and at Haringhata. Two more such stations proposed to be established during the Third Plan period have been set up at Aarey (Maharashtra) and Kasanpalli (Andhra Pradesh). The three pig breeding stations viz. at Aligarh, Harringhata and Aarey sold 168 boars for breeding purposes. Pig breeding units established during the Second Five Year Plan were 15 against a target of 10, and piggery development blocks were 31 against the target of 51. During the Third Plan period, 5 pig breeding units and 10 piggery development blocks were started during 1961–62 and the programme for 1962–63 envisaged setting up 3 and 22 respectively.

## DAIRYING

Like agriculture dairying is one of the major industries in India as milk and milk products contribute not less than Rs. 6,200 million to the national income.

The dairy industry is still unorganised. Of 200 million cattle and buffaloes, 72 million or 36 per cent are milch animals (females over 3 years). Milk yield is, however, low : Cow 413 lb. per year, buffalo 1,100 lb. Though buffaloes form only 30 per cent. of milch animals, due to their comparatively high yield, they account for 55·9 per cent of the total milk produced. Buffalo milk has butter fat content 6·5 to 7 per cent. as against 4 to 5 per cent. of cow.

Gross production of milk is 20·65 mln. tons, of which 13·2 mln. tons are marketed, the rest being used for home consumption or for feeding the calves. *Per capita* daily consumption of milk and milk products varies from 16·89 oz. in the Punjab to 26·4 oz. in Orissa ; average 5·5 oz.

As a prelude to setting up city milk plants, pilot milk schemes were in operation in 15 centres during 1962-63. The dairy plants in operation during 1962-63, 1963-64 and 1964-65 were 18, 22 and 29 respectively, and 4, 3 and 4 new plants were also established during these years. The total daily average output of milk of these were about 8·5, 9·0 and 10·0 lakh litres respectively during these three years. Construction and installation of equipment are in progress for other 26 dairies (five of which with assistance of New Zealand Govt. and UNICEF).

The dairy plants at Calcutta & Madras are associated with cattle colonies like Bombay Milk scheme. In them, 12,000, 13,000 and 14,000 cattle have been resettled during 1962-63, 1963-64 and 1964-65 respectively. A second milk colony for Bombay is being set up at Venkas. A cattle feed compounding factory is being set up at Anand by Kaira Dt. Coop. Milk Producers Union to supply balanced cattle feed to the Coop. Milk producers.

In the field of milk products development, creameries have been started at Aligarh, Barauni and Junagadh. Milk products factories have been set up at Amritsar and Rajkot and another two (at Anand and Mehsana with the assistance of Denmark) are under construction. Two similar plants were under construction at Miraj (Maharashtra) and Vijayawada (Andhra). A milk drying plant is proposed for Bikaner Milk plant (with New Zealand assistance) at Indore. Dairy plants are expected to be set up at Madurai and Kanpur (with UNICEF aid). Dairy projects at Ludhiana, Baroda and Calcutta (expansion) are also helped by U.N.I.C.E.F. Assistance under Colombo Plan has been received from New Zealand for establishing dairies at Dehra Dun and Dhulia.

Efforts are being made to set up 130 intensive cattle development centres.

To provide dairy technical personnel for various dairy projects, training programme has been expanded with special courses in Dairy Engineering and Dairy Extension at N.D.R.I., Karnal and Southern Regional Station at Bangalore, Agricultural Institute at Anand, Dairy Technological Institute at Aarey, at Allahabad Agricultural Institute and Haringhata — altogether in six centres. Separate department for dairy development work has been set up in Bengal, Kerala and Maharashtra States.

## THIRD PLAN

The Third Five Year Plan provides about Rs. 90 crores for animal husbandry. During this period the Key Village Scheme is to be consolidated and expanded. Rs. 5·10 crores have been provided for the key village scheme. It is proposed to undertake, as an experimental measure, cross-breeding with exotic breeds and to convert 414 goshalas into cattle breeding-cum-milk production units.

The objectives of the animal husbandry programmes during the Third Five Year Plan are : (1) To increase the supply of milk, meat and eggs, greater consumption of which is very essential to balance the present customary diet ; (2) To provide sufficient bullock power for agricultural operations and (3) To improve the output of certain animal products *viz.* wool, hides, skins, bristles, bones, etc. which are industrial raw materials.

During the Third Plan livestock development is envisaged as an integral part of diversified farming in the form of mixed farming. Dual purpose breeds will be developed to provide good bullocks for farming and wholesome milk in dairy industry. The scope of key village schemes will be expanded to cover 10 Key Village units covering 8,000 to 10,000 head of cattle. Besides expanding 68 Key Village blocks already set up in previous plans 71 new ones will be established in well-known breeding tracts ; 40 central stations for collection, preservation and distribution of semen will also be established. Use of artificial insemination will be extended, 11 bull bearing farms will be established, 33 existing livestock farms expanded and 30,000 bull calves subsidized for rearing. Apart from 59 gosadans established already 23 more will be established and large scale castration of scrub bulls will be taken up. In addition to 256 Goshalas taken up for production of superior bulls during the previous plan period, 168 more will be developed into cattle and milk productive units. The rehabilitation of nomadic cattle-breeders will be continued.

The production of milk estimated at 19 and 22 million tons in First Five Year Plan and Second Five Year Plan is expected to go up to about 25 million tons by the end of the Third Five Year Plan. The average per capita consumption of milk and milk products estimated at 4·76 oz. per day in 1951 and 4·9 oz in 1961, is also likely to go up to 5·1 oz. per day by the end of the Third Plan against the minimum requirement of 10 oz. for balanced diet.

The Third Five Year Plan provided for 21 milk schemes as spill over from the Second Five Year Plan and the establishment of 55 new milk supply schemes in cities (with a population exceeding one lakh) and in growing industrial townships. Out of these six and two have been completed ; 11 and 11 are under implementation 4 and 13 are being implemented, during 1963-64 in the spill over schemes and new schemes respectively. Emphasis is laid in the Third Plan on the need for linking up dairy schemes with rural areas so as to make a tangible impact on cattle development both for milk supply and draught needs.

Production of infant and other milk food is being started by Messrs. Glaxo, Horlicks, Amul and Asok Nestles.

## PROGRESS OF DAIRY SCHEMES

The following are the names of milk schemes completed and schemes in progress of different States with their present capacity and expected capacity per day in litres respectively after completion.

*Andhra :* Completed :—Guntur Cooperative Milk Union 4,000 ; Co-operative Milk Union, Kurnool 4,000.

In progress :—Vizag Dairy Farm ; Nellore Milk Scheme 5,000; Hyderabad-Vijayavada Project 5,500 ; Chittoor Milk Scheme 5,500 ; Warangal 5,500.

*Bihar :* Completed :—Gaya 5,500 ; Barauni Rural Creamery.

*In Progress :*—Patna Milk Scheme 9,000 ; Ranchi Scheme 5,500.

*Delhi Milk Scheme:* Started in Nov. 1959 at a cost of Rs. 45 million to the Centre and Rs. 150 million to New Zealand Govt., distributes 3,500 mds. of milk daily through 500 depots and 6 milk booths meeting about half of the demand for Delhi City. The dairy plant is capable of handling 12,000 mds. daily. Produces also ghee, ice-cream, flavoured milk, cheese and milk powder.

The Government of India appointed a team of experts in July 1964 to examine the working of the scheme. The team has recommended that the scheme may be reorganised as a limited company and milk may be procured through milk producers cooperative unions. Some procedural changes have also been recommended. Government have entered into an agreement with the World Food Programme authorities for supply of skimmed milk powder for production of toned milk.

*Gujarat :* Completed :—Anand (Ahmedabad Milk Project) 20,000 (to expand from 400 mds. to 1,500 mds.); Rajkot Factory 6,000; Jamnagar creamery (Started).

*Gujarat :* 1) Anand Dairy; 2) Kaira Co-operative Milk Union continued to supply 1,050 mds. of pasturised milk daily in rail tankers to the Aarey Colony and manufactured large quantities of butter, ghee and condensed milk and milk powder. The Union's Milk Factory expanded to produce cheese, tinned cream and baby foods; 3) Junagadh Milk Scheme.

In Progress:—Ahmedabad Milk Factory 55,000; Gondal Pilot Project Milk Scheme 1,000; Junagadh Milk Creamery.

*Jammu & Kashmir :* In Progress :—Srinagar Milk Scheme 9,000.

*Kerala State :* Completed :—Travancore Milk Scheme 5,500; Trivandrum Dairy Scheme 100 mds.

*Kerala :* Kodapannakunnu and Ollukara Dairy Farms Expansion.

In Progress :—Calicut Milk Scheme 9,000.

*Madhya Pradesh :* Completed :—Bhopal Milk Scheme 9,000.

In Progress :—Jabalpore Milk Sheme 9,000.

*Madras :* Completed :—Nanginad Milk Union 700; Coimbatore Milk Union 5,500.

*Madras :* Madras Co-operative Milk Supply Union.

In Progress :—Madras Milk Project 75,000; Madurai Milk Scheme 25,000.

*Maharashtra :* Completed :—Aarey Scheme 14,000; Karjat Milk Collection Dept. to Aarey 1,000; Nagpur Milk Scheme 1,000.

*Maharashtra :* 1) Bombay Milk Scheme (Aarey); Continued to maintain 15,000 milch animals and supplied about 5,000 mds. of whole milk and toned milk daily to Bombay City. A second dairy has been set up at Worli; 2) Poona Milk Scheme; 3) Nagpur Milk Scheme.

In Progress :—Sholapur Milk Scheme 5,500; Worli Dairy Project 2,50,000; Kolhapur Milk Scheme 5,500; Nagpur Milk Scheme 36,000; Poona Milk Scheme 25,000; Nasik Milk Scheme 19,000; Miraj Dairy Project 50,000.

*Mysore:* Completed :—Kudige Milk Scheme 4,000; Bangalore Milk Project 5,500.

In Progress :—Bangalore Milk Project 50,000.

*Orissa :* In Progress :—Cuttack Milk Scheme 5,500; Roorkela Dairy Project 6,000.

*Punjab :* Completed :—Chandigarh Milk Scheme 9,000; Amritsar Milk Plant 2,500 mds.

In Progress:—Hissar Milk Project 4,000.

*Rajasthan :* In Progress :—Jaipur Milk Project 9,000.

*Tripura :* In Progress :—Agartala Milk Scheme 18,500.

*U.P. :* Completed :—Agra Milk Scheme 9,000; Allahabad Cooperative Milk Supply Union; Aligarh Rural Creamery; Lucknow Milk Union 40,000; Kanpur Milk Project 50,000.

*West Bengal :* Completed :—Haringhatta 54,000.

*West Bengal :* Calcutta Milk Project; Haringhatta Milk Scheme.

*Calcutta Milk Project :* About 5,000 milch animals were removed from the City to Haringhatta Milk Colony and over 1,400 mds. of milk are now handled daily. Toned milk and flavoured vitaminised milk (with one per cent fat) are also supplied. Three rural milk chilling stations were set up. The new dairy under construction in Calcutta made good progress.

In Progress :—Haringhatta-Kalyani Colony Milk.

*Foreign Aid :* UNICEF aid $6,13,000 for training and $760,000 for dairy projects of Worli (Maharashtra) and Kanpur (U.P.) were received.

The services of five experts in various fields of dairying were made available by F.A.O. and one expert by the Government of New Zealand during 1961-62. A number of scholarships were also awarded for training Indians abroad in different branches of dairying by T.C.M., F.A.O. and under Colombo Plan.

*Cattle Power :* Over 69 million cattle are engaged in agricultural operations to work approximately 38 million ploughs in addition to other farm work. Out of the 11 million carts in the country used for farm transport, about 0·5 million are located in the urban areas and the rest are in the countryside. Nearly 1·2 million working cattle are used for carting alone. Over half a million sugarcane crushers in the country are worked by bullocks. Over 0·3 million bullock driven ghanies are also run in the country each requiring at least one bullock.

## ANIMAL DISEASES

The chief diseases that the Animal Husbandry and Veterinary Departments have to deal with are glanders and surra in equines, foot and mouth disease, haemorrhagic septicaemia, black quarter and anthrax in ruminants while tuberculosis, Johne's disease and contagious abortion are assuming greater importance than in the past. Glanders and surra are both scheduled diseases under the Glanders and Farcy Act. Glanders is incurable but surra can now be successfully treated with Naganol or Antrypol. This disease (surra) also affects camels, cattle and dogs and in recent years its importance as a bovine disease has been more widely recognised.

A major scourge affecting Indian cattle is Rinderpest which causes a mortality of about 60 per cent resulting in an annual loss of 0·4 million heads of cattle, valued at about 300 million rupees. The First Plan and Second Plan had provided Rs. 1·67 million and Rs. 18·3 million respectively for Rinderpest eradication. Because of the eradication campaign of the past, Kerala, Mysore and Madras are now free from the disease. But, further north, in Andhra Pradesh, Gujarat and Maharashtra State the disease is prevalent and a pilot scheme to vaccinate and brand about 12 million cattle and buffaloes has been in operation since October, 1954. As a result of the last eight years' work over 112·4 million cattle and buffaloes have been protected out of an inoculable population of 131·6 million. The scheme is in operation in the States of Assam, Gujarat, Jammu & Kashmir, M.P., Orissa, Rajasthan and U.P.

Progress of operation is given below :

| Year | Doses of vaccine produced (in millions) | No. of animals vaccinated (in millions) |
|---|---|---|
| 1959-60 .. .. | 44·627 | 22·770 |
| 1960-61 .. .. | 35·575 | 18·448 |
| 1961-62 .. .. | 25·570 | 13·360 |
| 1962-63 .. .. | 27·245 | 16·001 |
| 1963-64 .. .. | 37·786 | 9·700 |
| 1964-65 .. .. | 34·461 | 4·932 |

To meet the demand for vaccine in various States, six vaccine production centres have been established during the Second Plan period at Izatnagar, Lucknow, Calcutta, Ranipet (Madras), Mhow and Hissar.

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by means of sera or by vaccines.

Indian poultry are also subject to several contagious diseases.

### Research and Educational Institutions

The Chief Research Centres under the Central Government :—Indian Veterinary Research Institute is situated at two places in Uttar Pradesh, Izatnagar, and at Mukteswar near Bareilly. They undertake both research and training.

The Institute supplies the veterinary demands of the whole of India for sera and vaccines and except for two minor institutions (one in Madras and the other in Mysore), it is the only source in India for these products. The present output of these products meets only ⅓rds of the demands. Recently on the advice of a foreign expert in the manufacture of Biological Products through modern methods, steps are being taken to modernise the equipment and processes.

Similarly, research in dairying is done at the Indian Dairy Research Institute, Karnal (Punjab) and at its southern regional station at Bangalore (Mysore). The Indian Dairy Research Institute is the principal educational and research centre in the country in Dairy Science. The institute and its southern regional station at Bangalore give courses in Animal Husbandry and Dairying. There is also the Agricultural Institute, Allahabad.

There are 19 Veterinary Colleges in India, one each at Hyderabad, Tirupathi (Andhra Pradesh); Gauhati (Assam); Patna and Ranchi (Bihar); Trichur (Kerala); Jabalpur (Madhya Pradesh); Madras (Madras); Bombay, Nagpur (Maharashtra); Hebbal (Mysore); Cuttack, Mhow (Orissa); Hissar (Punjab), Bikaner (Rajasthan); Mathura, Nainital and Izatnagar, (Uttar Pradesh); Calcutta (West Bengal).

### Recent Research in Animal Husbandry

Animal husbandry studies have proved the feasibility of centralised production of semen for cross-breeding the hill cattle with Jersey. Cross-breeding for increased milk production was in progress at various centres.

Under the Third Five Year Plan a comprehensive scheme for development of the hill cattle with Jersey is taken up and two Jersey farms at Mandi (H.P.) and at Harsanghatta (Mysore) have been set up stocked with Jerseys from U.S.A. Studies made hitherto have shown that the cross-bred animals in their first and second generations had given three to four times more productions of their dams, matured early and was also giving better returns. The sale value of cross-bred also increased by three to four times.

It has been observed at National Dairy Research Institute that the production of milk was not affected by feeding a lower level of D.C.P. i.e. 0·04 lbs. In Punjab it was observed that the freezing point of cow and buffalo milk is nearly the same and that it does not vary with seasonal variations. Very little change takes place in freezing point with advance in lactation. The freezing point can be used as a test for purity of milk. The N.D.R.I. Kernal has at the same time evolved a simple test *'Hansa test'* to distinguish between buffalo and cow milk.

The cross breeding of local sheep with Rambouillet Rams resulted in obtaining the third generation graded progeny. The *fleece lot* of the second generation graded rams weighed 7 to 8 lbs. as against 3–4 lbs. of its first generation and 1–1·5 lbs. of local sheep. Similarly cross-breeding of Nilgiri sheep with Ramcey Marsh rams in the second generation showed faster growth and more wool yield of uniform and finer staple than local sheep.

In poultry Rhode Inland Red showed better performance than white *leghorns* under battery system.

### LIVESTOCK STATISTICS

The following table shows the estimates of livestock population for 1961. (In thousands).

| Area | Cattle | Buffaloes | Sheep | Goats | Horses & Ponies | Other Livestock | Total Livestock | Poultry |
|---|---|---|---|---|---|---|---|---|
| STATES | | | | | | | | |
| Andhra Pradesh | 12,345 | 6,949 | 8,363 | 4,247 | 71 | 676 | 32,651 | 16,248 |
| Assam .. .. | 6,497 | 571 | 54 | 1,878 | 16 | 450 | 9,466 | 11,251 |
| Bengal (West) .. | 11,465 | 847 | 548 | 4,474 | 25 | 130 | 17,590 | 11,675 |
| Bihar .. .. | 16,104 | 3,698 | 1,156 | 8,671 | 133 | 848 | 30,610 | 12,358 |
| Gujarat .. .. | 6,553 | 2,915 | 1,481 | 2,222 | 113 | 165 | 13,449 | 2,047 |
| Jammu & Kashmir .. | 1,831 | 401 | 1,161 | 577 | 64 | 41 | 4,076 | 1,608 |
| Kerala .. .. | 2,753 | 485 | 24 | 1,312 | * | 123 | 4,697 | 9,106 |
| Madhya Pradesh | 24,774 | 5,576 | 1,009 | 5,539 | 203 | 466 | 37,567 | 6,525 |
| Madras .. .. | 10,817 | 2,574 | 7,159 | 3,427 | 20 | 643 | 24,641 | 11,296 |
| Maharashtra .. | 15,526 | 3,134 | 2,125 | 5,168 | 112 | 271 | 26,336 | 10,769 |
| Mysore .. .. | 9,659 | 3,022 | 4,763 | 2,905 | 46 | 268 | 20,664 | 9,522 |
| Orissa .. .. | 9,810 | 1,075 | 994 | 2,382 | 58 | 210 | 14,528 | 6,548 |
| Punjab .. .. | 6,053 | 4,426 | 901 | 1,221 | 74 | 518 | 13,194 | 2,237 |
| Rajasthan .. | 13,140 | 4,019 | 7,360 | 8,052 | 94 | 849 | 33,514 | 718 |

* Jharkhand. † Muslim League. ‡ 18 from Dravida Munnetra Kazhagam. *a* 7 from Akali Dal. *b* One seat won by Ram Rajya Parishad. *c* Hindu Mahasabha.

### CALENDAR

The third General Elections started on 16th February 1962 and ended on May 26. The first State to go to the polls was West Bengal and the last was the Leh Constituency of Jammu & Kashmir on May 26, 1962. The election at this constituency could not be held earlier on account of unavoidable circumstances.

Below we give the Calendar of the elections.

*Andhra Pradesh* February 19, 21 to 25.

*Assam* February 19, 24.

*Bihar* February 18, 21–23, 25.

*Gujarat* February 21, 23, 25.

*Kerala* February 24.

*Madhya Pradesh* February 19–25.

*Madras* February 17, 19, 21, 24.

*Maharashtra* February 20, 22, 25.

*Mysore* February 19, 22, 25.

*Orissa* February 19–25.

*Punjab* February 24.

*Rajasthan* February 19–23, 25.

*Uttar Pradesh* February 19, 21–23, 25.

*West Bengal* February 16–23, 25.

*Delhi* February 24.

*Manipur* February 19, 23, 27 and March 6.

*Tripura* February 21, 23, 25.

*Himachal Pradesh* April 1962.

The polling for the Presidentship took place on 7th May and the result was declared on 11th. Three candidates filed their nomination papers. The candidates were Dr. S. Radhakrishnan, New Delhi, Chaudhuri Hari Ram of Rohtak, Punjab, and Yamuna Prasad Trisulia of Ballia, Uttar Pradesh.

Of 5,62,945 valid votes cast in the polling the result was as follows :

Dr. Radhakrishnan—5,53,067 ; Chaudhuri Hari Ram—6,341 ; Mr. Yamuna Prasad—3,537. There were 98 invalid votes.

The polling for the Vice-Presidentship took place on 7th May and the result was declared on the same day. Two candidates filed their nomination papers. They were Dr. Zakir Hussain and Mr. N. C. Samantsinghar, a former Congress member of the Lok Sabha from Orissa.

The result of the polling was as follows: Dr. Zakir Hussain—568 ; Mr. N. C. Samantsinghar—14. There were 14 invalid votes.

### PARTIES FOR THE 1962 ELECTION

All those political parties which secured 3 per cent of the votes polled in the 1957 general elections were recognised for allotment of symbols.

The all-India parties recognised were : Indian National Congress, Praja Socialist Party, Communist Party of India and Bhartiya Jan Sangh ; and the recognised State parties were : People's Democratic Front, and Praja Party in Andhra Pradesh ; Peasants and Workers' Party in Andhra Pradesh and Maharashtra ; Janata Party and Jharkhand Party in Bihar ; United Independent Front in Himachal Pradesh ; Muslim League in Kerala ; Hindu Mahasabha in Madhya Pradesh and Delhi ; Dravida Munnetra Kazhagam in Madras ; Lok Seva Sangh in Mysore ; Ram Rajya Parishad in Rajasthan ; Socialist Party in Uttar Pradesh and Manipur ; Forward Bloc (Marxist) in West Bengal and Republican Party in Maharashtra and Punjab only. The symbol of the Republican Party was Elephant.

#### Two Ballot Papers

There were two ballot papers in the 1962 elections, pink for the Assembly and white for the Lok Sabha. Both the ballot papers were inserted in the same ballot box. There was no separate ballot box for a candidate or party as in the last two polls. The symbols of all the contesting candidates were printed in the same ballot paper.

*Two-member Constituencies (Abolition) Act*, 1961 : The Bill was passed in the Parliament and it received the assent of the President on March 9, 1961. By the abolition of double-member constituencies, there were only single-member constituencies in the 1962 general election.

#### Revised List

The following are the details of the new list of recognised political parties, prepared by the Election Commission on the basis of the votes polled in the 1962 general election :

The Communist party will have its symbol in all States except Gujarat, M.P., Mysore, U.P. and Tripura.

The Praja-Socialist party will be entitled to its reserved symbol in all States except Andhra Pradesh, Madras, the Punjab, Rajasthan and West Bengal.

The Swatantra party will be recognised in Andhra Pradesh, Bihar, Gujarat, Madras, Mysore, Orissa, Rajasthan and Himachal Pradesh.

The Jan Sangh will have a reserved symbol in M.P., the Punjab, Rajasthan, U.P. and Delhi. Earlier, it had a reserved symbol in Maharashtra also.

The Republican party, which had enjoyed recognition in Maharashtra and the Punjab before the election, will now have a reserved symbol in Maharashtra, the Punjab and Himachal Pradesh.

The Socialist party will have a reserved symbol in U.P. and Manipur.

The Jharkhand party, the Muslim League, the Dravida Munnetra Kazhagam, the Peasants and Worker's Party, the Akali Dal and the Forward Bloc will continue to enjoy the privilege in Bihar, Kerala, Madras, Maharashtra, the Punjab and West Bengal respectively.

## FACTS AND FIGURES

The total number of voters enrolled for the 1962 Elections were 216,050,506. Women voters totalled nearly 100 million. The estimated total population in the country in 1962 was about 440 million. Thus about 50 per cent of the total population was entered in the electoral rolls.

The task of organising and carrying through the elections was completed with the whole-hearted support of the electorate, political parties, candidates and Government. In all about 1,680,000 persons were employed to participate in the election operations in different capacities.

## STATE ASSEMBLIES

**A note on the first election in Goa after merger with India :** For the purpose of reservation of election symbols the Election Commission recognised three political parties viz., Congress, Frente Popular and Maharashtrawadi Gomantak for the assembly, and parliamentary elections in the Union Territory of Goa, Daman and Diu. The symbol 'Two Bullocks with Yoke on', was reserved for the Congress ; 'Elephant' for the Frente Popular; and 'Lion' for the Maharashtrawadi Gomantak. Elections in the parliamentary and assembly constituencies in Goa were held in the month of December 1963.

The position about election petitions pertaining to the general elections was as follows (March 15, 1960):—Seven were pending before Election Tribunals, five before High Courts, and ten before the Supreme Court.

### POST-GENERAL ELECTION POLLS

## GENERAL ELECTIONS IN GOA

Goa, Daman and Diu went to the poll for the first time on December 9, 1963. The election in Goa first in the country since the President's assent to the Sixteenth Amendment to the Constitution primarily designed to curb secessionist tendencies. The amendment requires every candidate to affirm his or her faith in India's sovereignty and integrity before his or her candidature is considered.

There are 30 Assembly constituencies including one each for Daman and Diu and two parliamentary constituencies Panjim (including Daman) and Mormugao (including Diu).

The candidates comprised nominees of four parties besides a host of independents. The Congress which fielded candidates for all the 30 Assembly seats (20 Hindus and 10 Catholics) including one each from Daman and Diu and for both the parliamentary seats (one Hindu and one Catholic) is the only All-India party. The other three, Maharashtrawadi Gomantak, United Goans and Frente Popular have their activity restricted to Goa.

Maharashtrawadi Gomantak which put up 27 candidates for the Assembly and two for Parliament is fighting for immediate merger of Goa in Maharashtra. The objective of the United Goans Party, which had nominees for 24 seats for the Assembly and one each for the Parliament, is a full-fledged State of Goa. Both these parties have made the future status of Goa their only election issue. The Frente Popular, an extreme left-wing party, contested only eight seats in the Assembly and none in Parliament. This party believes that the status of Goa should not become an issue at present.

*Assembly Poll:* Total number of seats: 30; Number of seats declared 30; Total electorates 3,50,039; Total votes polled: 2,60,372.

Party-wise particulars regarding the seats contested, seats won and votes polled respectively are as follows:—

Maharashtrawadi Gomantak: 27: 14: 1,00,117; United Goans: 24: 12: 17,081; Congress: 30: 1: 43,100; Frente Popular: 8 Nil: 4,589; Independents: 27: 3: 27,648; Invalid votes: 10,837.

*Parliamentary Poll:* Number of seats: 2; Number of seats declared: 2; Total electorate 3,50,039; Total votes polled: 2,60,869.

The following are particulars regarding seats contested; seats won and votes polled respectively by each party in the parliamentary election:—

Maharashtrawadi Gomantak: 2: 2: 1,16,073; United Goans 2: Nil: 82,497; Congress: 2: Nil: 43,602; Independents: 2: Nil: 11,616; Invalid votes: 7,081.

### ORISSA MID-TERM ELECTIONS

The mid-term election to the Orissa Legislative Assembly which began on 2nd June and ended on 12th June 1961, swept the Congress to power.

The final party position in the 140-member Assembly was: Congress 82, Ganatantra Parishad 37, Praja-Socialists 10, Communists four, Independents seven. The Independents include one member each from the Swatantra Party and the Socialist (Lohia) Party.

The following table gives details of the elections:—

| | 1957 | | 1961 | | |
|---|---|---|---|---|---|
| | Seats won | Percentage polled | Seats won | Votes polled | Percentage |
| Congress .. .. .. | 56 | 38·21 | 82 | 1,309,607 | 44·44 |
| Ganatantra Parishad .. | 51 | 28·37 | 37 | 642,822 | 21·81 |
| Praja-Socialist Party .. | 11 | 10·39 | 10 | 301,514 | 10·23 |
| Communist Party .. | 9 | 8·93 | 4 | 246,465 | 8·37 |
| Independents .. .. | 13 | 14·64 | 7 | 446,576 | 15·15 |

*Note:* 1961: Electorate 8,442,849, Votes polled 2,046,984, percentage 34.5.

Independent votes include Jharkhand Party 36,894. Socialist (Lohia) Party 18,810, Swatantra Party 18,080 and Adivasi Unnat Samaj 14,729. More details are given in the previous editions of the book.

The Election Commission had constituted 115 tribunals to process 348 petitions challenging elections upto Aug. 1965.

Of the 367 petitions received, 309 related to the election to the Legislative Assemblies, 46 to the Lok Sabha, 5 to the Rajya Sabha and 7 to the Legislative Councils.

State-wise election petitions from Parliamentary Constituencies are: Andhra Pradesh 1; Assam 1; Bihar 7; Gujarat 1; Madhya Pradesh 7; Madras 1; Orissa 2; Punjab 6; Rajasthan 5; Uttar Pradesh 12; West Bengal 2; Manipur 1.

Elections disputed in the Assembly Constituencies are:

Andhra Pradesh 27; Assam 8; Bihar 23; Gujarat 12; Jammu & Kashmir 11; Madhya Pradesh 32; Madras 12; Maharashtra 19; Mysore 18; Punjab 57; Rajasthan 30; Uttar Pradesh 50; West Bengal 10.

The following parties are eligible for a reserved symbol in the States and Union Territories shown against them.

1. Indian National Congress — all the States and Union Territories except Nagaland.
2. Communist Party of India — Andhra Pradesh, Assam, Bihar, Kerala, Madras, Maharashtra, Orissa, Punjab, Rajasthan, West Bengal and Tripura.
3. Communist Party of India (Marxist)— Andhra Pradesh. Kerala and West Bengal.
4. Praja Socialist Party — Assam, Bihar, Gujarat, Kerala, Madhya Pradesh, Maharashtra, Mysore, Orissa, Uttar Pradesh, and Manipur.
5. Swatantra Party — Andhra Pradesh, Bihar, Gujarat, Madras, Mysore, Orissa, Rajasthan and Himachal Pradesh.
6. Jana Sangh — Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh and Delhi.
7. Republican Party — Maharashtra, Punjab and Himachal Pradesh.
8. All Party Hill Leaders' Conference — Assam.
9. Jharkhand Party — Bihar.
10. Muslim League — Kerala.
11. Dravida Munnetra Kazhakam — Madras.
12. Peasants & Workers Party — Maharashtra.
13. Akali Dal — Punjab.
14. Forward Bloc — West Bengal.
15. People's Front — Pondicherry.
16. Frente Popular — Goa, Daman and Diu.
17. Maharashtrawadi Gomantak—Goa, Daman and Diu.
18. United Goans — Goa, Daman and Diu.
19. Democratic Party of Nagaland—Nagaland.
20. Naga Nationalist Organisation—Nagaland.
†21. Samyukta Socialist Party — Madhya Pradesh & Manipur.

**Miscellaneous**

No. of candidates who filed nomination papers — Lok Sabha 2,763; Assemblies 18,582.

No. of candidates whose nominations were rejected—Lok Sabha 35; Assemblies 247.

No. of candidates who withdrew their candidature—Lok Sabha 743; Assemblies 5,689.

No. of candidates who have contested — Lok Sabha — 1,985; Assemblies — 12,646.

The position about the forfeiture of deposits was as follows:—

For the Lok Sabha 856 and for the Assemblies 6,337.

Uncontested returns were:—Lok Sabha 3, all Congress (Madras, Orissa and Uttar Pradesh — one each).

Assemblies 13, all Congress (Andhra Pradesh 6; Madhya Pradesh 3; Mysore 2; Rajasthan 1 and West Bengal 1).

**Women Members**

38 women were elected to the Lok Sabha and 174 to the State Assemblies (excluding Kerala and Orissa where no general election took place). These figures also include the members nominated and the members elected to the Himachal Pradesh and Manipur.

31 women elected to the Lok Sabha belonged to the Congress Party, two to the Communist Party and five to the Swatantra Party.

Of those elected to the State Assemblies, 158 belonged to the Congress, four to the Communist, three Swatantra, three P.S.P., one Jana Sangh, two R.R.P., two D.M.K. and one Independent.

The Bihar Assembly had 25 women, the largest for any State, followed by Uttar Pradesh with 20, Mysore with 18 and Madhya Pradesh with 16.

**Biennial Elections to Rajya Sabha, 1964**

Under the Constitution, a third of the members of the Rajya Sabha have to retire every two years. Thus the term of 79 members (75 elected and 4 nominated) expired on April 2, 1964.

Statewise vacancies were:

Andhra Pradesh 6; Assam 2; Bihar 8; Gujarat 4; Kerala 3; Madhya Pradesh 6; Madras 6; Maharashtra 6; Mysore 4; Orissa 3; Punjab 4; Rajasthan 3; Uttar Pradesh 11; West Bengal 4; Jammu & Kashmir 2; Delhi 1; Himachal Pradesh 1.

119 candidates were in the field. The statewise figures were:—

Andhra Pradesh 12; Assam 2; Bihar 11; Gujarat 5; Kerala 5; Madhya Pradesh 17; Madras 7; Maharashtra 7; Mysore 7; Orissa 4; Punjab 13; Rajasthan 5; Uttar Pradesh 12; West Bengal 5; Jammu and Kashmir 3; Delhi 1; Himachal Pradesh 2.

The candidates from Assam and Delhi State were elected uncontested.

31 of the sitting members were elected/nominated and 48 were new members.

† The Praja Socialist Party disassociated from the Samyukta Socialist Party and retained their symbol 'Hut' since the merger agreement was not implemented.

### Bye-Elections

140 bye-elections, 27 to the Lok Sabha and 113 to the State Legislative Assemblies, have been held since the general poll in 1962 to Aug. 2, 1965.

The analysis of 27 Lok Sabha seats shows that Congress retained 19 seats in various bye-elections and registered no gain. The P.S.P. gained one seat and the Swatantra two. The Jan Sangh and Republican Party lost one seat each while the Forward Bloc two. Independents retained their two seats and the D.M.K. secured one seat.

The Congress gained 14 seats in various Assembly bye-elections held since the last general elections in 1962. The DMK gained one and the SSP three seats. The Communists, the Swatantra and Akali parties lost two seats each while the Gantantra Parishad lost one seat. The All Party Hill Leaders' Conference and Independents lost three and seven seats respectively. The Muslim League retained its two seats.

The following table shows State-wise particulars of the by-elections since General Elections in 1962 to 1965.

| Name of State | BYE-ELECTIONS | | | |
|---|---|---|---|---|
| | Lok Sabha | | Legislative Assemblies | |
| | Before Emergency | During Emergency | Before Emergency | During Emergency |

### Election Petitions

333 election petitions after the general poll out of 367—have been disposed of by the different tribunals (Aug. 1965).

As of Aug. 1965, 56 petitions have succeeded, resulting in the setting aside of the election of the returned candidates. As many as 236 petitions were dismissed either by the tribunal in the first instance or by the appellate courts on appeal. Forty petitions were allowed to be withdrawn, and one petition abated on the death of the returned candidate.

In four cases, the returned candidates' election has been set aside and, in places some other candidate declared elected. In 9 cases where the election has been set aside, appeals are pending before the High Courts or the Supreme Court.

Punjab had the maximum number of election petitions, 67, and Uttar Pradesh was a close second with 64. There were 39 petitions from Madhya Pradesh, 35 from Rajasthan, 33 from Bihar, 29 from Andhra Pradesh and 20 from Maharashtra, two from Orissa and one from Manipur. Seventy-seven petitions came from the remaining six States, while there was none from Kerala, Delhi, Himachal Pradesh and Tripura.

The Election Commission dismissed 19 petitions on technical grounds. For the trial of the remaining 348 petitions, 115 tribunals were constituted. Eleven of them were presided over by retired High Court judges and 104 by serving District Judges.

On Aug. 2, 1965, 15 election petitions were pending before tribunals.

Two election tribunals presided over by retired High Court judges and 8 tribunals presided over by serving District Judges are functioning in the various States.

### Delimitation Commission

The Delimitation Commission has refixed the number of seats in each State legislative assembly for the next general election.

The strength is increased in ten States, remains the same in two States, Bihar and Orissa, and is slightly reduced in two other States, Uttar Pradesh and Andhra Pradesh.

The new allotment, including the reserved seats, is as follows :—

| Name of State | Total No. of seats | No. of seats reserved for | |
|---|---|---|---|
| | | Scheduled Castes | Scheduled Tribes |
| Uttar Pradesh .. | 425 | 89 | .. |
| Bihar .. .. | 318 | 45 | 29 |
| Maharashtra .. | 270 | 15 | 16 |
| Andhra Pradesh . | 287 | 40 | 11 |
| West Bengal .. | 280 | 55 | 17 |
| Madras .. | 234 | 42 | 2 |
| Madhya Pradesh . | 296 | 39 | 61 |
| Mysore .. .. | 216 | 29 | 2 |
| Gujarat .. .. | 168 | 11 | 22 |
| Punjab .. .. | 161 | 33 | .. |
| Rajasthan .. | 184 | 31 | 21 |
| Orissa .. .. | 140 | 22 | 34 |
| Kerala .. .. | 133 | 11 | 2 |
| Assam .. .. | 126 | 8 | 10 |

In Assam 16 seats are reserved for the autonomous districts : five for the United Khasi and Jaintia Hills District ; four for the Garo Hills District ; three for the Mizo District ; one for the North Cachar Hills and three for the Mikir Hills.

Under the Delimitation Commission Act, the total number of seats of the legislative assembly of a State has to be an integral multiple of the number of seats in the Lok Sabha allotted to that State.

These multiples at present are : Uttar Pradesh and Madras five ; Bihar and Maharashtra six ; Andhra Pradesh, West Bengal, Gujarat, Punjab, Orissa and Kerala seven ; Madhya Pradesh, Mysore and Rajasthan eight ; and Assam nine.

The Commission has decided to maintain the existing multiples in all States except Madras. The legislative assembly of this State has at present only 206 seats. In view of the fact that its quota in the Lok Sabha will for the future be reduced from 41 to 39, the Commission has increased its 'multiple' from five to six and assigned 234 seats to its legislative assembly.

The Commission has already increased the seats allotted to the 14 states in the Lok Sabha from 481 to 490. The new distribution, as already announced is as follows : Uttar Pradesh 85 ; Bihar 53 ; Maharashtra 45 ; Andhra Pradesh 41 ; West Bengal 40 ; Madras 39 ; Madhya Pradesh 37 ; Mysore 27 ; Gujarat 24 ; Punjab 23 ; Rajasthan 23 ; Orissa 20 ; Kerala 19 ; and Assam 14.

### PONDICHERRY ELECTION

The first general election to the Pondicherry Legislative Assembly took place on Aug. 23, 1964. There were 85 candidates in the field to contest 29 seats. The Congress contested all the 29 seats. The leading opposition party (Communist-dominated) People's Front had put up 17 candidates, and the remaining were independents.

In the election the Congress secured an absolute majority of 22 seats in the 30-member legislative assembly. The People's Front secured four seats. Other successful candidates were independents.

### President's Rule stays in Kerala

A no-confidence motion was passed against the Congress Ministry in Sept. 1964. President's rule was promulgated. New election took place in March 1965. The Legislative Assembly has however again been dissolved by the Presidents' proclamation under article 356 of the constitution on March 24, 1965, as no party had an absolute majority.

# ANDHRA PRADESH LEGISLATIVE COUNCIL

*Strength* :—90.

An estimate of party position is as follows :— Cong. 62, Communist Party 5, Swatantra 2, United Democratic Front 2, Ind. 11 (including Independent Group), C. D. L. F. 3 and National Democrats 7.

*Chairman :* G. Brahmayya ; *Dy. Chairman :* M. Anandam ; *Secretary :* G. V. Chowdary ; *Asstt. Secretary :* Sadasiva Reddy.

### Local Authorities' Constituencies (31)

## BIHAR LEGISLATIVE COUNCIL

Seats: 96.

*Chairman:* Vacant; *Deputy Chairman:* Theodore Bodra; *Secretary:* E. Rahman; *Assistant Secretary:* R. N. Thacore.

### Graduates (8)

Krishna Bahadur (*Patna*).
Purnendu Narayan Singh (*Patna*).
Ram Ashraya Prasad Sinha (*Gaya-cum-Shahabad*).
Trivikramdeo Narain Sinha (*Muzaffarpur-cum-Saran-cum-Champaran*).
Lokesh Nath Jha (*Darbhanga*).
Ravaneshwar Mishra (*Bhagalpur-cum-Saharsa-cum-Purnea*).
Harendra Pd. Jha (*Monghyr-cum-Santhal Parganas-cum-Hazaribagh-cum-Dhanbad*).
Anil Kumar Sen (*Ranchi-cum-Singhbhum-cum-Palamau*).

### Teachers (8)

Jagdish Sharma (*Patna*).
Baij Nath Rai (*Gaya-cum-Shahabad*).
Brinda Prasad Roy 'Virendra' (*Tirhut Division*).
Kailash Sinha (*Tirhut Division*).
Hargouri Tiwari (*Monghyr*).
Bindhyeshwar Mishra (*Bhagalpur-cum-Shaharsa-cum-Purnea*).
Badri Narayan Mishra (*Santhal-Parganas-cum-Hazaribagh-cum-Dhanbad*).
Mahendra Prasad (*Ranchi-cum-Singhbhum-cum-Palamau*).

### Local Authorities (34)

Deva Saran Singh (*Patna-cum-Gaya*).
Ram Bilas Sharma (*Patna-cum-Gaya*).
Saraswati Devi (*Patna-cum-Gaya*).
Kumar Jha (*Patna-cum-Gaya*).
Syed Nazir Haider (*Patna-cum-Gaya*).
Indra Kumar (*Shahabad*).
Ram Das (*Shahabad*).
Ramanand Singh (*Saran*).
Tribhuwan Nath Pathak (*Saran*).
Bhola Mandal (*Saran*).
Shiva Shanker Kanodia (*Champaran*).
Lakshmi Kant Jha (*Champaran*).
Nitishwar Prasad (*Muzaffarpur*).
Krishna Nandan Sahay (*Mazaffarpur*).
Gulzar Prasad (*Muzaffarpur*).
Smt. Kishori Devi (*Darbhanga*).
Baidyanath Pajiar (*Darbhanga*).
Vidyaker Kavi (*Darbhanga*).
Krishna Mohan Pyare Singh (*Monghyr*).
Radha Krishna Prasad Singh (*Monghyr*).
Nurullah (*Saharsa*).
Narayan Pd. Singh (*Bhagalpur*).
Beer Narain Chand (*Purnea*).
Dinesh Kumar Singh (*Purnea*).
Pirthi Chand Kisku (*Santhal Parganas*).
Ram Charan Sah (*Santhal Parganas*).
Ram Prakash Lal (*Hazaribagh*).
Hari Krishna Lal (*Hazaribagh*).
Ram Ratan Ram (*Ranchi*).
Amanat Ali (*Ranchi*).
Ram Lakhan Pandey (*Palamau*).
Braj Mohan Agarwalla (*Dhanbad*).
Subodh Kumar Sen (*Singhbhum*).
Samu Charan Tubid (*Singhbhum*).

### Legislative Assembly (34)

Baburam Hembrom.
Sudama Mishra.
Basanta Chandra Ghose.
Kumar Ganga Nand Singh.
Jageshwar Prasad Khalish.
Rampyari Devi.
Abdus Sami Nadvi.
Theodore Bodra.
Jafar Immam.
Kailaspati Singh.
Chandrika Ram.
Maheshwari Pd. Sinha.
Radha Govind Prasad.
Anisur Rahman.
Rajandhari Sinha.
Smt. Rajeshwari Saroj Das.
Mungeri Lal.
A. A. Md. Noor.
Mahamaya Prasad Sinha.
Ram Khelawan Sinha.
Ram Govind Singh.
Rajeshwari Prasad.
Gajendra Prasad Sinha.
Sitaram Yadav.
Ramraj Jajware.
Pasupati Singh.
Sardar Harihar Singh.
Sidheshwar Prasad Sinha.
Kumar Dhanushdhari Singh.
Bhola Prasad Singh.
Basawan Singh.
Braj Mohan Singh.
Indradeep Singh.
Jamuna Pd. Sinha.

### Nominated (12)

Fazlur Rahman.
Shayama Prasad Sinha.
Parmanand.
Smt. Lady Anise Imam.
Smt. Parwati Devi.
Gauri Shanker Dalmia.
B. P. Sinha.
Smt. Kamal Kamini Prasad.
Narayan Soren.
Shiva Chandra Sharma.
Kuwar Ram.
Mathura Prasad Singh.

## BIHAR VIDHAN SABHA

Electorate: 2,20,58,168; Seats 319 (including one nominated); S.C.: 40; S.T.: 32.

## KERALA LEGISLATIVE ASSEMBLY

A no-confidence motion against the Kerala Congress Ministry was passed on Sept. 8, 1964. The Assembly was dissolved. New election took place in March 1965. The legislative assembly has been again dissolved since no party had an absolute majority. There is no likelihood of a further new election before the next General Elections.

# MADHYA PRADESH LEGISLATIVE ASSEMBLY

Seats: 289 (inclusive of one nominated); (S.C. 43; S.T. 54); Electorate: 1,58,56,404.

# ROADS

IT is estimated that India in 1914 had 273,000 Km. of roads. Against this, the length in April 1963 was 756,211 Km. made up of 251,961 Km. of metalled roads, and 504,250 Km. unmetalled roads. Included in this, however, are roads constructed in Community Development and N.E.S. Blocks, amounting to 263,100 Km. which are generally mere tracks and are often not properly maintained.

## ROAD FUND

The first all-India move for road development came in 1928 when the Road Development Committee presided over by the late M. R. Jayakar recommended the creation of a Road Development Fund out of a two-anna share per gallon of the proceeds of the import and excise duties on motor spirit, whose unexpended balances should not lapse at the end of the financial year. The share was later raised to two and a half annas per gallon.

Up to the end of March 1963 total receipts in the Central Road Fund since its inception were about Rs. 75·82 crores and those in the Central Road Fund Reserve since its inception were about Rs. 8·42 crores.

At present the annual revenue accruing to the Fund amounts to roughly Rs. 4 crores. For the first 15 years after its inauguration, the Central Road Fund was the main source of revenue for the construction of new roads or the improvement and modernisation of existing ones. However at present this fund represents hardly 2 per cent of the total tax revenue from motor transport, 5 per cent of the total expenditure on original road works provided for in the 3rd Five Year Plan and 4 per cent of the gross expenditure on roads inclusive of the maintenance cost of the road system.

On the administrative side roads except for the small mileage of National Highways described later are a State subject and may be divided into two main classes, State Roads under the Public Works Department and Local Roads in charge of local bodies.

## NAGPUR PLAN

In December 1943 the Chief Engineers of the various States met in conference at Nagpur and evolved a road plan based on the minimum needs of the country. Adopting as their objective the very modest proposition that no village in a well-developed agricultural area should remain more than 5 miles from a metalled road, the Chief Engineers recommended the increase of Indian Union's road mileage from 220,000 to 331,000 (522,700 Km.) of which nearly 40 per cent would be metalled.

The net increase in road mileage under this Plan, now known as the Nagpur Plan works out at 50 per cent.

Five-year programmes for commencement from April 1947 and representing varying proportions of the Nagpur scheme were prepared by the States for their respective areas as part of their post-war reconstruction programmes.

These programmes, exclusive of National Highways were estimated to cost nearly Rs. 120 crores over a five-year period, and were intended to embrace the construction or improvement of 80,000 miles (129,000 Km.) of roads.

During the eight years ending March 1951, India's road mileage increased by just 13 per cent. Thus at the beginning of the First Five Year Plan, India had 389,942 Km. of roads, of which 157,019 Km. were metalled and the remaining 242,923 Km. unmetalled.

## FIVE YEAR PLANS

At the beginning of the Five Year Plan, the lengths remaining to be constructed, in order to reach the targets of the Nagpur Road Plan, were 40,970 km. of metalled roads and 91,792 km. unmetalled roads, making a total of 132,762 km. in all.

A provision of Rs. 156 crores was made for road development during the First Five Year Plan period ending March 1956. Physical achievements during the 5-year period consisted of 109,691 km. of new roads.

The provision for road development in the Second Five Year Plan was Rs. 244 crores, against Rs. 156 crores in the First Plan. Details are as under :—

(Rs. in Crores)

| | 2nd 5-Year Plan April 1956 to March 1961 | 1st 5-Year Plan April 1951 to March 1956 |
|---|---|---|
| National Highways .. | 45 | 27·00 |
| State Roads financed by the Union Government .. .. .. | 7 | 4·24 |
| Central Aid for roads of inter-State or economic importance .. | 16 | 10·00 |
| State Roads .. .. | 151 | 89·75 |
| Central Road Fund .. | 25 | 25·00 |
| Total .. | 244 | 155·99 |

During the Second Plan 52,763 km. of metalled roads and 1,58,000 km. of unmetalled roads were added to the road system, thereby exceeding the Nagpur Plan in terms of total mileages, taking India as a whole : but the actual position was that the length of district and village roads was slightly larger than the minimum size laid down in the Nagpur Plan while the arterial roads comprising National Highways and State Highways were short of the Nagpur targets. Moreover at the end of the Second Plan there were hundreds of unbridged river crossings whose number, on National Highways alone, was 80. Again over 25 per cent of the road system representing village roads constructed in the community development and N.E.S. blocks were sub-standard roads and very often mere tracks with no arrangement for their annual maintenance or repairs.

**Extra-Municipal Road Length, Km.**

| Year ending March | Surfaced Roads | Unmetalled Roads | Total |
|---|---|---|---|
| 1957 .. | 191,470 | 324,084 | 515,554 |
| 1958 .. | 201,889 | 370,001 | 571,890 |
| 1959 .. | 210,517 | 408,401 | 618,918 |
| 1960 .. | 220,426 | 444,925 | 665,351 |
| 1961 .. | 235,790 | 473,330 | 709,120 |
| 1962 .. | 244,552 | 473,508 | 718,060 |
| 1963 .. | 251,961 | 504,250 | 756,211 |

## THIRD FIVE YEAR PLAN

The Planning Commission originally provided for an expenditure of Rs. 271 crores on roads in the Third Plan within the total overall allocation of Rs. 7,500 crores in the public sector. The actual programmes included in the Third Plan amounted to Rs. 324 crores and efforts, it was promised, would be made to provide funds to this extent to implement those programmes according to the annual budgetary position. The following is the break-up of the outlay of Rs. 324 crores:

| | | |
|---|---|---|
| **Central Sector** | | |
| National Highways .. .. .. .. | Rs. 48·50 crores | |
| Roads in Sikkim .. .. .. .. | Rs. 1·50 crores | |
| | Rs. 50·00 crores | |
| Central aid for roads of Inter-State or economic importance .. .. .. | Rs. 30·00 crores | |
| | | Rs. 80·00 crores |
| **State Sector** | | |
| State Plans .. .. .. .. | Rs. 218·31 crores | |
| Union Territories .. .. .. .. | Rs. 25·75 crores | |
| | | Rs. 244·06 crores |

In addition, the International Development Association has extended a development credit of Rs. 29 crores to meet a substantial part of the cost of certain selected road and bridge projects on National Highways. This increased the total provision for National Highways in the Third Plan from Rs. 48·5 crores to about Rs. 77 crores and the total road programme ceiling from Rs. 324 crores to Rs. 353 crores.

Further augmentation of the road programme was witnessed in 1963 and 1964. To ease the bottlenecks in transport of coal by switching over some of the short distance traffic to road and water, it has been decided to construct and improve roads in Bengal and Bihar at a cost of Rs. 20 crores. Again in the face of the emergency created by the Chinese invasion another provision of Rs. 34·5 crores has been made for the improvement of 1,000 miles of National Highways. Special permission has also been given by the Planning Commission to go ahead with the construction of 9 bridges over certain National Highways in Assam, Bihar and Bengal for which a provision of Rs. 4 crores is expected. New roads for facilitating the movement of iron ore from the States of Mysore, Andhra Pradesh and Orissa to nearby ports are at the same time being taken up. Further, with a view to meeting the economic and other needs of the other northern border of the country, it has been decided to develop a lateral road connecting Bareilly in U.P. to Amingaon in Assam *via* Siliguri in West Bengal. The total length of the lateral road, with four link roads is about 1,300 miles. The total cost of the road and of 21 major bridges on it will be Rs. 110 crores. Work commenced in 1964 and the major portion will be completed in four years. In view of all these additions, it is likely that the total outlay on roads during the Third Plan will be around Rs. 459 crores.

The road mileage in the country compares very poorly with that of other countries in relation to the area of the land and its population. Over 60 per cent of India's mileage is unmetalled and unsuited for all-weather traffic.

## NATIONAL HIGHWAYS

The Central Government, as part of their contribution towards post-war development accepted liability for the construction and maintenance of the National Highways with effect from 1st April 1947.

On 1st April, 1947 the total length of the roads provisionally accepted as national highways was 13,400 miles. Consequent on partition and the integration of the former princely States with the Indian Union the total length of these roads increased to about 22,209 km. On the 1st of April 1947 the selected national highway routes had approximately 2,250 km. of missing road links and thousands of missing culverts and bridges out of which about 150 were bridges on large rivers. In addition, about 9,000 miles of these roads had low-grade surface.

During the 5 years ending March 1956, 636 miles of missing links and a large number of culverts and bridges including 30 major bridges were constructed, about 4,000 miles of existing sections improved and provided with one-lane asphalted carriageway, and about 400 miles of the improved sections made fit for two-lane traffic.

National Highways include the following roads:—1. The Grand Trunk Road from Calcutta to Amritsar *via* Banaras, Kanpur, Agra and Delhi; 2. The Agra-Bombay Road; 3. The Bombay-Bangalore-Madras Road; 4. The Madras-Calcutta Road; 5. The Calcutta-Nagpur-Bombay Road; 6. The Banaras-Nagpur-Hyderabad-Bangalore-Cape Comorin Road; 7. The Delhi-Ahmedabad-Bombay Road; 8. The Road from Ahmedabad to Kandla with a branch Road to Porbandar; 9. The Hindustan-Tibet Road from Ambala to Tibet border *via* Simla; 10. The Delhi-Lucknow-Gorakhpur-Muzzafarpur Road with a branch road to Nepal border; 11. The Assam Access Road; 12. The Assam Trunk Road on the South Bank of the Brahmaputra; 13. The road branching off from the Assam Trunk Road towards the Burma border through the State of Manipur.

In 1961 three additional roads were classed as National Highways. They are Jabalpur-Bhopal-Biaro Road, Agra-Jaipur-Bikaner Road and Sholapur-Chitradurg Road. Consequently the length of the National Highway system has now increased to 14,880 miles.

Targets fixed for the development of National Highways during the Second Five Year Plan from April 1956 to March 1961, and the progress achieved during the five years ending March 1961 were as follows:—

| | Targets for 5 years ending 31st March 1961. | Work done during 5 years ending 31st March 1961. |
|---|---|---|
| Construction of missing links, Miles .. | 700 | 640 |
| Construction of major bridges, Numbers .. | 40 | 41 |
| Improvements to existing lengths, Miles .. .. | 3,500 | 3,500 |
| Widening of roads to two-lane carriageways, Miles .. | 1,200 | 1,000 |

At the end of the Second Plan, only about 3,000 miles of National Highways had 2 lane carriageways. There were about 400 miles of missing links and 1,600 miles of low grade surfaces. The remaining 9,880 miles had one-lane asphalt or cement concrete carriageway. There were also 77 major bridges to be constructed.

Some of the important works completed on national highways so far are the Barakar and Poon bridges and the rail-road bridge over the Ganga near Mokameh in Bihar, the Kathjuri and Kuakhai bridges in Orissa, the Mahi bridge in Bombay, the Pennar and Champavati bridges in Andhra Pradesh, Pugalur and Palar bridges in Madras, Beyne and Ghagger bridges in the Punjab, Gheesh and Leesh bridges in West Bengal, Bygool, Bhakra and Betwa bridges in U.P., the Chambal bridge near Dholpur in Madhya Pradesh and the bridge over the Ganga at Garhmukteshwar in U.P.

Among the important projects in progress are the construction of National Highway No. 28 from Dalsingsarai to Barauni and Pipra to Kasia (Salemgarh) in Bihar, construction and improvement of roads in the Dandakaranya area in Madhya Pradesh, improvement of National Highway No. 2 from Mathura to Agra District border in U.P. and construction of the following bridges costing over Rs. one crore each: (*a*) across Gowthami branch of the river Godavari in Andhra; (*b*) across Kosi river at Kurdela in Bihar; (*c*) across Beas river near Mirthal on Jullundar-Pathankot road; (*d*) across Sutlej river on mile 99 of Grand Trunk Road; and (*e*) over the Ganga river at Allahabad.

The west coast road, though under construction mainly at the cost of the Central Government, has not yet been declared a National Highway. Passing through the States of Maharashtra, Mysore, Goa and Kerala this 763 mile road from Panvel in Maharashtra to Chalissery in Kerala is expected to be completed during the Fourth Plan. Against the total estimated cost of Rs. 23·15 crores, an expenditure of roughly Rs. 9·85 crores was incurred upto April 1964.

During the 3rd Plan, 300 miles of missing links and 60 major bridges are likely to be constructed on National Highways. About 2,300 miles of low-grade surface are proposed to be improved and 900 miles of carriageways are expected to be widened. The above targets also include the road and bridge works under the I.D.A. projects. The schemes of the I.D.A. seek to serve primarily certain highly congested areas near big cities like Calcutta and Bombay, the industrial belt of Jamshedpur and the Gangetic planes of northern Bihar which are fully populated. The projects cover the construction or improvement of about 660 miles of National Highways including 19 major bridges. A short length of a new 4-lane Highway is to be built to provide an easy access to Calcutta through Joypurbeel and the Vivekananda bridge. Another Highway will be constructed to serve the fertile coastal areas of West Bengal which are not connected by road to Calcutta at present. Among the 19 major bridges selected is one across the Sone which will fill the existing gap in the Grand-Trunk Road. Also included in this programme is the Eastern Express Highway for the Bombay Region.

Even with the inclusion of the IDA works, the National Highway programme for the Third Plan will fall substantially short of India's immediate needs. The Jha Committee on automobile industry has recommended that by the end of the Third Plan India should have about 4 lakhs of passenger cars, one lakh of buses and three lakhs of trucks. The traffic generated by these vehicles calls for at least 50 per cent of the National Highways to be widened to 2 lane carriageway, but, as at present proposed, only 4,200 miles out of 14,880 miles of these National Highways will have double-lane carriageways.

The National Highways are distributed over the length and breadth of the country on a fairly uniform basis. The actual National Highway mileages in the various States in 1961 were as follows:—

States: Andhra 1,351, Assam 723, Bihar 935, Gujarat 579, Maharashtra 1,431, Jammu &

Kashmir 338, Kerala 250, Madhya Pradesh 1,669, Madras 1,033, Mysore 820, Orissa 852, Punjab 879, Rajasthan 620, Uttar Pradesh 1,402, West Bengal 742.

Union Territories : Delhi 50, Himachal Pradesh 151, Manipur 132, NHTA 69, Sikkim 39. Total mileage excluding missing links 14.065.

## EXPRESS HIGHWAYS

Four express highways designed for fast motor traffic form part of the current road schemes. Two of these are at the northern outskirts of Bombay City known as the Western and Eastern Express Highways. A portion of the former leading to the Bombay airport was thrown open to traffic in 1963. While the latter, leading from Bombay to Thana was opened to light traffic early in 1964. Work on the remaining two express highways, which are comparatively longer, being roughly 100 miles each, is in progress. They connect Calcutta to Durgapur in West Bengal and Sukinda mines to Paradip port in Orissa. These express highways as well as the new roads in the coal areas are expected to give a fillip to the use of heavy vehicles and truck-trailer combinations for the transport of coal and mineral ores.

## NEW ROAD PLAN

Now that the Nagpur Roads Plan of 1943 has been completed in some respects, a new assessment of India's needs for the next 20 years has been undertaken by the Chief Engineers at the instance of the Government of India and a new Road Plan has been prepared for execution during the 20-year period from 1961 to 1981.

The broad outline of the plan is to raise the mileage of roads from 4·10 lakhs in 1961 to 6·57 lakhs by 1981 with provision for two lane carriage-ways on National Highways. The Plan aims at increasing the intensity of roads from 0·32 to 0·52 per square mile of territory. When the plan is completed the average distance from a village in an agricultural area to a metalled road will be reduced from five to three miles and the distance to an unmetalled road will be reduced from two to 1½ miles.

There is also a provision to have 1,000 miles of Expressways with limited access and also grade separation at most of the crossings.

The cost of this scheme is estimated at Rs. 5,200 crores and it is recommended should be split up between four 5-year periods as under :—

| | | |
|---|---|---|
| 1961-62 to 1965-66 | .. | Rs. 590 crores |
| 1966-67 to 1970-71 | .. | Rs. 1,075 ,, |
| 1971-72 to 1975-76 | .. | Rs. 1,545 ,, |
| 1976-77 to 1980-81 | .. | Rs. 2,000 ,, |

Statement showing how the allotments in the scheme are made—for Highways, District Roads and Village Roads.

| | Mileage | | Cost in Rs. crores (improvement and new construction) |
|---|---|---|---|
| | As expected on 1-4-1964 | Targets proposed in the Plan | |
| National Highways .. .. .. .. | 14,880 | 32,000 | 980 |
| State Highways .. .. .. .. | 35,000 | 70,000 | 1,580 |
| Major District Roads .. .. .. .. | 95,200 | 1,50,000 | 1,360 |
| Other District Roads .. .. .. .. | 78,300 | 1,80,000 | 650 |
| Village Roads (Classified) .. .. .. | 1,86,520 | 2,25,000 | 630 |
| Total .. .. .. .. | 4,09,900 | 6,57,000 | 5,200 |

A sum of Rs. 459 crores would be spent for the development of roads in the country during the 3rd Plan period out of Rs. 590 crores suggested by the Chief Engineers. Consequently India's progress towards an adequate road system for the country will now be very slow.

## INTERNATIONAL HIGHWAYS

A major development likely to take shape during the Third Plan period is the linking up of our national highways with the international highways as proposed by the ECAFE. These international roads have to be of certain minimum standards which have been laid down after discussion among experts of the countries concerned.

These highways are divided into two categories, the first consisting of main arterial routes joining the capitals of the countries and the second consisting of other routes joining main cities, ports etc. with the arterial network. Constituting a part of the main international system by linking India with Lahore in Pakistan and Mandalay in Burma the main arterial highway through India is the Amritsar-Delhi-Agra-Calcutta-Golaghat-Imphal road. Next in importance are two routes, Agra via Gwalior, Hyderabad and Bangalore to Danushkodi and Barhi to Kathmandu. Highways of the second category in India will include roads such as Agra-Bombay, Delhi-Multan, Bangalore-Madras, Golaghat-Ledo etc.

While in most cases the national highways satisfy the minimum standards of international roads, a few sections will have to be constructed or up-graded. Besides the geometrical and structural requirements, there are certain other facilities which have to be provided along these international roads. These include the provision of service stations and petrol filling stations, hotels, rest-houses, telephone booths, first aid posts etc. and water tanks in dry areas.

Through the international highways in Turkey, the Asian highway will link up with the European highways on the west, while on the east the highway will extend to Rangoon, Bangkok, Saigon and Singapore. Road travel between Asian and European countries will thus lose its hazards in due course.

## BORDER ROADS

A "Border Roads Development Board" was formed in March 1960 to accelerate the economic development of the North and North Eastern border areas. Its programme includes improvement of certain existing roads and tracks and construction of new ones. While all road agencies like the State P.W.D. and the Central P.W.D. cooperate with the Board, work is being carried out directly by the Board in the most forward areas and especially at high altitudes and in difficult terrain. For this purpose a special organisation viz. General Reserve Engineer Force (G.R.E.F.) has been created. The Board has taken over overall responsibility for the maintenance and improvement of the Pathankot-Jammu-Srinagar-Uri National Highway.

Owing to the national emergency some special roads might also be constructed for defence purposes.

## LENGTH OF EXTRA-MUNICIPAL ROADS MAINTAINED BY P. W. D. AND LOCAL BODIES AND ROADS CONSTRUCTED IN C. D. & N. E. S. BLOCKS IN INDIA AS ON 31st MARCH 1963.

(In kilometres)

| State/Union Territory | Surfaced Roads | Unsurfaced Roads | Total |
|---|---|---|---|
| Andhra Pradesh .. | 27,299 | 34,629 | 61,928 |
| Assam .. | 3,805 | 29,730 | 33,535 |
| Bihar .. | 11,145 | 42,129 | 53,274 |
| Gujarat .. | 13,140 | 14,864 | 28,004 |
| Jammu and Kashmir .. | 2,486 | 9,538 | 12,024 |
| Kerala .. | 8,052 | 12,076 | 20,128 |
| Madhya Pradesh .. | 24,352 | 27,558 | 51,910 |
| Madras .. | 33,815 | 22,297 | 56,112 |
| Maharashtra .. | 25,637 | 30,708 | 56,345 |
| Mysore .. | 28,719 | 39,952 | 68,671 |
| Nagaland .. | 103 | 2,741* | 2,844 |
| Orissa .. | 8,171 | 30,333 | 38,504 |
| Punjab .. | 11,422 | 26,742 | 38,164 |
| Rajasthan .. | 15,366 | 25,069 | 40,435 |
| Uttar Pradesh | 22,087 | 87,556 | 109,643 |
| West Bengal | 13,581 | 51,551 | 65,132 |
| Union Territories ** .. | 2,781 | 16,777 | 19,558 |
| Total .. | 251,961 | 504,250 | 756,211 |

* Data in respect of unsurfaced roads constructed by C.D. & N.E.S. Blocks are not available.

** Includes 63 kilometres of national highway length in Sikkim as on 31st March 1961.

## REVENUE FROM MOTOR TRANSPORT

In 1962-63 the expenditure on roads amounted to Rs. 120·03 crores made up of Rs. 76·43 crores on road construction or improvements and Rs. 43·59 crores on road maintenance The Governments at the Centre and in the States realised in the year an amount of Rs. 227·65 crores from motor transport, as under :—

| | Revenue, 1962-63 (Rs. in Crores) |
|---|---|
| *Central Revenues.* | |
| Motor Spirit and Diesel Oil Duties<br>Tyre Excise and Import Duties<br>Vehicle Parts Imports Duties | 144·67 |
| *State Revenue.* | |
| Vehicle Taxes and Petrol Sales Taxes, Passenger and Goods Taxes, etc. | 82·98 |
| | 227·65 |

## MOTOR VEHICLES

The number of motor vehicles in use in India in March 1963 was 844,553. In terms of the population of the country, this represents about 160 vehicles per lakh of inhabitants.

The 844,553 vehicles operating in India in March 1963 were distributed among the various States as in the table shown on next page. The growth of motor vehicles in India in the past eight years is about 125 per cent, the total number having increased from 3·76 lakhs in March 1955 to 8·45 lakhs in March 1963.

An estimate of the number of bullock carts and bicycles in the country puts the figures at 10 million and 4 million respectively (Nov 1959).

## NUMBER OF MOTOR VEHICLES ON THE ROAD IN INDIA ON 31st MARCH 1963.

## NATIONALISED TRANSPORT

Programmes for nationalisation of road transport have occupied a prominent place in the plans of State Governments from 1946 onwards. In April 1951 nationalised bus services had a total fleet of about 8,000 vehicles. By March 1961, the total number of such vehicles increased to 17,982 representing 33·2 per cent of the passenger services in the country.

Nationalised bus services covered in 1961 almost the major parts of Gujarat, Maharashtra, Orissa, Delhi, Manipur and Himachal Pradesh.

No nationalisation has taken place in Tripura but in the remaining parts of the country the extent to which services have been nationalised varies from one State to another, some having started only experimental nationalisation while in some others more than 90 per cent of the bus services are under State ownership as is shown in the following table:

**PRIVATE AND NATIONALISED BUSES AT BEGINNING OF THIRD PLAN, 1ST APRIL 1961**

| Name of State/Union Territory | Number of buses in public sector | Number of buses in private sector | Total | Percentage of 2 to 4 |
|---|---|---|---|---|
| Andhra Pradesh | 1,302 | 3,151 | 4,453 | 28·33 |
| Assam | 444 | 736 | 1,180 | 37·60 |
| Bihar | 613 | 1,869 | 1,982 | 31·00 |
| Maharashtra | 3,623 | 3,065 | 6,688 | 57·20 |
| Gujarat | 3,190 | 359 | 3,549 | 90·00 |
| Kerala | 559 | 2,640 | 3,199 | 17·50 |
| Madhya Pradesh | 673 | 2,415 | 3,088 | 21·70 |
| Madras | 692 | 4,487 | 5,179 | 13·40 |
| Mysore | 1,657 | 2,358 | 4,015 | 41·25 |
| Orissa | 386 | 403 | 789 | 49·00 |
| Punjab | 722 | 2,208 | 2,930 | 24·60 |
| Rajasthan | 177 | 3,314 | 3,491 | 5·10 |
| Uttar Pradesh | 2,984 | 4,528 | 7,512 | 39·70 |
| West Bengal | 730 | 3,270 | 4,000 | 18·25 |
| Delhi | 668 | 74 | 742 | 90·40 |
| Jammu and Kashmir | 143 | 497 | 640 | 22·30 |
| Himachal Pradesh | 261 | Nil | 261 | 100·00 |
| Manipur | 115 | 3 | 118 | 97·40 |
| Andaman and Nicobar Islands | 5 | 5 | 10 | 50·00 |
| Tripura | .. | 369 | 369 | — |
| Total | 17,982 | 36,213 | 54,195 | 33·20 |

Freight transport is operated by certain State Transport organisations such as those in Assam, Maharashtra, Uttar Pradesh, Jammu & Kashmir and Himachal Pradesh. While these freight lorries as a rule operate on charter basis or on scheduled parcel services without monopoly, the State Transport in Assam has a monopoly of the truck traffic on 68 miles of roads and the entire goods traffic in Himachal Pradesh is a State monopoly. The number of goods lorries operated by nationalised concerns is however not more than two per cent of the total goods vehicles in India.

Expansion of nationalisation during the Third Plan commencing April 1961 will be confined as in the Second Plan to passenger services. The Third Plan envisages the addition of 5,000 vehicles so as to increase the nationalised fleet of buses to 23,000 by March 1966.

## TRANSPORT BODIES

The department in the Central Government which deals with the overall direction of the roads plan and co-ordination of State planning is the Roads Wing under the Ministry of Transport. The chief official is the Consulting Engineer (Road Development) who is also Joint Secretary to the Ministry of Transport.

The Roads Wing gives technical advice and arranges for the allocation of Central Road Fund reserves among the States.

An inter-State Transport Commission has been set up to develop, co-ordinate and regulate operation of motor vehicles in areas or routes common to two or more States. The present Chairman of the Commission is Mr. N. P. Mathur.

For proper and planned development of transport as a whole and to ensure co-ordination between the various modes of transport on the one hand and the Central and State transport policies on the other, Government of India in 1958 set up three transport bodies. They are the *Transport Development Council, the Road and Inland Water Transport Advisory Committee, and the Central Transport Co-ordination Committee.* These replaced the Transport Advisory Council constituted in 1935, the Central Board of Transport and the Standing Committee of the Central Board of Transport.

The Transport Development Council is a high-level body to advise the Government of India on all matters of policy relating to roads, road transport as well as inland water transport. The Council will also advise on problems relating to co-ordination between different forms of transport that may be referred to it by the Government of India.

The membership of this Council is restricted to Transport Ministers of the States and Lt. Governors and Chief Commissioners of the Union Territories. From the Centre, the Ministers of Transport, Commerce, Industry and Railways, Minister of State in the Ministry of Transport, Deputy Minister of Transport and member in charge of transport in the Planning Commission are its members.

The Union Minister of Transport is the chairman of the Council and the Transport Secretary to the Government of India its Secretary. The Council will meet at least once a year.

The Road and Inland Water Transport Advisory Committee has been set up to discuss problems relating to roads, road transport and inland water transport and to make recommendations to the Transport Development Council for final decisions. The Committee consists of official and non-official members and the Minister of State in the Ministry of Transport is its chairman

The Central Transport Co-ordination Committee has been constituted in the place of the Standing Committee of the Central Board of Transport and deals with the day-to-day transport problems confronting the different ministries of the Government of India. The Transport Secretary to the Government of India is the chairman of this Committee.

The Government of India has also prepared a pilot scheme for setting up transport co-operative societies. To begin with, two such societies have been set up one each in Delhi and Kerala. Other States in which such societies are to be formed are West Bengal, Orissa and Madras.

The objective of the scheme is twofold; to bring more vehicles on the road; and to find employment for the educated unemployed.

The co-operative societies will be under the control of the State Government. Financial assistance by way of loans will be granted to the societies by the Government of India. The cost of training of the members of the co-operative societies would also be borne by the Central Government.

The membership of the co-operative societies will be restricted to workers, like drivers, mechanics, booking clerks, depot managers, etc.

On the basis of five persons to man one vehicle, each co-operative society will have 50 members. Each member will be required to contribute Rs. 1,000 towards the capital of the society.

### Road Transport Reorganisation Committee

The Government of India in 1958 appointed a Road Transport Reorganisation Committee under the chairmanship of Mr. M. R. Masani, M.P. to recommend changes in the machinery of transport administration in the States so that road transport might be developed to meet the demands created by the country's plans of economic development.

The recommendations were given in the 1960-61 Directory.

The Government appointed another committee under the chairmanship of Mr. K. C. Neogy in 1959 to study and recommend on the problem of transport policy and co-ordination. Mr. Neogy tendered his resignation in 1964 and Mr. Tarlok Singh has been appointed as Chairman of the committee. The report is awaited.

# FOOD

THE areas covered by the Punjab and Madhya Pradesh (former Vindhya Pradesh) are generally surplus in wheat.

The areas covered by the following States are generally surplus in rice: Orissa, Madhya Pradesh, Andhra, Punjab.

From the point of view of food generally the position is roughly as follows: Surplus areas: Madhya Pradesh, Punjab, Orissa, Andhra. Self-sufficient areas: U.P., Rajasthan, Madras, Mysore, Assam. Deficit areas: Maharashtra, Gujarat, Himachal Pradesh, Bihar, West Bengal, Kerala, Kashmir, Tripura. Manipur is marginal.

## PRODUCTION

In 1963-64 food production was 79·4 million tons and the index figure 134·9. Production of rice and wheat in 1963-64 was estimated at 36 mln., and 11 mln., tonnes respectively.

Total foodgrains production in the country from 1952-53 to 1963-64 was as follows (figures in million tons): 1952–53: 58·27; 1953–54: 68·72; 1954–55: 66·60; 1955–56: 65·3; 1956–57: 68·7; 1957–58: 64·3; 1958–59: 77·1; 1959–60: 76·7; 1960–61: 80·9; 1961–62: 81·0; 1962-63: 78·4; 1963-64: 79·4.1964-65: 88·4

The following are the comparative production figures of rice, wheat, barley, millets and pulses during the period 1960–61 to 1963–64.

(000 met. tons)

| Year | Rice | Wheat | Barley | Millets | Pulse | Maize |
|---|---|---|---|---|---|---|
| 1960–61 .. | 34,198 | 10,992 | 2,886 | 16,247 | 12,652 | 4,015 |
| 1961–62 .. | 34,807 | 12,039 | 3,152 | 15,138 | 11,631 | 4,270 |
| 1962–63 .. | 31,914 | 10,829 | 2,423 | 17,264 | 11,440 | 4,578 |
| 1963–64 .. | 36,489 | 9,708 | 1,985 | 16,846 | 9,875 | 4,527 |

The production of gram in 1963-64 was 4·5 million tons, Tur 1·3 million tons.

State-wise details of production of foodgrains in 1963-64 (in '000 met. tons) are as under :—

Andhra Pradesh 7,195 ; Assam 1,899 ; Bengal (West) 5,809 ; Bihar 7,406 ; Gujarat 2,524 ; Jammu & Kashmir 618 ; Kerala 1,148 ; Madhya Pradesh 9,163 ; Madras 5,672 ; Maharashtra 6,749 ; Mysore 4,072 ; Orissa 4,072; Punjab 4,819; Rajasthan 5,790 ; Uttar Pradesh 11,825 ; Andaman and Nicobar Islands 9 ; Delhi 53 ; Himachal Pradesh 345 ; Manipur 109 ; Tripura 175 ; Nagaland 71.

The index of production of foodgrains is as follows (1949-50 = 100) :—

1961-62 : 137·5 ; 1962-63 : 130·4 ; 1963-64 : 134·9.

| Food grains | 1961–62 | 1962–63 | 1963–64 |
|---|---|---|---|
| Rice .. .. .. | 139·0 | 127·4 | 145·7 |
| Wheat .. .. .. | 178·3 | 160·4 | 143·8 |
| Jowar .. .. .. | 111·2 | 138·2 | 132·5 |
| Bajra .. .. .. | 111·3 | 121·9 | 117·0 |
| Ragi .. .. .. | 121·6 | 122·9 | 120·4 |
| Maize .. .. .. | 152·5 | 163·5 | 161·7 |

(*e*) Figures for 1964 are provisional and subject to revision.

The balance sheet of foodgrains distributed by Governments during 1963 and 1964 was as follows :

(in thousand met. tons)

| — | 1963 | 1964 (*a*) |
|---|---|---|
| Opening Stock with States .. | 395 | 319 |
| Procurement .. .. | 296 | 545 |
| Stocks with States at the end of the year .. .. | 319 | 467 |
| Central Reserves at the end of the year .. .. | 1,940 | 530 |

(*a*) Provisional.

Offtake from Central Government stock in 1964, was 8·663 million tons comprising 1·857 million tons rice, 6·785 million tons wheat and 0·023 million tons coarse grains. The total number of fair price shops in different States at the end of Dec. 1964 was about 104,560.

The total procurement of rice in 1964 was 1·283 million tons. Of this 7,41,000 tons were procured by the Centre and the rest 5,42,000 tons by the States as detailed below : (Fig. in million tons) : Andhra Pradesh 0·046 ; Assam 0·071 ; Gujarat 0·011 ; J. & K. State 0·015 ; Kerala 0·003 ; Madras 0·072 ; Maharashtra 0·013 ; Orissa 0·072 ; Punjab 0·011 ; U.P. 0·145 & W. Bengal 0·663.

Manipur and Tripura procured 10,000 tons each.

With effect from 1st April 1956 foodgrains have been supplied to State Governments and others at a specially reduced price with a view to stabilising the market price in the country as follows (Figures in million Rs.) :

1956-57 : 184·8 ; 1957-58 : 230·4 ; 1958-59 : 100·2 ; 1959-60 : 88·18 ; 1960-61 : 128·51 ; 1961-62 : 124·12.

Supplies of food grains to State Governments from Central Stocks (Mill. met. tons).

| Year | Rice | Wheat | Others | Total |
|---|---|---|---|---|
| 1961 .. | 2·70 | 0·65 | — | 3·35 |
| 1962 .. | — | — | — | 4·30 |
| 1963 .. | 1·12 | 3·80 | — | 4·92 |
| 1964 .. | 1·40 | 6·85 | — | 8·25 |

## IMPORTS (1960-64)

Imports of food grains into India in 1964 were about 6,266 thousand metric tons.

The imports of foodgrains over the years were as follows :

(figures in million long tons)

1960—5·056 ; 1961—3·44 ; 1962·—3·64 valued at Rs. 141·1 crores ; 1963—4·56 valued at about Rs. 183·6 crores and 1964—6·266 valued at about Rs. 266·25 crores. Of the 1964 imports, 5·621 mln. tonnes were wheat and 0·645 mln. tonnes rice.

The imports of individual grains were as follows :

(in million metric tons)

| | 1962 | 1963 | 1964 |
|---|---|---|---|
| Rice .. .. .. | 0·390 | 0·083 | 0·645 |
| Wheat (including flour) | 3·250 | — | — |
| Others .. .. .. | — | — | — |

Countries from which imports were obtained from 1962 to 1964 with quantity (in million metric tons) were as follows :

| | Quantity | | |
|---|---|---|---|
| | 1962 | 1963 | 1964 |
| Country | | | |
| U.S.A. .. | 3·036 | 4·198 | 5·586 |
| Australia .. | 0·356 | 0·156 | 0·261 |
| Canada .. | 0·045 | 0·019 | 0·107 |
| U.A.R. .. | — | — | 0·029 |
| Burma .. | 0·201 | 0·173 | 0·152 |
| Others .. | — | 0·010 | 0·131 |
| TOTAL | 3·640 | 4·556 | 6·266 |

Countries from which wheat and rice imported during the year 1964 : (quantity in million metric tons).

| | Wheat | Rice |
|---|---|---|
| U.S.A. .. .. .. | 5·253 | 0·333 |
| Australia .. .. .. | 0·261 | — |
| Burma .. .. .. | — | 0·152 |
| Canada .. .. .. | 0·107 | — |
| U.A.R. .. .. .. | — | 0·029 |
| Others .. .. .. | — | 0·131 |
| TOTAL .. .. | 5·621 | 0·645 |

The Plan provided for an import of 6 million tons of foodgrains costing about Rs. 48 crores a year.

An important event which had a salutory effect on the market sentiment during 1960 was the conclusion of the long-term P.L. 480 agreement with U.S.A. in May 1960 for the import of 16 million tons of wheat and one million metric tons of rice over a period of four years.

## PRICE LEVEL

The movement in the price of some items is shown by the following table of index numbers of wholesale prices :

(Base 1952-53 — 100)

| | 1963 | | 1964 | 1964 | 1965 |
|---|---|---|---|---|---|
| | January | December | January | December | January |
| All commodities .. | 126·0 | 134·9 | 136·3 | 158·0 | 159·4 |
| Food Articles .. .. | 123·4 | 136·2 | 137·9 | 166·0 | 167·9 |
| Cereals .. .. .. | 102·8 | 117·4 | 118·3 | 142·1 | 145·3 |
| Pulses .. .. .. | 103·9 | 121·7 | 124·0 | 194·8 | 196·3 |
| Rice .. .. .. | 108·1 | 121·7 | 124·0 | 128·9 | 127·9 |
| Wheat .. .. .. | 88·4 | 106·3 | 112·0 | 145·4 | 151·2 |
| Jowar .. .. .. | 127·7 | 114·3 | 122·7 | 203·7 | 217·2 |
| Bajra .. .. .. | 116·2 | 138·6 | 139·3 | 179·8 | 197·1 |
| Ragi .. .. .. | 116·2 | 138·6 | 139·3 | 192·4 | 203·3 |
| Gram .. .. .. | 88·9 | 110·2 | 112·5 | 192·5 | 187·1 |
| Arhar .. .. .. | 116·4 | 144·5 | 141·3 | 231·4 | 241·4 |
| Mung .. .. .. | 97·0 | 116·5 | 129·4 | 184·1 | 189·0 |
| Ulud .. .. .. | 118·3 | 125·4 | 123·7 | 143·3 | 140·8 |
| Masur .. .. .. | 117·1 | 125·8 | 127·2 | 225·6 | 239·7 |

The Central Government gave financial and technical assistance to State Governments for agricultural development programmes during 1961-62 to the tune of Rs.477·9 million; 1962-63: Rs. 524 million ; 1963-64 : Rs. 736·5 million.

## SEED

The area under improved seeds of food grains is proposed to be increased from 55m. acres (1960-61) to about 203 m. acres (1965-66).

A bill on seed certification is proposed for laying down standards of quality and making arrangements for seed analysis, inspection certification and regulation of notified seeds.

The Govt. of India has set up a Central Seed Corporation as a company registered under the Indian Companies Act, 1956 with a share capital of Rs. 50 million divided into five lakh equity shares of Rs. 100 each to promote the production of improved seeds in the country by financial aid, technical guidance, organising marketing agencies and sponsoring training programmes in collaboration with Central and State Governments and other interests. Four seed units each of 500 acres will be set up in the 3rd Plan for hybrid maize and one to two for hybrid jowar.

## FERTILIZERS & MANURES

India's requirement of nitrogen fertilizer is placed at between 2 and 2·5 million tons. Minimum requirement would probably be estimated at 1·5 million tons on the basis of 30 lbs. per acre.

It is estimated that the use of one ton of fertilizer on an area of 75 acres results in an extra 10-ton production of food grain.

An expert Committee under the Chairmanship of Mr. B. Shivraman was appointed to examine the problems relating to production, pricing and distribution of fertilisers and the report was submitted in May 1965.

**Consumption of Fertilizers**

(met. tons)

| Plant Food | 1963-64 | 1964-65 |
|---|---|---|
| | Consumption | Consumption |
| Nitrogen .. .. | 3,76,827 | 5,55,246 |
| Phosphoric Acid .. | 1,16,499 | 1,48,689 |
| Potash .. .. | 50,620 | 55,922 |
| All fertilizers .. | — | — |

The night soil compost scheme, which has now been introduced in Madras, Rajasthan, Punjab, Orissa and Mysore, will cover 500 bigger panchayats, for which Central assistance has been given at the rate of Rs. 2,000 per panchayat.

A total number of 2,250 urban centres was also engaged in night soil compost production in the States. 111 million tons of rural compost were expected to be produced in 1964-65.

**Urban Compost**

| Year | Quantity prepared (million tons) | No. of centres | Quantity distributed (million tons) |
|---|---|---|---|
| 1961–62 | 2·95 | 2,135 | 2·560 |
| 1962–63 | 3·10 | — | — |
| 1963–64 | 3·30 | 2,410 | — |
| 1964–65 | 3·6 | — | — |

Distribution of green manure seeds in parcels is encouraged in most States. A subsidy of Rs. 2 per maund is given to the State for multiplying green manuring seed. The total area green manured during 1962-63 : 16 million acres ; 1963-64 : 17 million acres and 1964-65 : 22·3 mil. acres.

# THE FOOD PROBLEM

The *per capita* net availability of food grains in India :

(in grams)

| Year | Cereals | Pulses | Total |
|---|---|---|---|
| 1959 .. | 385·3 | 74·4 | 459·7 |
| 1960 .. | 379·3 | 64·9 | 444·2 |
| 1961 .. | 392·6 | 68·4 | 461·0 |
| 1962 .. | 384·8 | 61·6 | 446·4 |

The *per capita* consumption in India of all food items in terms of calories compares as follows :—Canada : 3,140 ; U.S.A. : 3,150 ; U.K. : 3,270 ; Japan : 2,110 ; and India : 1,880.

The problem can be summed up in some such way as the following :—

The consumption of food grains and pulses in India has been increasing over the last three years faster than production.

The increase in population of eight million persons per year in itself will require one million tons of additional food grains each year. With an increase of the *per capita* intake of 100 calories per day, India would require an additional five million tons food grains per year.

It will take another five years for India to achieve the 81-million-ton food target of the Second Five-Year Plan. Consumption in the meantime will increase to 87 million tons, leaving a net deficit of six million tons per year.

Of this, India would probably import one million tons per year commercially. The balance of five million tons would need to be met somehow.

A reserve for India is necessary to meet crop failures and other contingencies.

The Government of India concluded a long-term agreement with the U.S.A. under P.L. 480 for import of 16 million metric tons of wheat and one million metric tons of rice from the U.S.A. over a period of four years to meet the current demands and also build up a reserve stock of five million tons of food grains.

The following agreements were signed in 1963 for import of foodgrains : (*a*) Government of Canada (Under the Colombo Plan 1963-64) for an aid of $1·5 million for wheat purchases fetching about 20,000 tons of wheat ; (*b*) Under P.L. 480, 0·156 million tons of wheat purchased from Australia against 0·2 million tons (for U.S. fiscal years 1962-63 and 1963-64) ; (*c*) South Viet-Nam (agreement of 3rd Sept. 1963) to import 10,000 tons of rice which arrived in Oct. 1963 ; (*d*) Burma (contracts of Sept. and Dec. 1963) 0·170 million tons of rice imported in 1963 and 0·15 million tons to be imported in 1964 ; (*e*) U.A.R. (contract dated 25th Dec. 1963) to import 35,000 tons of rice during 1964.

### Buffer Stocks

The Government of India propose to build up a buffer stock of four million tons of wheat and two million tons of rice. The stock of wheat is to be built from imports from U.S.A. under P.L. 480 agreement of May 1960 and that of rice from internal procurement and imports.

Distribution of foodgrains from Government stocks channelled through 60,000 fair price shops amounted to 4·92 million tons comprising 3·80 mln. tons of wheat, 1·12 mln. tons of rice in 1963 as against 4·31 mln. tons in 1962.

### Price Support

The support prices for standard venture of coarse paddy was announced in Oct. 1964 ; ranged Rs. 34—41 per quintal by Jha Committee. In the case of wheat (Feb. March 1965) red variety Rs. 45·50 ; white Rs. 49·50 and superior variety Rs. 53·50 per quintal. The State Govts. were authorised to announce producers price for gram within the range of Rs. 40—40·50 per quintal for 1964-65. They were also authorised to fix prices of jawar, bajra and maize within the price-range of Rs. 38—38·50, Rs. 40—40·50 and Rs. 36—36·50 respectively.

Maximum whole-sale and retail prices of rice were fixed in Bengal (Jan. '64) and in the Southern States (Aug. 1964). Subsequently the Government fixed the maximum price of paddy Re. 1/- higher than the support prices. Maximum prices of wheat have been fixed by the Govt. of Rajasthan and of jawar by Madhya Pradesh and Maharashtra.

To regulate trade activities the wholesale dealers in foodgrains are licensed in all States. Statutory rationing in Calcutta (Jan. 1965), informal rationng in Kerala (Nov. 1964) and in Delhi (Nov. 1964) were introduced.

## WAREHOUSES

It is estimated that about three million tons of foodgrains go waste in the country owing to lack of efficient storage facilities To arrest wastage of agricultural produce, warehousing has been adopted as a national programme in the public sector.

A Central Warehousing Corporation was established in 1956 under the Agricultural Produce (Development and Warehousing) Corporation

Act, 1956. The target set for the Third Five Year plan is 100 Central Warehouses and 600 State Warehouses including sub-ware houses.

As many as 80 types of commodities are now stored in the warehouses including foodgrains, oilseeds, cattle fodder, raw cotton, cotton seed, raw jute, turmeric, gur, ginger, pepper, cardamom, coffee seeds, chicory, fertilizers and food products.

### Food Corporation

The Food Corporation was set up as a statutory body in Jan. 1965 to function in the long term comprehensive strategy for solving the food problem.

During 1965 the Corporation purchased about 20 lakh tons of rice through Central and State Govts. (*For more details see under All India Corporations*).

### Subsidiary Foods

A Food and Nutrition Board with 10 members consisting of scientists and technologists has been setup in the Department of Food for securing accelerated, coordinated, effective implementation of programmes of development and popularisation of subsidiary and protective food with the Secretary in Dept. of Food as the Chairman.

The Board has initiated investigations for the development of cotton-seed protein for human consumption, fortification of common salt with calcium and development of food from green vegetation and further work on parboiled rice and vegetable milk powder.

Programme has been initiated for the promotion of food preservation technique. It is proposed to establish demonstration-cum-community canning and food preservation centres one each at Delhi, Bombay, Madras and Calcutta. The Delhi Centre has already started functioning. Four mobile food and nutrition extension units for the systematic campaign for promotion and popularisation of food preservation technique, suitable dietary habits, cost balanced diet and scientific technique of cookery, proper utilisation of food etc. with Hd. Quarters at Delhi, Bombay, Calcutta and Madras, have also started functioning.

## PACKAGE PROGRAMME

A U.S.A. team of 13 Agricultural Experts arrived in India under the sponsorship of the Ford Foundation, early in 1959, and with the help of their Indian counterparts, they studied the Indian agricultural problem.

A summary of the Ford Foundation report published during the year 1959 is given in the 1960-61 edition of the Directory.

The recommendation that intensified work on a pilot project basis be taken up in selected areas is also being given effect to. A pilot project has been drawn up for selected districts, one each in seven States—four rice-growing States, namely, Andhra Pradesh, Bihar, Madras and, Madhya Pradesh, two wheat growing States namely, U.P. and Punjab, and one millet-growing State, namely, Rajasthan.

The pilot project is part of a "package programme" in which all the factors that are likely to contribute significantly to a rapid increase in food production would be combined into one programme. The essence of the scheme is to make available to the farmer in the selected districts all his needs in terms of credit, supplies including fertilizers and seeds and demonstrations. All supplies will be made available at the farmer's door or at least within bullock-cart distance. The programme would include adequate incentives and aids to cultivators to increase production.

The Ford Foundation has agreed to finance the pilot project in a big way.

Among other things, the Foundation will underwrite up to a certain percentage losses incurred by co-operative societies in advancing loans to non-credit-worthy farmers, and fully any loss of stocks which will have to be stored three months in advance of need by service co-operatives. The farmer will be guaranteed against any failure of crops.

The Foundation will also help to organise public works programmes to put landless labour to work on projects like soil and water conservation, and to establish modest agricultural implements factories.

It is prepared to supplement Governmental efforts to the extent necessary to try out all the measures essential to raise production in the selected districts provided the scheme is tried for a period of five years and all the suggestions are accepted as a whole.

Suitable storage and marketing facilities will be provided. The Government will undertake to buy all the produce at a stated minimum price or the prevailing market rate, whichever is higher.

Another requirement will be well-developed village institutions, particularly co-operatives and panchayats, through which developmental efforts will be made to reach the farmer.

The results will be evaluated from the beginning on a yearly basis to see whether the investment is commensurate with the extra production. Crop-cutting surveys will be undertaken of the actual production before the scheme is launched and every two seasons thereafter to assess progress.

The programme was initially introduced in 7 districts—Tanjore (Madras), West Godavari (Andhra), Raipur (M.P.), Shahabad (Bihar), Aligarh (U.P.), Pali (Rajasthan) and Ludhiana (Punjab).

As compared with the levels of average yields prevailing during the 3-year period preceding the introduction of the Package Programme the yields of paddy during 1963-64 recorded an increase of 25·2 per cent in W. Godavari (A.P.), 20 per cent in Raipur (M.P.), 40 per cent in Mandya (Mysore) and 39·7 per cent in Burdwan (W. Bengal), during the same period the yield of wheat in Ludhiana increased by 78 per cent. Good increase was also recorded in maize, barley and Jawar.

Achievements of the "Intensive Agricultural District programme" in the first seven districts:

| | 1962-63 | 1963-64 |
|---|---|---|
| No. of farm plans prepared .. .. | 380,000 | 861,000 |
| Improved seeds (000 tons) .. .. | — | 18,53 |
| Nitrogenous fertilisers distributed (000 tons) .. .. | 119·9 | 227 |
| Plant protection coverage—area treated for pests and diseases (in 000 acres) | 815 | 18,56 |
| No. of field demonstration plots in cultivated fields.. .. | 17,400 | 23,000 |

The German Democratic Republic has sponsored a similar package programme—with greater emphasis on Animal Husbandry and Horticulture—in the Mandi District of Himachal Pradesh. The Delhi Territory is also being granted a package programme.

The project was launched in Nov. 1962 in the pattern of mixed farming where emphasis is laid on the development of cattle, sheep, piggery, poultry and fruit and vegetable cultivation. Up to 1963, farm plans have been prepared for 28,643 out of the total number of 50,000 cultivating families, 2,495 composite demonstration plots laid out and over 1,700 tonnes of chemical fertilisers distributed in the district.

### PACKAGE PRACTICE

The general approach to the programme is similar to that of I.A.D.P. (package programme functioning with the co-operation of Ford Foundation) to concentrate on a region which has the best natural conditions for increasing agricultural production, the necessary supplies (improved seeds, green manure, fertilisers, plant protection facilities) and service, *i.e.*, technical assistance. Extensive and repeated trials in the rice growing areas have indicated that the current rice production could be stepped up by about 25–30 per cent in one year by the adoption of the combination of the production technique such as (1) use of suitable pure improved seed after dressing them with fungicide, (2) raising stocky seedlings by using lesser seed in well-prepared nurseries and line sowing and best spacing, (3) green manuring wherever feasible and fertilisation by the application of 150 and 100 lb. of nitrogenous and superphosphate per acre respectively, and (4) rope protection from weeds (by weeding and interculture with rotary hoe) and against insect pests (like stem borer, gall fly, gundhi bug and other pests).

Since it may not probably be possible to cover the whole of the area with these practices, a phased programme may be followed, with a coverage of 20 per cent of the area in the first, 40 per cent in the second and 60 per cent in the third year.

The coverage under the programme has increased to 245 blocks out of a total number of 308 C.D. blocks of the selected districts, accounting for a cultivated area of 5·187 m. acres representing 35 per cent of the total cultivated area in the selected districts.

### Export Promotions

Export promotion division is set up in the Ministry for export of agricultural commodities. It has set up a number of study groups for the export promotion studies in agricultural commodities; Viz. myrobalans, walnuts, mushroom. Export possibilities of banana to Japan is being pursued. Five advisory panels have been set up to advise the Govt. in matters of policy and implementation of research, development and educational programmes relating to Indian farming.

## AGRICULTURE PRICES COMMITTEE

The Govt. has appointed the Agricultural Price Committee with Prof. M. L. Dantawalla of Bombay University as Chairman, to advise the Govt. on the price policy of agricultural commodities particularly, rice, wheat, millet, pulses, oilseeds, sugar cane, cotton and jute. The price policy will aim at evolving a balanced and integrated price structure taking into account the overall needs of the economy with due regard also to the producers' and consumers' interests. In recommending, the Committee will consider: (1) need to provide incentive to the producers for adopting improved technology for maximising production; (2) need to ensure rational utilisation of land and other production resources; (3) the likely effect of the price policy on the cost of living, level of wages, industrial cost structure, etc. The Committee may also put forward any other measures necessary to achieve the objectives, viz. Collection of information on agricultural policy and programmes, marketing and production costs, etc. The Committee will recommend from time to time measures necessary to make price policy effective in respect of different commodities.

# U. S. AID TO INDIA

U. S. economic assistance to India consists of both grants and loans. The total commitments of the U.S. under various agreements with the Government of India now stand at $6,151·6 million (Rs. 2,929·3* crores).

*U.S. Aid from the inception of the Economic Assistance Programme to India in June* 1951 *through June* 25, 1965: The first figure is in million dollars and the figure in brackets the rupee equivalent in crores: 1. U.S. Agency for International Development Mission's Technical Cooperation Programme: (*a*) Development grants (not repayable) 378·1 (180·0); (*b*) Loans (repayable in rupees or dollars) 154·2 (73·4); 2. U.S. Agency for International Development: Development loans (repayable in dollars) 1,376·7 (655·6); 3. U.S. Development Loan Fund credits (repayable in rupees) 509·2 (242·5); 4. Public Law 480. Title I (grants & loans repayable in rupees) 2,911·5 (1,386·4); 5. Public Law 480, Title II (grants not repayable) 15·8 (7·5); 6. Public Law 480, Title III (agricultural commodities donated through voluntary agencies: not repayable) 204·5 (97·4); 7. Emergency Flood & Famine Relief grants (not repayable) 5·5 (2·6); 8. Export-Import Bank loans (repayable in dollars) 406·4 (193·6); 9. Wheat Loan of 1951 (repayable in dollars) 189·7 (90·3); Total 6,151·6 (2,929·3)

*Breakdown:* 1. Grants (not repayable) 1,392·1 (662·8); 2. Loans repayable in dollars 1,927·7 (939·5); 3. Local currency repayments (This includes loans repayable in rupees or dollars; the Cooley Fund for loans to private enterprise; and amounts under PL-480, Title I, agreements reserved for U.S. Government uses) 2,786·8 (1,327·0): Total 6,151·6 (2,929·3).

It will be noted that only 32 per cent of total American aid to India involves foreign exchange repayments. The greater part of this amount bears exceptionally low rates of interest and is repayable over a long period (40 years).

Nearly a quarter of the total aid represents grants. The remainder (45·3 per cent) represents loans repayable in rupees. These repayments do not involve the utilization of India's foreign exchange earnings or the export of goods from this country.

## EMERGENCY WHEAT LOAN

In 1951 the U.S. Congress enacted legislation for a loan of $189·7 million (Rs. 90·3 crores) to India to finance the purchase of 2 million tons of wheat to meet an acute food shortage. The loan is repayable in dollars and carries an interest rate of 2¼ per cent. Repayment was scheduled to commence on June 30, 1957. However, in view of India's serious foreign exchange difficulties, the U.S. Government has postponed the 18 semi-annual instalments of interest and principal due from December 31, 1959 and re-scheduled them to fall due from December 1986 to 1995, without additional interest payments.

American assistance to India is at present extended through the following three agencies.

## U.S. AGENCY FOR INTERNATIONAL DEVELOPMENT (U.S.A.I.D.)

This new Agency was created on November 3, 1961 to bring American economic assistance under a unified administration. It is in charge of activities previously administered by the International Cooperation Administration, which was represented in India by the Technical Cooperation Mission (TCM), the Development Loan Fund, the Food for Peace Programme (Public Law 480) in its relation with other countries, and other staff and related functions.

U.S.A.I.D. gives both developmental loans and grants. Grants have been made to the Malaria Eradication Programme, Small-pox eradication, higher education, National Productivity Council, craftsmen training, dairy development, community development, crop production and a number of other projects. U.S.A.I.D. and its predecessor, TCM. have also aided India by making available American experts to work on specific technical and economic problems in the Indian development programme, by giving advanced training to Indian participants both in India and abroad, and by the provision of supplies and equipment. The names of the principal divisions of U.S.A.I.D. (Agriculture, Industry, Health, Education, Labour and Management) indicate the comprehensive scope of its activities. Developmental grants total $378·1 million (Rs. 180·0 crores). These, of course, do not involve repayment.

The 35 developmental loans given by U.S.A.I.D. since its establishment in November 1961 total $1,376·7 million (Rs. 655·6 crores). These loans are repayable in dollars, but in order to avoid an excessive foreign exchange debt servicing burden to India, the terms of the loans are set at a long period, taking into account such factors as other foreign debt and the foreign exchange earnings of the country. Repayment is scheduled over 40 years, with a 10-year grace period: that is, no payments of principal during the first ten years.

The 22 loans authorized through 1963 are free of interest and carry a credit fee of three quarters of one per cent per annum. The foreign aid legislation enacted by the U. S. Congress for the fiscal year 1964 effected a slight change in the terms of these loans: instead of a credit fee they are now subject to payments of interest at three quarters of one per cent during the first ten years and at two per cent during the remaining thirty years. Ten loans were authorized in India under these terms. The legislation that was passed for the fiscal year 1965 established a minimum interest rate during the first ten years of development loans of one per cent per annum and of 2¼ per cent thereafter. So far, three loans have been authorized in India under new terms.

**Details of the developmental loans given by the U.S.A.I.D. are as follows:**

| | Date of Agreement or Announcement | Project | Dollars (Millions) | Rupee Equivalent (Crores) |
|---|---|---|---|---|
| 1. | Feb. 28, '62 | Dhuvaran Thermal Power Station, Gujarat (Cambay) | 33·6 | 16·0 |
| 2. | Feb. 28, '62 | Premier Automobiles, Ltd., Bombay, Maharashtra (second loan) | 3·0 | 1·4 |
| 3. | Mar. 30, '62 | Industrial Finance Corporation (second loan) | 20·0 | 9·5 |
| 4. | April 11, '62 | Pamba-Kakki (Sabarigiri) Hydroelectric Project, Kerala | 20·2 | 9·6 |
| 5. | June 21, '62 | General Non-Project Loan for maintenance imports (first loan) | 200·0 | 95·2 |
| 6. | June 21, '62 | Bandel Thermal Power Project, West Bengal | 38·0 | 18·1 |
| 7. | June 21, '62 | Hindustan Steel Ltd., for Patherdih Coal Washery, Bihar | 4·2 | 2·0 |
| 8. | June 21, '62 | Fourth Railway Loan | 43·0 | 20·5 |
| 9. | June 28, '62 | Delhi Cloth Mills Ltd., for their rayon tyre cord plant at Kotah, Rajasthan | 9·8 | 4·7 |
| 10. | July 27, '62 | Napco Bevel Gear of India Ltd. (precision gearplant), Faridabad, Punjab | 2·3 | 1·1 |
| 11. | Oct. 12, '62 | Trombay Power Plant (Tatas), Maharashtra | 17·9 | 8·6 |
| 12. | Nov. 2, '62 | Ramagundam Thermal Power Project, Andhra Pradesh | 8·4 | 4·0 |
| 13. | Dec. 7, '62 | Hindustan Motors Ltd., Calcutta (first loan) | 15·8 | 7·5 |
| 14. | Dec. 7, '62 | Tata Engineering & Locomotive Co. Ltd., Jamshedpur, Bihar (first loan) | 13·7 | 6·5 |
| 15. | Feb. 25, '63 | General Non-Project loan for maintenance imports (second loan) | 240·0 | 114·3 |
| 16. | Mar. 8, '63 | Indraprastha (Delhi "C") Thermal PowerStation | 16·0 | 7·6 |
| 17. | Mar. 8, '63 | Satpura Thermal Power Station, Madhya Pradesh | 25·1 | 12·0 |
| 18. | Mar. 25, '63 | Chandrapura Thermal Power Project, Bihar (Second loan) | 16·0 | 7·6 |
| 19. | April 21, '63 | Fifth Railway Loan | 15·9 | 7·6 |
| 20. | May 21, '63 | Central Ropeways 'F', Jharia Bihar | 7·7 | 3·7 |
| 21. | May 21, '63 | Dugda Coal Washery Expansion, Bihar | 5·1 | 2·4 |
| 22. | July 1, '63 | Tarapur Nuclear Power Station, Maharashtra | 80·0 | 38·1 |
| 23. | Feb. 6, '64 | National Engineering Industries, Ltd., Jaipur, Rajasthan | 4·3 | 2·0 |
| 24. | Feb. 24, '64 | General Non-Project loan for maintenance imports (third loan) | 225·0 | 107·1 |
| 25. | June 19, '64 | Trombay Fertilizer Plant, Maharashtra (second loan) | 7·8 | 3·7 |
| 26. | July 7, '64 | Hindustan Motors, Ltd., Calcutta, West Bengal (second loan for expanding automobile production) | 23·0 | 11·0 |
| 27. | July 7, '64 | Hindustan Motors, Ltd., Calcutta, West Bengal (for production of power shovels) | 3·0 | 1·4 |
| 28. | July 7, '64 | Tata Engineering and Locomotive Co. Ltd., Jamshedpur, Bihar (second loan) | 11·8 | 5·6 |
| 29. | Aug. 6, '64 | General non-project loan for Maintenance Imports (fourth loan) | 50·0 | 23·8 |
| 30. | Aug. 6, '64 | Sixth Railway Loan | 7·2 | 3·4 |
| 31. | Aug. 6, '64 | Sharavathi Hydro-Electric Power Project, Mysore (third loan) | 3·1 | 1·5 |
| 32. | Aug. 6, '64 | U.S. Consulting Services | 2·0 | 1·0 |
| 33. | Jan. 13, '65 | Industrial Finance Corporation (third loan) | 10·0 | 4·8 |
| 34. | June 17, '65 | Seventh Railway Loan | 3·8 | 1·8 |
| 35. | June 17, '65 | General Non-project Loan for Maintenance Imports (fifth Loan) | 190·0 | 90·5 |
| | | Total | 1,367·7 | 655·6 |

* Military assistance is not included.

Prior to November 1961, the Technical Cooperation Mission had given the Indian Government loans totalling $154·2 million (Rs. 73·4 crores). These could be repaid in either rupees or dollars at the option of the Government of India. (For the sake of simplicity, a sum of $5·8 million (Rs. 2·8 crores), which was made available to the Govt. of India in the form of Italian, French and Japanese currencies in exchange for Indian rupees, is included in this item).

The U.S. Development Loan Fund, which has now been absorbed into U.S.A.I.D., extended loans to India totalling $509·2 million (Rs. 242·5 crores) between 1958 and September 30, 1961. These loans are repayable in non-convertible rupees.

## U.S. PUBLIC LAW 480

(Food for Peace Programme)

India has been the largest recipient of U.S. agricultural commodities under Title I, P.L. 480. The first Title I agreement was signed with India on August 29, 1956. Since then eight additional agreements and eighteen supplemental agreements have been signed. The last supplemental agreement was signed on December 31, 1964. The market value of the commodities (including some ocean transportation costs) in all these agreements and amendments through June 25, 1965, totals $2,911·5 million (Rs. 1,386·4 crores).

The Government of India pays for the commodities imported under Title I, P.L. 480, with rupees. From these total sales proceeds, 80·4 per cent is returned to the Government of India as loans and grants for economic development purposes. An additional 7·2 per cent is available for loans to private enterprises in India. The U.S. and India governments have agreed that the sales proceeds should be used in the following manner:

| | Rupees crores |
|---|---|
| 1. For grants to the Indian Government (not repayable) .. .. | 375·3 |
| 2. For loans to the Indian government (repayable in rupees, generally over a period of 40 years) .. .. .. .. | 740·2 |
| 3. For loans to private enterprises under the Cooley Amendment .. | 100·4 |
| 4. For meeting the expenses within India of U.S. government agencies .. .. .. .. | 170·5 |
| Total .. .. .. | 1,386·4 |

As of March 31, 1965, a sum of Rs. 1,119·7 crores had accrued as sales proceeds of commodities supplied to India.

This amount has been allotted as follows:

| | Rs. crores |
|---|---|
| 1. For grants to Indian government | 360·1 |
| 2. For loans to Indian government | 539·3 |
| 3. Cooley Fund for loans to private enterprise .. .. .. | 75·0 |
| 4. For U.S. government uses .. | 145·3 |
| Total .. .. .. | 1,119·7 |

## GRANTS FROM U.S. PUBLIC LAW 480 SALE PROCEEDS

The nine agreements between the United States and India under U.S. Public Law 480 provide for the grant of Rs. 375·3 crores from the sale proceeds of agricultural commodities to the Indian Government for economic development projects

As of March 31, 1965 a sum of Rs. 360·1 crores had become available from sale proceeds for grants to the Indian Government. Agreements have been concluded for grants to be made to the following projects:

| | Crores Rs. |
|---|---|
| 1. River Valley Development (Chambal, Hirakud, Damodar Valley, Mahi Right Bank Canal, Kakrapar, Nagarjunasagar, Kosi, Bhadra, Tungabhadra, Mahanadi Delta Irrigation, Kundah and Koyna Projects) .. .. | 5·94 |
| 2. Malaria Eradication .. .. | 69·24 |
| 3. Indian Institute of Technology, Kanpur .. .. .. .. | 3·20 |
| 4. U.P. Agricultural University, Pant Nagar .. .. .. .. | 2·16 |
| 5. All India Institute of Medical Sciences, New Delhi .. .. | 2·90 |
| 6. Indian Investment Centre .. | 0·55 |
| 7. Dairy Development .. .. | 3·60 |
| 8. Soil and Water Conservation .. | 6·65 |
| 9. National Highways .. .. | 20·00 |
| 10. Exploration of Groundwater Resources .. .. .. .. | 0·80 |
| 11. Craftsmen Training .. .. | 27·40 |
| 12. Modern Storage of Food Grains .. | 13·13 |
| 13. Higher Technical Education .. | 6·90 |
| 14. Elementary Education .. .. | 62·80 |
| 15. Smallpox Eradication .. .. | 8·74 |
| 16. Primary Health Centres .. .. | 9·78 |
| 17. Medical Educator Training .. | 7·40 |
| 18. National Productivity Council .. | 0·07 |
| 19. Agricultural Refinance Corporation .. .. .. .. | 5·00 |
| Total .. | 256·26 |

### Loans to the Indian Government from U.S. P.L. 480 Sale Proceeds

The nine agreements between the United States and India under U.S. Public Law 480 provide for loans totalling Rs. 740·2 crores from the sale proceeds of agricultural commodities to the Indian Government for economic development projects.

As of March 31, 1965 a sum of Rs. 539·3 crores had become available from the sale proceeds for loans to the Indian government.

Agreements have been concluded for loans to the following projects:

| | Crores Rs. |
|---|---|
| 1. Refinance Corporation (now renamed The Industrial Development Bank of India) .. .. | 36·20 |
| 2. River Valley Development (Chambal, Hirakud, Damodar Valley, Mahi Right Bank Canal, Kakrapar, Nagarjunasagar, Kosi, Bhadra, Tungabhadra, Mahanadi Delta Irrigation, Kundah and Koyna projects) .. .. | 232·23 |
| 3. Sharavathi Hydroelectric Project, Mysore .. .. .. | 34·45 |
| 4. Industrial Credit and Investment Corporation of India .. .. | 20·00 |
| 5. Industrial Finance Corporation .. | 20·00 |
| 6. Chandrapura Thermal Power Project, Bihar .. .. .. | 20·50 |
| 7. Barauni Thermal Power Project, Bihar .. .. .. .. | 1·31 |
| 8. Durgapur Thermal Power Project, West Bengal .. .. .. | 3·43 |
| 9. Kanpur Thermal Power Project.. | 0·95 |
| 10. Barapani Hydroelectric Power Project, Assam .. .. | 6·40 |
| 11. Trombay Fertilizer Plant.. .. | 13·43 |
| 12. Rihand Valley Hydro-Electric Project .. .. .. .. | 8·92 |
| 13. Cambay Thermal Power Station.. | 9·02 |
| 14. Amarkantak (Amlai) Thermal Power Project, M.P. .. .. | 6·67 |
| 15. Bandel Thermal Power Project .. | 8·40 |
| 16. Talcher Thermal Power Project, Orissa .. .. .. .. | 8·54 |
| 17. Pamba—Kakki (Sabarigiri) Hydroelectric Power Project, Kerala .. .. .. .. | 18·40 |
| 18. Satpura Thermal Power Project, Madhya Pradesh .. .. | 15·30 |
| 19. Indraprastha (Delhi "C") Thermal Power Project .. .. .. | 8·30 |
| 20. Ramagundam Thermal Power Project .. .. .. .. | 3·70 |
| Total of loan agreements .. | 476·15 |

Public Law 480, which is playing a significant role in ensuring the availability of agricultural commodities to India at reasonable prices at a time of intense economic development, has four titles (chapters).

### P. L. 480 Title I

Under Title I of PL-480, the United States has entered into nine agreements with India for the supply of large quantities of wheat, rice, coarse grains, cotton, dried milk powder, tobacco, and other agricultural commodities. India pays for these commodities in rupees. The total value of the commodities covered by these agreements is Rs. 1,386·4 crores ($2,911·5 million). Of this, Rs. 170·5 crores ($358·2 million) is reserved for U.S. Government uses; Rs. 100·4 crores ($210·8 million) for loans to private enterprise under the Cooley Amendment; Rs. 375·3 crores ($788·2 million) for grants to the Indian Government for development projects; and the balance of Rs. 740·2 crores ($1,554·3 million) for loans to the Indian Government for the same purpose. Thus 87 per cent of the value of agricultural commodities supplied under Title I of PL-480 is utilized in financing irrigation dams, power projects, educational and research facilities, the malaria eradication programme, industrial enterprises, and other development undertakings.

### P.L. 480 Title II

Title II of Public Law 480 enables the U.S. President to furnish emergency assistance to foreign countries in meeting famine or other urgent or extraordinary relief requirements. Under this title India has received agricultural commodities worth $15·8 million (Rs. 7·5 crores).

### P.L. 480 Title III

Under Title III of Public Law 480, $204·5 million (Rs. 97·4 crores) worth of dried milk, wheat, rice, corn, cottonseed oil, and other such commodities has been distributed in India through voluntary agencies. Some 80 lakh school children receive free lunches through programmes assisted under this title.

### P.L. 480 Title IV

Title IV provides for long-term credits to friendly nations for purchase of agricultural commodities during periods of economic development. Repayment in dollars could be spread over twenty years. No transactions have taken place between India and the United States under this title.

## COOLEY FUND

The Cooley Amendment to U.S. Public Law 480 (named after Congressman Harold D. Cooley, Chairman of the Committee on Agriculture of the U.S. House of Representatives) provides that up to 25-per cent of the local currency proceeds from the sale of American agricultural commodities shall be made available to U.S.A.I.D. for lending in the private sector to two categories of borrowers :

1. American firms or their subsidiaries operating in the host countries (India) or indigenous (Indian) firms having an affiliation with an American firm ;
2. Indigenous firms of the host countries with no American affiliation but which are facilitating the disposal of American agricultural products, *e.g.* local private warehouses storing grain or flour mills processing the grain, etc.

The nine agreements between India and the United States under Public Law 480 provide for Rs. 100·4 crores to be given in loans to private enterprise under the Cooley amendment.

As of March 31, 1965 a sum of Rs. 75·0 crores had become available to the Cooley Fund.

The following loans have been extended from the Cooley Fund (in Rs. crores) : 1. Otis Elevator

of India Ltd., Bombay (elevators) 0·2 ; 2. Goodyear Tyre & Rubber Co. of India Ltd., Ballabgarh, Punjab (rubber products) 2·25 ; 3. Mysore Cements Ltd (M/s. Sarangapani Mudaliar/Kaiser), Ammasandra, Mysore (cement) 1·375 ; 4 Hindustan Aluminium, Ltd. (M/s. Birla/Kaiser) Renukoot, U.P. (aluminium) 2·0 · 5. Synthetics and Chemicals, Ltd., (M/s. Kilachand/Firestone), Bareilly, U.P. (synthetic rubber) 6·5; 6. Ex-Cell-O (India) Pte. Ltd. (M/s. Amerind Engineering Co./Ex-Cell-O Co. Detroit, Mich.) Bombay (machine tool parts) 0·2 ; 7. Premier Tyres Ltd. (Joint enterprise with Dayton Rubber Co.), Kalamaseri, Kerala (rubber tyres) 0·3 ; 8. Seshasayee Paper & Board Ltd., Erode, Madras (M/s. Seshasayee/Parsons and Whittemore) (bagasse pulp and paper mill) 2·0 ; 9. Cyanamid India Ltd., Bombay, Maharashtra (American Cyanamid Co. of New York) (antibiotics) 0·25 ; 10. Gabriel India Private Ltd., Mulund, Bombay, Maharashtra (M/s. D. C. Anand/Gabriel of Detrioit) (shock absorbers) 0·19 ; 11. Madras Rubber Factory Ltd., Madras (Mansfield Rubber Co. of Ohio) (rubber tyres) 0·75 ; 12. East India Hotels Ltd. (M/s. Oberoi/Intercontinental Hotel Corporation) New Delhi (construction of hotel in New Delhi) 0·76 ; 13. Wyeth Laboratories, Pte. Ltd. (American Home Products Corporation), Bombay, Maharashtra (steroid compounds and hormones) 0·17 : 14. Victor Gasket India (Pte.) Ltd., Mulund, Bombay, Maharashtra (Victor Mfg. & Gasket Co., Chicago) (gaskets) 0·075 ; 15. Union Carbide (India) Ltd., Calcutta, West Bengal (chemicals and plastics) 2·16 ; 16. McNally-Bird Engineering Co. Ltd., Kumaradhubi, Bihar (manufacture of coal washeries and allied equipment) 0·5; 17. Harig-Malik Manufacturing Co. Pte. Ltd., Faridabad, Punjab (Haring Manufacturing Corporation, Chicago) (tools, dies, gauges, etc.) 0·6028 ; 18. Precision Bearings India Ltd.. Baroda (Norma-Hoffman Bearings Corporation, Stanford, Conn.) (ball and cylindrical bearings) 0·3; 19. Wyman-Gordon Ltd., Bombay, Maharashtra (Wyman-Gordon Co., Worcester) (precision foreigns) 0·25; 20. Arbor Acres Farm India Pte. Ltd. ; Talegaon, Maharashtra (Arbor Acres Farm inc., Glastonbury, Connecticut) (poultry breeding) 0·25; 21. Mandya Paper Mills, Ltd., Belagula, Mysore (Parsons and Whittemore, New York (paper mill) 1·5 ; 22. Kirloskar-Cummins, Ltd., Poona, Maharashtra (Cummins Engine Co., Columbus, Indiana) (engines) 1·25 ; 23. Napco Bevel Gear of India, Ltd., Faridabad, Punjab (Napco Industries Inc., Minneapolis, Minnesota) (gears, joints and allied parts) 0·8 ; 24. Coromandel Fertilizers, Ltd., Visakhapatnam, Andhra (California Chemical Company, and International Minerals & Chemicals Corporation) 10·76 ; 25. Elpro International Ltd., Bombay (General Electric Co., New York) (lightning arresters, X-ray equipment and magnets) 0·4; 26. Frick India, Ltd., New Delhi (Frick Co., Waynesboro, Pennsylvania) (refrigeration equipment) 0·25 ; 27. Bharat Steel Tubes, Ltd., Ganaur, Punjab (Abbey Etna Machine Co., Perrysburg, Ohio) (steel tubes) 0·25; 28. I.A. & I.C. Pte. Ltd., Bombay, Maharashtra (Lapic Inc.) (sulphur grinding) 0·05; 29. Everest Refrigerants, Ltd., Bombay, Maharashtra (Technical Enterprises Inc., New York) (refrigerant gases and aerosol dispensers) 0·6; 30. Borosil Glass Works, Ltd., Andheri, Maharaashtra (Corning Glass Works, New York (glassware) 0·71 ; 31. Synbiotics Ltd., Ahmedabad, Gujarat (Olin Mathieson International, New York (antibiotics and fine chemicals) 1·34 ; 32. Graphite India Ltd., Calcutta, West Bengal (Great Lakes Carbon Co poration, New York) (graphite electrodes, anodes and carbon products) 0·69 ; 33. Chemicals and Plastics India Ltd., Mettur, Madras (B.F. Goodrich Chemical Co., Cleveland, Ohio) (polyvinyl chloride plastics) 0·326 ; 34. Indabrator Ltd., Bombay (Wheelabrator Corporation, Mishawaka, Indiana) (air blast and shot blast equipment and dust collectors) 0·143 ; 35. American Universal Electric (India) Ltd., Faridabad, Punjab (Universal Electric Company, Owosso, Michigan) (fractional-horsepower electric motors) 0·21; 36. Shama Forge Co. Ltd., Bhopal, Madhya Prdesh (Kropp Forge Co., Chicago, Illinois) (steel forgings) 0–48 ; 37. Sylvania & Laxman Ltd., New Delhi (Sylvania International, New York) (fluorescent tubes and Mercury vapour lamps) 0·5 ; 38. Rockwell India Ltd., Udhna, Gujarat (Rockwell Manufacturing Co., Pittsburgh, Pennsylvania) (power tools) 0·1693 ; 39. Renusagar Power Co. Ltd., Renukoot, Uttar Pradesh (Kaiser Aluminium & Chemical Corporation, Oakland, California) (thermal power station) 3·0 ; 40. United Carbon India Ltd., Bombay (United Carbon Co., Ashland, Kentucky) (carbon black) 1·41 ; 41. Herdillia Chemicals Ltd., Thana, Maharashtra (Hercules Power Co. Inc., Wilimington, Delaware) 2·65 ; 42. Semiconductors Ltd., Bombay (Raytheon Co. Inc., Lexington, Massachusetts) 0·135 ; 43. Raymon Engineering Works Ltd., Calcutta (World Investments Inc., Wichita, Kansas) 2·14 ; Total 50·28.

## THE EXPORT-IMPORT BANK

The bank has authorized 23 loans to India totalling $406·4 million (Rs. 193·6 crores). The Bank extends loans and guarantees for the primary purpose of promoting the export and import trade of the United States. Loans given by it are repayable in dollars. In determining the rate of interest to be charged on loans, the Bank takes into consideration the maturity of the loans and the extent of credit risk to be assumed by the Bank as affected by such guarantees as may be offered, as well as prevailing United States commercial and government rates. For instance, the First Line of Credit of $150 million to the Government of India authorized in 1958 carries an interest rate of 5¼ per cent. The principal is repayable in 20 semi-annual instalments beginning in January 1964.

Loans in Rs. crores given by the U.S. Export-Import Bank to India. Loans are repayable in dollars : 1. Sundatta Foods and Fibres, Ltd., Bombay 0·03 ; 2. National Rayon Corpn., Kalyan 0·86 ; 3. First Line of Credit to Government of India 71·43 ; 4. Hindustan Aluminium Ltd., Pipri, Uttar Pradesh 6·50 ; 5. Air India (first loan) 1·95 ; 6. Second Line of Credit to GOI 23·81; 7. Orient Paper Mills, Ltd., Amlai, M.P. 8·81 ; 8. Air India (second loan) 3·30 ; 9. East India Hotels Ltd., New Delhi 0·34 ; 10. Third line of credit to GOI 11·90 ; 11. Union Carbide India Ltd., Calcutta 3·64 ; 12. Hindustan Aluminium Ltd., Pipri, U.P. 2·38 ; 13. Indian Rayon Corporation Ltd., Veraval, Gujarat 2·24 ; 14. Varanasi Diesel Locomoitve Factory (Indian Railways), U.P. (first loan) 9·05 ; 15. Bharat Forge Co. Ltd., Poona 1·86 ; 16. Coromandel Fertilizers, Ltd., Visakhapatnam, Andhra 12·90 ; 17. Mysore Acetate Chem. Co. Ltd. Mandya, Mysore ; 18. Chemicals Plastics ( India ) Ltd., Mettur, Madras & Bombay 1·50 ; 19. Fourth line of Credit to Govt. of India 11·90 ; 20. Hindustan Aluminium Ltd., Pipri, U.P. (third loan) 5·24 ; 21. Central Pulp Mills Ltd., Fort Songhad, Gujarat 3·25 ; 22. Varanasi Diesel Locomotive factory (Indian Railways), U.P. (second loan) 8·10 ; 23. Herdillia Chemicals Ltd., Thana, Maharashtra 1·57; Total 193·56.

## U. S. ASSISTANCE FOR POWER DEVELOPMENT IN INDIA

India has received substantial assistance from the United States for power development. The total stands at Rs. 574·4 crores ($1,206·2 million). It consists of $461·4 (Rs. 219·8 crores) in foreign exchange and Rs. 354·6 crores in rupees derived from the sale of agricultural commodities supplied to India under U.S. Public Law 480 and Section 402 of Public Law 665.

Thirteen projects with a total installed capacity of 2·4 million kilowatts are financed entirely by the United States (both rupees and foreign exchange). Eighteen other projects with a total installed capacity of 4·4 million kilowatts are financed partially by the United States.

Thus U.S. assisted projects will have a total capacity of 6·8 million kilowatts. This may be compared with the Third Five Year Plan target of 12·7 million kilowatts.

## INDO-AMERICAN TECHNICAL ASSISTANCE

The position is as on June 30, 1965. Figures are in thousands of dollars :

**Project and Title :—**

*Food and Agriculture* :—Acquisition and distribution of Fertilizers 17.310 ; Acquisition and distribution of Iron and Steel for Agricultural purposes 19,739 ; Plant Protection and Locust Control 584(*a*) ; Soil Fertility and Fertilizer use 1,029 ; Expansion and Modernization of Marine and Inland Fisheries 2,902 ; Ground water Irrigation 18,284 ; Agricultural Extension 2,875 ; Ground Water Exploration 4,092 ; Agricultural Machinery Utilization 206 ; Agricultural Universities Development 14,712 ; Foodgrains Storage 1,665 ; Engineering Services in Water Resources and Power Development 43 ; Animal Husbandry 922 ; Agricultural Information, Production and Training 371 ; Agricultural Economic Research 289 ; Crop Production 1,413 ; Farmers' Organization 275 ; Dairy Development 994 ; Cooperative Marketing and Warehousing of Agricultural Produce 20 ; Calcutta Milk Scheme 518 ; Cooperative Membership Education 93 ; Soil and Water Conservation 998 ; Agricultural Extension 8 ; River Valley Development 7,187 ; Water Resources Survey and Minor Irrigation Works 477 ; Forest Research 356; Provision of Engineering Services to the Damodar Valley Corporation 95 ; Augmenting Fertilizer Supply 3,800 ; Production, Processing and Marketing of Citrus Fruit 17 ; Assistance to Ministry of Food and Agriculture 33 ; Fertilizer 7,862 ; Fertilizer 5,262(*b*) ; Agriculture Programme Direction & Development 162 ; Total 114,493.

*Industry and Mining* : Forest Research 189 ; Construction Equipment Operators 489 ; Rihand Valley Development 6,009 ; Assistance to Industrial Research & Technical Services Organization 3,010 ; Hot Lines Maintenance 394 ; Water and Power Development 1,076 ; National Productivity Council 3,398 ; Delhi Thermal Plant 3,981 ; Geological Survey of India 537 ; Oil and Gas Commissiou 106 ; Assistance to Lime Industry 1 ; Assistance to Coal Industry 149 ; Assistance to C.S.I.R. 19 ; Steel Training 1,213 ; Assistance to Phosphorous Industry 13 ; Orissa Iron Ore 18,348 ; River Valley Development 730 ; Mineral Development 1,149 ; Building Material Development 34 ; Exploratory Lignite Excavation & Development 606 ; Augmenting Steel Supply 41,054 ; Improvement of Rajasthan Power Facilities 1,046 ; Survey of the Expansion of the Sindri Fertilizer Plant 17 ; Provision of Industrial Technical Services 2,056 ; Mineral Survey Development 103 ; Flood Control 315(*c*) ; Industrial Programme Adviser 154 ; Technical Assistance to Irrigation Research Institute 92 ; Steel Casting Foundry 1 ; Steel Standards 142 ; Tele-Communication Development 47 ; Marketing Conference & Study Tour 5 ; Machine Tool Industry Development 18 ; Natural Resources Programme Development 10 ; Steel Industry 17 ; Bokaro Steel Plant 686 ; Non-Metalic Minerals and Productions 47 ; Tubewell Casing 1,954 ; Cement Manufacturing Equipment 6,231 ; Rural Electrification 2,945 ; Total 98,391.

*Power* : Power Generation & Distribution 174 ; Construction Equipment Training and Utilization 569 ; Total 743.

### Local Autonomous Churches

Throughout the country there are a large number of local churches, generally of a congregational order, which are fully autonomous.

This group consists of hundreds of local independent churches or assemblies on the simple N.T. pattern throughout India, having no common centralised set up but maintaining close fellowship with one another. Most of these were established through the faithful labours of Indian Nationals.

### Other Groups

Some of the other Independent Churches have been unified under two organisations:

(1) THE ALL INDIA FEDERATION OF NATIONAL CHURCHES with Rev. R. S. Modak as President and Rev. R. S. Williams as General Secretary.

(2) THE FELLOWSHIP OF CHRIST IN INDIA—BHARAT CHRIST SANGH—in Northeast India with the Rev. B. D. Roy, M.A., B.T., Dip. Ed. (Bristol) as President and the Rev. R. C. Das, M.A., as Executive Secretary.

These aim at creating an independent and indigenous church in India. At present there is no formal inter-relation. There is however a fellowship, and sometimes some co-operation.

### Lutheran Churches

*Federation of Evangelical Lutheran Churches in India:* is an expression of the spiritual unity of the Lutheran churches.

The Federation started in July 1953, a Theological College in Madras in which 8 of its constituent bodies now co-operate. This institution is named as *The Gurukul Lutheran Theological College and Research Institute*, and directs its course of study to the B.D. and M.T.L. degree. A further aim is graded research in both Christian and non-Christian religions against the Indian background. It has a governing council of 11 members and is established at Gurukul, Madras 10.

The general headquarters for India, Pakistan, Burma and Ceylon are located at Salisbury Park, Poona. R. L. Lowry, President; C. R. Bonney, Secretary; C. B. Guild, Treasurer. (Office Address: Post Box 15, Poona.)

## SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker and was for many years under his control, with Headquarters in India. For some time now, the areas occupied have been divided for administrative purposes into 6 Territories, each under a Territorial Commander; and one smaller Command. The headquarters for Pakistan are at Lahore.

*North-Eastern Territory*, with Headquarters at Calcutta.

*Western Territory*, with Headquarters at Bombay.

*Madras and Andhra Territory*, with Headquarters at Madras.

*Southern Territory*, with Headquarters at Trivandrum, in Kerala.

*Ceylon Territory*, with Headquarters at Colombo.

*Burma Command*, with Headquarters at Rangoon.

The Registered Audit and Editorial office is at Poona.

The Commanders are directly responsible to the International Headquarters in London.

**North-Eastern Territory.**—The area in this Territory is the Salvation Army work in the Punjab (India), Uttar Pradesh, Orissa, Bengal, Delhi, Assam, Bihar, Manipur and Cachar.

Evangelistic work is extensively carried on.

Medical work is carried on in one Hospital which is in Dhariwal, Punjab and also dispensaries.

There are boarding and day schools, Social Service Centre in Calcutta, a Young Women's Hostel, and orphanages for both girls and boys. A home and school for the Blind at Kalimpong. 'Red Shield' Guest House, Calcutta.

| | |
|---|---|
| Village centres at which the S. A. works | 2,127 |
| Officers and Employees | 605 |
| Social Institutions | 12 |
| Boarding and day schools | 13 |
| Hospital | 1 |
| Guest House | 1 |

*Territorial Headquarters :* 37, Dharamtala Street, Calcutta 13.

*Territorial Commander :*—Lt. Commissioner Lawrence Fletcher.

**Madras and Andhra Territory.**—Embraces Madras City, the central and northern districts of Madras, Andhra Pradesh and Mysore. 455 fully commissioned officers and 365 workers are fully occupied in evangelical, educational and village uplift work carried on in just over 339 villages, a high school with hostels for boys and girls, a Training Institute for men and women selected for officership ; agricultural settlement of 2,782 men, women and children —many work at Chirala, the others on the land. A Leprosy Hospital, General Hospital, a Social Services Department where wastepaper sorting, etc. is carried on, and a Women's and Children's Home in Madras complete the list of institutions where work is going forward.

*Territorial Headquarters :*—The Salvation Army, 1C, Ritherdon Road, P.O. Box 453, Vepery, Madras 7.

*Territorial Commander :*—Colonel Arthur G. Long.

*Chief Secretary :*—Colonel S. Gnanaseelan.

**Southern India Territory.**—The Territorial Headquarter is in Trivandrum in Kerala State.

In 1,153 Corps and Centres of work, the majority of officers labour among the village population. The Army has a membership in South India of 102,383.

This territory is divided, for administrative purposes into 14 divisions, 5 among the Tamil-speaking people and 9 among those who speak Malayalam.

The Catherine Booth Hospital at Nagercoil, 12 miles from Cape Comorin is a 360 bed general hospital with special departments in ophthalmology, plastic and reconstructive surgery and a modern obstetric block. Radiotheraphy by Deep X-Ray and radium is available and a new Physiotheraphy Department with associated Rehabilitation Department (in which surgical boots and appliances are made). Wards for the Surgical Rehabilitation of leprosy were opened in 1963. In 1963 out-patients were cared for at the Catherine Booth Hospital and Branches with 4,000 operations performed. Schools of Nursing, Midwifery, Radiography and Physiotheraphy are maintained.

The Evangeline Booth Leper Hospital at Puthencruz in Central Kerala, accommodates 200 patients. These institutions carry on work in accordance with the highest traditions of Christian service.

Staff in the Territory consist of 1,056 officers & 439 employees. There are 404 Officered Corps and 111 societies, 28 primary day schools, 2 boarding schools, 1 middle school, 1 high school, 1 training college, 572 outposts, 1 women's industry.

*Territorial Headquarters :*—Kowdiyar, Trivandrum 3.

**Western India Territory.**—This territory comprises Corps 242 ; Outposts 674 ; Social Institutions 14 ; Day Schools 67 ; Boarding Schools 2 ; Training College 1.

Besides the evangelical operations there are in this Territory, two large Hospitals, the Emery Hospital at Anand, and the Evangeline Booth Hospital at Ahmednagar and two dispensaries. Patients treated at both Hospitals during 1964 were—Out-patients 13,594, In-patients 3,178 ; Major Operations performed 413 ; Minor Operations performed 1,034. Both Hospitals are well-equipped and have a Nurses' Training School attached.

Social work in Bombay includes the King George V Memorial Infirmary, and Lady Dhunbai Jehangir Home for Destitutes, Industrial and Rescue Home for Women at Matunga and Industrial Home for Men at Byculla. A night shelter for men where about 50 men are given shelter every night. A well-equipped Red Shield House, is situated on Merewether Road, Fort, Bombay. Accommodation for visitors to Bombay may be secured there.

*Territorial Headquarters :*—P.O. Box 4510, Morland Road, Byculla, Bombay 8. B. C.

*Territorial Commander :*—Lieut. Commissioner Stanley Hannam.

*Chief Secretary :*—Col. Maganlal Mulji.

# MONEY SUPPLY

According to the Reserve Bank's Report on Currency & Finance, Money supply expanded during 1964-65, though the pace of expansion was made slower as compared to that in the previous year reflecting partly the slackening tempo of growth in industrial output and partly the impact of measures taken by the monetary authorities to restrict expansion in bank credit and curb the growth of liquidity in the economy. Money supply expanded by Rs. 328 crores or 8·7 per cent. as compared to Rs. 442 crores or 13·4 per cent in 1963-64 and Rs. 264 crores or 8·7 per cent. in 1962-63. In the 1964 slack season, as was normally expected, there was a contraction in money supply of Rs. 33 crores as against an unseasonal expansion of Rs. 30 crores in the 1963 slack season. In the 1962 slack season the contraction was of the order of Rs. 63 crores. In the 1964-65 busy season also, the expansion in money supply was smaller than in the preceding busy season though it was higher than in the 1962-63 busy season.

It was observed that in 1963-64, deposit money accounted for nearly one-half of the increase in money supply, whereas during 1962-63 the increase in money supply was shared between currency and deposit money roughly in the proportion of 2 : 1. During 1964-65, increase in money supply was shared equally by currency with the public and deposit money (Rs. 164 crores each).

As regards the factors contributing to the monetary expansion, net bank credit to the Government continued to be the principal factor influencing the expansion in money supply, though the rate of its increase during the year was lower than in the preceding year. Net bank credit to Government rose by Rs. 235 crores as compared to Rs. 281 crores in 1963-64 and Rs. 269 crores in 1962-63. The smaller rise this year was mainly due to lower growth in the Reserve Bank credit to Government reflecting a levelling off of the tempo of growth of defence expenditure coupled with a smaller increase in the non-developmental expenditure, the extent of rise being Rs. 127 crores this year compared to Rs. 195 crores in 1963-64. The rate of increase in net bank credit to the private sector (mainly to private trade and industry), registered an appreciable slowing down during 1964-65 ; the increase under this head was Rs. 74 crores as compared to Rs. 163 crores in 1963-64 and Rs. 105 crores in 1962-63. The smaller increase this year was mostly explained by a substantially larger rise in time deposits of banks (adjusted for P.L. 480 and P.L. 665 funds) of Rs. 162 crores than in the preceding year (Rs. 81 crores) and partly by restrictive credit controls imposed by the Reserve Bank of India. If, seasonal variations in money supply and the factors affecting them are considered, it is seen that while in the slack season of 1964, net bank credit to the private sector showed a contraction of Rs. 180 crores in contrast to an expansion in net bank credit to the Government of Rs. 139 crores, in the busy season of 1964-65, the expansion in net bank credit to the private sector was substantially larger (Rs. 276 crores) than that (Rs. 165 crores) to the Government following a record rise in scheduled bank credit ; it may be noted that the busy season expansion in bank credit this year was somewhat prolonged and continued up to mid-May 1965. For the financial year, the movement in balance of payments as measured by changes in foreign exchange assets of the banking sector exerted a contractionary impact on money supply of the order of Rs. 19 crores as against its expansionary impact last year (Rs. 39 crores). Other factors comprising mainly the net non-monetary liabilities of the banking system exerted an expansionary influence (Rs. 38 crores) as agianst their contractionary role in 1963-64 (Rs. 41 crores).

**VARIATIONS IN MONEY SUPPLY** (Rs. Crores)

| ITEM | 1962-63 (1) | 1963-64 (2) | 1964-65 (3) |
|---|---|---|---|
| 1. Currency with the Public .. .. .. | + 178 | + 222 | + 164 |
| 2. Deposit Money .. .. .. .. .. | + 86 | + 216 | + 164 |
| 3. Money Supply .. .. .. .. | + 264 | + 442 | + 328 |
| **FACTORS AFFECTING MONEY SUPPLY** | | | |
| A. Net Bank credit to Government Sector(*a*) .. | + 269 | + 281 | + 235 |
| B. Net Bank Credit to Private Sector(*a*) .. | + 105 | + 163 | + 74 |
| C. Net Foreign Exchange Assets .. .. | — 43 | + 39 | — 19 |
| D. Others (Increase —) .. .. .. .. | — 67 | — 41 | + 38 |

(*a*) Adjusted for P.L. 480 and P.L. 665 deposits with banks in India other than the Reserve Bank but ignoring the transfer of P.L. 480 deposits from the State Bank to Reserve Bank (Rs. 40 crores) during November 1964—March 1965.

# PUBLIC FINANCE

## SOURCES OF REVENUE AND EXPENDITURE

THE principal sources of Central revenue are: customs duties, excise duties levied by the Central Government, corporation tax, income tax (excluding taxes on agricultural income), wealth tax, estate and succession duty, the earnings from the mints, terminal taxes on goods or passengers carried by railway, sea or air, taxes on railway fares and freights, taxes (other than stamp duty) on transactions in stock exchange and future markets, stamp duty on bills of exchange, cheques, bills of lading, letters of credit, insurance policies, transfer of shares, etc., taxes on sale and purchase of newspapers and on advertisements in newspapers.

The railways and the posts and telegraphs contribute to the Central revenues. There are also the profits on the Government industrial undertakings.

About as much as 81 per cent of the revenue is derived from the customs, excise duties, corporation and income-taxes.

The principal sources of revenue for the individual States are: State taxes (on agricultural income, lands and buildings, mineral rights, consumption or sale of electricity, sale or purchase of goods other than newspapers, advertisements other than in newspapers, goods and passengers carried by road or on inland water-ways, vehicles, animals, boats, tolls, professions, trades, luxuries, amusements), capitation taxes, stamp duties, excise duties on alcoholic liquors, opium and other narcotics.

A point about the Sales Tax is worth mentioning here. The Union has the power of declaring any commodity as essential for the life of the community and thereby vetoing any sales tax levied on it by a State Government. This power comes from the Essential Goods Act of 1952.

Then there are the subventions from the Central Government. Part of the proceeds of the income-tax and excise duties are distributed among the States. There are also special grants which are made to certain States.

Collection and appropriation of taxes are not always vested in the same authority. Some taxes are levied by the Central Government but collected and appropriated by the States (stamp duties, excise duties, duties on medicines and toilet preparations). Some are levied and collected by the Union but assigned to the States (estate duties on property other than agricultural, terminal taxes on passengers, railway fares, freights, stock exchange, future markets, newspapers or advertisements). Corporation tax is collected and retained by the Union, but taxes on other incomes are levied and collected by the Union and distributed between the Union and States.

The two biggest items of expenditure of the Central Government are outlay on development programmes (capital account) and defence.

Three important heads of expenditure of the States under the revenue account are: irrigation security and social services.

Then there is public debt which consists of rupee loans, sterling loans and loans received from other countries. The rupee debt may be divided into three classes, long term loans and money market liabilities, the unfunded debt which includes provident funds, postal deposits, saving certificates, and last the deposits.

The following table shows the budget estimates of revenue and expenditure of the Government of India for 1965-66 as compared with the budget and revised estimates for 1964-65 and actuals for 1963-64:

**Revenue Receipts of the Central Government**

In crores of Rs.

| Heads of Revenue | 1962-63 Accounts | 1963-64 Accounts | 1964-65 Revised | 1965-66 Budget |

## CAPITAL ACCOUNT

The estimate of the receipts and disbursements on capital account of the Central Government are shown below. These cover receipts and disbursements connected with capital schemes undertaken by the Central Government, borrowings at home and abroad, Gold bonds, premium prize bonds, annuity certificates, treasury bills, post office savings bank including the cumulative time deposits scheme, the National Plan Savings and National Defence Certificates issued through post offices and the treasury savings deposit and defence deposit certificates sold through the public debt offices, treasuries and sub-treasuries etc. They also cover a variety of other items such as the National Defence Fund, the State Provident Funds, the investments of deposits of U.S. Government P. L. 480 counterpart funds, the various deposits under the Income-tax Act, the depreciation and reserve funds of departments like railways and posts and telegraphs and special *ad hoc* funds created from time to time by the Government.

The capital requirements of the Government are ordinarily met from four sources. Firstly, regular loans are floated and in the case of short-term requirements, treasury bills are issued, ordinarily for a period of 91 days at a time. Secondly, there is the flow of money through the postal savings bank and other small savings schemes. Thirdly, there are the receipts into the various depreciation, reserve and other funds and under the deposit heads including the National Defence Fund and the investment in special securities of P.L. 480 counterpart funds deposited by U.S. Government with the Reserve Bank of India. Fourthly any sum provided in the revenue budget for reduction or avoidance of debt or for debt redemption is also available, as it is transferred to capital by debit to the revenue budget. To the extent to which the receipt from these sources is insufficient to meet the capital requirements, the deficit has to be made good from revenue, the accumulated cash balances, and if neither is available, by the sale of *ad hoc* treasury bills to the Reserve Bank.

### CAPITAL TRANSACTIONS

The following two statements summarise the capital transactions of the Central Government.

**Capital Receipts of the Central Government**

## DEBT POSITION

The outstanding public debt of the Government of India is expected to amount to Rs. 7,842 crores at the end of the 1965-66 financial year compared to Rs. 7,183 crores in the revised estimates of 1964-65. An analysis of the debt position is shown in the following statement.

Taking into account other liabilities indicated in the Statement, the overall debt stands at Rs. 11,230 crores in 1964-65 and Rs. 11,280 crores at the end of 1965-66.

**Summary of Debt Position** (Rs. crores)

| | As on March 31, 1963 (Acctts.) | As on March 31, 1965 (Revised) | As on March 31, 1966 (B. E.) |
|---|---|---|---|
| Current Loans | 2,851·04 | 3,234 | 3,350 |

## TAX PROPOSALS FOR 1965-66

The table below summarises the yield from additional taxation under major heads proposed for 1965-66.

| Tax Proposals | (Rs. crores) Estimated Revenue (−) or additional revenue (+) |
|---|---|
| I. *Direct:* | |
| Income-tax (Loss of revenue on account of proposed changes offset by increased collections expected) | — |
| Corporation tax | − 14·40 |
| Wealth tax | 1·50 |
| Total I | − 12·90 |
| II. *Indirect:* | |
| Union excise | − 7·98* |
| Customs | + 14·50 |
| Total II | 6·52 |
| III. Grand Total (I + II) | − 6·38 |

* Excludes Rs. 5·02 crores representing States' share.

### Direct Taxation

The net loss of Rs. 14·40 crores under Corporation tax is the result of modification of the existing structure of corporate taxation. However, while various changes are proposed in the general schemes of corporate taxes, the essential features which are sound remain unaltered. For instance, no changes have been proposed in respect of the divided tax in view of the continued need for a degree of restraint on dividend distribution in the context of inflationary pressures and also for generating sufficient resources for investment in the corporate sector. Like-wise, no changes have been proposed in respect of surtax.

As regards personal taxation, revenue from income-tax is expected to show a loss of Rs. 21 crores because of a few changes. The loss of revenue is, however expected to be offset by the expected improvement in tax collection.

### Indirect Taxation

Under indirect taxation, the changes proposed in union excise duties are expected to result in a net loss of Rs. 7·98 crores. However, the net effect of the changes proposed in indirect taxation including customs and excise for the budget year 1965-66 will be an increase in revenue by Rs. 6·52 crores. The additional yield from customs on account of increases in import duty on certain items like paints, colours, non-cellulostic art silk, stainless steel plates, etc. is expected to be arround Rs. 6·50 crores. In addition, there will be an increase in revenue of Rs. 8 crores as a result of the countervailing duty in steel tinplates, iron and steel products and copper. It may also be mentioned in this connection that the regulatory duty of customs at 10 per cent *ad valorem* imposed with effect from February 17, 1965, on all goods except foodgrains, fertilizers, pesticides, books and accessories used for family planning, is expected to yield Rs. 20 crores for 1965-66.

### TAX (INCLUDING SURCHARGE) PAYABLE BY A MARRIED PERSON WITH MORE THAN ONE CHILD

| Income before deduction of Annuity Deposit | Amount of Annuity Deposit | Total Income (Col. 1 minus Col. 2) | AMOUNT OF TAX | | | |

# PUBLIC SERVICES

PUBLIC Services in India can be broadly classified into four distinct categories: All India Services, Central Services, State Services and Local Bodies' Services. All India Services are common to the Union and the States and are created under Article 312 of the Constitution. The Central and State Services are intended for the administration in the respective fields assigned to the Union and the States under the Constitution. The Local Bodies in different States have their own Services though they may also utilise the State or All India Services for specific functions.

The Constitution provides for the setting up of a Public Service Commission for the Union and for each State. Two or more States may, however, join together to have a common Public Service Commission.

The Union Public Service Commission or the State Public Service Commission, as the case may be, is required under the Constitution to be consulted on all matters relating to the methods of recruitment to Civil Services and for civil posts and on the principles to be followed in making appointments to Civil Services and posts, and in making promotions and transfers from one service to another, as well as on disciplinary matters affecting a person serving under the Government of India or the Government of a State in a civil capacity.

However, the President in respect of the All-India Services and other services and posts in connection with the affairs of the Union, and the Governor in respect of the other services and posts in connection with the affairs of a State, may make regulations specifying the matters in which either generally or in any particular class of cases or in any particular circumstances, it shall not be necessary for the Public Service Commission to be consulted.

The Chairman and Members of the Union Public Service Commission, and of Joint Commissions if any, are appointed by the President of the Union while the chairman and members of a State Public Service Commission are appointed by the Governor.

A member of the Union Commission holds office for six years or till he attains the age of 65. A member of a State Commission also holds office for six years but retires earlier on attaining the age of 60.

In order to assure the independence of Public Service Commissions beyond doubt, the Constitution has provided that the Chairman of the Union Public Service Commission shall be ineligible for further employment either under the Government of India or under the Government of a State; the Chairman of a State Public Service Commission shall also be ineligible for employment either under the Government of India or under the Government of a State except as the Chairman or Member of the Union Public Service Commission or as the Chairman of any other State Public Service Commission. A Member of the Union Public Service Commission shall also be eligible for employment only as the Chairman of the Union Public Service Commission or as the Chairman of a State Public Service Commission. And a Member of a State Public Service Commission shall be eligible only for appointment as the Chairman or Member of the Union Public Service Commission or as the Chairman of that or any other State Public Service Commission.

The Chairman or any Member of a Public Service Commission shall only be removed from his office by an order of the President on grounds of misbehaviour after the Supreme Court, on reference being made to it by the President, has, on inquiry held in accordance with the procedure prescribed in that behalf, reported that the Chairman or such other Member, as the case may be, ought on any such ground to be removed.

In the discharge of their functions, the Union and State Commissions conduct examinations for recruitment to Government services.

The Union Public Service Commission also serves as the Commission for the Union Territories.

The annual reports of the Public Service Commissions which are required to include a list of cases in which Government did not accept the advice of Commissions, together with memoranda from the Government explaining the reasons for non-acceptance of the advice of the Commissions on such matters, are placed before the appropriate legislature.

In addition to the Union Public Service Commission, there are the following Public Service Commissions in different States:— Andhra Pradesh Public Service Commission (Hyderabad). Assam Public Service Commission (Shillong). Bihar Public Service Commission (Patna). Gujarat Public Service Commission (Ahmedabad). Jammu & Kashmir Public Service Commission (Srinagar). Kerala Public Service Commission (Trivandrum). Madhya Pradesh Public Service Commission (Indore). Madras Public Service Commission (Madras). Maharashtra Public Service Commission (Bombay). Mysore Public Service Commission (Bangalore). Orissa Public Service Commission (Cuttack). Punjab Public Service Commission (Patiala). Rajasthan Public Service Commission (Jaipur). Uttar Pradesh Public Service Commission (Allahabad). West Bengal Public Service Commission (Calcutta).

## ALL INDIA SERVICES

Under the federal system of Government that exists in this country, there are 'Central Services' to administer purely central subjects such as defence, foreign affairs, railways, posts and telegraphs, customs, income-tax, etc. The officers of these services are in the exclusive employ of the Central Government. The subjects lying within the field of State autonomy such as land revenue, agriculture, forest, education, health, etc. are administered by States Services. In addition, India also has a third category of services known as the All India Services (I.A.S./I.P.S.) created under Article 312 of the Constitution. These services are common to the Centre and States, officers of these services are liable to serve in connection with the affairs of a State or under the Union Government: mostly both at different times, although at the State end service is generally confined to the particular State of allocation.

The All India Services are organised into a number of Cadres—one for each State, except for a joint cadre each of the IAS/IPS for the Union Territories of Delhi & Himachal Pradesh. Initial recruitment is made by the Central Government on the result of an open all India Competitive Examination held by the Union Public Service Commission. This shows the high quality inherent in a system of all India Competition. The officers so recruited are allotted by the Central Government to different State Cadres. The Central Government also arranges the initial training of recruits at Central training institutions to ensure a certain uniformity of standards. The strength of each cadre is so fixed as to include a reserve of officers for service under the Central Government on tenure deputation for periods varying from three to five years. This system ensures that:

(*i*) evolution of high policies is not divorced from practical administration in the field acquired in the States: and the experience of different States is pooled at the policy making levels of the Union Government;

(*ii*) the States, derive the benefit of their officers acquiring an all India outlook;

(*iii*) the interchange of officers contributes to the administrative unity of the country.

The control of the Central Government over the All India services is exercised through the various rules and regulations framed by it, in consultation with the State Governments. In all important matters such as pay, cadre structure, seniority, pension, leave, discipline and appeal etc., apart from recruitment and promotion, uniform conditions of service have been provided. The more serious penalties such as reduction in rank, removal or dismissal are exercised only by the Central Government.

Recruitment to the two All India Services is made on the basis of an open competitive written examination, supplemented by a personality test, conducted by the Union Public Service Commission except for 25 per cent of the senior duty posts in the various State cadres of the two Services which are reserved for promotion from the State Civil Service and the State Police Service Officers respectively, including a proportion (15% of the above) from among any persons of outstanding ability and merit serving in State Services other than the State Civil Service.

The total authorized cadre strength of the I.A.S. and I.P.S. in the different States was 2,474 and 1,342 respectively as on 1st Jan. 1965 as against 1,206 and 590 respectively in 1950.

The State-wise break-up of I.A.S. and I.P.S. respectively is as follows: Andhra Pradesh 176, 80; Assam 117, 52; Bihar 188, 71; Gujarat 147, 67; Jammu & Kashmir 33, 26; Kerala 85, 37; Madhya Pradesh 201, 148; Madras 164, 57; Maharashtra 196, 106; Mysore 125, 68; Orissa 170, 79; Punjab 162, 103; Rajasthan 144, 80; Uttar Pradesh 314, 175; West Bengal 169, 128.

In 1964, 169 and 128 officers were appointed to the I.A.S. and I.P.S. respectively on the results of the competitive examinations conducted by the U.P.S.C. During the same period 40 and 11 officers were appointed by promotion selection to the I.A.S. and I.P.S. from the State Services.

The States Reorganisation Commission's recommendation that at least 50 per cent of new entrants to the All-India Services be from outside the State has been implemented in case of both the I.A.S. and I.P.S.

### New All India Services

There are two All India Services, *viz.*, the Indian Administrative Service and the Indian Police Service at present. Legislation providing for the constitution of three more All India Services, *viz.*, the Indian Services of Engineers (Irrigation, Power Buildings and Roads), the Indian Forest Service and the Indian Medical and Health Service has been enacted and the services will be constituted in due course.

The Union Government propose to introduce legislation during 1965 winter session of Parliament to amend the All-India Services Act, 1951, to bring within its scope two new all-India services, one for agriculture and the other for education (general and technical).

All State Governments have agreed in principle to the creation of these two services. The Rajya Sabha also adopted a resolution in March, 1965 suggesting that it was necessary and expedient in the national interest to create these two services.

The creation of new all-India services was recommended by the States Reorganisation Commission as one of the measures to be adopted to help in promoting national integration. New services for engineering, forestry and medical and public health have already been agreed upon by all the State Governments. The two latest additions proposed for agriculture and education are in furtherance of this process.

Consultations are now taking place between the Centre and the State Governments about the initial constitution of the two new services and it is hoped that once legislation is enacted, more rapid progress would be made in organising them.

### Training

NATIONAL ACADEMY OF ADMINISTRATION: In the context of the objectives of a welfare State and the need for the successful implementation of the Five Year Plans, it has been considered essential that civil servants particularly those at the higher levels, should possess not merely professional skill and experience but also a wide outlook, greater adaptability and a deeper realisation of the ethics and obligations of public service. With this object in view, a combined course of training for new entrants to All India Services and Central Services, in background and foundational subjects, is now imparted at the National Academy of Administration which was set up at Mussoorie in September 1959.

The programme of training of probationers of All India Services and the Central Services class I, in the foundational subjects has since undergone some change. Due to increase in the number of probationers, the scheme of the foundational course was reviewed. It was considered that besides the accommodation difficulties, it has become difficult to ensure the requisite personal contact between them and the directing staff. It has, therefore, been decided that two foundational courses may be conducted with effect from 1965 instead of one previously. The probationers of various services to be given training in foundational subjects in these courses are as under :—

First Foundational Course : 1st July to 30th Oct. : IAS., IFS., IPS., IA & AS., IRAS., IDAS., IITS.

Second Foundational Course : 15th Feb. to 15th June : TT & C.D., MLCS., IOFS., IPOS., CIS and IC & ES.

The Academy also arranges a refresher course for Central and State Government Officers with 10 to 15 years' service.

The Director of the Academy also functions as Director of Training, Government of India and in the latter capacity co-ordinates the training programmes of probationers in the All India Services as well as Central Services.

### Retirement Age

The retirement age of the Central Government employees has been extended from 55 years to 58 years.

### Central Health Service

Rules for the Central Health Service were published on May 1, 1963 and they came into force on May 15, 1963. The Service will cover all medical and public health posts under the Central Government and the Union Territories, other than those under Ministries of Railways and Defence.

The initial strength of the Service at the constitution will be 1,030 permanent posts and 1,303 temporary posts.

The Service will be divided into two classes : Class I and Class II, comprising four classes of scale of pay divided into five categories as shown below :—

| Class of scale | Category | Scale of pay | Classification |
|---|---|---|---|
| Super-time scales | A (*i*) D.G.H.S. | Rs. 2,750 fixed | |
| | (*ii*) Additional D.G.H.S. | Rs. 2,250 fixed | |
| | (*iii*) Other posts | Rs. 1,600–100–2,000 | Central Health Service, Class I |
| | B | Rs. 1,300–60–1,600 | |
| Senior scale | C | Rs. 675–35–850–40–1,050–50–1,500 | |
| Junior scale | D | Rs. 425–25–450–30–600–35–705–E.B.–35–950 | |
| Class II scale | E | Rs. 325–25–500–30–590–E.B.–30–800 | Central Health Service, Class II |

## QUALIFICATIONS FOR CENTRAL SERVICES

The lower levels of Government services, namely, Class III and IV services are generally not required to have a university degree.

The higher level of Government services, All India and Central Class I and II will continue to require a candidate to possess a university degree. Generally the qualifications and age limits prescribed are as given below :—

| Service | Qualifications | Age limits |
|---|---|---|
| I. SUPERIOR SERVICES | | |
| All India and Central (Class I) | University Degree essential. | 21–24 years ; for Indian Police Service—20–24 years. |
| II. MIDDLE GROUP SERVICES | | |
| (*i*) Central Class II (Gazetted) | University Degree essential. | 21–24 years. |
| (*ii*) Central Class II (non-gazetted) | University Degree essential. | 20–24 years. |
| (*iii*) Central Class III (non-clerical) other than SAS Apprentices and Divisional Accountants in the Indian Audit & Accounts Service. | Intermediate/Senior Cambridge/Higher Secondary or equivalent qualifications. | 19–23 years. |
| III. CLERICAL SERVICES | | |
| Upper Division other than those recruited direct to this grade in the Indian Audit & Accounts Department. | Intermediate/Senior Cambridge/Higher Secondary or equivalent qualifications. | 18–21 years. |
| Lower Division. | Matriculation or equivalent qualifications until replaced by Higher Secondary. | 18–21 years. |

The above will not, however, apply to technical, professional and specialist services.

## CENTRAL SERVICES

The total number of Central Government employees (including work charged personnel, contingent staff and local recruits abroad) as on March 31, 1963 was 23,48,675.

All employees declared surplus as a result of the economy drive are reported to the Special Cell in the Directorate General of Employment and Training, which has been created for re-absorption of surplus employees in alternative posts. All vacancies occurring in Central Government offices are also reported to the Special Cell. Surplus employees on the register of the Special Cell are given top priority for employment in these vacancies. Vacancies against which they cannot *prima facie* be considered are released to the Regional Employment Exchange.

Recruitment to the non-technical Central Class I Services also takes place on the basis of an open competitive written examination conducted by the Union Public Service Commission.

The following are the more important among the class I Central Services :—

Archaeological Service (Class I); Botanical Survey of India (Class I); Central Engineering Service (Class I); Central Electrical Engineering Service (Class I); Central Health Service (Class I); Central Revenues Chemical Service (Class I); Central Secretariat Service : (*a*) Selection Grade, (*b*) Grade I, (*c*) Grade II, General Central Service (Class I); Geological Survey of India (Class I); Indian Audit and Accounts Service; Indian Defence Accounts Service; Indian Foreign Service (Class I); Indian Meteorological Service (Class I); Indian Postal Service (Class I); Indian Posts and Telegraphs Traffic Service (Class I ; Indian Revenue Service : (*a*) Customs Branch (Indian Customs Service, Class I); (*b*) Central Excise Branch Central Excise Service (Class I); (*c*) Income Tax Branch (Income Tax Service, Class I); Indian Salt Service (Class I); Mercantile Marine Training Ship Service (Class I); Mines Department (Class I); Overseas Communications Service (Class I); Survey of India (Class I); Telegraph Engineering Service (Class I); Zoological Survey of India (Class I); Indian Frontier Administrative Service (Class I); Central Legal Service (Class I); Railway Inspectorate Service (Class I); Indian Foreign Service (Branch B); Central Information Service; Indian Supply Service (Class I) and Indian Inspection Service (Class I); Indian Statistical Service; Indian Economic Service.

## INDUSTRIAL MANAGEMENT POOL

For staffing senior managerial posts in the public enterprises operating under the Union Ministries, the Government of India constituted in November, 1957 an Industrial Management Pool. For the present, the Ministries of Steel and Mines, Industry and Supply, Commerce, Transport and Civil Aviation are participating in the Scheme which is under the administrative control of the Union Ministry of Home Affairs. Any other Ministry concerned with the running of industrial undertakings may later join the scheme. At present there are 109 officers of the Pool working in various undertakings.

## SCIENTISTS' POOL

The Scientists' Pool under the Council of Scientific and Industrial Research was established in 1958, to provide temporary placement for well-qualified Indian scientists, technologists, engineers and medical personnel until they are absorbed in regular employment. This Pool is mainly intended for scientific and technical personnel who return from abroad after acquiring high qualifications in their subjects. There is also provision for the appointment of persons with Indian qualifications who have outstanding academic records. A limited number of places in the Scientists' Pool are also now available for placement of persons with high qualifications in some branches of Social Science. All persons enrolled in the Indians Abroad Section of the National Register of Scientific and Technical Personnel are considered for the selection to the Pool. Advertisements are also issued periodically to enable suitable persons to apply.

Persons selected to the Pool are attached or seconded to Government Departments, State Undertakings, National Laboratories, Universities or Scientific and technical institutions, and other establishments including those in the private sector.

Six hundred nineteen persons were working in the Pool on June 1, 1965. More than 3,500 persons have been selected for the scientists' pool since its constitution in 1958. The persons selected to the pool, start usually on a monthly salary between Rs. 400 and Rs. 700 per month. 871 have so far left the "Pool" on securing regular appointment.

The number of persons selected to the pool from various countries of training up to Sept. 1, 1965:

| Country of training | Science | Engg. | Tech. | Medicine | Total |
|---|---|---|---|---|---|
| U.S.A. | 712 | 616 | 89 | 159 | 1,576 |
| Canada | 110 | 46 | 5 | 23 | 184 |
| U.K. | 139 | 435 | 62 | 816 | 1,452 |
| W. Germany | 49 | 182 | 23 | 7 | 261 |
| Other European countries | 55 | 75 | 14 | 6 | 150 |
| Other Countries | 24 | 39 | 2 | 3 | 68 |
| India | 57 | 10 | 4 | 38 | 109 |
| Total | 1,146 | 1,403 | 199 | 1,052 | 3,800 |

The Secretariat Training School imparts training in various subjects including training in typewriting, to the ministerial staff of the Govt. of India, namely, Section Officers, Assistants and Lower Division Clerks who are recruited on the results of the Union Public Service Commission examinations and also to those who are already employed under the Government of India.

During 1961, a new 3 months' course had been instituted to impart specialised theoretical and practical training in work involving dealings in cash and maintenance of accounts, to select ministerial officials of the Secretariat and its attached offices. The aim of this course is to create a strong corps of trained officials well-versed in cash and accounts matters.

From April 1, 1965, an 8 weeks training in work study O. & M. techniques has been started. The aim of this course is to train officials for manning O. & M. work study units and for implementing programmes of administrative reforms in Central and State Governments.

## POLICE TRAINING

The Central Police Training College was established by the Government of India at Mount Abu on Sept. 15, 1948. to train I.P.S. probationers with the object of centralising the training of All India Police Service Officers. Before this the I.P. officers were trained in their respective State training centres after recruitment.

General theoretical training as well as practical professional training is imparted to the probationers. The I.P.S. probationers are taught criminal law, legal procedure and medical jurisprudence. They are trained in methods of observation of the scene of crime, the use of scientific aids like examination of finger-prints, foot-prints, blood strains, photography, handwriting etc. as aid to the detection of crime.

## SERVICE CONDITIONS

The Public Employment (Requirement as to Residence) Act, 1957 provides that there shall not be any condition of residential qualification for any public service in India except in regard to certain non-gazetted appointments in subordinate posts in the Telangana area of Andhra Pradesh and in the Union Territories of Himachal Pradesh, Manipur and Tripura. The special provisions made in respect of these areas will, however, be operative only for a specified period.

The conditions of service of Central Government servants and norms of conduct for them are embodied in four sets of rules *viz.* the Fundamental and the Supplementary Rules, the Civil Service Regulations, the Central Civil Service (Conduct) Rules and the Central Civil Service (Classification, Control and Appeal) Rules. The Fundamental and the Supplementary Rules and the Civil Service Regulations were framed many years ago. The Conduct Rules and the Classification (Control & Appeal) Rules are more recent.

## SECRETARIAT TRAINING SCHOOL

The Secretariat Training School was started in Delhi in May, 1948 to give the new entrants to the Central Secretariat "pre-entry" training. It has since been placed on a permanent footing and functions as an attached office under the administrative control of the Union Ministry of Home Affairs.

The Conduct Rules require every Government servant to maintain integrity and devotion to duty. Government servants are expected to avoid participation in politics except to the extent of casting their votes by secret ballot at elections. They may not offer themselves as candidates even for elections to municipal and other local authorities. The rules provide that Government servants shall not join or continue to be members of asssociations the objects or activities of which are prejudicial to the interests of the sovereignty and integrity of India or public order or morality. Revised rules for recognition of Service Associations/Unions of Government employees are being framed. The Conduct Rules disallow non-industrial employees to organise strikes or demonstrations in furtherance of their service interests.

Staff Councils consisting of representatives of the different sections of employees and the nominees of Government have been in existence in some of the Ministries and other organisations for the purpose of promoting employer-employee understanding and to serve as a forum for discussion of general questions affecting the employees' conditions of service. With the object of promoting harmonious relations and of securing the greatest measure of cooperation between the Government in its capacity as employer and the general body of its employees in the matter of common concern and with the object, further, of increasing the efficiency of public service, the Government of India has decided to establish a machinery for joint consultation and arbitration of unresolved differences. The Joint Councils are being set up at National/Departmental/Regional/Office levels. They will replace the Staff Councils.

The Conduct Rules for the All India Services and the Railway Services require, as in the case of the Central Civil Services, that Government servants' transactions in immovable and movable property should in specified circumstances be reported to Government either for their information or for according sanction to those transactions. Officers of the All India Services and of the Class One Central Services may not take up commercial employment within two years of their retirement from Government service without first obtaining Government's permission. The son, daughter or other dependant of such officers may take up employment with a private firm having dealings with Government only after the officer concerned has reported the facts to Government and obtained their permission.

## ADMINISTRATIVE VIGILANCE DIVISION

The Administrative Vigilance Division was set up in August 1955 in pursuance of the decision of the then Home Minister that there should be in the Ministry of Home Affairs an organisation which would assume the overall responsibility and provide the necessary drive, direction and coordination to ensure sustained and rigorous action against lack of integrity. The Administrative Vigilance Division functions substantially in an advisory capacity in keeping with the basic principle that initiative for prevention of corruption in a Ministry/Department in its sphere of activity must come from within that Ministry/Department. Reference to the Division on individual cases cover a wide range, advice being sought on technical points of procedure and the assessment of merits in individual cases.

Cases relating to members of the following Services are dealt with in the Ministry of Home Affairs—

(1) All India Services—

(*a*) cases relating to members of such services who are serving in connection with the affairs of a State Government where it is proposed to impose the penalty of dismissal, removal or compulsory retirement;

(*b*) all cases relating to members of such services borne on the Delhi Himachal Pradesh Cadre.

(2) Central Secretariat Service (Selection Grade and Grade I).

Consequent on decentralisation of the three Central Secretariat Services, control over staff of and up to the grade of the Section Officers of the Central Secretariat Service and over the Central Secretarial Stenographers' Service, Central Secretariat Clerical Service was transferred to the Administrative Ministries/Departments concerned.

(3) Industrial Management Pool.

(4) Indian Economic Service.

(5) Indian Statistical Service.

The agencies at present responsible for implementing the anti-corruption measures of the Central Government are :—

(*a*) The Administrative Vigilance Division in the Ministry of Home Affairs; (*b*) The Vigilance Units in the respective Ministries/Departments and their attached and subordinate offices and in the public sector undertakings; (*c*) Central Bureau of Investigation (The Delhi Special Police Establishment has been merged with it as one of the divisions); (*d*) Central Vigilance Commission.

A measure of the work done by the Administrative Vigilance Division during the last five years is given below :

**Complaints**

| Year | Carried over from previous year | Received during the year | Total | Disposed of | Percentage of disposal | Pending at the end of the year |
|---|---|---|---|---|---|---|
| 1960 | 2,283 | 8,438 | 10,721 | 8,548 | 79·73 | 2,173 |
| 1961 | 2,173 | 8,308 | 10,481 | 8,148 | 77·74 | 2,333 |
| 1962 | 2,333 | 18,128 | 20,461 | 16,178 | 79·06 | 4,283 |
| 1963 | 4,283 | 20,914 | 25,197 | 19,925 | 79·07 | 5,219 |
| 1964* | 5,228 | 22,985 | 28,213 | 21,425 | 75·95 | 6,788 |

* Variation in figures of pendency is due to organisational changes in the Ministries/Departments etc.

**Vigilance Cases**

| | | | | | | |
|---|---|---|---|---|---|---|
| 1960 .. .. | 3,655 | 9,650 | 13,305 | 9,530 | 71·63 | 3,775 |
| 1961 .. .. | 3,755 | 11,361 | 15,116 | 10,973 | 72·52 | 4,143 |
| 1962 .. .. | 4,143 | 15,134 | 19,277 | 13,454 | 69·79 | 5,823 |
| 1963 .. .. | 5,823 | 14,291 | 20,114 | 13,967 | 69·44 | 5,665 |
| 1964* .. .. | 5,670 | 14,539 | 20,209 | 13,728 | 67·98 | 6,481 |

* Variation in figures of pendency is due to organisational changes in the Ministries/Departments etc.

*Note :* All the complaints and vigilance cases do not relate to charges of bribery and corruption. Quite a number of them are in respect of other types of disciplinary offences.

The above vigilance cases include those initiated on S.P.E.'s recommendation.

During the period 1st Jan. 1960 to 31st Dec. 1964 major penalties (dismissal, removal, compulsory retirement, reduction in rank) were imposed on 5,958 Government servants (124 gazetted, 5,834 non-gazetted); action including imposition of minor penalties was taken against 55,251 Government servants (1,233 gazetted and 54,018 non-gazetted).

### CENTRAL BUREAU OF INVESTIGATION

The Government of India established the Central Bureau of Investigation on 1st April 1963. The Delhi Special Police Establishment has been merged in the Central Bureau of Investigation and has become its integral part as one of the Divisions. In July 1964, a new wing known as the Economic Offences Wing was established and formed part of the Delhi Special Police Establishment Division. In May 1965, still another wing was added *viz.* Food Offences Wing. The Delhi Special Police Establishment Division now consists of three wings, *viz.*, General Wing, Economic Offences Wings and Food Offences Wing. Of the 1,955 new cases relating to bribery, corruption and other malpractices registered by the Delhi Special Police Establishment Division of the Central Bureau of Investigation during 1964, 1,396 (71 per cent) were registered on the basis of information collected by its own staff. During 1964, the Special Police Establishment Division collected 2,886 informations through its own sources.

Including those pending at the beginning of year, the S.P.E. Division processed during the year 1964, 3,253 informations. Of these, 1,308 were registered as cases for formal investigation ; 702 were referred to Departments concerned for necessary action, 783 were dropped and 460 remained pending at the end of the year.

Special units have been created in the S.P.E. Division of the C.B.I. to collect information about "big corruption" and about the corruption in higher ranks.

### ORGANISATION & METHODS DIVISION

The first phase of the activities of the O & M Division, established in March 1954 for making sustained and concerted efforts for improving administrative efficiency, was directed towards creating consciousness for an ordered improvement in work handled in the Secretariat, by expediting disposal of cases and keeping track of them to avoid delay. The second phase, which began in 1961 in collaboration with the Special Reorganisation Unit of the Ministry of Finance and Committee on Plan Projects, aims *inter alia* at securing improvements in procedural competence, techniques of programming, work studies of organisations, matching of workload with staffing, and securing cost reduction in projects.

In view of the increasing importance of work study techniques in simplifying the existing methods of work and assessing staff requirements, so as to secure the maximum utilisation of men and material, the O & M Division periodically conducts instructional courses in work study and also in such specialised techniques as Operations Research. These courses are attended by officers of the lower/middle supervisory level from the Ministries as well as Commercial and Industrial State enterprises. A quarterly journal 'WORK IMPROVEMENT' is also issued by the Division covering different aspects of O & M and work study.

A Committee of Direction set up under the aegis of the O & M Division is engaged in simplifying, coordinating and rationalising the system of reporting by the different sectors of trade and industry to Government authorities.

**Education Allowances :**—With effect from March 1, 1962, an educational allowance of Rs. 15 per child for secondary and higher secondary classes and Rs. 10 for primary classes, subject to a total of Rs. 50 per month, was admissible to every Central Government servant drawing a salary of Rs. 349 or below per month.

The Government has liberalised the educational allowance scheme of Central employees (May 1964). At present, the children's educational allowance, sanctioned in 1962, is available if the children are educated at places other than the place of duty of a Government servant. Under the liberalised scheme the tuition fees payable and actually paid in the middle and higher secondary schools should be reimbursed to the employees at rates not exceeding those approved by the State Government of the area for Government and aided schools.

## PAY COMMISSION REPORT

The Second Pay Commission was appointed in Aug. 1957 to enquire into the emoluments and conditions of service of Central Government employees.

The members of the Commission were Mr. Jagannadha Das (Chairman), Dr. V. B. Gandhi, Mr. N. K. Sidhanta, Prof. M. L. Dantwala, Mrs. M. Chandrasekhar, Mr. L. P. Singh (Secretary), Mr. H. F. B. Pais (Associate Secretary)

Towards the end of 1957 the Commission submitted an interim report on which Government issued orders in Dec. 1957.

The final report was submitted to Government on Aug. 24, 1959 and was laid on the table of the Lok Sabha on Nov. 30, 1959.

The details of the report are given in the 1960-61 Directory.

## GOVERNMENT DECISIONS

On August 2, 1960 the Finance Member laid on the table of the Lok Sabha a statement giving the Government of India's decisions on the recommendations of the Pay Commission. These differed in many respects from the ones that were announced earlier.

The total cost to the exchequer would now be about Rs. 44 crores annually. The earlier estimate was Rs. 29 crores.

Below we give a brief summary.

Briefly, it may be stated that the Government has accepted all the major recommendations of the Pay Commission with a financial bearing.

The pay structure is changed with the minimum wage fixed at Rs. 80 a month.

The earlier decision to give effect to these new scales from November 1, 1959, has been rescinded and the date proposed by the Commission, namely, July 1, 1959, adopted.

Further the arrears for the entire period will be paid in cash.

The Commission's recommendations regarding the liberalisation of retirement benefits, casual leave and holiday and leave travel concessions have been accepted, as also the suggestions about converting temporary posts into permanent posts.

Central Government employees who get less than Rs. 350 a month have been granted a Children educational allowance, subject to fulfilment of certain conditions. These children will be eligible for education at boarding schools of their choice in the absence of suitable facilities at stations of posting.

The maximum house rent recoverable from employees getting less than Rs. 150 will be 7-1/2 per cent. of the pay. A compulsory provident fund scheme will be introduced to which employees will be required to contribute 6 per cent. of their pay. Class IV employees will have the option of a slightly lower contribution range.

Government have accepted the recommendation of the Commission that if during a period of 12 months the consumer price index remains on an average 10 points above 115, the Government should review the position and consider whether an increase in the allowance should be allowed ; and if so, at what rate.

After making the necessary review, orders have been issued to increase the dearness allowance admissible to civilian Government employees drawing a basic pay below Rs. 320 p.m. and to extend the benefit of dearness allowance to those drawing a basic pay between Rs. 320 and Rs. 399 with effect from 1-11-1961. The increase generally ranges between Rs. 5 and Rs. 10 p.m. in each case.

In terms of the recommendations of the Second Pay Commission accepted by the Government, the rates of D.A. were reviewed by the Government at the highest level on May 7, 1964.

This is because the average of the working class consumer price index for 12 months reached 135 in January.

Nearly 23 lakhs of civilian Central Government employees will get increased dearness allowance with retrospective effect from February 1, 1964.

The increase ranges from Rs. 3·50 to Rs. 15 per month, according to the pay of the employees at present eligible for the allowance.

The Government has also decided to extend the benefit of D.A. to those drawing a basic pay between Rs. 400 and Rs. 580—the D.A. being Rs. 20.

The increased D.A. will cost the exchequer Rs. 14 crores per annum.

In October 1964, when the average index rose to 145, the rates of dearness allowance was further revised giving an increase of Rs. 7·50 at the lowest pay scale and Rs. 50 at the slab 400–599.

The increased D.A. will cost the exchequer Rs. 30·78 crores per annum.

Again, when in March 1965, the average index rose to 155, the rates of D.A. were raised giving an increase of Rs. 5 at the lowest slab and Rs. 20 at the highest slab. The D.A. was also extended to Government servants drawing pay upto Rs. 1,000 per month.

The increased D.A. will cost the exchequer Rs. 25·21 crores per annum.

Orders have already been issued implementing the decisions on the recommendations relating to pension which were announced on 30th November, 1959. Government have agreed to liberalise these orders by accepting the Commission's recommendation that special pay should

also count for pension in full if the post to which it was attached was held in a substantive capacity, and to the extent of half in all other cases.

The Government have accepted and already announced their decisions on the Commission's recommendations regarding the grant of gratuity to temporary and quasi-permanent employees on their retirement, discharge from service, or death, and improvement of death gratuity in the case of permanent employees who die before completing five years of qualifying service, as also in respect of employees who are governed by the Contributory Provident Fund Scheme.

The recommendations of the Commission for improvement or liberalisation of retirement benefits in the case of scientists and technologists have also been accepted and orders issued.

Below we give some typical new pay-scales. The existing scales are given in brackets.

Indian Audit and Accounts Service : Class I—Rs. 400—1,250. ((I) Rs. 600—1,150, (II) Rs. 350—850 ).

Central Secretariat Service—Class I : Grade I : Rs. 900—1,250. (Rs. 800—1,150). Grade II : Rs. 350—900 (Rs. 530—800).

Section Officers : Rs. 350—900 (Rs. 530—800 (II) ; Rs. 275—500 (III)).

Central Secretariat Service—Class II : Assistants : Rs. 210—530 (Rs. 160—450).

Central Secretariat Stenographers' Service : Grade I : Rs. 350—650 (Rs. 275—500). Grade II : Rs. 210—530 ((I) Rs. 250—375, (II) Rs. 160—330 ).

Central Secretariat Clerical Service : Grade I : Rs. 130—280 (Rs. 80—220). Grade II : Rs. 110—180 (Rs. 60—130).

Stenographers : Non-Secretariat : Rs. 130—300 (Rs. 80—220).

U.D.C. Non-Secretariat : Rs. 130—300 (Rs. 80—220).

L.D.C. Secretariat : Rs. 110—180 (Rs. 60—130).

L.D.C. Non-Secretariat : (I) Rs. 150—240, (II) Rs. 110—180 (Rs. 60—130).

Staff car drivers : Rs. 110—139 (Rs. 60—75).

Despatch riders : Rs. 100—130.

The Union Ministry of Finance have accepted all the recommendations of the Pay Commission in regard to casual labour.

It has been decided that casual labour should be paid at market rates subject to the condition that where the market rates are lower than the minimum wages fixed by the respective State Governments for comparable scheduled employments, the wages shall be the minimum wages fixed by the State Governments.

Other three recommendations of the Pay Commission accepted by the Finance Ministry are :

1. Casual employment should be restricted to work of a truly casual nature and in order to ensure that this is done, there should be a general review of the existing position :

2. All casual labour under the Central Government including those to whom the minimum wages law is not applicable, should have the benefits and safeguards provided by Rules 23-25 of the Minimum Wages (Central) Rules, 1950 relating to weekly holidays, working hours, night shifts and payment for overtime ; and

3. Long experience as casual labour should be taken into consideration while making selections for appointment to regular establishments.

The decisions of the Finance Ministry have already come into force.

Two lakh persons working under the various establishments of the Government of India come under the category of casual labour. The Ministry of Railways employs about 1·6 lakhs as casual labour and the rest are employed in the other Ministries including Defence, Posts and Telegraphs and the Central Public Works Department.

A minimum wage has also been fixed. The total expenditure involved as a result of the new decisions is expected to be a few crores of rupees.

The Government have approved of a revised scale of pay for general service officers of the Defence Services. These scales have already been announced.

The Government have accepted in principle the Commission's recommendations regarding the working conditions, canteen facilities and staff welfare. An *ad hoc* inter-departmental committee as recommended by the Commission has been set up and its report has been submitted to the Cabinet.

The Commission have recommended setting up of a Whitely type machinery, with a Central Joint Council representing the whole body of Central Government employees, both industrial and non-industrial, for negotiation and settlement of disputes. It is proposed to introduce a bill for setting up a Whitely type machinery and providing for compulsory arbitration as recommended by the Commission.

## STATISTICS

Below we give the total number of employees of the Central Government from 1953. Figures for the period 1953 to 1959 relate to 30th June of each year and from 1960, relate to 31st March of each year.

1953 : 15,60,627 ; 1954 : 16,12,552 ; 1955 ; 16,92,336 ; 1956 : 17,92,082 ; 1957 : 18,38,517 ; 1958 : 19,13,981 ; 1959 : 19,88,798 ; 1960. 20,25,237 ; 1961 : 20,94,477 ; 1962 : 21,56,220 : 1963 : 23,48,675.

The distribution of regular employees by pay ranges as on 31st March 1963 is given below :—

| | |
|---|---|
| Below–75 : .. .. | 4,15,498 |
| 75–100 .. .. | 7,83,449 |
| 100–150 .. .. | 4,83,610 |
| 150–200 .. .. | 2,88,143 |
| 200–300 .. .. | 1,41,889 |
| 300–400 .. .. | 40,884 |
| 400–500 .. .. | 20,741 |
| 500–750 .. .. | 15,066 |
| 750–1000 .. .. | 5,899 |
| 1000–1500 .. .. | 3,904 |
| 1500–2000 .. .. | 981 |
| 2000–2500 .. .. | 361 |
| 2500–3000 .. .. | 72 |
| 3000 and above .. | 140 |
| Total .. .. | 22,00,637 |

(Gazetted 33,381 ; Non-Gazetted 21,67,256).

Number of persons employed by department and class is given below. The figures are as on 31st March 1963.

**EMPLOYEES—BY CLASS AS ON 31st MARCH, 1963.**

| Class of post | No. of persons employed as on 31st March, 1963. | | |
|---|---|---|---|
| | Railways | Posts and Telegraphs | Others |
| 1 | 2 | 3 | 4 |
| Class I .. .. .. .. .. | 2,037 | 816 | 11,732 |
| Class II .. .. .. .. .. | 1,975 | 1,322 | 25,753 |
| Class III .. .. .. .. .. | 4,96,240 | 2,60,544 | 3,25,967 |
| Class IV .. .. .. .. .. | 7,27,405 | 60,563 | 3,35,866 |
| Unclassified .. .. .. .. .. | 1,111 | — | 3,306 |

| Work-charged, contingent and local recruits abroad .. .. .. .. .. | 51,571 | 59,542 | 36,925 |

# FORESTS

TOTAL Forests : 302,688 sq. miles. Percentage of Forests to Land : 21·8. Per capita forest area will be about half an acre.

Revenue : 1955–56 : Rs. 26·83 crores ; 1956–57 : Rs. 34·50 crores ; 1957–58 : Rs. 42·10 crores ; 1958–59 : Rs. 46·37 crores ; 1959–60 : Rs. 54·01 crores.

Financial return per acre of Forest : Rs. 2·60.

The forests are unevenly distributed and the production is also proportionately low, being only 2·5 c.ft. per acre per year as compared to 56·8 c.ft. in France, 37·3 c.ft. in Japan and 18·1 c.ft. in U.S.A.

Private forests : In Assam 400 sq. miles (in Khasi and Jaintia Hills), Orissa 600 sq. miles mostly in zamindari agencies, Punjab 340 sq. miles in scattered units, and Himachal Pradesh 29 sq. miles in Jabbal Division.

About 16 per cent of the total forest area is inaccessible and 45 per cent of these could yield timber and other forest products.

Systematic management and administration of forests in India date back to over a century. The first enunciation of policy was in 1894, when forests were classified into four classes : (*a*) protection forests ; (*b*) timber forests ; (*c*) minor forests ; and (*d*) pasture lands.

The limited outlook of this policy was enlarged upon by the Government of India, and the new forest policy laid down in 1952. The details are given in 1960-61 Directory.

Most of the country's forests are worked according to Forest Working Plans prepared by special staff. On the basis of present conditions and past working, these plans lay down, for a 10-15-year period at a time, silvicultural systems, schedules for thinnings and other cultural work, methods of management, staff requirements and exploitation programmes, besides development schemes for roads and buildings.

The formation of forest plantations involving a long-term policy for increased production,

is now-a-days an important feature of Indian Forestry, *e.g.* the very valuable and extensive plantations of Teak, Bluegum, Wattle, Casuarina, Sal, Deodar, as also evergreen species and softwoods for matches.

'Forests' are a State subject.

The Government of India, however, are responsible for forest research and forest education. The Ministry of Food and Agriculture in the Government of India co-ordinates forest activities in the country, but no forests are directly worked by it except the Andaman forests. The Inspector-General of Forests is their technical adviser in forest matters.

All States have separate Forest Departments. Usually a Chief Conservator of Forests (C.C.F.) heads the Department.

For purposes of administration the States are divided into one or more Forest Circles, each in charge of a Conservator of Forests.

Each Circle is in turn divided into four to eight Divisions, each under a Divisional Forest Officer. The unit of administration and execution of forest works is the Forest Range, managed by a Range Forest Officer. Four to eight of these are included in each Division. A Division may be coextensive with Civil districts or larger or smaller than those districts depending on the importance of the locality and extent of forests in them.

## EDUCATION AND RESEARCH

Forest research and education are centralised in one large institution known as the Forest Research Institute and Colleges located at Dehra Dun.

The Forest Research Institute as such came into being in 1906 as an adjunct to the then Imperial Forest College. Through progressive stages of development the Institute has now attained a position which has earned for it international prestige as evidenced by its recognition by the Food and Agricultural Organisation of the United Nations as a Centre for training in Forestry for South-East Asia.

The Forest Research Institute and Colleges are under the administrative control of the Ministry of Food and Agriculture of the Government of India. Its administrative Head is designated the President. It has under its control two Regional Forest Research Centres, one at Bangalore and the other at Coimbatore to deal with the special problems pertaining to the area. It has a strength of about 100 officers and about 1,300 other staff.

The institute was reorganised into four directorates working under the President, *viz.*, 1) The Directorate of Forest Education, 2) The Directorate of Forestry Research, 3) the Directorate of Forest Products Research and 4) the Directorate of Biological Research.

The education wing of the Institute comprising three Colleges is in the charge of the Director of Forest Education.

The Indian Forest College trains recruits of the State Governments to their gazetted forest services. The course stretches over a period of two years and the minimum qualification for admission is a B.Sc. degree.

The Northern Forest Rangers College (Dehra Dun) and the Southern Forest Rangers College (located in Coimbatore) offer training for two years to rangers selected by State Governments in the northern and southern regions of the country respectively, the minimum qualification for admission being Inter Science.

**Directorate of Forestry Research:** This has two branches (1) Silviculture Branch—studies rates of growth of the different kinds of trees, forest management, influences of forests, study of soils and forest ecology. It also has a museum, a demonstration area and experimental gardens under its control. The important cloves of fast growing poplars which hold promise of early production of industrial wood have been successfully established. Extensive work on the cultivation of economic plants is continued.

(2) The other is the Logging Branch dealing with the methods of scientific felling of trees and economic extraction and conversion of timber. Fifty sets of efficient modern logging tools supplied at half the cost by the Government of Switzerland were distributed to various States and Union Territories for demonstration purposes.

**Directorate of Biological Research:** Has six branches under it :—

(1) The Minor Forest Products Branch is engaged in economic research on forest plants which constitute about 30 per cent of the forest wealth of India and earn foreign exchange of about Rs. 40 crores annually. The branch has established Artemisia and Santonin industry in India and has done work on the cultivation of medicinal and essential oil yielding plants.

(2) The Botany Branch maintains a herbarium which has over a quarter-million carefully preserved authentic specimens from all over the world and about 3–4 thousand exotic and indigenous specimens are added every year to it. The branch takes up the identification of plants, their breeding and experiments on genetics and introduction of new species of trees in various regions.

(3) The Forest Pathology Branch specializes in investigations of tree diseases and timber decays caused by fungi with a view to evolving methods of control. This branch forms one of the centres of the Indian National Committee on Type Cultures of Micro-organisms.

(4) The Entomology Branch functions to reduce the losses to forest trees and forest products caused by harmful insects and pests.

(5) The Wood Anatomy Branch has one of the finest timber collections in the world comprising about 15,000 indigenous and foreign wood samples.

(6) The Wood Preservation Branch conducts experiments on improving the timber by impregnation with various chemicals and preservatives and thus protects it from deterioration and damage by the insects and fungi. Both the above branches coach the students for the certificate and diploma courses in these subjects, which are awarded by the Institute.

**Directorate of Forest Products Research:** Has six branches :—

(1) The Wood Seasoning Branch has designed a number of seasoning sheds and seasoning kilns including veneer driers. It has also found out Indian substitutes for foreign timbers for various wood based industries and textile mills accessories.

(2) The Composite Wood Branch undertakes to study the problems of improved woods like plywood, compregnated wood, building boards etc. and also conducts research on suitability of various glues.

(3) The Cellulose and Paper Branch is the only place in India where organised research is being done on the utilisation of forest produce and agricultural wastes for the production of pulp, paper and boards. The branch is equipped with a six-ton pilot paper plant by which the researches carried out in the laboratory are piloted before they are advised to the paper industry. The branch has diploma and short-term courses regularly in pulp and paper technology.

(4) The Timber Mechanics Branch studies the various properties of timbers and also finds out their suitability for various purposes.

(5) The Timber Engineering Branch has done work on the utilisation of non-conventional timbers and the use of short-length, small dimensioned timbers for making buildings, pavilions and bridges.

(6) The Chemistry of Forest Products Branch has done work on extraction of essential oils from the various forest produce and also Katha from *Acacia catechu* tree.

There is a well equipped Publicity & Liaison Branch for the various branches of the Institute. Their research results and activities are published in technical journals. The publication of research papers, strengthening of liaison with various woodbased industries and departments of the Government, and organisation of meetings and conferences are the main activities of this branch.

The staff of this Institute are provided with adequate housing accommodation and there is also a well-equipped rest house for visitors. The Institute has a high school, a hospital, a cooperative society, clubs, play-grounds and P. & T. office in the campus.

## U. N. AID

The U.N. is expected to help India's Rs. 1,440-lakh project of scientific survey of forest resources from its special fund.

The U.N. is expected to contribute, mainly in the form of technical experts and equipment, including helicopters and aerial survey apparatus, to the tune of Rs. 40 lakhs.

An agreement was signed in 1964-65 by the Govt. of India and representatives of U.N. Special Fund and FAO of U.N.O. for providing assistance to a Govt. Forestry project involving more than $2 6 million. The project is intended to assist development and forest incentives.

A project for pre-investment survey of forest resources to assess various forest reserves in selected regions and the scope for industrial development they offer, is being started. Another, for the establishment of four logging training centres to introduce more efficient logging technique by modern equipment and transport is also being taken up. Both these are being implemented with the help of U.N. Special Fund. To meet the requirement of wood-based industries a centrally sponsored scheme for the plantation of quick growing species is under operation. During 1961-64, an area of 68,000 acres was brought under such plantation and it was expected to extend the same to another 64,000 acres during 1964-65.

The Central Board of Forestry met in Poona in June 1964 and reviewed the progress made in the implementations of the previous recommendations. A sub-committee of the same made detailed examinations of the scope for afforestation of various canal banks.

The annual session of the Board met in Ranchi in Jan. 1965 and suggested measures for the development of forestry particularly in Andaman and Goa on a priority basis.

## FOREST PRODUCE

Forest produce is divided into two main heads—(1) Major produce, i.e., timber and firewood, and (2) Minor produce, comprising all other products, such as bamboos, canes, leaves, fruits, fibres, grasses, gums, resins, essential oils, medicinal and poisonous plants, fatty oils and fats, dyes, tans and animal and mineral products.

The annual output of timber is 274 million c.ft. and 700 million c.ft. of firewood. At present annual import of wood and wood products is of the order of 40 million c.ft.

The bulk of the timber supply is used for railway sleepers, constructional requirements, furniture, plywood (especially for tea chests), matches, etc.; but the country imports timber for specialized uses such as jute and textile mill accessories.

Exports from India are limited to selected rosewood logs for high grade furniture to Europe, teak poles for the Middle East and a few other items. Up-to-date, Indian rural economy (and perhaps only to a slightly less extent even its urban population) depends on wood fuel, much of which is derived from the forests. The large-scale use of bamboos and some forest grasses in the expanding paper industry, the exports of sandalwood and its oil and the development of medicinal plants deserve mention in connection with the utilisation of other forest produce.

In the Andamans, the North Andaman forests are leased out to a private agency for working

the virgin forests of these islands. The Middle and South Andamans continue to be worked departmentally, mainly to meet the needs of the mainland especially for matchwood and plywood logs. Over half a million tons of timber is extracted and shipped to mainland from the Andamans every year. An area of 1,200 acres is now under teak plantation for raising industrial plantations.

Nearly two million people are estimated to be employed on forest work; but the figures are probably below the actuals, as much forest labour is not full-time labour, devoting seven or eight months in the year to agriculture and the rest to forest work.

The general practice of the Forest Departments in the various States is to dispose of standing timber and forest produce by open auctions. Departmental conversion and sales of the produce itself are resorted to only where special considerations necessitate them, *e.g.* working of sandalwood because of its great value.

Timber production in India is not sufficient to meet internal needs. While foreign markets could be readily developed for Indian timber, exports are limited to small quantities of ornamental timbers for European countries, teak poles for the Middle East from the west coast and traditional despatches to markets in Pakistan.

Exports are regulated by quotas which are periodically re-examined.

Imports are regulated by protective or revenue duties and are restricted to such specialized items as are not readily obtainable from local production.

### Third Five Year Plan

The Third Plan has provided an outlay of Rs. 510 millions for various forest development programmes at the Centre and in the States, as against Rs. 193 millions during the Second Plan period. Besides expansion and intensification of the schemes initiated earlier, provision has been made in the Third Plan for new schemes for pre-investment survey of forest resources, plantation of fast-growing species, improved methods of logging and farm forestry. The progress of the principal forestry programmes during the first two years of the Plan is shown in the table below :—

| Scheme | Unit | Third Plan target | 1961-63 achievement |
|---|---|---|---|
| Fast-growing species | Million acres | 0·137 | 0·020 |
| Economic plantations | " " | 0·695 | 0·22 |
| Farm forestry | " " | 1·126 | 0·031 |
| Rehabilitation of degraded forests | " " | 0·508 | 0·169 |
| Survey | 000 square miles | 46·0 | 13·31 |
| Demarcation | 000 miles | 14·81 | 4·88 |

The total outlay on forestry schemes during the first three years of the Plan came to about Rs. 220 million.

**Forest Statistics.**

| States & Union Territories | 1962-63 (in sq. miles) forest area | | | 1962-63 Economy (in Rs. 1,000) | |

# COMMUNITY DEVELOPMENT PROJECTS AND PANCHAYATS

AT the Centre the Ministry that is responsible for community development projects is the Ministry of Community Development and Co-operation. The Ministry is responsible also for village panchayats.

The C. D. programme, which was launched on Oct. 2, 1952, entered its 13th year of operation on Oct. 2, 1964.

The Government proposes to set up 1,000 additional community development blocks during the Fourth Plan period.

The entire country has now been covered by the C. D. programme. There are 2,709 Stage I blocks, 1,910 Stage II blocks and 601 Post-Stage II blocks besides 18 blocks in the pre-extension phase.

Out of the 450 Tribal Development Blocks to be opened during the Third Plan period only 299 have so far been allotted. The balance is expected to be allotted in the last year of the Third Plan period.

The Government expenditure amounted to Rs. 188 crores during the Second Plan period. The people's contribution in terms of cash, kind and labour on schemes of community benefit during the Second Plan totalled Rs. 77·11 crores.

**BUDGET** (Rs. in lakhs)

| Loans to Govt. Servants .. | 7·00 | 4·00 |
| Total Capital Expenditure .. | 1,494·46 | 1,802·06 |

## COMMUNITY DEVELOPMENT

An outlay of over Rs. 60·89 crores for the Community Development programme is proposed for 1965–66.

*Agriculture:* Agricultural production has continued to be the main focus of community development. The administrative structure has been streamlined from the State to the village level to achieve a rapid increase in agricultural production.

Formulation of a realistic village agricultural production plan was studied by a team appointed by the Min. of Food and Agriculture with which Min. of C. D. & Cooperation was actively associated. According to the team, in any scheme of rural advancement, the role of Panchayati Raj bodies is vital, for they represent the people at the local level and mobilise the village community in the task of maximising production. Certain measures were suggested to the State Governments with a view to ensuring effective involvement of Panchayati Raj institutions in this behalf. The measures suggested included drawing up of a precise programme of action by the P. R. bodies for their respective areas indicating time schedules for each operational component and allotment of a group of villages to the officers of the Panchayati Raj institutions. The officers concerned are expected to see that the operational schedules for various programmes are being adhered to.

The Agricultural Production Board has approved a scheme of provision of incentives to progressive farmers. Prizes in the shape of agricultural implements, animal husbandry equipment and other useful items like cycles, radio, cow-dung gas plants, etc. are also proposed to be given to progressive farmers in recognition of their meritorious accomplishments. A scheme of study tours, exchange of farm leaders and facilities for higher training are also included in the proposals. A working group has been set up by the Ministry to consider and devise criteria for the classification of blocks with a view to facilitating intensive programmes of agricultural production.

The working group has submitted its report in May 1964. The group has recommended the classification of blocks under three categories, *viz.* blocks where impact programmes of agricultural development can be immediately taken up, blocks where potential for agriculture is insignificant but where there is considerable scope for undertaking intensive programmes of animal husbandry, dairying, sheep-rearing etc., and blocks where programmes of water and land development will have to be first undertaken before intensive production programmes become possible. These recommendations were endorsed by the annual conference.

*Fisheries :* Considerable progress was recorded in the implementation of the special scheme for intensive development of fisheries in 600 selected blocks covering the States of Andhra Pradesh, Gujarat, Madhya Pradesh, Mysore and U.P.

*Poultry:* Poultry programme recorded good progress during the year under review. Development of poultry in C. D. blocks around large urban centres was taken up by 11 States. The Agricultural Production Board decided that this programme should be taken up as an integral part of the programmes of agricultural development in the States.

The last annual conference recommended that a sum of Rs. 10,000 should be provided from the block budget in each block where intensive poultry programme is under implementation for loans to poultry farmers.

*Village and Small Scale Industries :* Almost all the States have accepted the minimum target of four village industries in each block. This target has been achieved in Andhra Pradesh, Gujarat, Kerala, Maharashtra, Mysore, Orissa, Punjab and U.P. To encourage the development of small industries in the rural areas, the Ministry of Industry and Supply have agreed to earmark foreign exchange to the tune of Rs. 50 lakhs for the issue of import licences for raw materials required by units in rural industrial estates. The Khadi and Village Industries Commission has agreed to provide necessary funds for promoting Khadi and village industries programmes in the block.

*Health :* There were 4,186 Primary Health Centres against 5,205 blocks on June 30, 1964.

*Adult Literacy :* During the period from October 1963 to September 1964, 46,578 Adult Literacy Centres were started, and a total of about 8 lakh adults attended them. Over the same period 86 lakhs of adults had been made literate. During the same period, 13,740 Reading Rooms/Libraries were started bringing the total to 143,026.

*Community Listening Sets. :* Over 1,85,000 community listening sets have been already supplied and located in the rural areas. It is envisaged that every Panchayat should have a commentary listening set by the end of the Third Plan period.

### SPECIAL PROGRAMMES

*Applied Nutrition :* The Applied Nutrition Programme has been taken up for implementation in 222 selected blocks. The programme aims at increased production at the village level of various protective and body-building foods and training and education of the villagers in the production, preparation and consumption of these foods. This programme is now in operation in 183 blocks in the States of Andhra Pradesh, Orissa, Uttar Pradesh, Madras, Madhya Pradesh, Kerala, Mysore, W. Bengal, Punjab & Himachal Pradesh. 34 more blocks were expected to be taken up by the end of 1965.

*Youth and Women's Programme :* The rural youth and women's club continued their social, cultural and recreational activities. During 1964-65, 1,19,709 Yuvak Mandals and 61,224 Mahila Mandals with a membership of about 23 and 13 lakhs respectively were functioning in the country.

*Balwadis :* The Integrated Child Welfare Projects, launched by the Ministry of Education in collaboration with Ministry of Community Development and Cooperation, have now been undertaken by almost all States. In all, 22,689 Balwadis were functioning in the country at the end of Sept. 1964.

*Rural Works :* From the Planning Commission the rural works programme has been transferred to the Ministry of Community Development & Panchayats with effect from Sept. 1, 1964. The programme which started in 1960 on a pilot basis in 32 blocks, now covers 995 blocks. This programme seeks to provide full-time employment to those who are under-employment or exposed to seasonal unemployment. An amount of Rs. 5·6 crores has been spent on this programme till the end of 1963-64. It was estimated that the expenditure for 1964-65 would be over Rs. 7 crores. As against 188 lakh man-days of employment generated by the programme during 1963-64, the employment to be generated during 1964-65 was expected to be 350 lakh man-days.

State-wise coverage of Rural Works Programme and number of blocks are as follows ; Andhra Pradesh 106; Assam 43; Bihar 81;

Gujarat 33 ; Jammu & Kashmir 16 ; Kerala 36 ; Madhya Pradesh 65 ; Madras 72 ; Maharashtra 128 ; Mysore 45 ; Orissa 45 ; Punjab 36 ; Rajasthan 40 ; Uttar Pradesh 169 ; West Bengal 46 ; Himachal Pradesh 28 ; Tripura 6—Total 995.

### CONSULTATIVE COUNCIL

The Ministry of Community Development & Co-operation has set up a consultative council on Panchayati Raj. The 51-member council with Mr. S. K. Dey, Minister for Community Development & Co-operation as Chairman, includes members of Parliament and State legislatures, Union and State Ministers, members of the Planning Commission, eminent individuals in various walks of life and representatives of voluntary organisations.

The council will review the progress of the implementation of Panchayati Raj with special reference to the adequacy and depth of decentralisation, suggest measures to ensure local initiative for the growth and consolidation of the Panchayati Raj movement and make proposals for training and research. The council is empowered to set up committees to deal with specific aspects of its functions. Its first meeting was held early in June 1964.

## PANCHAYATI RAJ

Panchayati Raj was in force at the end of 1963-64 in 11 States, namely Andhra Pradesh, Assam, Gujarat, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal.

Though Panchayat Samitis and Zila Parishad Act was enacted in Bihar State in Feb. 1962, and notification issued in Aug. 1963 for bringing Panchayati Raj into force, formal inauguration of Panchayati Raj has taken place only in two Districts, namely, Ranchi and Bhagalpur, on Oct. 1964.

The Kerala Panchayat Union Council and Zila Parishad Bill introduced in the State Assembly lapsed on the dissolution of the State Legislature, in Sept. 1964.

In Jammu and Kashmir State the Democratic Decentralisation Committee, set up by the State Government was to suggest suitable pattern of Panchayati Raj for the State by March 1963.

The Government of Mysore have introduced a Bill in the State legislature to give effect to the recommendations of the Committee on Panchayati Raj set up by them.

The Ministry continued to assist the State Governments in the formulation and implementation of Panchayati Raj legislation.

### CONSULTATIVE COUNCIL

During 1964-65 a consultative council on Panchayati Raj was set up. The council is a national forum reflecting different shades of public opinion for advising the Ministry on general policies regarding Panchayati Raj. The Council constituted a Committee under the chairmanship of late Shri Balwantray Mehta to suggest measures required to safeguard the integrity and to strengthen the finances of Panchayati Raj institutions. The Committee has submitted its interim report. The council has also appointed four zonal committees to study the functions of Panchayati Raj institutions in the States.

*Mehta Committee's Suggestions :* The Committee, headed by late Shri Balwantray Mehta, has recommended that the financial relationship between the State Govts. and Panchayati Raj institutions should be modelled generally on the pattern of the existing financial relationship between the Centre and the States.

Among the measures suggested by the Committee to strengthen the finances of Panchayati Raj institutions are: (1) The earmarking of the entire proceeds of land revenue in the States to Panchayati Raj institutions, and (2) the provision of capital assistance, partly with the rupee counterpart of PL 480 funds to enable Panchayati Raj bodies to create remunerative assets in the form of markets, plantations, fisheries and cottage and small scale industries.

The number of village panchayats in the country was a little over 2,19,604 as on March 31, 1964. They cover 5,49,187 villages and a population of 3,538 lakhs.

#### Santhanam Committee

The Committee on Panchayati Raj Elections, set up by the Ministry of Community Development and Cooperation, submitted its report in March 1965. The report is unanimous.

The Committee was appointed on February 22, 1964, with Shri K. Santhanam as Chairman.

The terms of reference of the committee were:

To study the different methods of elections to Panchayati Raj bodies being followed in the States with special reference to the methods and procedures which have been conducive to the vigorous and healthy growth of Panchayati Raj and to make recommendations on the following:

(1) The strength and composition and the method of election to Panchayati Raj bodies at the village, block and district levels as can ensure the democratic and efficient functioning of these bodies and the evolution of a harmonious and coordinated pattern of representative institutions ;

(2) The need for co-option, the categories to which co-option should be applied, the manner of its application and other related matters;

(3) The measures for ensuring adequate and effective representation to the weaker sections on these bodies;

(4) The method of election of office bearers of these bodies;

(5) The association of members of Parliament and State legislature with Panchayati Raj bodies ;

(6) The terms of membership and the periodicity of elections to Panchayati Raj bodies ;

(7 How far unanimity in elections is practicable consistent with the growth of democratic processes ;

(8) Whether and to what extent political parties should participate in Panchayati Raj elections ;

(9) The measures required to ensure free and fair elections to Panchayati Raj bodies and the desirability of setting up a State-level Commission for the purpose.

A study team has been set up to undertake a detailed examination of the working of the present system of audit of the accounts of Panchayati Raj institutions, to locate deficiencies, to devise measures to strengthen the system and to suggest a basic pattern of audit. A senior representative from the office of the Controller and Auditor General of India headed the team. The report of the team was expected by the end of March 1965.

*Study and Research :* An opinion survey of rural leaders and officials in Panchayati Raj institutions by the Indian Institution of Public-opinion revealed that whilst younger and better educated leadership was being thrown up, well designed training programmes were needed to educate them into an awareness of their roles and responsibilities. A majority of the rural leaders had fairly close contact with the general public. A majority of the block officials were satisfied with the change effected in their position by the introduction of Panchayati Raj. There was a fairly high degree of satisfaction among the people with the working of the Panchayati Raj though there was a feeling that safeguards were necessary to prevent the monopoly of influential groups in the villages.

A five-year plan of basic research on Panchayati Raj and Community Development has been initiated by the Indian Institute of Public Administration. The study is envisaged in four phases and is expected to be completed by 1967.

### TRAINING & EDUCATION

The training programmes have been maintained on a country-wide basis for both officials and non-officials engaged in the implementation of the development programmes. This is a continuous process. Important aspects of the training were examined closely from time to time during 1964-65 and steps taken as necessary, to reorganise and further strengthen the programme.

The National Institute of Community Development, the apex institute for training, study & research in Community Development and Panchayati Raj, functioned during 1964-65 from Hyderabad and Dehra Dun.

Five orientation courses had earlier been organised at the Institute. The instruction wing of the institute conducted two courses of each for instructors of training centres and sub-divisional officers at Rajpur during 1964-65. It also organised a special course in communication media and audio-visual aids for artists and selected instructors from the training centres.

The draft constitution of the National Institute as an autonomous registered organisation has been finalised. It is proposed to form the institute into a registered society during 1965.

The research on fundamental and applied research was stepped up.

The following are particulars of the studies completed by the National Institute of Community Development and by the training centres:—

(1) A study of benefits accruing to Tribals in the special Multipurpose Tribal blocks ; (2) A study of capital formation in agriculture ; (3) Factors associated with the adoption of recommended agricultural practices ; (4) An evolution of orientation of school teachers in community development.

By the training centres : (1) The role of production committees of the Panchayat Samiti and Gram Panchayats in planning and execution of production programme in their respective areas (Orientation and Study Centre, Junagadh) ; (2) Role of supervision in Development Administration (Orientation and Study Centre, Junagadh) ; Study of the work load of Block Development and Panchayat Officer in Punjab (Orientation and Study Centre, Nelokheri).

*Social Education :* All the eight training centres continued functioning during 1964-65 imparting special courses for the orientation of teacher-educators in Community Development. In addition, three months' condensed courses were organised at a few centres to provide training in social education to composite functionaries entrusted with the work of social education along with other duties in the blocks. Special courses were also organised at all the training centres for imparting orientation in community development to instructors from training institutions for primary school teachers.

*Mukhya Sevika Training Centres :* The ten Mukhya Sevika Training Centres continued to handle job courses for Mukhya Sevikas. The duration of the courses was 10½ months.

*Training of Extension Officers (Industries) :* It has been decided to conduct integrated training courses, on pilot basis, at the Khadi Gram Udyog Vidyalayas at Nilokheri and Rajendranagar (Hyderabad). The Small Industries Service Institutes and Khadi Gram Udyog Vidyalayas continued to conduct their separate courses of four and eight months' duration respectively.

*Higher Training of selected Gram Sevaks :* During the year 1963-64, opportunities for higher education to Village Level Workers continued impetuously. During 1964-65, 205 scholarships were awarded as against 152 in the previous year, the total number of scholarships

awarded since the inception of the scheme in 1961 came to 534.

*Training of Foreigners:* During the year 1963–64, 49 administrators and field workers from 26 countries visited India for study and training in various aspects of the programmes under the Colombo Plan and schemes sponsored by the United States Agency for International Development, etc.

*Gram Sahayaks:* The programme of training of Gram Sahayaks (village leaders) taken up in 1957 continued during the year. The number of Gram Sahayaks Training Camps held was 11,272 during the 12 months ending Sept. 1964. Total number trained from the inception of the programme is about 61 lakhs.

*Youth and Women:* The programme of training of youth and women workers associated with Yuvak and Mahila Mandals was stepped up during 1964-65. 218 twelve-day training camps for youth leaders and 85 one month camps for associate women workers were sanctioned during 1964-65. Special emphasis was laid on the training of these workers in blocks taken up for the applied nutriton and other intensive development programmes.

*Panchayati Raj Training Centres:* Following an overall review by the All India Seminar held at Nilokheri in March, 1964 comprensive suggestions were conveyed to the State Governments for securing more effective implementation of the Panchayati Raj training programme. In addition to the institutional and peripatetic training of office-bearers and members of Panchayats, training courses for children and members of Nyaya Panchayats and Panchayat Secretaries are also conducted at the Panchayati Raj Training Centres. In view of the increasing requirements of training, their number continues to grow. Of the 122 centres sanctioned so far, 101 have already been set up by various State Governments. It is expected that by the end of the Third Plan period, almost half the districts in the country will each have a centre.

The Central Institute of Training and Research in Panchayati Raj continued to conduct its three courses of three months duration each for traning Principal Instructors of Panchayati Raj Training Centres. A Committee, recently set up, is now engaged in evaluating its work.

### STAFF POSITION (as on Sept. 1, 1964).

*Essential Staff:* No. of blocks reporting (including pre-extension blocks) 5,264; Block Development Officers 4,951; Gram Sevaks 49,628; Extension Officers (Agriculture) 5,117; Social Education Organisers (Men); Extension Officers (Panchayats) 6,028; Extension Officers (Cooperation) 4,641.

*Other Staff:* No. of Block reporting (Stage I, Stage II and Post Stage II Blocks only) 5,162; Extension Officers (Animal Husbandry) 4,087; Extension Officers (Village Industry) 2,980; Mukhya Sevikas 2,726; Overseers 4,891; Gram Sevikas 6,726; Medical Officers 2,319; Progress Assistants 3,658.

### PROGRAMME DURING THE THIRD PLAN

The Third Plan period is expected to bring about vast changes in the developmental activities in the rural side mainly due to the progress made by the Community Development Programme and the Panchayati Raj.

The period will also witness a shift in the emphasis of the Programme. Instead of the official agencies initiating the schemes, the people will be encouraged to take the initiative in the developmental activities.

The following are among the ten-point test by which the success of Panchayati Raj will need to be measured from time to time:—

1. Agricultural production as the highest national priority during the Third Plan;
2. Development of rural industry;
3. Development of co-operative institutions;
4. Full utilisation of the local manpower and other resources;
5. Development of facilities for education and adult literacy;
6. Optimum utilisation of resources available to Panchayati Raj institutions such as finance, personnel, technical assistance and other facilities from higher levels, and efforts by them to raise their own resources;
7. Assistance to the economically weaker sections of the village community;
8. Progressive disposal of authority and initiative with special emphasis on the rule of voluntary organisations;
9. Understanding and harmony between elected representatives and public servants to be achieved through comprehensive training in education and a clear demarcation of duties and responsibilities and progressive increase in competence both among officials and non-officials; and
10. Cohesion and mutual self-help within the community.

### PLAN OUTLAY

(Rupees lakhs)

| Particulars | Outlay | Actuals 1963-64 | Anticipated 1964-65 | Approved 1965-66 |
|---|---|---|---|---|
| Community Development Programme | 287,67·00 | 52,70·80 | 58,19·15 | 60,89·16 |
| Panchayat Schemes | 2,800·00 | 219·39 | 309·93 | 383·66 |
| Central Schemes | 600·00 | 36·39 | 83·81 | 84·44 |

### PROGRAMME ACCORDING TO STATES

Blocks allotted as on 1st January 1965:—

| State/Union Territory | No. of blocks allotted | | | | | Population covered (lakh nos). | Villages covered | Area (in sq. Km. covered |
|---|---|---|---|---|---|---|---|---|
| | No. of Blocks | Pre-extension | Stage I | Stage II (incl. post-Stage II) | Total | | | |
| Andhra Pradesh | 445 | .. | 260 | 185 | 445 | 334 | 27,100 | 275,300 |

| Tripura | 15 | .. | 11 | 4 | 15 | 9·4 | 4,900 | 10,500 |
| TOTAL | 5,240* | 18 | 2,709½ | 2,511 | 5,238½ | 4,046 | 566,900 | 3,169,200 |

* Excludes 79½ additional C.D. Blocks on account of Tribal Development Blocks.

## PERFORMANCE UNDER SELECTED ITEMS OF ACTIVITY OF C. D. PROGRAMME

| | Achievements during year ending September | | Achievements from block during year ending September | |
|---|---|---|---|---|
| | 1962-63 | 1963-64 | 1962-63 | 1963-64 |
| *Agriculture :—* | | | | |
| Improved seeds distributed (Quintals) | 34,88,000 | 35,66,000 | 884 | 810 |
| Chemical fertilizers distributed (Quintals) | 1,43,45,000 | 1,84,07,000 | 3,634 | 4,180 |
| Chemical pesticides distributed (Quintals) | 1,68,000 | 1,77,500 | 60 | 60 |
| Improved implements distributed (Nos.) | 6,68,000 | 7,38,965 | 169 | 170 |
| Agricultural demonstrations held (Nos.) | 10,13,300 | 9,94,400 | 257 | 225 |
| Compost pits dug (Nos.) | 73,98,900 | 80,20,200 | 1,875 | 1,820 |
| *Animal Husbandry :—* | | | | |
| Improved animals supplied (Nos.) | 29,065 | 34,124 | 9·0 | 9·5 |
| Improved birds supplied (Nos.) | 6,40,951 | 10,17,851 | 162 | 231 |
| Fish fingerlings supplied (Nos.) | 6,00,57,000 | 6,75,32,000 | 15,216 | 15,315 |
| Animals castrated (Nos.) | 29,85,800 | 31,88,000 | 756 | 723 |
| Animals artificially inseminated (Nos.) | 7,67,809 | 9,47,525 | 195 | 215 |
| *Health and Rural Sanitation :—* | | | | |
| Rural latrines constructed (Nos.) | 1,12,400 | 98,930 | 28 | 22 |
| Pucca drains constructed (metres) | 14,39,000 | 8,61,000 | 446 | 242 |
| Village lanes paved (sq. metres) | 11,44,800 | 9,48,000 | 355 | 266 |
| Soakage pits constructed (Nos.) | 2,62,200 | 2,60,700 | 81 | 73 |
| Drinking water wells constructed (Nos.) | 40,035 | 42,711 | 10 | 10 |
| Drinking water wells renovated (Nos.) | 47,194 | 46,327 | 12 | 11 |
| *Social Educations :—* | | | | |
| Adult literacy centres started (Nos.) | 47,809 | 46,578 | 12·8 | 11·2 |
| Adults made literate (Nos.) | 7,78,857 | 8,28,488 | 197 | 188 |
| Reading rooms and libraries started (Nos.) | 15,644 | 13,740 | 4·0 | 3·1 |
| Youth clubs and Farmers' Unions started (Nos.) | 42,582 | 57,656 | 10·8 | 13·1 |
| No. of members in Youth Clubs and Farmers' Unions | 8,43,549 | 8,72,431 | 214 | 198 |
| Functional Gram Sahayaks camps held (Nos.) | 15,999 | 11,272 | 5·0 | 3·2 |
| Functional Gram Sahayaks' Leaders trained (Nos.) | 7,42,873 | 6,87,624 | 188 | 157 |
| *Women's Programme :—* | | | | |
| Mahila Samitis/Mandals Started (Nos.) | 23,069 | 27,138 | 5·8 | 6·2 |
| Membership in Mahila Samitis/Mandals | 4,62,842 | 6,14,371 | 117 | 139 |
| No. of women participated in the Women camps held | 1,68,275 | 1,40,582 | 52 | 35 |
| Women's camps held (Nos.) | 5,199 | 5,885 | 1·6 | 1·6 |
| Balwadis/Nurseries Started (Nos.) | 8,226 | 10,040 | 2·3 | 2·6 |
| Children attending in Balwadis/Nurseries | 2,14,481 | 2,80,272 | 61 | 71 |
| *Communications :—* | | | | |
| New Kacha roads constructed (Kilometres) | 33,749 | 25,483 | 8·6 | 5·8 |
| Existing roads improved (Kilometres) | 57,384 | 49,266 | 14·5 | 11·2 |
| Culverts constructed (Nos.) | 24,277 | 24,678 | 6·2 | 5·8 |
| *Village and Small Industries :—* | | | | |
| Ambar Charkha introduced (Nos.) | 8,696 | 8,965 | 2·7 | 2·5 |
| Brick kilns started (Nos.) | 18,147 | 18,886 | 6·5 | 6·1 |
| Bricks manufactured (lakh Nos.) | 15,233 | 16,868 | 6·0 | 6·0 |
| Tiles manufactured (lakh Nos.) | 4,284 | 3,705 | 1·7 | 1·3 |
| Sewing machines distributed (Nos.) | 9,342 | 9,394 | 2·4 | 2·1 |
| New Tannery pits introduced (Nos.) | 3,604 | 2,118 | 1·3 | 0·8 |
| Improved ghanis introduced (Nos.) | 1,235 | 703 | 0·44 | 0·25 |
| Bee-hives introduced (Nos.) | 19,596 | 19,057 | 7·0 | 6·8 |
| Flaying centres started (Nos.) | 257 | 261 | 0·1 | 0·1 |
| Value of improved tools and appliances distributed for Blacksmithy (Rs.) | 4,48,000 | 4,30,000 | 161 | 153 |
| " " " " " for Carpentry (Rs.) | 4,64,000 | 4,01,000 | 167 | 142 |
| *Minor Irrigation :—* | | | | |
| Net additional area likely to be irrigated through minor irrigation works (Hectares) | 4,67,522 | 4,52,533 | 147 | 130 |

## TRAINING PROGRAMME—A SUMMARY

### INTERNATIONAL CHILDREN'S COMPETITION 1962

Four hundred and twenty one prizes shared by 68 countries were awarded—379 for paintings and 42 for literary entries, in the Shankar's International Children's Competition 1962, held on January 24, 1964.

Over 100,000 entries were received from children of 84 countries for this competition. Of these 97,000 were paintings and the rest literary entries.

The President's Award for best painting has been awarded to a 15-year-old Indian girl Meera Jain by name for the painting entitled "Ramlila".

The Vice-President's Award for the best literary entry has been awarded to a 14-year-old Canadian girl Joanne Ruth Nichols by name for the novelette entitled "The Winter".

The 12 First Prizes for painting, called Jawaharlal Nehru Prizes, have been won by the following countries: India and Japan three prizes each, Austria two prizes and Czechoslovakia, Ceylon, Poland and U.S.S.R. one each.

The 9 First Prizes for literary entries, also called Jawaharlal Nehru Prizes, have been won by India (5 prizes), Australia (2 prizes), New Zealand and Greece (one prize each).

The annual Competition for Children in painting and writing, which was started in 1949, was at first confined to Children from India. In 1950 it became international with 6,000 entries received from 13 countries; gradually it gained more popularity and in the subsequent years the number of entries received and the number of countries participating have gone on steadily increasing.

The President's Award for the best painting was instituted in 1951 and has so far been won by children belonging to nine diffrent countries.

The Vice-President's Award for the best literary entry was instituted in 1952 and has so far been won by children from 8 different countries.

During the period from 1950 to 1962, 264 Prime Minister's First Prizes have been won by children belonging to 31 different countries.

A large number of paintings, drawn by children who won in these competitions, were lent for exhibition in different countries.

### TEACHERS

The scheme of National Awards for Teachers was instituted during 1958-59 by the Union Ministry of Education with the object of raising the prestige of teachers and giving public recognition to the meritorious services of outstanding teachers working in the primary, middle, high and higher secondary schools.

The scheme is being continued during the Third Five Year Plan.

The Government of India announced on Sept. 5, 1965 the names of 90 teachers—47 primary and 43 secondary, who have been selected for the 1965-66 National Awards.

Each recipient of the Award will receive a Certificate of Merit and Rs. 500 cash.

Since inception, 520 teachers—276 primary and 244 secondary, have received the National Award till 1964-65.

Twenty teachers and headmasters of secondary schools and lecturers of training colleges have been selected for the award of cash prizes of Rs. 500 each in the all-India competition of seminar readings for 1963-64.

The competition was organised by the Directorate of Extension Programmes for Secondary Education, National Council of Education Research and Training to facilitate and encourage teachers and other educational workers to popularise their experiences in the field of secondary education.

## STATE AWARDS FOR FILMS—1964

"Charulata", a feature film in Bengali has been adjudged as the best feature film of 1964 by the Central Committee of State Awards for Films and has won the President's Gold Medal. Its producer will get a cash prize of Rs. 20,000 and the director Rs. 5,000.

The All-India Certificte of Merit for the second best feature film goes to "Haqeeqat" (Hindi) with a cash prize of Rs. 10,000 to its producer and Rs. 2,500 to its director.

For the third prize in this category, "Unnaipol Oruvan" (Tamil) has been selected by the Committee and will get the All-India Certificate of Merit.

For the first time since its institution, the award for the best story writer, a Certificate of Merit, went to Balaichand Mukherji, author of the story of the film "Aarohi" (Bengali).

The feature, documentary and educational films and filmstrips were initially examined by the respective regional and special committees constituted for the purpose.

The Government invited entries of the feature films for the Cash Prizes of Rs. 25,000 and Rs. 20,000 respectively for the films aimed at promoting family planning and national unity and emotional integration. While no entry was received for the former, none of the three films entered for the latter were considered to be suitable for the award by the Central Committee.

Among the children's films, the Central Committee did not find any film to be of a standard to merit any award.

*Documentary Films :* No documentary was found suitable for the President's Gold Medal.

*Educational Film :* The educational film "Sterilization of the Female" Produced by the Films Division has been recommended for a Certificate of Merit only.

No filmstrip has been recommended for an Award.

*Regional Awards :* "Dosti" in Hindi, "Pathlaag" in Marathi, "The Avalanche" in English, "Jagga" in Punjabi, "Mainz Raat" in Kashmiri, "Aarohi" in Bengali, "Pratidhwani" in Assamese, "Sadhana" in Oriya, "Kai Kodutha Deivam" in Tamil, "Doctor Chakravarti" in Telugu, "Chandavalliya Thota" in Kannada, "Thacholi Othenan" in Malayalam.

These awards had been announced by the Government of India on the recommendations of the Central Committee of State Awards for Films presided over by Mr. G. D. Khosla.

The items of work for which the competitions are organised relate to irrigation, agriculture, animal husbandry, co-operation and panchayats in the case of gram sevaks, and agriculture animal husbandry, environmental sanitation nutrition, and home improvement, etc. in th case of Gram Sevikas.

## CULTURAL SCHOLARSHIPS

The following 47 persons were selected by the Union Ministry of Education for the award of scholarships under the "Scheme of Scholarships to Young Artistes in Different Cultural Fields" during the year 1964-65 :—

*Bharat Natyam :* Narendra Bhatt ; Kum. Matura Varalakshmi ; Kum. K. R. Gita ; Kum. Asha Devi.

*Drama :* Mukund Naik ; Amar Kaicker.

*Folk Song :* Balai Chakravarty.

*Hindustani Music (Instrumental) :* Manas Dasgupta (*Tabla*) ; Gopal W. Wadegaonkar (*Tabla*) ; Kum. Sharmistha Sen (*Sitar*) ; Mohamed Yamin (*Vichittar Veena*) ; Rafiq Ahmed (*Sarangi*).

*Hindustani Music (Vocal) :* Gulam Taqi Khan ; Kum. Shailaja Apte ; P. J. Karekar ; Rajeshwar Bobde ; Kum. Sarla K. Bhide ; Kum. Aroti Paul ; Kum. Provati Mukherjee.

*Karnatak Music (Instrumental) :* A. Jayalakshmi Seshadri (*Veena*) ; Smt. Rajlakshmi Tirunarayanan (*Veena*) ; A. Kalyanasundaram (*Mridangam*) ; V. Surendran Nair (*Mridangam*) ; V. Gopalkrishnan (*Mridangam*) ; D. Papa Rao (*Violin*).

*Karnatak Music (Vocal) :* V. Ramachandran ; Kum. Padma Narasinhachari ; Kum. G. Seethalakshmi Ammal ; Smt. Usha Sagar.

*Kathak :* Kum. Purnima Joshi ; Smt. Shakuntala Nair ; Kum. Anjani Ambegaonkar.

*Kathakali :* Bhaskar Kumar ; D. Kesavan Namboodri.

*Painting :* K. V. Haridasan ; Gokal Krishen Dembi ; M. Suryamurthy ; Eruch Hakim ; Kum. Anju Chaudhuri ; A. P. Panneerselvam ; Bimal Banerjee.

*Rabindra Sangeet :* Kum. Swapna Chatterjee ; Kum. Bulbul Sen.

*Sculpture :* Balbir Singh Katt ; Binit Kumar Roy ; Ashit Das Gupta.

## NATIONAL LOAN SCHOLARSHIPS

During the Third Plan, the Ministry of Education introduced the National Loan Scholarships Scheme with a Plan provision of Rs. 9 crores. Started in 1963-64, it provided 18,100 scholarships in 1963-64, 22,300 in 1964-65 and 26,500 in 1965-66.

A meritorious student whose parent's income does not exceed Rs. 500 per month is eligible for the loan. The maximum loan limit will vary from Rs. 720 to Rs. 1,500 per annum according to the course of study ; in the case of students for engineering and other technical and professional courses, the limit will be increased by Rs. 250. Loans will be recovered in monthly instalments commencing one year after the loanee secures employment. One of the attractive features of the scheme is that the loan would remain interest free in case the borrower does not make a default in making regular return payments. Another feature is that the loanee need not provide security or sureties.

The scheme extends a special privilege to those loanees who join the teaching profession. In their case one-tenth of the loan amount would be written off for every year of service put in. Each recipient will be issued a loan scholarship book wherein all amount given and repaid by him will be entered.

## RESEARCH SCHOLARSHIP

On the recommendation of the Central Sanskrit Board, 20 scholars have been selected for the award of Research Scholarships for the products of the Traditional Sanskrit Pathasalas during 1962-63.

The amount of scholarship has been raised from Rs. 100 p.m. to Rs. 150 p.m. as recommended by the Central Sanskrit Board from 1962-63 onwards.

## BHATNAGAR AWARDS

Four scientists have been chosen for the grant of the Shanti Swarup Bhatnagar Memorial Award for 1964 for their contributions to physical, Chemical, engineering and biological sciences.

The scientists are : Dr. A. R. Verma (Physical Sciences) ; Dr. Sukh Dev (Chemical Sciences) ; Dr. B. R. Nijhawan (Engineering Sciences) and Dr. D. S. Athwal (Biological Sciences).

The awards carry a cash prize of Rs. 10,000 each.

## SHRAM VIR NATIONAL AWARDS

The Union Ministry of Labour and Employment has instituted a scheme to be known as the Shram Vir National Awards Scheme.

The scheme will be open to only such undertakings where suggestion schemes already exist. It will apply to factories, mines, plantations and docks.

There will be five prizes in class I, carrying a reward of Rs. 2,000 each, ten prizes in class II of Rs. 1,000 each and 20 prizes in class III of Rs. 500 each. In addition, a certificate of "Shram Vir" will also be awarded.

For the promotion of safety consciousness, four schemes for the grant of national safety awards have been instituted to recognise good safety records in industrial undertakings.

## SCHOLARSHIP IN HUMANITIES & SCIENCE

The University Grants Commission has selected 91 teachers in Humanities including Social Sciences for awards under the scheme of financial assistance to teachers for research work during 1964-65.

The scheme has been instituted by the Commission with a view to encouraging teachers to undertake research work.

The following is a list of subjects and the number of teachers awarded scholarships under each subject during 1964-65:—Archaeology 2 ; Commerce 1 ; Economics 4 ; English 4 ; Geography 4 ; Urdu 2 ; Hindi 16 ; History 17 ; Linguistics 1 ; Music 1 ; Law 3 ; Philosophy 5 ; Political Science 6 ; Psychology 3 ; Sanskrit 2 ; Sociology 8 ; Bengali 1 ; Oriya 2 ; Malayalam 2 ; Telugu 1 ; Tamil 1 ; Kannada 2 ; Education 1. Fine Arts 1 :—and Marathi 1.

An amount of Rs. 69,400 has been shared by 92 teachers.

## POST GRADUATE RESEARCH SCHOLARSHIPS IN SCIENCE-AWARDS DURING 1962-63.

*Chemistry* 14 ; *Mathematics* 29 ; *Physics* 25 ; *Geology* 14 ; *Geophysics* 4 ; *Agronomy* 3 ; *Statistics* 7 ; *Zoology* 7 ; *Horticulture* 2 ; *Botany* 5 ; *Microbiology* 1 ; *Agriculture* 1 ; *Cytogenetics* 2.

Altogether 114 scholarships were awarded during 1962-63 under the various subjects.

## PRINTING AND DESIGNING

The Tenth State Awards, in 24 Categories, for excellence in printing and designing of books and other publications for 1964 were given away by Dr. C. D. Deshmukh, at a special function held in Delhi in May, 1965.

These Awards are being organised every year by the Directorate of Advertising and Visual Publicity, Ministry of Information and Broadcasting.

Following is the full list of the recipients of the Awards :

*Children's Books :* First Prize not awarded ; Bolanath (Marathi) ; Etu Lokancha Desh (Marathi) ; Nanhi Nartaki (Hindi) ; Arun Barun Kiran Mala (Bengali).

*Art Books :* Kangra Paintings of the Gita Govinda ; South Indian Bronzes.

*Books (English) :* Farmers of India Vol. III ; India in World Affairs (1954-56) ; Towards a Prosperous India.

*Books (Indian Languages) :* Nain Nakash (Punjabi) ; Manu-Dwadash (Bengali) ; Saranara Anubhava Sahitya (Kannada) ; Shri Shiv Chhatrapati (Marathi).

*Daily Newspapers (English) :* The Indian Express, Bombay ; The Hindustan Times ; The Economic Times.

*Daily Newspapers (Indian Languages) :* Maharashtra Times (Marathi) ; Hindustan (Hindi) ; Navamani (Tamil).

*Display Advertisement Layouts :* The clasp ; Not an Iota less, for students—Now 30% off ; Vacancies for 4 Million People ; Deadly Distance.

*Art Magazines and Annuals :* First Prize not awarded ; second prize not awarded ; Roopa-Lekha ; Marg.

*Periodicals (Other than Annuals—English) :* Illustrated Weekly of India ; Pradeep ; Oxygen News.

*Periodicals (Other than Annuals—Indian Languages) :* First Prize not awarded ; Visva-Bharati Patrika (Bengali) : Sandesh (Bengali) ; Deepavali (Marathi).

*Posters :* First Prize not awarded ; Air-India—Rome ; Incomplete address delays your mail ; 15 Vanamahotsava 1964.

*Folders (Offset/Photogravure) :* Indian Pavilion —New York World Fair 1964-65 ; Corto-Quinol ; India-Goa ; Beehive Brandy.

*Folders (Letterpress) :* Menu Card for Pope Paul VI ; Monuments to Bayer Pesticides in Japan ; How High Should the Post be ; India-Calcutta.

*Calendars (Offset/Photogravure) :* Air-India Calendar 1965—Festivals of India ; Assam oil Company Calendar 1965 ; G.K.W. Prestige Calendar 1965 ; Indian Oxygen Ltd., Calendar 1965-Konarak ; The Premier Automobiles Ltd. Calendar 1965-Series of Arts & Crafts in India.

*Calendars (Letterpress) :* Mukund Iron & Steel Works Ltd. Calendar 1965 ; The Indian Iron & Steel Co. Ltd., Calendar 1965 ; Agfa India Ltd., Calendar 1964 ; Tea Board Calendar 1964—Birds of India.

*Diaries :* Desk Diary 1964 ; India 1965 ; Air Conditioning Corpn. Ltd. New Look Diary 1965.

*Devnagiri Type Faces :* No prizes awarded.

*Publicity Booklets :* The Changing Face of India-Agriculture ; India Makes ; As India Builds (Telugu) ; The Changing Face of India ; The King Lear ; Great Cigarettes from India.

*Labels :* K.M.P. Castor Hair Oil Label ; Dipy's Cidep Label ; Sikkim Orange Label ; Doolia Supreme Darjeeling Tea Label.

*Best Bound Books :* Baukunar Mandir ; Iyengar on Income-Tax Vol. III ; Statistics for Iron & Steel Industry in India.

*Packaging :* Wrapping Paper ; Tata-Finlay "Bahadur" Dust Tea Carton ; Liberty Shorts Carton ; Tiara Tale Carton ; Container for whisky glasses.

*Point of Sales (Counter and Display Material) :* Dunlopillo Showcard ; Maxifix Showcard ; National Ekco Radio Hanger ; Waterbury's Compound Red Label Showcard.

*Printed Pictures :* Contemporary Paintings of India ; Second Prize not awarded ; Certificate of Merit not awarded.

*Greeting Cards and Picture Postcards :* With Best wishes for a colourful New Year ; Greeting Card—Tonga Ride ; Greeting Card—Landscape II ; Greeting Card—Peace ; Greeting Card—Decorated Bull.

### Basic and Cultural Literature

The Ministry of Education, in consultation with the Ministry of Community Development and Co-operation announced on July 3, 1964 an award of Rs. 1,000 to each of the authors of the following 27 books/manuscripts received in the third competition for production of basic and cultural literature :—

*Assamese :* "Jon, Beli Tora" by Satyabrata Sharma.

*Bengali :* "Mahashunyer Katha" by Monoj Dutta ; "Bharat-Varser Bado Bado Lekhak" by S. K. Das ; "Mahakabir Jiban Katha" by Kanon Mukerji ; "Desh Neta Moti Lal Nehru" by Paresh Dhar.

*Gujarati :* "Akashna Deeva" by Rajanikant Mody.

*Hindi :* "Rabindra Pratibha" by Krishna Kriplani; "Rog-Danav-se-Yudha" by Dr. Inder Sen Varma; "Jhilmilate Sitare" by Ramesh Varma; "Moti Lal Nehru" by Jagdish Goel; "Graha-Nakshatra" by Krishna Vallabh Dwivedi; "Moti Lal Nehru" by Hans Raj Rehbar.

*Kannada :* "Akashada Ascharya" by H. Bhadriah; "Stars and Planets" by V. Cheluvaroj Iyengar.

*Malayalam :* "Nakshathrangalum Grihangalum" by M. P. Parameswaran.

*Marathi :* "Apale San and Apale Utsav" by S. R. Devale; "Pandit Moti Lal Nehru" by Raja Mangalwedhekar; "Don Jyoti" by Pramil Vasant Kulkarni.

*Oriya :* "Yuga Yuga ra Kala" by Durga Prasad Patnaik.

*Punjabi :* "Guru Dev Tagore" by S. S. Amole.

*Tamil :* "Heroes of Indian History" by P. Surianarayanan;" India's Rivers" by V. R. Sastri; "Odi Villaiyadu Pappa" by C. S. Balaguranthan.

*Telugu :* "Indian Handicrafts" by Dr. R. V. Rao; "Common Diseases" by Dr. Y. Suryanarayana Rao.

*Urdu :* "Quami Jhande ki Kahani" by S Ibrahim Fikri; "Sitaron ki Duniya Bahut dur tak hai" by Athar Parvaz.

### SPORTS

The Government of India have made selections for the "*Arjuna Awards*" to the Sportsmen of the year 1964, on the basis of outstanding contribution made to enhance the glory of the game during the year. These awards were instituted in 1961.

The following seven persons were awarded the *Arjun Awards* by the President in 1965: Makan Singh (*Athletics*); Nawab of Pataudi (*Cricket*); Jarnail Singh (*Football*); S. Lakshman (*Hockey*); Rao Raja Hanut Singh (*Polo*); Gautam R. Divan (*Table Tennis*); Birhambar Singh (*Wrestling*).

One award is also to be given as a special case to the entire team of Indian mountaineers, who successfully climbed Mount Everest in May, 1965.

The *Arjuna Awards* were instituted in 1961 for outstanding recognition in different departments in the field of sports.

### PUBLIC SECTOR

The committee for Presidential awards for public sector industrial undertakings has awarded a shield in silver and copper to the Indian Telephone Industries, Bangalore, whose all-round performance was adjudged the best for 1962-63.

The I.T.I. also received along with the Hindustan Cable Factory, Rupnarainpur, and Hindustan Antibiotics, Pimpri, the Certificate of merit for outstanding performance. The Nangal unit of the Fertiliser Corporation of India was presented with the certificate of honour performance.

The annual awards to public sector industrial undertakings were instituted at the instance of the Prime Minister to encourage them to exceed their production targets and achieve outstanding all-round performance. A committee under the chairmanship of Mr. Khandubhai Desai, M.P., was subsequently set up to evaluate the performance of these undertakings.

### SUR-SINGAR SAMSAD'S FILM AWARD

Sur-Singar Samsad's award for 1964 for the best classical film song went to "Manmohan man mein" from the film "Kaise Kahoon".

The following were the recipients of the awards for 1964 :

Saraswati Award : Ram Bellara, Producer of "Kaise Kahoon".

Swami Haridas Award : S. D. Burman, music director of "Kaise Kahoon".

Mian Tansen Award : Mohammed Rafi, Suman Kalyanpur and S. D. Batish, Singers.

The Dr. Brahaspati award for the largest number of classical songs in a film went to "Sant Dnyaneshwar".

### KALINGA AWARD

Dr. R. Warren Weaver, of the United States, has been selected for award of the 13th International Kalinga Prize for 1964 for the popularisation of science.

The selection of the recipient was made as usual by an international jury appointed by UNESCO.

A professor, administrator and a pioneer of science, Dr. Weaver is the author of numerous works. They include "*Lady Luck*", "*The Theory of Probability*", "*The Mathematical Theory of Communication*", "*Science and Complexity*" and "*People, Energy and Food*".

The 1,000 pound Kalinga Prize is a personal donation by Mr. Bijoyanand Patnaik, an industrialist and a director of the Kalinga Foundation.

### KRISHI PANDIT AWARD

In the first All-India paddy crop competition, conducted by the Government of India for the *Kharif* season 1964-65, a Maharashtra farmer, Sri A. K. Nirgudkar, having obtained the largest yield 3,664·955 kgs. per acre, was declared the first prize winner. Sri D. A. Naik, also from Maharashtra stood second with 3,345·124 kgs. per acre, followed by Sri J. Nabi Saheb of Andhra Pradesh who won the third prize with 2,125·427 kgs. yield per acre.

### NEHRU PRIZE

The Government of India has instituted, to honour the memory of the late Prime Minister Jawaharlal Nehru, an international award named "Nehru Prize for International Understanding".

It will be an international award open to citizens and institutions of all countries. The prize will be awarded every year to a person or an institution who has contributed most during the preceding year to the ideals of world peace and international understanding. The prize will consist of Rs. one lakh and a medal. The award winner will be invited to India to receive the prize and will also be asked to deliver a lecture following the formal presentation of the prize.

The first prize was expected to be awarded on Nov. 14, 1965.

# GLASS INDUSTRY

THE more commonly used raw materials for glass industry are : sand, borax, soda ash and salt cake, dolomite, lime or limestone, saltpetre and sulphur, manganese dioxide and colouring materials. Though supplies of sand are in plenty, its quality is not uniform. Nearly all the glass factories of northern India and West Bengal obtain their requirements of sand from the Allahabad district. Subsequent to the Tariff Board's inquiry in 1932, little progress has been made in the installation of grading and washing equipment for sand. Borax is mostly obtained from abroad, while soda ash is received from indigenous manufacturers and importers. Sufficient quantities of lime or limestone are available. Coal is the commonest fuel. The bulk of refractories is obtained from indigenous sources.

The industry comprises the manufacture of sheet glass, blown and pressedware and bangles.

The Tariff Commission reviewed the protection granted to the sheet glass industry in 1957 and 1960. The protection has been withdrawn from the end of 1965. Therate of protection duty continues at 70 per cent *ad valorem*.

At the commencement of the Second Plan there were 109 glass factories in India with an annual installed capacity of about 291,000 tons. In addition, there were 22 factories with a capacity of about 23,000 tons which were, more or less, permanently closed. By March 1961 the number of factories had gone up to 148 and the installed capacity to 444,000 tons, which includes the 22 closed factories referred to above. Recently, the Development Wing of the then Ministry of Commerce & Industry had gone in detail into the question of the effective capacity of the glass industry. They had reached the conclusion that 51 factories with a capacity of about 61,000 tons which had been lying idle for over 3 years may be scrapped for the purpose of planning the future development of the glass industry as there was little likelihood of these units ever coming into production again. The State-wise distribution of the remaining 97 factories representing a capacity of about 383,000 tons is given below :

| State | Number of factories | Annual capacity (tons) |
|---|---|---|
| Uttar Pradesh | 28 | 83,000 |
| West Bengal | 24 | 1,10,400 |
| Maharashtra | 22 | 57,900 |
| Madras | 6 | 11,100 |
| Bihar | 4 | 60,700 |
| Gujarat | 2 | 27,900 |
| Orissa | 2 | 13,200 |
| Punjab | 2 | 5,800 |
| Delhi | 2 | 1,800 |
| Rajasthan | 1 | 4,800 |
| Kerala | 1 | 3,600 |
| Andhra Pradesh | 1 | 1,800 |
| Madhya Pradesh | 1 | 700 |
| Mysore | 1 | 500 |
| TOTAL | 97 | 3,83,200 |

The itemwise break-up of this capacity is a follows :

| Item | Annual capacity (in tons) |
|---|---|
| Bottles and vials | 1,74,100 |
| Table and pressedware | 74,500 |
| Sheet glass | 61,800 |
| Lampware | 42,200 |
| Scientific glassware | 14,000 |
| Thermos flasks | 8,480 |
| Shells for electric lamps | 2,860 |
| Miscellaneous glassware | 10,400 |
| TOTAL | 3,83,340 |

The production of different types of glass and glassware from 1960 onwards is given below :

| | Units | 1960 | 1961 | 1962 | 1963 | 1964 | 1965 (January April) |
|---|---|---|---|---|---|---|---|
| Sheet glass .. .. | Thousand sq. meters. | 7,524 | 6,780 | 8,724 | 9,840 | 9,623 | 2,205 |
| Laboratory Glass .. | Metric tonnes. | 4,872 | 3,576 | 3,948 | 4,440 | 4,464 | 1,145 |
| Glass shells .. .. | Lakh pieces. | 461 | 623 | 682 | 744 | 535 | 174 |
| Other Glassware .. | Thousand tonnes | 171 | 177 | 186 | 190 | 198 | 49 |
| Thermos Flasks .. | Thousand Pieces. | 1,382 | 1,541 | 1,542 | 1,939 | 1,936 | 525 |

A number of items have been produced for the first time in the country. There is a notable improvement in the quality of glassware produced. The incentives for exports have been increased from 20 per cent to 70 per cent.

Coloured sheet glass, safety glass, glass wool and fibre glass, building blocks, glass syringes, synthetic stones and glass chatons are some of the new items whose manufacture was undertaken for the first time in the country during the Second Plan period. The pilot plant project to experiment with the production of optical glass undertaken in the Central Glass and Ceramic Research Institute, Calcutta, has shown good results. The Institute is expected to start the manufacture of optical glass during the Third Plan period with a view to meeting the demand for this product in the country. The manufacture of ophthalmic glass will be undertaken in a public sector project to be located at Durgapur and financed out of the credit of 500 million roubles offered by the U.S.S.R. Government. Its project report is at present under preparation by the Russian consultants. The total cost of the project is tentatively estimated at Rs. 2·6 crores of which the foreign exchange component would be about Rs. 2·0 crores. The factory, which will have a capacity of 300 tonnes per annum, is likely to go into production in the beginning of the Fourth Plan.

Imports and exports are as follows : (Rupees in lakhs)

| | 1960 | 1961 | 1962 | 1962–63 | 1963–64 | 1964-65 |
|---|---|---|---|---|---|---|
| Imports .. .. .. | 120·82 | 130·63 | 136·94 | 148·58 | 158·35 | 122·96 |
| Exports .. .. .. | 24·50 | 23·55 | 24·05 | 24·11 | 33·33 | 63·74 |

There was a rapid increase in the domestic consumption of glass and glassware during the Second Plan period and the average annual rate of increase has worked out to about 17 per cent.

On balance of all considerations it is estimated that the requirements of glass and glassware in 1965–66 would be of the order of 440,000 tons inclusive of export requirements of about 15,000 tons. This would give an average annual increase of a little over 15 per cent during the Third Plan period. An item-wise break-up of this demand among different categories of glass and glassware is broadly visualised as follows :

| | (tons) |
|---|---|
| Bottles and vials .. .. | 2,00,000 |
| Table and pressedware .. | 65,000 |
| Sheet glass, plate glass etc. .. | 1,00,000 |
| Lampware .. .. .. | 30,000 |
| Scientific glassware .. .. | 15,000 |
| Thermos flasks .. .. | 2,700 |
| Shells for electric lamps .. | 3,300 |
| Miscellaneous glassware .. | 24,000 |
| TOTAL .. .. .. | 4,40,000 |

On the basis of 80 per cent utilisation of installed capacity in the case of sheet glass and 70 per cent in other categories, the capacity target is visualised at about 615,000 tons, requiring a capital investment of Rs. 11 crores during the Third Plan. The additional employment is estimated at 28,000. Planning on this basis would provide adequate buffer capacity to boost up production further, if required.

The demand for highly specialised process equipment is increasing on account of the growth of chemical, pharmaceutical and allied industries. Glassed steel plays an important role in these industries because of its corrosion resistance and versatility. Recently, therefore, the Investment Corporation of India Ltd. entered into an agreement with the famous Pfaudler Permutit Inc. of the United States for the formation of a jointly-owned company in India to manufacture Pfaudler glassed steel, alloy process equipment, Ionac water and waste treatment equipment and chemicals. This will not only help other industries but also will go a long way to save considerable foreign exchange for the country.

The project of National Investments Ltd.—an ophthalmic glass factory at Durgapur—would be completed by early 1966. The production schedule includes glass pressings for optical lenses, coloured glass pressing for goggles, lenses and prisms for cameras, microscopes and other optical instruments.

# NON-FERROUS INDUSTRY*

(See also under 'Mines and Minerals'.)

## COPPER

THOUGH there are many copper fields in India, extraction of copper ores is at present confined to only one area *viz.* Mosabani area in the Singhbhum district, Bihar, which is operated by Messrs. Indian Copper Corporation. Copper pyrites is the principal ore of copper and it is a double sulphide of copper and iron. More and more deposits of copper are being located and important among such areas are: Almora and Garhwal in U.P., Singbhum and Baragunda in Bihar; Khetri and Daribo in Rajasthan; Sikkim; Manipur; NEFA; and Jammu and Kashmir. Detailed work in the Khetri-Daribo area of Rajasthan and Rangpo area of Sikkim has established substantial workable reserves of copper ore — about 28 million tons with an average copper content of 0·8 per cent metal in Khetri and about 0·35 million tons averaging about 6·24 per cent of combined copper lead and zinc in Rangpo. The deposits in Daribo are found to be rich in copper content but the extent of the reserves is yet to be fully proved. The Khetri Copper Project has been started in the public sector and it is expected to be completed by the end of 1966. The capacity of this project is fixed at 10,000 tons of metal per annum.

Domestic production meets only a small part of the country's requirements of this metal. A large tonnages of copper, copper alloys and other manufactures have to be imported. In 1956 the internal production met only about 29 per cent of the demand. There is only one copper mine and smelter in the country with a capacity of 10,000 tonnes a year.

Installed capacity and production of copper and allied products (metric tons)

| Year | Virgin Metal | | Pipes and Tubes | | Sheets and Circles | |
|---|---|---|---|---|---|---|
| | Installed capacity | Production | Installed capacity | Production | Installed capacity | Production |
| 1954 .. | 7,315·2 | 7,276·8 | 369·6 | 16·8 | 46,452 | 1,488 |
| 1955 .. | 7,315·2 | 7,398·0 | 369·6 | 50·4 | 46,452 | 1,584 |
| 1956 .. | 7,315·2 | 7,750·8 | —do.— | 45·6 | —do.— | 1,776 |
| 1957 .. | 7,315·2 | 7,974·0 | 369·6 | 58·8 | 45,672 | 2,376 |
| 1958 .. | 7,315·2 | 7,966·8 | 369·6 | 54·0 | 46,896 | 3,204 |
| 1959 .. | 7,315·2 | 7,764·0 | 369·6 | 44·4 | 46,896 | 2,724 |

| 1961 .. | 7,320·0 | 8,745·6 | 4,020·0 | 348·0 | 54,000 | 4,368 |
| 1962 .. | 9,000·0 | 9,781·2 | 4,020·0 | 303·6 | 54,000 | 3,528 |
| 1963 .. | 9,960·0 | 9,592·8 | 4,920·0 | 598·8 | 48,000 | 3,168 |
| 1964 .. | 9,960·0 | 9,454·8 | 4,920·0 | 619·2 | 54,000 | 2,064 |

Import of Copper and Copper Alloys

| Year | Copper and alloys refined or unwrought | | Copper and alloys worked | | Total | |
|---|---|---|---|---|---|---|
| | Quantity (lakh kgs.) | Value (Rs. lakhs) | Quantity (lakh kgs.) | Value (Rs. lakhs) | Quantity (lakh kgs.) | Value (Rs. lakhs) |
| 1960-61 .. | 568·56 | 1,903·62 | 58·48 | 286·18 | 627·04 | 2,189·80 |
| 1961-62 .. | 650·86 | 2,030·58 | 61·63 | 296·40 | 712·49 | 2,326·98 |
| 1962-63 .. | 697·40 | 2,228·24 | 55·23 | 300·67 | 752·63 | 2,528·91 |
| 1963-64 .. | 694·18 | 2,381·44 | 50·37 | 222·79 | 744·55 | 2,604·23 |
| 1964-65 .. | 527·15 | 2,106·11 | 56·46 | 334·95 | 583·61 | 2,441·10 |

* Protection to non-ferrous industries has been withdrawn from Dec. 31, 1965.

**Investment & Employment :** Messrs. Indian Copper Corporation have invested nearly Rs. 5·6 crores on the developmental activity such as proving of reserves of copper ore and on the plant and machinery during the Second Plan period. It is anticipated that the Indian Copper Corporation will increase its production to 11,000 tonnes by 1966.

The Development Council for non-ferrous metals had estimated the demand for copper by 1965–66 at 170,000 tons per year, without taking into account the substitution possibilities by aluminium. Estimating these possibilities as equivalent to about 20,000 tons of copper, the Council estimated the demand for copper inclusive of the copper element of brass in 1965–66 as follows : (Figures in tons) :

Commercial copper sheets and circles (hot rolled) 4,000 ; Copper sheet (cold rolled) 1,500 ; Industrial copper strips (cold rolled) in cut length and coils 2,500 ; Electrolytic copper wire rods for cables, wires and strips 75,000 ; Copper rods and sections (extruded) 2,000 ; Copper pipes and tubes (extruded) 2,500 ; Total 87,500. Commercial brass sheets/circles (hot rolled) 35,000 ; Brass sheets (cold rolled) 4,000 ; Industrial brass strips in cut lengths or coils (cold rolled) 8,000; Brass rods and sections (extruded) 10,000 ; Brass pipes and tubes (extruded) 6,000 ; Brass/copper wires (non-electrical) 3,500 ; Copper base alloys and castings 30,000 ; Total 96,500; Copper equivalent 62,700. Total 1,50,200.

Items 1 to 5 total to 87,500 tons of copper. Items 6 to 11 are for copper and brass base alloys and total to 96,500 tons. Taking an average of 65 per cent of copper content, this will work out to 62,700 tons. Thus the total requirements of copper would come to about 1,50,000 tons including the substitution.

The demand for copper, the indigenous production and the import requirements are expected to be as shown below during the Third Plan period ('000 tons): 1961–62 : 90 ; 13; 77 ; 1962–63 : 101 ; 14; 87 ; 1963 –64: 115 ; 15 ; 100; 1964–65 : 135 ; 23 ; 112 ; 1965–66 : 145 ; 35 ; 110.

**Import Duty.**—The Government of India has announced the imposition of 10 per cent regulating duty on copper. Excise duty on copper sheets and circles, etc. has been raised from Rs. 200 per ton to Rs. 500 per ton.

## LEAD

Lead ores are known to occur at a number of places in India. The only large deposits now being worked are those of Zawar which is about 17 miles from Udaipur city, where lead is found in association with zinc. These mines are worked by Messrs. Metal Corporation of India.

The present mining capacity is 500 tons run-off mine ore per day.

**Production Figures of Metal Corporation**

| Year | Ore raised | Ore dressed in Mill | Lead Concentrates | Zinc Concentrates | Lead Ingots |
|---|---|---|---|---|---|
| 1959–60 .. | 152,274 L.T. | 142,647 L.T. | 5,976 L.T. | 9,567 L.T. | 3,700 L.T. |
| 1960–61 .. | 151,447 L.T. | 145,307 L.T. | 6,360 L.T. | 9,882 L.T. | 3,803 L.T. |
| 1961–62 .. | 146,949 M.T. | 147,402 M.T. | 5,216 M.T. | 8,860 M.T. | 3,177 M.T. |
| 1962–63 .. | 157,369 M.T. | 158,813 M.T. | 7,358 M.T. | 11,031 M.T. | 3,771 kg. |
| 1963–64 .. | 153,869 M.T. | 152,590 M.T. | 5,147 M.T. | 9,900 M.T. | 3,754 kg. |
| 1964–65 .. | 162,550 M.T. | 159,635 M.T. | 6,296 M.T. | 10,880 M.T. | 6,055 kg. |

The outlook for the lead industry has considerably improved in the last few years. The current annual production of lead from the only smelter of Messrs. Metal Corporation of India at Tundoo, Bihar, is of the order of 4,000 tons against the installed capacity of 6,000 tons per annum. The Development Council for non-ferrous metals has estimated the demand for non-ferrous metals as 35,000 tons per year in 1960.

Installed capacity and production (Metric tons)

| Year | Virgin Metal | | Lead Pipes and Tubes | | Lead Sheets | |
|---|---|---|---|---|---|---|
| | Installed capacity | Production | Installed capacity | Production | Installed capacity | Production |
| 1959 .. | 6,096·0 | 3,957·6 | 4,876·8 | 619·2 | 1,092 | 36 |
| 1960 .. | 6,096·0 | 3,746·4 | 4,872·0 | 399·6 | 2,316 | 264 |
| 1961 .. | 6,096·0 | 3,664·8 | 4,872·0 | 534·0 | 2,316 | 504 |
| 1962 .. | 6,096·0 | 2,848·8 | 4,872·0 | 752·4 | 2,316 | 720 |
| 1963 .. | 6,096·0 | 3,536·4 | 4,800·0 | 639·6 | 3,000 | 720 |
| 1964 .. | 6,096·0 | 3,624·0 | 4,800·0 | 584·8 | 3,000 | 696 |

*Import of lead :*

| Year | Lead and alloys unwrought | | Lead and alloys worked | | Total | |
|---|---|---|---|---|---|---|
| | Quantity (lakh kgs.) | Value (Rs. lakhs) | Quantity (lakh kgs.) | Value (Rs. lakhs) | Quantity (lakh kgs.) | Value (Rs. lakhs) |
| 1960–61 .. | 244·55 | 243·90 | 1·80 | 2·87 | 246·35 | 246·77 |
| 1961–62 .. | 285·15 | 252·06 | 3·60 | 6·83 | 288·75 | 258·89 |
| 1962–63 .. | 339·70 | 266·55 | 0·97 | 2·18 | 340·67 | 268·73 |
| 1963–64 .. | 370·52 | 333·18 | 1·69 | 2·08 | 372·21 | 335·26 |
| 1964–65 .. | 337·79 | 457·01 | 3·22 | 4·87 | 341·01 | 461·88 |

**Third Plan :** The demand for lead is expected to rise to 60,000 to 65,000 tons by 1965–66, with the break-up as given below : Non-ferrous and alloys 12,000 ; Electric industries 30,000 to 35,000 ; Chemicals (Paints) 12,500 ; Heavy mechanical engineering and light mechanical engineering 2,500 ; Small-scale industries 2,000 ; Miscellaneous 1,000 ; Total 60,000 to 65,000.

## ANTIMONY

Antimony ore deposits are situated at the Shigree Glacier in Lahaul, Kangra district, Punjab and in the region of Nagpur in Maharashtra State. For antimony, there is only one smelter at Bombay, working on imported ores with a capacity of 1,000 tons.

Statistics regarding installed capacity and production in tonnes during the period 1954 to 1964 are shown below : 1954 : 710·4 ; 547·2 ; 1955 : 710·4 ; 512·4 ; 1956 : 710·4 ; 599·8 ; 1957 : 710·4 ; 510·0 ; 1958 : 710·4 ; 535·2 ; 1959 : 710·4 ; 674·4 ; 1960 : 912·0 ; 810·0 ; 1961 : 912·0 ; 620·4 ; 1962 : 900·0 ; 661·2 ; 1963 : 900 ; 909·6 ; 1964 912·0 ; 840·0 .

The production of antimony in India during 1963 was 9,096 tonnes. During 1964-65 the quantity of antimony metals and alloys imported was 46,296 Kgs. valued at Rs. 2·66 lakhs.

According to the 1962 report of the Tariff Commission, domestic consumption of antimony increased from 614 tonnes in 1956 to 787 tonnes in 1960.

## ZINC

Deposits of zinc, at present, are known to occur at only two places in India in Zawar Mines in Udaipur and in Riasin District in Kashmir State. Due to the nonavailability of smelting facilities, the Metal Corporation of India is exporting about 7,000 to 8,000 tons of zinc concentrates every year to Japan for smelting on a toll basis. The Metal Corporation has established an electrolytic Zinc Refinery near Udaipur—the construction of which is complete. This has been projected to produce 18,000 tonnes of zinc, 28,000 tonnes of sulphuric acid, 75 tonnes of Cadmium, 11,000 tonnes of virgin pig lead and 540,000 ozs. of silver. Comnco-Binani is establishing a Zinc Refinery at Alwaye which is to produce 12,000 tonnes of metallic zinc.

The Development Council for Non-ferrous Metals has estimated the present requirements of zinc to be about 85,000 tons per annum and that they are likely to increase upto 185,000 tons by 1965–66.

Installed capacity and production of zinc sheets and strips in metric tons during 1953 to 1964 are as follows : 1954 : 4,480·8 ; 46·8 ; 1955 : 4,480·8 ; 43·2 ; 1956 : 3,754·8 ; 92·4 ; 1957 : 5,925·6 ; 956·4 ; 1958: 5,925·6 ; 2,113·2 ; 1959 : 5,925·6 ; 2,876·4 ; 1960 : 4,800·0 ; 3,270·0 ; 1961 : 4,800·0 ; 3,774·0 ; 1962 : 4,800·0; 3,525·6 ; 1963 : 4,800·0 ; 3,882·0 ; 1964 : 4,800·0; 4,647·6.

**Imports**

| Year | Zinc and zinc alloys wrought | | Zinc alloys worked | | Total | |
|---|---|---|---|---|---|---|
| | Quantity (lakh kgs.) | Value (Rs. lakhs) | Quantity (lakh kgs.) | Value (Rs. lakhs) | Quantity (lakh kgs.) | Value (Rs. lakhs) |
| 1960–61 .. | 707·3 | 894·4 | 14·3 | 24·4 | 721·6 | 918·8 |
| 1961–62 .. | 669·2 | 722·9 | 9·8 | 16·2 | 679·0 | 739·1 |
| 1962–63 .. | 875·4 | 885·1 | 13·1 | 17·0 | 888·5 | 902·1 |
| 1963–64 .. | 842·1 | 967·9 | 11·6 | 17·6 | 853·7 | 985·5 |
| 1964–65 .. | 700·5 | 1,106·8 | 11·3 | 22·7 | 711·8 | 1,129·0 |

*Note.*—Figures are in metric tonnes from 1960 onwards.

According to the Industrial Policy Resolution of April 1956, the developments in this field fall under Schedule "A", which is the responsibility of the public sector. Some of the important deposits that are proposed to be investigated are as follows :

Deposits in Cuddapah, Kurnool and Nellore districts (Andhra Pradesh), Hazaribagh, Santal Parganas and Monghyr districts (Bihar), Jubbulpore and Bastar Districts (Madhya Pradesh), Pachekani (Sikkim), Almora and Garhwal Districts (Uttar Pradesh), Udaipur District (Rajasthan), Riasi (Jammu & Kashmir), Mayurbhanj District (Orissa) and Manipur.

## TIN

Tin ores are in Hazaribagh, Ranchi and Gaya districts of Bihar. At present there is no indigenous production in the primary metal. So India has to depend on imports. A substantial part comes from Malaysia. Statistics of imports of tin during recent years are given below.

**Imports of Tin :** The quantity in lakh kgs. and the value in Rs. lakhs respectively during 1960-61 to 1964-65 :

| Year | Tin and alloys unwrought | | Tin and alloys worked | | Total | |
|---|---|---|---|---|---|---|
| | Quantity (Lakh kgs.) | Value (Rs. lakhs) | Quantity (Lakh kgs.) | Value (Rs. lakhs) | Quantity (Lakh kgs.) | Value (Rs. lakhs) |
| 1960–61 .. | 36·0 | 377·7 | 0·1 | 1·6 | 36·1 | 379·3 |
| 1961–62 .. | 49·5 | 570·5 | 0·4 | 5·8 | 49·9 | 576·3 |
| 1962–63 .. | 42·8 | 507·9 | 0·2 | 2·5 | 43·0 | 510·4 |
| 1963–64 .. | 50·5 | 618·7 | 1·7 | 21·1 | 52·2 | 639·8 |
| 1964–65 .. | 48·8 | 771·8 | 1·3 | 18·6 | 50 1 | 790·4 |

## NICKEL

| Year | Nickel & Alloys unwrought | | Nickel and Alloys | | Total | |
|---|---|---|---|---|---|---|
| | Quantity (Lakh kgs.) | Value (Rs. lakhs) | Quantity (Lakh kgs.) | Value (Rs. lakhs) | Quantity (Lakh kgs.) | Value (Rs. lakhs) |
| 1960–61 .. | 11·2 | 113·5 | 3·6 | 28·5 | 14·8 | 142·0 |
| 1961–62 .. | 13·8 | 123·6 | 3·9 | 28·3 | 17·7 | 151·9 |
| 1962–63 .. | 13·7 | 126·5 | 2·1 | 17·7 | 15·8 | 144·2 |
| 1963–64 .. | 17·3 | 151·2 | 2·7 | 26·4 | 20·0 | 177·6 |
| 1964–65 .. | 13·3 | 117·9 | 4·1 | 35·8 | 17·4 | 152·7 |

India has no proven deposits of nickel ores so far. It is likely that with further geographical exploration nickel ores might be found.

## ALUMINIUM

Aluminium is the only non-ferrous metal which India can produce in large quantities because of extensive deposits of bauxite and adequate supplies of bulk power. At present, considerable attention has been paid for augmenting the production of aluminium in order to arrest the rising trend in the import of this non-ferrous metal involving considerable foreign exchange.

Even though it is known that India possesses bauxite, the basic raw material for aluminium to the extent of 250 million tons, accurate detailed information regarding the extent and quality of the individual deposit has not yet been collected ; only reserves of 25 million tons have stated to have been proved to be suitable for the manufacture of aluminium.

Except bauxite and coal, most of the other raw materials are available only partly or not at all from indigenous sources. Caustic soda and soda are not produced in sufficient quantities, cryolite, aluminium floride, carbon black and filter cloth have to be imported and the possibilities of producing cryolite in this country are being explored.

**Aluminium — Installed Capacity and Production**

(Metric tons)

| Year | Virgin Metal | | Aluminium Sheets and Circles | | Aluminium Foils | | Aluminium Wire Rods (ACSR) | | Aluminium Rods and Sections (extruded) | |
|---|---|---|---|---|---|---|---|---|---|---|
| | Installed Capacity | Production | Installed Capacity | Production | Installed Capacity | Production | Installed Capacity | Production | Installed Capacity | Production |
| 1960 .. .. | 18,192 | 18,413 | 20,400 | 16,418 | 2,028 | 3,000 | 14,016 | 4,656 | 1,224 | 1,296 |
| 1961 .. .. | 22,116 | 18,382 | 21,600 | 16,930 | 3,000 | 3,216 | 13,056 | 8,292 | 3,756 | 1,584 |
| 1962 .. .. | 53,340 | 35,212 | 22,200 | 16,294 | 4,200 | 3,444 | 13,056 | 11,352 | 3,756 | 3,060 |
| 1963 .. .. | 53,340 | 53,386 | 22,200 | 22,244 | 3,000 | 3,444 | 13,056 | 17,988 | 3,756 | 3,936 |
| 1964 .. .. | 53,340 | 54,539 | 22,200 | 22,501 | 3,000 | 2,544 | 29,400 | 20,256 | 3,756 | 3,240 |

**Imports**

| Year | Aluminium and Alloys unwrought | | Aluminium and Alloys worked | | Total | |
|---|---|---|---|---|---|---|
| | Quantity (Lakh kgs.) | Value (Rs. lakhs) | Quantity (Lakh kgs.) | Value (Rs. lakhs) | Quantity (Lakh kgs.) | Value (Rs. lakhs) |
| 1960–61 .. | 104·6 | 262·4 | 149·5 | 501·8 | 254·1 | 766·2 |
| 1961–62 .. | 80·9 | 212·8 | 174·7 | 580·1 | 255·6 | 792·9 |
| 1962–63 .. | 151·8 | 357·2 | 236·3 | 693·1 | 388·1 | 1,050·3 |
| 1963–64 .. | 39·4 | 86·4 | 207·4 | 550·9 | 246·8 | 637·3 |
| 1964–65 .. | 35·4 | 97·4 | 194·1 | 626·6 | 229·5 | 724·0 |

**Consumption :** It was expected that the demand for aluminium would expand from 20,000 tons to nearly 30,000 tons by 1960–61 mainly owing to an increase in the production of A.C.S.R. cables. The Tariff Commission Report (1960) on Aluminium Industry placed the requirements by 1963 at 74,000 tons per annum as given below : Utensils 16,000 ; A.C.S.R. and A.A.C. 27,000 ; Transportation and aluminium alloys 11,500 ; Building and construction 5,000 ; Food and farming 2,500 ; Canning and Packaging 6,000 : Miscellaneous 6,000. Total 74,000.

An investment of the order of Rs. 12 crores is estimated to have been made in the aluminium industry during the Second Plan period against Rs. 22 crores, anticipated at the time of formulating the programmes of development in 1956.

The investment in the aluminium industry under the Third Plan is estimated at about Rs. 65 crores. About 8,000 to 10,000 additional persons are expected to find employment in this industry.

**Schemes Under Implementation :**

The progress made by some of the aluminium companies is as follows :

**Aluminium Corporation of India :** This company is the first producer of aluminium metal from Indian bauxite. The Corporation successfully completed the new smelter and put into operation on June 2, 1962. The full rated capacity was achieved by November, 1962. The Company has been granted a letter of intent for further expansion from 7,500 tonnes to 12,500 tonnes.

**Aluminium Industries :** About 55,200 kilometres of bare conductor and 10·19 million core metres of covered aluminium conductor were manufactured in 1962–63 as compared to 62,000 kilometres of bare conductor and 9·86 million core metres in 1961–62. The expansion of the covered aluminium conductor factory at Kundara and the new factory at Hyderabad is nearing completion.

**Indian Aluminium Co. :** Production at Hirakud smelter was stabilised at its rated capacity and 21,040 tonnes of metal were produced in 1964 against 19,984 tonnes in 1963. Alumina production at Muri was 65,500 tonnes compared to 59,309 tonnes in 1963. At Lohardoga bauxite mining at 196,444 tonnes showed improvement over the 1963 level of 163,556 tonnes.

In May 1964, the Company submitted proposals to the Govt. of India for establishment of an integrated Aluminium industry in Western India. These proposals consist in setting up in the first stage of a 30,000 tonne smelter in Mysore, a 13,000 tonne sheet mill in Maharashtra and a 65,000 tonne alumina plant in Maharashtra. Capital investment will be of the order Rs. 260

*Note :* Figures upto 1959 are in tons and from 1960 onwards are in metric tons.

million of which Rs. 108 million will be the foreign exchange requirement.

Total production in the year 1964 has been 22,880 M. Tons comprising 13,320 M. Tons of electrical grade and 9,560 M. Tons of Commercial grade. Total production of Alumina during the year was 43,294 M. Tons as against 39,040 M. Tons during 1963. Properzi plant was commissioned in Jan. 1964 and it has been possible to achieve a production of 6,623 M. Tons of Re-draw rods against the rated capacity of 6,000 M. Tons.

**The Madras Aluminium Company:** It is expected that the plant will commence production during the latter half of the year 1964. This company has undertaken the manufacture in collaboration with the Martecatine of Italy.

**Growth of Demand and Supply of Aluminium:** The data in the following table give an indication of the growth of demand of aluminium during the Third Plan period.

Demand for electrical grade and commercial grade respectively of aluminium in '000 tons: 1961-62: 23·0; 35·0; 1962-63: 27·0; 40·0; 1963-64: 33·0; 44·0; 1964-65: 45·0; 51·0; 1965-66: 55·0; 60·0.

The following table summ rises the development programme of the industry envisaged in the Third Plan (unit in tons).

| | 1960–61. | 1965–66. |
|---|---|---|
| No. of Smelters .. | 3 | 6 |
| Installed capacity | 18,100 | 87,305 |
| Production .. | 18,243* | 80,000 |

* Production during 1960.

### BRASS

The position with regard to the production of brass pipes and tubes, and brass sheets and circles respectively from 1954 to 1964 is as follows: Figures in tonnes: 1954: 0·36; 15,888; 1955: 13·20; 13,228; 1956: 0·84; 13,800; 1957: 0·72: 18,072; 1958: 0·72; 20,724; 1959: 0·84; 21,300; 1960: 0·36; 26,988; 1961: 106·8; 24,612; 1962: 181·2; 23,748; 1963: 352·8; 22,644; 1964: 642·0 20.328.

The quantity imported during 1964-65 and the value of brass were 18·1 lakh Kgs. and Rs. 97·7 lakhs respectively.

The position regarding the value in Rs crores of imports of non-ferrous base metals during 1962-63, 1963-64 and 1964-65, respectively is as shown below: 1962-63: 55·14; 1963-64: 55·06; 1964-65: 58·30.

# PAPER INDUSTRY

THE bulk of the production comprises the more common types of paper, especially printing and writing paper. The manufacture of superior varieties is also undertaken but on a restricted scale.

The following table gives the trend of production:—

(In thousand tonnes)

| | 1960 | 1961 | 1962 | 1963 | 1964 |
|---|---|---|---|---|---|
| Printing & Writing .. .. .. .. | 216·7 | 229·5 | 234·4 | 300·0 | 320·5 |
| Wrapping .. .. .. .. .. | 67·4 | 59·9 | 75·5 | 75·0 | 85·0 |
| Special Varieties .. .. .. .. | 8·53 | 9·0 | 8·0 | 6·6 | 6·5 |
| Paper Boards .. .. .. .. | 57·37 | 65·5 | 69·7 | 80·0 | 80·4 |
| Total .. .. .. .. .. | 350·00 | 363·9 | 387·6 | 461·6 | 492·4 |

According to the Annual Survey of Industries the total factory sector as a whole employed Rs. 91·5 crores (productive capital) in paper industry in 1962.

At present (as at the end of 1964) there are 42 paper mills manufacturing paper and paperboards with a total installed capacity of 5·65 lakh tonnes. The aggregate installed capacity of the paper industry was 433,800 tonnes in 1962, as compared to 409,992 tons in 1961, 400,000 tons in 1960, 321,000 tons in 1959, 268,600 tons in 1958. The consumption of paper was 411,000 tons in 1962-63, and 389,000 tons in 1961-62. The consumption is expected to be of 493,000 tons in 1963-64.

The Statewise distribution of the industry as on March 1, 1964 is as follows:

| State | Position as on 1-3-1964 | |
|---|---|---|
| | No. of units | Annual installed capacity (tons) |
| West Bengal .. .. | 5 | 1,14,550 |
| U.P. .. .. .. | 2 | 31,200 |
| Bihar .. .. .. | 2 | 63,000 |
| Orissa .. .. .. | 3 | 98,000 |
| Punjab .. .. | 4 | 45,760 |
| Gujarat .. .. | 5 | 15,050 |
| Maharashtra .. .. | 11 | 48,310 |
| Andhra Pradesh .. | 2 | 43,000 |
| Mysore .. .. | 5 | 53,640 |
| Kerala .. .. .. | 1 | 8,640 |
| Madras .. .. | 1 | 20,000 |
| Madhya Pradesh .. | 1 | 8,000 |
| Total .. | 42 | 5,49,150 |

The following are the leading industries in paper and paper industries having an annual installed capacity of more than 30,000 tonnes, statewise.

| State | Name and location of the company | Annual capacity (tonnes) |
|---|---|---|
| West Bengal .. | Messrs. Titaghur Paper Mills, Titaghur .. .. | 50,000 |
| | Bengal Paper Mills, Raniganj .. | 36,000 |
| Bihar .. | Rohtas Industries Ltd., Dalmianagar .. .. | 60,000 |
| Orissa .. .. | Orient Paper Mills Ltd., Brajrajnagar .. .. | 68,000 |
| Punjab .. | Shree Gopal Paper Mills Ltd., Yamunanagar .. | 40,000 |
| Andhra Pradesh. | Sirpur Paper Mills Ltd., Sirpur .. | 40,000 |
| Mysore .. | West Coast Paper Mills, Dandeli .. | 30,000 |

The Madhya Pradesh Government sanctioned the establishment of a paper mill at Amlai (Sahdol), with an annual capacity of 48,000 tonnes. This project costing Rs. 17 crores was inaugurated on April 16, 1965 and is expected to produce well over 200 tons of fine writing printing grades of paper per day. Two new factories for the manufacture of paper will soon be established in Maharashtra. These units will be located at Ahmednagar District by Mr. Sohan Lal of New Delhi and Messrs. K. L. Gupta & Co., of Bombay, the annual capacity of these units being 42,000 and 37,200 tonnes respectively.

The Industries Directorate of the State Government has already studied the fuel problem of the sugar factories making over their bagasse for pulp or paper manufacture.

India imported paper and paperboards worth Rs. 13 crores in 1964-65. Some exports of paper and paperboards have also been taking place. Such exports were valued at Rs. 71 lakhs in 1964-65. The leading countries importing Indian paper and paperboards were Indonesia, Turkey, Egypt, Ceylon and East and West Pakistan. Cigarette paper alone accounted for Rs. 43 lakhs in 1964-65.

Paper and paper pulp had protection from 1925 to April 1947.

The Tariff Commission in its report submitted to the Government in 1959, recommended a substantial reduction in the ex-works and selling price of paper and paperboards and fixed fair prices of paper and paperboards of 24 varieties.

The selling prices of white printing and creamlaid paper have now been fixed at Rs. 1·55 and Rs. 1·61 respectively (per Kg.), excluding excise duties, State Government and local levies.

The Tariff Commission recommended several measures for expanding paper production in the country and creating new capacity to meet the increasing demands. It also suggested steps to tighten up the distribution system to keep a check on the prices. The Tariff Commission recommended that the Government should take early steps to make technical assessment of the capacity of each unit in terms of several types of paper and paperboards and production should be planned in such a way as to rectify the imbalance in the pattern of production which had developed during the last few years.

The possibility of permitting long-term leases of forests to paper mills was suggested by the Commission. It recommended that establishment of pulp manufacturing units independently of paper mills and direct supply of waste paper in bulk quantities from the Government departments to mills, instead of through intermediate dealers, should be encouraged.

In its resolution on the Commission's report, the Government of India announced that it would take necessary steps to implement the recommendations.

### DEVELOPMENT PROGRAMME

The Union Government have also approved and granted licence for 15 new (large) units with a total capacity of 397,000 tonnes and 35 small units for production of paper and paperboards. Out of these 15 (large) units, 11 will be bagasse based units. The three units, which are reported to manufacture paper and paperboards

from bagasse are, Rohtas Industries, Mandya National Paper Mills, and Seshasayee Paper and Boards Ltd.

At the end of the First Plan period there were 24 units producing straw boards and other boards with an annual capacity of 59,380 tons. During the Second Plan period the number increased to 26 with an annual capacity of 77,424 tons. The Planning Commission has envisaged production and capacity targets of 70,000 tons and 90,000 — 100,000 tons per year respectively, for 1965-66. As on March 1, 1964 there were 30 units with an annual capacity of 92,404 tonnes. Fourteen new units with an annual capacity of 47,100 tonnes have been licensed. With the implementation of these schemes, the indigenous capacity would increase to 1·4 lakh tonnes.

The target for paper and paperboards in the Fourth Plan is 1·5 million tons against the Third Plan target of 820,000 tons. In order to reach the Fourth Plan target, it was estimated that 25 to 30 new paper mills each having a capacity of 100 tons per day would have to be set up. The Fourth Plan target suggested by the Development Council for Paper, Pulp and Allied Industries are : 1) Paper and Paperboard 1·4 million tons ; 2) Newsprint 330,000 tons ; 3) Pulp 220,000 tons.

The Second Plan envisaged the establishment of three hardboard factories. Of these, one, namely, Anil Hardboard Ltd. in Bombay, went into production in November 1958. The annual capacity of this factory is 6,000 tons. The company proposes to double the capacity of its hardboard plant and secured licence to import plant and machinery worth Rs. 29 lakhs. The other two factories now being set-up are the 6,000 tons Madhya Pradesh Industries Ltd. and the 3,700-ton Western Indian Plywood Ltd. at Baliapatam.

The progress made by the paper industry during the First and Second Plan periods and the targets set for it in the Third Plan are indicated below :

(In '000 tons)

| | Paper and paperboard | Newsprint | Security paper (In tons) |
|---|---|---|---|
| 1950-51 Production .. .. .. .. | 114 | .. | .. |
| 1955-56 Capacity .. .. .. .. | 210 | 30 | .. |
| 1955-56 Production .. .. .. .. | 187 | 4·2 | .. |
| *Second Plan targets :* | | | |
| 1960-61 Capacity .. .. .. .. | 450 | 60 | .. |
| 1960-61 Production .. .. .. .. | 350 | 60 | .. |
| 1960-61 Capacity (anticipated) .. .. | 363 | 30 | .. |
| 1960-61 Production (anticipated) .. .. | 320 | 28 | .. |
| *Third Plan* | | | |
| 1965-66 Target Capacity .. .. .. | 820 | 150 | 1,500 |
| 1965-66 Target production .. .. .. | 700 | 120 | 1,500 |

During the First Plan period, the consumption of paper and paperboard increased on an average by about 8 per cent per annum. It showed a progressive increase of 10 per cent during the Second Plan. On this basis, the demand by 1960-61 might have been about 350,000 tons. The demand for newsprint went up to 120,000 tons, and that for strawboards and other boards to 40,000 tons by end of the Plan period. A sum of Rs. 44 crores over and above the investment of about 4·25 crores in public sector projects was invested in the paper and paperboard industry during the Plan period, to achieve the target capacity of 450,000 tons. The investment on newsprint factories was Rs. 6 crores for 60,000 tons. An increase in the production of paper to the extent of 700,000 tons is envisaged during the Third Plan period, *i.e.*, by 1965-66.

In order to achieve self-sufficiency, a production target of 700,000 tons and a capacity target of 820,000 tons was fixed. It is expected to attain production of 680,000 tons by 1965-66. The utilization of capacity in the paper industry has been over 85 per cent during the last several years.

The National Industrial Corporation of the Government of India has prepared the feasibility report for setting up two paper plants costing Rs. 22 crores in Jammu and Kashmir to be implemented during the IV Plan, for manufacturing rayon grade pulp and newsprint and white printing paper.

Besides, it has been proposed to start one newsprint factory in Punjab and another in U.P. with a capacity of 60,000 tonnes and 30,000 tonnes per year respectively.

The *per capita* consumption of paper in India at present stands at 2·6 lbs., as compared with 453 lbs. in the U.S., 126·4 lbs. in Japan and 207 lbs. in the U.K. Hence, it is imperative that the industry should expand even though there is actually a glut in certain varieties of paper such as ordinary writing paper, printing and wrapping paper.

### NEWSPRINT

The National Newsprint and Paper Mills Ltd. (NEPA) is India's first newsprint mill. (For details see under Government Industrial Undertakings.)

The total licensed capacity of newsprint at present is 180,000 tonnes per year. Of the three new schemes licensed, *viz.* Messrs. Birla Gwalior Pvt. Ltd. (U.P.), Shree Gopal Paper Mills Ltd. (Punjab) and Rohtas Industries (Maharashtra), only the first two are likely to materialise by the end of the Fourth Plan. It has also been agreed in principle to expand the capacity of the NEPA Mills from 30,000 tons to 60,000 tons per annum. NEPA Mills produced 30,300 tons of newsprint during 1962-63, exceeding the original target by 300 tons.

It is estimated by the Planning Commission that by 1965-66, the annual demand for newsprint will be of the order of 150,000 tons. An inhibiting factor in the growth of these industries was the dearth of raw materials. In the Third Plan, a target capacity of 150,000 tons per year has been fixed for newsprint, to meet the estimated consumption of 120,000 tons in 1965-66. This demand is based on the actual consumption of newsprint under the restrictive policy for newsprint adopted by the Government. The target for the Fourth Plan is 330,000 tons.

A five-fold expansion from 30,000 tons to 150,000 tons has been proposed in anticipation of growing demand during the Third Plan period. Additional capacity is expected to be achieved through the doubling of the Nepa mills and through the establishment of new newsprint factories based on bagasse and on the soft woods available in the Himalayan region. The table below will throw some light on the expansion of the newsprint industry during the Plan periods.

The following table summarises the development of paper and paperboard industry envisaged during the period of the Third Plan.

('000 tons)

| | 1960-61 | | 1965-66 | |
|---|---|---|---|---|
| | Annual rated capacity | Production | Annual rated capacity | Production |
| Paper and paperboard | 410·0 | 343·2 | 820·0 | 700·0 |
| Newsprint .. | 30·0 | 22·9 | 150·0 | 120·0 |
| Strawboard and other boards .. | 77·4 | 54·5 | 90–100·0 | 70·0 |

The Import of newsprint is given in the table below.

| Year | Value (Rs. crores) |
|---|---|
| 1960–61 .. .. .. | 5·95 |
| 1961–62 .. .. .. | 9·71 |
| 1962–63 .. .. .. | 7·63 |
| 1963–64 (April-Dec.) .. | 5·06 |
| 1964-65 .. .. .. | 7·40 |

The main supplying countries of newsprint to India are Canada, Finland, Norway, Poland, Sweden and U.S.S.R.

# PETROLEUM INDUSTRY

PETROLEUM is a mixture of hydrocarbons which may be in liquid, solid or gaseous forms. Very frequently these three forms are found together but in completely different proportions in different localities. In addition to hydrocarbons, petroleum is usually contaminated with small quantities of compounds containing sulphur, nitrogen or other elements.

Because of the varying proportions of hydrocarbons, crude oils from different sources differ widely in their characteristics. Thus, from some crude oils sufficient lubricating oils and waxes may be obtained while others may yield insignificant quantities of wax but huge quantities of asphaltic bitumen.

Crude oil may be divided, very broadly, into three classes :—

(1) Paraffin Base Crudes : They usually give substantial yields of paraffin wax and lubricating oils, e.g. Assam Crudes. (2) Asphaltic Base Crude : This type of crude contains little or no paraffin but asphaltic matter in large proportions, e.g. crudes from Venezuela. (3) Mixed Base Crudes : Contain both parafin wax and asphaltic matter in quantity, e.g. Indonesian crude.

Crude oil is processed in a unit called a refinery for obtaining various products. There are hundreds of products manufactured from crude oil. In fact, today, there is hardly an industry which does not use some kind of petroleum product. To list here a few products :—

Kerosene is used as an illuminant and a cooking fuel. Motor Spirit and Aviation Spirit are

used as fuel by automobiles and aircraft respectively. High Speed Diesel Oil is used by trucks, buses and tractors. Furnace Oil is used in miscellaneous industrial units including power generation. Mineral Turpentine is used as base in paints and varnishes. Wax is used for manufacturing candles. Lubricants are used for lubricating machines. Bitumen is used in road-making, insulation purposes. Chemicals produced from petroleum sources and generally known as petrochemicals are used for industrial and agricultural purposes.

The demand for petroleum products in India has been steadily growing with the years. Between the years 1948 and 1964, the total inland demand has increased from 2·24 million tons to 11·4 million metric tons, representing an annual average growth rate of about 10 per cent. By 1966, it is expected that demand will be about 15 million metric tons.

Individual petroleum products have been showing a rise in consumption over the years. Most marked increases have been registered in the consumption of products like kerosene and high speed diesel oil, which are usually known as middle distillates and furnace oil.

With the growth in India's economy and rapid industrialisation, set in motion by the various Five-Year Plans, oil consumption has steadily grown but compared with other countries the per capita consumption is still very low. The per capita consumption of some countries including India are given below: U.S.A. 3·379 K.L.; Australia 1·65 K.L.; Ceylon 0·122 K.L.; Burma 0·038 K.L.; India 0·03 K.L.

India's current production of crude oil is about 2·3 million tonnes which is expected to rise to about six million tonnes per year by 1966. In order to bridge the gap between indigenous availability and the demand, India has to import crude oil and petroleum products from various countries.

During 1964 the refining capacity in the country was 8·50 million tonnes. This will rise to about 14·5 million tonnes during 1966. A little over a third of this capacity will be based on indigenous crude. By the end of the 4th Plan period, refining capacity is expected to be about 25 million tonnes per annum.

## OIL EXPLORATION AND PRODUCTION

At present oil exploration in India is conducted by three agencies: The Assam Oil Company, The Oil India Ltd., and the Oil and Natural Gas Commission.

The oil bearing regions in India extend over Punjab, Ganga Valley, Assam, West Bengal, Gujarat, Kutch, Rajasthan and the off-shore areas along the eastern and western coasts and have been estimated at 1,040,000 sq. kilometers. The Assam Oil Company and the Oil India Ltd. operate within the areas allotted to them in Assam State while the Oil and Natural Gas Commission is responsible for exploration over the remaining parts of the country including off-shore areas. Technical training institutes in prospecting, drilling, exploration etc. are being run by the oil and Natural Gas Commission at Bareilly, Cambay and Sibsagar. In addition, the Commission has a Research and Training Institute at Dehra Dun. The activities of the three agencies are briefly described below:

**Assam Oil Company:** India's first oil-well, 102 feet deep, was drilled with a steam-powered drill, near an oil seepage at Nahar Pong in Assam in 1866. It failed to strike oil. But on 26th March 1867, oil was struck at 118 feet at Makum. A few more wells were dug but not much was done for the next twenty years.

Assam Railway and Trading Company were the pioneers in the field of exploration. Between 1890 and 1893 they drilled 4 wells varying in depth from 662 feet to 910 feet. They obtained a concession from the Government to search for oil.

Another company, Assam Oil Syndicate, also obtained a similar concession. Both the companies met with a fair measure of success. By 1898, 15 wells were dug and the crude was refined at Margherita where a small refinery was set up.

The two companies then merged and formed the Assam Oil Company. A refinery was built at Digboi with a capacity of 17,000/20,000 gallons a day.

By 1920, the Assam Oil Company completed about 80 wells. Production reached 14,000 gallons a day. Burmah Oil Company, which had achieved considerable success in Burma, now took over control of the Assam Oil Company and re-equipped Digboi with modern machinery. By 1925, well No. 125, the first large well, was drilled. Production reached 4,500 barrels a day in 1931. Assam Oil Company has drilled nearly 1,000 wells so far out of which nearly 600 are in operation now. The present rate of production of Assam Oil Company is of the order of 0·4 million tonnes.

Oil India Private Ltd., a partnership between the Government of India and the Burmah Oil Company, was registered on February 18, 1959, in Shillong, as a Rupee Company. The headquarters of the Company is at Duliajan.

Oil India has an authorised capital of Rs. 50 crores, divided into 500,000 shares of Rs. 1,000 each. In terms of an agreement signed in 1961, the Govt. of India and the Burmah Oil Company became equal partners in Oil India Ltd.

Oil India Ltd. has drilled upto Sept. 1963, 164 wells out of which 127 were oil or gas producing.

Oil India Ltd. propose to drill 57 wells during 1964 and 1965 so as to be in a position to supply the crude oil requirement of Barauni Refinery also. This Company has already discovered crude oil reserves capable of sustaining an annual production of three million tons. This quality of oil is committed for supply to the Government owned refineries at Gauhati and Barauni.

The oil exploration work in the Andamans has revealed interesting prospects. The geological survey in the middle Andamans has revealed some structures which called for more work. As soon as it was completed, it was proposed to extend oil exploration in the region.

Another oilfield of substantial size has been discovered near about the small town of Kalol, 15 miles north of Ahmedabad and 80 miles from Cambay. According to official sources Gandhinagar area is likely to prove to be one of the richest oilfields in India.

### OIL AND NATURAL GAS COMMISSION*

The Oil and Natural Gas Commission was formed in May 1956 and functioned as a Government department till 1959 when it was converted into a statutory organisation. The Oil and Natural Gas Commission, of which the Minister for Petroleum & Chemicals is chirman, has its Hqrs. in Dehra Dun. About 12,620 persons are employed on its staff. The Commission has three Directorates—Geology, Geophysics and Engineering.

Geological and geophysical surveys are carried out by the Commission in various parts of the country—Jammu & Kashmir, Punjab and U.P. foot-hills and plains, Bihar, Assam, West Bengal, Gujarat, Saurashtra, Kutch, Rajasthan, Cauvery basin in Madras and Godavari basin in Andhra Pradesh and coastal regions of Kerala and Andaman & Nicobar islands.

On the basis of the results of these Geological and Geophysical surveys, drilling is in progress in Gujarat, U.P., Punjab, Assam, Bihar, Rajasthan and Madras. Drilling will shortly be taken up in West Bengal and in the Gulf of Cambay.

Oil and/or gas has been found in Cambay, Ankleshwar and Kalol areas of Gujarat and Rudrasagar and Lakwa areas of Assam. In Gujarat, commercial reserves of oil have been proved. The current rate of production from Gujarat fields is 3,300 tonnes per day. Up to March 31, 1965 a total of 280 wells have been drilled in Gujarat and it is estimated that these fields are capable of producing three million tonnes of crude per annum. Based on these reserves, a refinery at Koyali in Gujarat is under construction.

The Commission have entered into an agreement with the National Iranian Oil Company for exploration and production of oil in certain off-shore areas in the Persian Gulf in collaboration with AGIP of Italy and Phillips of U.S.A. The first well in the area was spudded in on the 29th of May 1965 and drilling is still in progress.

### DISTRIBUTION

Distribution is that stage of the petroleum industry when refined products leave the refinery on their way to the customer. Inland distribution is a very big undertaking in this country. About 11 million tonnes of petroleum products have been distributed during 1964.

At present the major oil distributing companies are: Burmah-Shell, Esso, Caltex and the Government owned Indian Oil Corporation, which apart from distributing the products obtained from its refineries, imports products from rupee payment sources. With the establishment of additional refineries, the Corporation will be handling increasing quantities of petroleum products.

#### Prices

In August 1960, the Government appointed the Oil Price Inquiry Committee under the chairmanship of Mr. K. R. Damle "to examine the principles and elements according to which the selling prices of various petroleum products in India should be determined after April 1, 1961", and *inter alia* to examine and report on specific aspects of petroleum pricing. The Committee submitted its Report in July, 1961. The Government announced its decisions on the Report late in September, 1961 and implemented them with effect from October 1, 1961.

The private oil companies have reduced the price of crude oil twice by 2 cents and 4 cents per barrel during Dec. 1964 and July 1965 respectively. This led to a saving on foreign exchange of about 2 crores.

The Union Government appointed on May 13, 1964 a working group headed by Mr. J. N. Taluqdar, to re-examine the pricing principles for enforcement from about the middle of 1965.

### MISCELLANEOUS

A joint committee of the Government and representatives of the private oil industry known as Oil Advisory Committee has been set up by the Government of India to study problems of supply, distribution and future demand in relation to indigenous production and refining capacity. In this way, a machinery has been set up for close and continuous consultation between the private and public sectors on matters of common interest. Representatives from the Government and oil industry are associated with the working of this Committee.

An institution known as the Indian Institute of Petroleum has also been set up under the control of the Council of Scientific and Industrial Research to do research and give training in petroleum technology.

### REFINERIES

The Digboi Refinery of the Assam Oil Company was commissioned in 1899, and it was the only refinery in India till 1954. A new gasoline plant and a new luboil distillation unit were added to the refinery in 1954. In 1964, the refinery produced a total of 4,35,450 tonnes of petroleum products. Its annual throughput is 0·45 million tonnes of Crude.

* O. N. G. C.'s production increased from 40,000 tons in 1961-62 to almost a million tons in 1963-64. It is expected to produce about 3 million tons by 1966 and 10 million by 1971.

As a result of agreements between the Government of India on the one hand and Burmah-Shell, ESSO and Caltex on the other, three new refineries were set up in mid-fifties. The refineries by Burmah-Shell and ESSO are located at Trombay near Bombay while the Caltex refinery is at Vishakapatnam. The capacities of these refineries are : Burmah-Shell 3·75 million tonnes ; ESSO 2·50 million tonnes ; Caltex 1·05 million tonnes.

## PUBLIC SECTOR REFINERIES

The first public sector refinery at Gauhati was commissioned in January 1962. The capacity of this refinery is 0·75 million tonnes.

The total cost of the Gauhati refinery is estimated at Rs. 17·70 crores. The Rumanian Government have agreed in principle to provide the necessary technical and financial assistance for expansion of the refinery from its present capacity of ·75 million tonnes per annum to 1·1/1·25 million tonnes per annum. The proposal is under examination.

The second public sector refinery at Barauni in Bihar was commissioned in the second half of 1964. The initial capacity of the refinery will be two million tonnes but the capacity will be ultimately expanded to three million tonnes in the beginning of the Fourth Plan period. The first stage of one million tonnes was commissioned in July 1964 and the second stage of another million tonnes and the luboil plant were expected to be commissioned during 1965.

The cost of Design and Technical Assistance as well as plant and equipment for Barauni refinery is being met out of Soviet credit. An amount of Rs. 16·48 crores has so far been utilised from this credit. The total cost of the refinery is estimated at Rs. 40·51 crores with a foreign exchange component of Rs. 17·54 crores.

The third public sector refinery is also under construction at Koyali near Baroda in Gujarat and was expected to be commissioned during the second half of 1965. Its initial capacity will also be two million tonnes to be ultimately expanded to three million tonnes.

The Gujarat refinery is estimated to cost Rs. 30·21 crores for the initial capacity of 2 million tonnes per annum. The expansion of the refinery by another million tonne will cost a further Rs. 2·91 crores. The foreign exchange component of the initial stage expenditure will be Rs. 8·78 crores and the same of the cost of expansion will be Rs. ·9746 crores. Soviet credit amounting to Rs. 8 crores has so far been allocated for the project. The balance of the foreign exchange requirement will also be found from the Soviet credit and any savings out of the same earmarked for Barauni refinery. The initial stage expenditure is expected to be incurred during the Third Plan while the expenditure on expansion will be incurred during the Fourth Plan.

**Cochin Refinery.**—The Cochin Refinery is expected to go on stream by March, 1966.

The cost of the project is estimated at Rs. 21·92 crores, and the foreign exchange component is Rs. 10·39 crores.

The Refinery has been designed to produce annually 2·5 million tons of petroleum products, with the provision for expansion of the capacity to 3·5 million tons later.

The Refinery will have a crude oil storage of 1 lakh tons. It will provide employment to about 1,000 persons.

**Indian Oil Corporation Ltd.**—A Government owned and Government managed private limited company—Indian Refineries Ltd. was incorporated on August 20, 1958 to control and manage the first two public sector refineries, namely the Gauhati and Barauni refineries. This Company has with effect from 1st September 1964 been merged with the public sector marketing company the Indian Oil Company Ltd. to form what is now known as the Indian Oil Corporation Ltd. A separate division of the Corporation called the Refineries Division is looking after the above public sector refineries. With effect from April 1, 1965, the ownership of the Gujarat Refinery has also been transferred to the Indian Oil Corporation Ltd. (Refineries Division) from the Oil and Natural Gas Commission.

In terms of an agreement signed on 27th April 1963 between the Government of India, Phillips Petroleum Company of U.S.A. and Messrs/ Duncan Brothers and Co., Ltd., Calcutta, a Govt. Public Limited Company was incorporated in Kerala State on September 6, 1963 to construct and operate an oil refinery with a capacity of 2·5 million tonnes of crude per annum. This refinery will initially process imported crude oil. The foreign exchange requirements have been obtained through equity participation of Phillips Petroleum Company and a long-term loan arranged by that company from U.S. Banks. The construction of the refinery has made rapid progress and it is expected to be commissioned in the beginning of 1966.

In order to meet the additional demands for petroleum products during the Fourth Plan period, it has been decided to increase the refining capacity to about 25 million tonnes by the end of the Fourth Plan by erecting three more refineries, the first at Madras, the second at Haldia near Calcutta and the third at a suitable location in North-Western India. The construction of the Madras Refinery will be entrusted to Messrs. National Iranian Oil Company and the American International Oil Co. whose collaboration for the refinery has been approved. Regarding Haldia Refinery, tenders have been invited from foreign parties and a suitable collaborator will be selected before the end of 1965.

**Gauhati Product Pipeline.**—This pipeline which is designed for the transport of petroleum products from Gauhati Refinery, was completed and commissioned in November, 1964. The total cost of the pipeline is estimated at Rs. 7·02 crores with a foreign exchange component of Rs. 1·70 crores. The foreign exchange cost has been met out of ENI credit from Italy.

**Barauni Refinery Pipeline.**—This pipeline is being constructed for the transport of petroleum products from the Barauni refinery to areas of consumption. The cost of the pipeline is estimated at Rs. 26·047 crores with a foreign exchange component of Rs. 9·074 crores. The foreign exchange cost will be met out of ENI credit from Italy. The construction of the pipeline is almost complete except for the rail bridge crossings, pump stations and terminals. These are expected to be completed by the end of 1965.

The construction of pipelines is being looked after by a separate division of the Indian Oil Corporation Ltd. The authorised share capital of the Indian Oil Corporation Ltd. is Rs. 75 crores and that of Oil India Ltd. Rs. 50 crores.

**Gujarat Pipeline System.**—The construction of the following pipelines for the transportation of crude oil, gas and products was taken up : Cambay-Dhuvaran Gas Line ; Ankleshwar Uttaran Gas Line; Ankleshwar-Baroda Gas Line ; Ankleshwar-Koyali Crude Line ; and Koyali-Ahmedabad Product Pipeline.

Of these the first two gas lines have since been completed and the remainig three are expected to be completed during 1965.

The total cost of Gujarat Pipeline system is estimated at Rs. 6·732 crores with a foreign exchange cost of Rs. 1·965 crores. The foreign exchange cost will be met out of ENI credit from Italy.

## BURMAH-SHELL REFINERIES LTD.

Burmah-Shell Refineries Ltd. was incorporated in India on 3rd November 1952 for the purpose of constructing and operating a petroleum oil refinery on a 450-acre plot of land in south-west Trombay—near Bombay.

The Refinery commenced operations on January 30, 1955.

The crude oil intake of the Refinery is about four million tons per annum ; the crude oil comes from the Persian Gulf area and from Ankleshwar in Gujarat.

The Refinery manufactures motor spirit, kerosene, high speed diesel oil, light diesel oil, fuel oil, bitumen, liquefied petroleum gas and special boiling point solvents.

The total cost of the Refinery was about Rs. 26 crores, and the total labour staff employed in the Refinery including all categories is about 1,550.

Residential quarters for key operating staff have been provided at a short distance from the refinery, and in addition, Burmah-Shell Refineries Ltd., have paid Rs. 40 lakhs to the Bombay Government for the provision of houses for Refinery labour employees and their families in the Chembur-Ghatkopar area.

Burmah-Shell Refineries Ltd., have also provided a 10-acre recreation ground for their staff and labour employees.

## CALTEX OIL REFINING (INDIA) LTD.

The Caltex Oil Refinery, a product of India's Second Five Year Plan, is located at Visakhapatnam. Its products include petrol, kerosene, diesel oil and fuel oils from the Refinery's flexible two-stage crude oil distillation unit, the fluid catalytic cracking unit with gas recovery facilities, the polymer plant, the propane decarbonisation unit and treating and blending plants.

The Visakhapatnam Refinery is one of the most modern and efficient refineries. It occupies an area as large as 515 acres, and this relaxed setting makes for beauty and work comfort, besides providing room for expansion.

## ESSO REFINERY

The Refinery, which is situated on Trombay island, near Bombay, cost about Rs. 17·5 crores. Construction was started in December 1952 and production started in July 1954. The refinery is capable of running 60,000 barrels of crude oil per stream day nearly 3 million tons a year of crude oil.

Initially the Refinery was designed to process 25,000 B/CD of crude from the Middle East. Besides stepping up refining capacity, new products such as bitumen, jute batching oil, solvents and liquified petroleum gas were introduced to meet the growing needs of the country and save foreign exchange. The Esso Bombay Refinery earned foreign exchange of over Rs. 57 crores during the first decade of its operations.

# PLASTICS INDUSTRY

PLASTICS can be classified into two groups, the-mosetting and thermoplastic. The thermosets soften only once under heat and do not soften again on subsequent heating. Thermoplastics soften when heat is applied and harden on cooling. They can be reshaped again and again. There is also a close relationship between the chemical industry and the plastic industry. The chemical industry supplies the plastic industry with raw materials necessary for the manufacture of synthetic resins.

The U.S.A. produces the largest quantity of plastics followed by Germany, Japan, U.K. and the U.S.S.R.

The Indian plastics industry is a post-war development and, during the first 10 years of its existence, the industry developed in the processing sector with the help of imported raw materials, machinery and moulds. But, at present, the main raw materials such as P.F. moulding powder, U.F. moulding powder, polyestyrene, polythylene, P.V.C. sheeting, nylon monofilament and laminated sheets are manufactured in the country. The plastics industry has now over 200 factories operating on modern lines, in addition to innumerable small ones working on small-scale or cottage industry basis. The capital invested by the industry is reckoned at more than Rs. 25 crores and the same may reach about Rs. 80 to 100 crores by 1966. The industry provides employment to more than 30,000 workers.

During the Third Plan period, the plastics industry is expected to expand more than six-fold. The targeted capacity of raw material production is aimed at 1,33,000 tons by 1965-66 and at 4,00,000 tons by 1970-71.

The machine capacity of the industry at present is estimated as under :—

Compression moulding : 35,000 tons ; injection moulding : 1,200 ounces ; extrusion : 200 inches and surface coating : 10 units.

The Tariff Commission's recommendation to de-protect the industry from January 1, 1963 was accepted by the Government.

There are six units manufacturing polyvinyl chloride (PVC) plastic coated cables, wires and flexibles with an annual capacity of 11 million yards. Six units are manufacturing leather cloth with a capacity of 8·7 million yards per annum. There is one unit producing phenolic resin laminates, with a capacity of 450 tons per annum. There are six units manufacturing polythylene films, layflat tubings and have an aggregate capacity of 837 tons.

The following table shows the total installed capacity and output of important plastic goods in 1962, 1963 and 1964. ('000 kgs)

| | 1962 | | 1963 | | 1964 | |
|---|---|---|---|---|---|---|
| | Installed capacity | Production | Installed capacity | Production | Installed capacity | Production |
| P. F. Moulding Powder | 4,512·0 | 2,422·8 | 4,512·0 | 3,087·6 | 4,512·0 | 3,225·6 |
| Polystyrene Moulding Powder .. .. | 5,443·2 | 3,886·8 | 5,443·2 | 5,515·2 | 5,443·2 | 5,114·2 |
| Phenolic Laminate .. | 1,479·6 | 1,174·8 | 1,478·4 | 1,657·2 | 1,621·2 | 1,708·8 |
| Polythene Films and layflat tubings .. | 3,324·0 | 1,987·2 | 3,324·0 | 1,744·8 | 4,468·8 | 2,292·4 |
| P. V. C. (Flexible) sheetings (unsupported) .. | 3,734·4 | 1,812·0 | 3,758·4 | 1,956·0 | 3,758·4 | 2,067·6 |
| U. F. Moulding Powder | 1,078·8 | 679·2 | 1,078·8 | 1,030·8 | 1,080·0 | 1,220·4 |
| Linoleum .. .. | 852·0 | 480·0 | 852·0 | 681·6 | 900·0 | 835·2 |
| Leather Cloth .. .. | 8,262·0 | 6,658·8 | 8,262·0 | 6,895·2 | 8,262·0 | 8,990·4 |

The articles now manufactured cover a wide range of household consumer and utility items, electrical accessories, telephone equipment, gramophone records, insulated wires, combs, toys, tooth brushes, spectacle-frames, hand-bags, leather cloth, packaging materials, films, industrial items and accessories for automobile engineering, radio and air-conditioning industries. Production of mechanised toys has been an important achievement in recent years.

The per capita consumption of plastics in India is estimated to be ·07 kilos per year against 18 kilos in U.S.A., 18 in West Germany, 12 in Britain and 8 in Japan.

A large part of the raw material is imported. Phenol formaldehyde moulding powder, phenol and formaldehyde and alkyd resin are manufactured in the country out of imported basic materials.

The first moulding powder to be manufactured in India was Phenol Formaldehyde moulding powder. This industry, is however, dependent largely upon imports of phenol, cresol and formaldehyde. In 1960-61, four units were engaged in the manufacture of P.F. moulding powder. Of these four units, three are located in Maharashtra, and one in Gujarat. The three concerns located in Maharashtra are, Industrial Plastics Corporation, Plastic Products of India and Indian Plastics. The requirement of formaldehyde by the plastic industry by 1965-66 is estimated at about 30,000 tonnes per annum. At present there are five units manufacturing P.F. moulding powder with an annual installed capacity of 4,500 tonnes.

*P.V.C. :* Two more factories are being set up, one in Bombay and the other at Mettur for production of this raw material. The capacity of the Bombay unit will be 20,000 tonnes and the other 6,000 tonnes per annum. The companies concerned are National Organic Chemical Industries and Chemical and Plastics India.

*H.D. Polyethylene :* Messrs. Polyolefine Industries Ltd., Bombay in collaboration with Farbwerke Hoechst, Germany were erecting a factory near Bombay for production of 20,000 tonnes. They would also produce 8,000 tonnes of Vinyl acetate and 12,000 tonnes of polyvinyl acetate.

Union Carbide will install a naptha cracker involving a capital outlay of Rs. 8·5 crores. They will produce 9 million kilogrammes of polyethylene per annum. This plant is scheduled to be completed in 1966.

*Polystyrene :* In addition to the plant of Messrs. Polychem of Bombay, one more factory was set up at Visakhapatnam for the production of this raw material. This plant of Messrs. Hindustan Polymers is making good progress and is expected to go on stream by the end of 1966. The licensed capacity of this plant is 10,000 tonnes per annum.

## THIRD PLAN PROGRAMME

The plan for plastics materials is to raise the capacity from 15,540 tons at the end of the Second Plan (1961) to 85,000 tons in the Third Plan (1966) at an estimated fixed investment of Rs. 25·0 crores of which Rs. 10 crores would be in the form of foreign exchange. The production target is placed at 74,000 tons, of which at least 11,000 tons of material as such or converted will be for export. The total employment in this industry in the large-scale sector is estimated to be of the order of 40,000 persons.

The capacity targets set under the Third Five-Year Plan for different articles are given in the table below :

| Material | Capacity (tons) |
|---|---|
| P.F. Moulding Powder .. .. | 6,700 |
| U.F. Moulding Powder .. .. | 4,450 |
| Cellulose Acetate .. .. | 6,700 |
| Polystyrene (including styrene alloys) | 13,400 |
| Polyolefines .. .. .. | 26,800 |
| P.V.C. .. .. .. .. | 13,400 |
| Polyvinyl Acetate .. .. .. | 4,450 |
| Cellulose Nitrate .. .. .. | 890 |
| Laminates .. .. .. | 1,780 |
| Nylon .. .. .. .. | 890 |
| Aceylics .. .. .. .. | 1,780 |
| Polyesters .. .. .. .. | 1,340 |
| Polyurethanes .. .. .. | 890 |
| Others .. .. .. .. | 1,340 |
| Total .. .. .. .. | 84,840 |

SOURCE : Programmes for Industrial Development 1961-66.

Indigenous fabrication of processing equipment and tools will be tailored for a consumption of 60,000 tons of material. It has been estimated that 350 presses of different sizes for compression moulding and lamination can handle 11,000 tons of thermosets. 350 extruders would convert 22,000 tons of thermoplastics into extruded products, besides, compounding 16,000 tons for injection moulding by 800 machines of varying capacities. The value of 1,500 machines and presses inclusive of replacements required for the period of the Plan together with auxiliary equipment such as predryers, preformers, tumbling barrels, scrap grinders, haul off for extruders, mould temperature controllers and other miscellaneous equipment for vacuum forming, vacuum metallising, hot stamping, embossing and printing rollers, heat welding machines, automatic blow moulding equipment, lamination presses, rotational casting machines, etc. would be around Rs. 10 crores. The miscellaneous equipment will cater to foaming, blowing, coating, calendering, casting and fabrication of 11,000 tons of thermoplastic materials.

The requirements of moulds for compression and injection moulding will progressively increase from 800-1,000 in the beginning of the Plan to 3,500-4,000 by 1966—an average of 2,500 moulds per year. As many as 2,500-3,000 dies for extrusion will also be required in the period of the Plan—an average of 500 dies annually. The value of moulds and dies required over the whole period may be put at Rs. 7-8 crores. Alloy steel for the construction of moulds would also become available by the end of the Plan.

The supply of plastics raw materials in the country through domestic production will increase substantially during the next Plan period. According to Planning Commission's working group on petro-chemical industries, polyethylene supply will increase to 26,000 tons in 1967 and to one lakh tons in 1970-71. Supply of PVC will rise from 27,000 tons in 1967 to one lakh tons in 1970-71. The availability of polystyrene will rise from 10,000 tons to 35,000 tons.

The main problem facing the plastics industry is the inflated cost structure which owes mainly to the steep excise duties and high raw material prices. The present rate of excise duty of twenty per cent *ad colorem* plus twenty per cent

surcharge on basic duty is very high. Imports, however, are still quite large, although, since 1957, a restrictive policy has been pursued. The value of imports of raw materials, which was Rs. 4·53 crores in 1959, rose to Rs. 5·71 crores in 1964-65. In 1961-62 imports amounted to Rs. 6·11 crores. The following table shows imports of some of the important raw materials of plastics industry :

(Rs. lakhs)

| Material | 1962-63 | 1963-64 | 1964-65 |
|---|---|---|---|
| P. F. Moulding Powder .. | 6·36 | 6·89 | 6·63 |
| U. F. Moulding Powder .. | 1·82 | 0·51 | 0·36 |
| Cellulose Acetate Moulding Powder .. | 40·65 | 17·16 | 7·96 |
| Polystyrene Moulding Powder .. | 16·66 | 3·22 | 4·72 |
| Vinyl Resins .. | 104·12 | 30·47 | 35·93 |
| Polyethylene Moulding Powder .. | 45·63 | 19·05 | 72·09 |

A Development Council for oil-based and plastics industries has been set up to advise the Government of India on various matters concerning development of soaps, paints and plastics industries.

The country is now an exporter of plastics goods. The following is the yearly exports of plastics from India :

| Year | Rs. crores |
|---|---|
| 1960-61 .. .. | 0·76 |
| 1961-62 .. .. | 0·83 |
| 1962-63 .. .. | 1·05 |
| 1963-64 .. .. | 2·64 |
| 1964-65 .. .. | 3·19 |

Item-wise exports of some of the plastics items were as under :

(Value in lakhs of rupees)

| Plastics Item | 1962-63 | 1963-64 | 1964-65 |
|---|---|---|---|
| Leather Cloth .. | 23·95 | 30·86 | 23·40 |
| Linoleum .. | 17·31 | 30·46 | 24·63 |
| Spectacle Frames | 7·71 | 8·07 | 8·74 |
| Bangles .. .. | 7·70 | 17·89 | 17·59 |
| Umbrella Handles | 2·09 | 1·23 | 2·05 |

In order to encourage exports, an Export Promotion Council was set up in 1955. The Government also allows rebate of import duty at specified rates on raw materials used in the manufacture of plastics goods intended for export. At present the concession is given on urea formaldehyde, cellulose acetate/cellulose acetate butyrate and polystyrene moulding powders.

The leading item of export is leather cloth. The major importers of leather cloth from India are South Viet Nam, Britain, Kuwait, Ceylon and Thailand.

Ceylon leads other countries in import of Indian plastics goods. The other importing countries include Burma, Kuwait, Kenya, Saudi Arabia, Tanganyika, Mauritius and Mozambique.

The following is the yearly import of synthetic plastics materials to India :

| Year | Rs. lakhs |
|---|---|
| 1960–61 .. .. .. .. | 571 |
| 1961–62 .. .. .. .. | 777 |
| 1962–63 .. .. .. .. | 648 |
| 1963–64 .. .. .. .. | 471 |
| 1964–65 .. .. .. .. | 318 |

# RAYON INDUSTRY

## RAYON, SYNTHETIC FIBRES, AND CELLULOSE FILM

### Rayon Filament

There were three units at the beginning of the Second Plan in the country, manufacturing rayon filament with an annual capacity of 22·3 million lbs. Subsequently, three new units with a combined capacity of nearly 21·6 million lbs. had commenced production. There are now nine large scale units engaged in production of viscose filament rayon in India, one in acetate filament and three in staple fibre.

The staple fibre factory of Gwalior Rayons started production in 1954 with a capacity of 5,400 tons per year. The production capacity has now increased to 36,000 tons per year. The South India Viscose has a capacity of 4,000 tons per year.

A Rs. 6 crore nylon plant with a production capacity of 5 tons a day is to be set up at Modinagar, U.P.

The consumption of rayon filament on the basis of production plus imports from 1957-58 to 1962-63 is estimated as under :

(Million lbs.)

| Year | Production | Imports | Availability |
|---|---|---|---|
| 1957–58 .. .. | 26·6 | 40·9 | 67·5 |
| 1958–59 .. .. | 35·0 | 44·5 | 79·5 |
| 1959–60 .. .. | 38·0 | 39·7 | 77·7 |
| 1960–61 (estimated) | 47·0 | 32·0 | 79·0 |
| 1961–62 .. .. | 51·8 | 36·3 | 88·1 |
| 1962–63 .. .. | 63·9 | 27·8 | 91·5 |

At current prices and taxation levels, the consumption of rayon filament can be assessed at about 80 million lbs.

### Staple Fibre

At the start of the Second Plan, Messrs. Gwalior Rayon Silk Manufacturing (Weaving) Company was the only factory producing staple fibre. Its plant at Nagda had a capacity of 16 million lbs. per annum at that time. Since then it has expanded its capacity to 48 million lbs. per annum thereby exceeding the target capacity of 32 million lbs.

The production of staple fibre during 1960 to 1964 is given below :

('000 tonnes)

| Year | Installed Capacity | Production |
|---|---|---|
| 1960 .. .. | 21·60 | 21·78 |
| 1961 .. .. | 25·20 | 26·00 |
| 1962 .. .. | 26·04 | 32·38 |
| 1963 .. .. | 26·04 | 32·24 |
| 1964 .. .. | 26·04 | 37·43 |

About Rs. 35 crores are estimated to have been invested in the rayon and synthetic fibre industry during the Second Plan period. The foreign exchange component of this investment is placed at about Rs. 25 crores.

### Programme of Development in the Third Five Year Plan

As the main use of rayon filament, staple fibre, nylon yarn and other synthetic fibres is in the art silk weaving industry, the demand for these during the Third Plan period has to be assessed in the light of the production envisaged for art silk cloth. In addition, account has to be taken of the demand for rayon yarn arising from other miscellaneous uses.

The production of art silk fabrics during the Second Plan period as reported to the Textile Commissioner has been as follows :—

| Year | Production (Million yards) |
|---|---|
| 1955-56 .. .. .. | 251·18 |
| 1956-57 .. .. .. | 296·11 |
| 1957-58 .. .. .. | 278·39 |
| 1958-59 .. .. .. | 310·87 |
| 1959-60 .. .. .. | 330·00 |
| 1960-61 .. .. .. | 350·00 |

The production during the Third Five Year Plan period viz. 1961 to 1964 is given below :

(Production of Art Silk fabrics including synthetics).

(million metres)

| Year | Production |
|---|---|
| 1961 .. .. .. .. | 570·0 |
| 1962 .. .. .. .. | 600·0 |
| 1963 .. .. .. .. | 648·0 |
| 1964 .. .. .. .. | 832·8 |

It was found that the actual increase in the per capita consumption was less than 3 per cent. per annum during the Second Plan period. The likely increase in the per capita consumption of art silk fabrics during the Third Five-Year Plan cannot be forecast with any great degree of accuracy. However, it seems likely that if supplies were available the per capita consumption would increase at the rate of about 8 per cent. per annum during the Third Plan period. On this presumption the per capita consumption could be reckoned at about 1·8 yards in 1965–66. The requirements of art silk fabrics by 1965-66 can thus be placed at about 864 million yards. While estimating the overall requirements of art silk cloth, account has to

be taken of exports. Export of art silk fabrics is, at present estimated to be of the order of 25–30 million yards. But with continuing efforts it might be possible to export about 50 million yards by 1965-66.

On the above basis, the total requirements of art silk fabrics by 1965-66 may be reckoned at about 915 million yards. On the assumption that (1) consumption of rayon filament and staple fibre will be in the ratio of 60 : 40 and (2) that one lb. of yarn will produce 5 yards of cloth, the total requirements of weaving industry for filament yarn and staple fibre by 1965-66 would be of the order of 110 million lbs. and 75 million lbs. respectively.

In addition to the weaving industry, rayon filament is required for tyre cord and other miscellaneous industries and purposes such as knitting and hosiery industries, gas mantles, fishing nets etc. The demand for rayon tyre cord from the automobile industry is provisionally estimated at 20 million lbs. by the end of the Third Plan period. In order to meet this demand, the Government gave licence to establish a tyre cord plant at Kalyan. This plant was established by Century Rayon in collaboration with Algemene Kunstzijde Unie N. V. of Holland and Veneinigte-Glanstoff Fabriken, A.G. of West Germany.

**Pattern of Consumption :**

In terms of different types of filament and staple fibre the requirements by 1965-66, based on the above target are estimated as follows :

(Million lbs.)

| Nature of fibre | Filament yarn | Staple fibre |
|---|---|---|
| Viscose .. | 96·0* | 64·0 |
| Acetate .. | 24·0 | 8·0 |
| Cuprammonium | 10·0 | .. |
| Synthetics .. | 10·0 | 3·0 |
| Total .. | 140·0 | 75·0 |

* includes 20 million lbs. of tyre cord.

The above estimates are broadly in conformity with the first assessment of demand made by the Development Council for the art silk industry. The Development Council, however, subsequently revised its estimates. According to the revised estimates, the requirements of filament and staple fibre in 1965-66 are placed at 204 million lbs. (including 20 million lbs. for tyre cord) and 141 million lbs. respectively.

The overall position regarding licensing of additional capacity in relation to anticipated requirements is indicated in the following statement :

(Million lbs.)

| Name of the fibre | Estimated requirements by 1965-66 | Total capacity expected on the basis of licences issued under the Industries Act | Total capacity expected on the basis of C.G. clearance |
|---|---|---|---|
| I. Rayon filament | | | |
| Viscose .. .. .. .. .. | 96·0 | 100·6 | 84·6 |
| Acetate .. .. .. .. .. | 24·0 | 19·0 | 4·0 |
| Cuprammonium .. .. .. .. | 10·0 | 13·0 | 5·0 |
| Synthetics .. .. .. .. .. | 10·0 | 13·4 | 7·1 |
| Total .. .. .. .. .. | 140·0 | 146·0 | 100·7 |
| II. Staple fibre | | | |
| Viscose .. .. .. .. .. | 64·0 | 56·0 | 56·0 |
| Acetate .. .. .. .. .. | 8·0 | 1·0 | .. |
| Synthetics .. .. .. .. .. | 3·0 | .. | .. |
| Total .. .. .. .. .. | 75·0 | 57·0 | 56·0 |
| Total of I and II .. .. .. | 215·0 | 203·0 | 156·7 |

The schemes so far licensed or recommended for licence under Industries Act will increase the overall capacity for rayon filament, staple fibre and synthetics to about 203 million lb. as against the target of 215 million lb. envisaged for the Third Plan.

**Investment and Employment :** It is estimated that a sum of Rs. 75 crores would have to be invested in the rayon and synthetic fibres industry during the Third Plan period to achieve the targets indicated. The foreign exchange component of this investment is placed at about Rs. 45 crores. The expansion of the industry is estimated to provide employment to about 8,000 additional persons.

**Requirements of Raw Materials :** The chief raw materials for the viscose process of filament and staple fibre, are rayon grade pulp, caustic soda and sulphur. The requirements of these raw materials for the production of 96 million lb. of viscose filament, 64 million lb. of staple fibre and 32 million lb. of acetate filament and acetate staple fibre are estimated as follows :

| | | |
|---|---|---|
| Rayon grade pulp .. .. | 82,000 | tons |
| Caustic Soda .. .. | 80,000 | „ |
| Sulphur (including carbon disulphide .. .. .. | 60,000 | „ |
| Alcohol .. .. .. | 6·4 | million gallons |
| Cotton linters (for acetate process only) .. .. .. | 13,000 | tons |

In addition, small quantities of copper sulphate, ammonia, sodium hydroxide, cotton linters and sulphuric acid will be required for the manufacture of cuprammonium and phenol and ammonia for the manufacture of caprolactum.

The entire requirements of rayon grade pulp are at present met by imports. A number of schemes for the manufacture of rayon grade pulp with a total annual capacity of about 270,000 tons have, however, been licensed or recommended for licence under the Industries Act.

## CELLULOSE FILM

The first unit for the production of cellulose film was set up by Messrs. Travancore Rayon Ltd. with an annual capacity of 400 tons in 1960. Licences have been granted to two more units, details of which are given below :

1. Messrs. Kesoram Cotton Mills have been licensed to set up a cellulose film unit at Hooghly with a capacity of 1,800 tons per annum. The foreign exchange for the import of plant and equipment for this project has been cleared by the capital goods committee.

2. Messrs. National Rayon secured licence for a capacity of 1,800 tons per annum.

On the basis of schemes so far licensed under the Industries Act, the total capacity for cellulose film is expected to increase from 3,600 tons to 7,200 tons per annum. Of this, the total capacity expected to materialise on the basis of capital goods clearance is 5,400 tons.

According to the then Ministry of Commerce & Industry, the effective demand for cellulose film at that time was about 5,000 tons. The demand for cellulose film is also on the increase on account of its usefulness as an attractive and improved medium for packing export articles. Current projections are that by 1965-66 the total demand will go upto about 10,000 tons per annum.

**Requirements of Raw Materials :**

The requirements of raw materials for a production target of 5,400 tons of cellulose film are estimated to be as follows :

| | |
|---|---|
| Rayon grade pulp .. .. | 6,200 tons |
| Caustic Soda .. .. | 5,400 tons |
| Sulphur .. .. .. | 4,500 tons |

The table given below summarises the development of rayon, staple fibre and cellulose film industry envisaged during the Third Plan :

| Particulars | 1960–61 | 1965–66 |
|---|---|---|
| ANNUAL CAPACITY : | | |
| 1. Rayon filament (million lb.) .. | 52·3 | 140·0 |
| 2. Staple fibre (million lb.) .. .. | 48·0 | 75·0 |
| 3. Cellulose film (tons) | 3,600 | 5,400 |
| 4. Rayon grade pulp (tons) .. .. | .. | 1,00,000 |
| PRODUCTION : | | |
| 1. Rayon filament (million lb.) .. | 47·0 (estimated) | 140·00 |
| 2. Staple fibre (million lb.) .. .. | 48·0 (estimated) | 75·0 |
| 3. Cellulose film (tons) | 2,084 (estimated) | 5,400 |
| 4. Rayon grade pulp (tons) .. .. | .. | 90,000 |
| EXPORTS : | | |
| 1. Art Silk Cloth (million yds.) .. | 30·0 (estimated) | 50·0 |

**Recent Developments :**

World production of man-made fibres had increased from 48 million lb. in 1921 to 8,665 million lb. in 1962. Its share in the total for all fibres had increased from 1 per cent. to 25 per cent. during this period.

Mr. A. R. Ramanathan, Chairman of the Association of Man-made Fibre Industry observed that along with specialisation and diversification, the fibre was being made cheaper. Though man-made fibres were in short supply in India, unlike in foreign countries, further expansion in their production desired on lines was not feasible on account of the slender exchange resources. The price of man-made fibres had been frozen at the 1957 level in spite of the all-round rise in costs. Meanwhile, market prices were falling and stocks with the spinners were mounting.

The Government, in the circumstances, should allow spinners to sell such quotas which are not lifted by the consumers within the prescribed time limit.

The Government has asked the Tariff Commission to recommend fair prices for all kinds of man-made fibre yarn other than acetate rayon yarn. The Commission has been asked to recommend both a fair ex-mill price and also the fair price payable by the consumer.

The development council has recommended to the Government that the Third Plan target for viscose staple fibre, including the controversial polynosic fibre, be increased to one lakh tons. The present licensed capacity for viscose staple fibre yarn is about 40,000 tons. It had been suggested that the target should be raised to one lakh tons, but reserving 40,000 tons for polynosic fibre, which is yet to be tested under Indian conditions.

**Rayon Fabrics Export :** Exports of silk and synthetic fibre which rose to a peak of 90·5 million metres (Rs. 10·35 crores) during 1963 declined to 64·76 million metres (Rs. 7·94 crores) in 1964. The figures for 1964 are provisional.

The principal buyers were Malaysia, Ceylon, Hongkong, Aden and Afghanistan. 1. Malaysia Rs. 101·68 lakhs (90·86 lakh metres) ; 2. Ceylon Rs. 77·43 lakhs (75·70 lakhs metres) ; 3. Hongkong Rs. 60·17 lakhs (57·64 lakh metres); 4. Aden Rs. 39·83 lakhs (47·22 lakh metres ; 5. Afghanistan Rs. 38 97 lakhs (28·91 lakh metres).

# RUBBER INDUSTRY

INDIA produced 45,618 metric tonnes of raw rubber during 1964–65 as against 37,487 metric tonnes in 1963–64.

Rubber production in India during March 1964 totalled 1,924 tonnes, according to the latest statistics of the Rubber Board. About 5,209 tonnes were consumed by manufacturers during the period. Stocks with estates and dealers during the same period were 5,907 m. tonnes.

Manufacturers held 10,185 tonnes in addition to 3,012 tonnes of synthetic rubber and 1,428 tonnes of reclaimed rubber. Imports of natural rubber amounted to 2,940 tonnes during March 1964. Exports were nil.

Of an area of about 377,938 acres under rubber cultivation at the end of 1963–64, over 94 per cent is located in the State of Kerala. Other rubber growing areas are the districts of Kanya Kumari, Coimbatore, Salem, Nilgiris and Madura in Madras State and Coorg and Chickmagalur in Mysore State, and Andamans and Tripura.

The total number of rubber estates registered up to the end of 1963–64 was 70,768.

The following are other details :—

| Year | Planted area in acres | Tappable Area (worked out on the basis of year of planting) in acres | Production (Metric Tonnes) | Average yield per acre in kgs. |
|---|---|---|---|---|
| 1956-57 | 234,351 | 178,500 | 24,060 | 135 |
| 1957-58 | 261,998 | 175,500 | 24,534 | 140 |
| 1958-59 | 286,567 | 173,600 | 24,169 | 139 |
| 1959-60 | 305,452 | 172,500 | 24,173 | 140 |
| 1960-61 | 321,002 | 173,600 | 25,697 | 148 |
| 1961-62 | 348,121 | 183,600 | 27,446 | 149 |
| 1962-63 | 361,142 | 207,700 | 32,239 | 155 |
| 1963-64 | 377,938 | 236,000 | 37,487 | 159 |

**STATEWISE DISTRIBUTION OF THE PLANTED AREA AT THE END OF 1963-64**
(Area in acres)

| STATES | Holdings | | Estates | |
|---|---|---|---|---|
| | No. of units | Area | No. of units | Area |
| Kerala .. .. .. .. | 69,309 | 227,974 | 565 | 128,372 |
| Madras .. .. .. .. | 815 | 5,836 | 41 | 10,977 |
| Mysore .. .. .. .. | 25 | 392 | 11 | 3,945 |
| Andamans .. .. .. | Nil | Nil | 1 | 422 |
| Tripura .. .. .. .. | 1 | 20 | Nil | Nil |
| TOTAL .. .. | 70,150 | 234,222 | 618 | 143,716 |

Areas upto and including 50 acres are classified as *Small Holdings* — (small growers).
Areas above 50 acres are classified as *Estates* — (large growers).

With effect from December 19, 1963, the Government of India fixed for all classes of business the following minimum prices, exclusive of sales tax, for the various grades and qualities of rubber and latex of different concentrations, excluding the cost of container, as mentioned below :

The quality of rubber and minimum price (F.O.B. Cochin for 50 kgms.) in Rs. respectively for the respective groups are as follows : Group 1 : R.M.A. IX ; 161·50 ; R.M.A. 1 ; 161·50. Group 2 : R.M.A. 2 ; 159·85 ; R.M.A. 3 ; 158·20 ; Cuttings No. 1 ; 149·93. Group 3 : R.M.A. 4 ; 154·34 ; R.M.A. 5 ; 149·93 ; Cuttings No. 2 ; 143·32. Group 4 : Precoagulated crepe ; 167·57 ; Pale latex crepe: IX ; 165·36; Pale latex crepe 1 ; 163.16 ; Pale latex crepe 2 ; 162·06 ; Pale latex crepe 3 FAQ ; 160·96. Group 5 : E.B.C. Super IX ; 156·54 ; Estate brown crepe IX ; 152·13 ; Estate brown crepe 2X ; 148·83 ; Smoked blanket; 152·13 ; Remilled crepe 2 ; 143·87. Group 6 : Estate brown crepe 3X ; 140·01 ; Remilled crepe 3 ; 137·81 ; Remilled crepe 4 ; 131·74. Group 7 : Flat bark : 122·37.

Normal latex upto 35 per cent concentrates : Rs. 161·50 plus a premium of Rs. 19·29 per 50 kgms. of D.R.C.

Latex concentrates of 36 per cent to 50 per cent (both inclusive) : Rs. 161·50 plus a premium of Rs. 36·38 per 50 kgms. of D.R.C.

Latex concentrates of 51 to 60 per cent (both inclusive) : Rs. 161·50 plus a premium of Rs. 47·40 per 50 kgms. of D.R.C.

With the expansion of existing factories and with more factories coming into existence every year, the consumption of rubber is increasing.

The quantities actually consumed during the last few years in metric tonnes were :

1953–54 : 24,157 (natural 24,142 ; synthetic 15) ; 1954–55 : 26.353 (natural 26,332 ; synthetic 21) ; 1955–56 : 28,906 (natural 28,445 ; synthetic 461) ; 1956–57 : 32,864 (natural 29,998 ; synthetic 2,866) ; 1957–58 : 36,235 (natural 33,074 ; synthetic 3,161) ; 1958–59 : 39,244 (natural 35,767 ; synthetic 3,477) ; 1959–60 : 45,455 (natural 40,491 ; synthetic 4,964) ; 1960–61 : 55,545 (natural 48,148 ; synthetic 7,397) ; 1961–62 : 58,596 (natural 48,410 ; synthetic 10,186) ; 1962–63 : 64,276 (natural 53,553 ; synthetic 10,723) ; 1963-64 : 73,114 (natural 61,155 ; synthetic 11,959).

Imports of rubber in metric tons were : 1953–54 : 44 (natural 25 ; synthetic 19) ; 1954–55 : 3,447 (natural 3.425 ; synthetic 22) ; 1955–56 : 5,629 (natural 4,428 ; synthetic 1,201) ; 1956–57 : 10,475 (natural 7,341 ; synthetic 3,134) ; 1957–58: 14,371 (natural 11,357 ; synthetic 3,014) ; 1958–59 : 16,767 (natural 12,538 ; synthetic 4,229) ; 1959–60 : 21,005 (natural 15,287 ; synthetic 5,718) ; 1960–61 : 31,222 (natural 23,125 ; synthetic 8,097) ; 1961–62 : 32,649 (natural 22,528 ; synthetic 10,121) ; 1962–63 : 33,657 (natural 23,360 ; synthetic 10,297) ; 1963-64 : 35,087 (natural 26.275 ; synthetic 8,812).

By the end of the Third Plan it might be possible to stop imports altogether.

The estimated production of natural rubber during the last year of the Third Five Year Plan period is as follows (in metric tonnes) : 1965-66 : 41,453. The estimated demand for different types of rubber during 1964-65 & 1965-66 is as given below :

| Year | Estimated demand (in Metric Tonnes) | | | |
|---|---|---|---|---|
| | Natural rubber | Synthetic rubber | Reclaimed rubber | Total |
| 1964-65 | 49,580 | 24,384 | 11,176 | 85,140 |
| 1965-66 | 55,168 | 26,416 | 13,716 | 95,300 |

At present about 16 per cent of the demand is met by synthetic rubber.

The total value of rubber plantation in the country is estimated at over Rs. 50 crores. The rubber plantation and manufacturing industries offer direct employment to about 1,30,000 workers and means of livelihood for over four lakh people according to a modest estimate.

## SYNTHETIC RUBBER

With the commissioning of the 30,000-ton Synthetic Rubber Plant at Bareilly (U.P.), on July 15, 1964, the problem of accumulation of alcohol in the distilleries in U.P. has been considerably solved. The plant would consume in a year 20 to 22 million gallons of alcohol, the main ingredient of synthetic rubber.

Besides being the first and the only unit in India, this factory makes a big headway in bridging the wide gap between the production and demand for rubber in the country. Foreign exchange to the tune of about Rs. 10 crores is expected to be conserved yearly by the country through this plant.

It introduces a new technology in rubber manufacture which, in the years to come, will help the country immensely in securing self-sufficiency in respect of rubber. The State alone, with over 70 sugar mills, has a vast potential of alcohol production from molasses.

Installed at a total outlay of Rs. 18 crores in the private sector, the plant has been brought into existence by Synthetic and Chemicals Limited, in collaboration with several American and one German concerns, for large-scale production of Butadiene and Styrene, the two main components of synthetic rubber.

Located on the Delhi-Bareilly National Highway, the open-air plant has been set up as a completely self-contained unit with elaborate arrangements for quality control and the safety of workers. It employs about 1,200 persons, mostly from the State.

The plant is supplying synthetic rubber to all tyre companies, rubbersole shoe factories, cable industries and other rubber goods factories in the country. Several technicians from Brazil were recently trained in this plant for production of synthetic rubber from alcohol.

About 116,333 tonnes of synthetic rubber was produced during 1964-65. The per capita consumption of Synthetic rubber in India is estimated to be 0·06 lbs per year against 15·5 lbs in U.S.A., 6·6 in Australia, 5·8 in West Germany and 2·9 in Japan.

## RUBBER GOODS

India has a modern manufacturing industry.

The raw materials used in Rubber goods are titanium dioxide, carbon black and zinc oxide.

In this, the manufacture of tyres and tubes accounts for about 70 per cent of the total consumption of rubber and bulk of capital investment, followed by foot-wear with 15 per cent annual consumption.

The total investment in the industry in 1957 is estimated at about Rs. 13 crores and the number of persons employed is about 21,800.

The progress of the manufacturing industry is given below :—

| Product | 1960 | 1961 | 1962 | 1963 | 1964 |
|---|---|---|---|---|---|
| Footwear (Lakh pairs) | 446·4 | 451·2 | 498 | 465·6 | 470·4 |
| Dipped Rubber goods, Toys, Balloons, etc.(Lakh Doz.) | 324·9 | 255·6 | 3,076·8 | 2,740·4 | 3,075·7 |
| Tyres : | | | | | |
| Automobile (000) | 1,362·0 | 1,562·4 | 1,710 | 1,926 | 2,090·4 |
| Cycle (000) | 10,830·0 | 11,346·0 | 11,940 | 14,186·4 | 16,156·8 |
| Tractor (No.) | 49,476 | 48,456 | 56,556 | 43,212 | 74,544 |
| Aero (No.) | 2,664 | 2,652 | 8,064 | 15,660 | 14,052 |
| Cab (000 meters) | 61·2 | 39·6 | 49·2 | 60 | 48 |
| Tubes : | | | | | |
| Automobile (000) | 1,281·6 | 1,484·4 | 1,644 | 2,029 | 2,208 |
| Cycle (000) | 12,675·6 | 12,848·4 | 11,562 | 13,342·8 | 15,194·4 |
| Tractor (No.) | 50,712 | 53,724 | 52,752 | 63,156 | 75,180 |
| Aero (No.) | 1,080 | 2,418 | 2,940 | 3,696 | 4,608 |
| Hoses : | | | | | |
| Radiator (000) | 248·4 | 249·6 | 205·2 | 207·6 | 276·0 |
| Vacuum Brake (000) | 345·6 | 724·8 | 1,114 | 1,920 | 1,220·4 |
| Other Types (000 meters) | 3,592·8 | 4,632 | 5,050·8 | 5,390·4 | 6,584·4 |
| Fan Belt (000s.) | 1,087·2 | 1,076·4 | 1,984 | 1,216·8 | 1,328·4 |
| Ebonite (kgms.) | 133·2 | 166·8 | 124·8 | 141·6 | 132·0 |
| Waterproof fabrics (000 meters) | 3,694·8 | 4,731·6 | 4,166·4 | 6,466·8 | 4,627·2 |
| Latex foam sponge (kgms) | 1,261·2 | 1,516·8 | 1,683·6 | 1,420·8 | 1,056·0 |

The programme of development for the rubber goods industry envisaged under the Plans period is summarised below :—

(In million Nos.)

| | 1955-56 Production | 1960-61 Installed Capacity | 1960-61 Production | Targets for 1965-66 Capacity | Targets for 1965-66 Production |
|---|---|---|---|---|---|
| *Automobile tyres* | 0·92 | 1·61 | 1·49 | 3·70 | 3·0 |
| *Bicycle tyres* | 5·80 | 15·12 | 11·15 | 38·6 | 30·9 |

### IMPORTS

Considerable quantities are being imported to meet the increased domestic demand of the manufacturing industry.

(Rs. lakhs)

| Imports | 1960-61 | 1961-62 | 1962-63 | 1963-64 | 1964-65 |
|---|---|---|---|---|---|
| 1. Crude rubber, including thetic and reclaimed | 1,078·22 | 1,010·37 | 1,023·22 | 975·04 | 542·89 |
| 2. Rubber fabricated materials | 22·59 | 15·72 | 21·4 | 23·19 | 22·39 |
| 3. Rubber manufacturedi articles | 302·85 | 333·09 | 154·13 | 174·93 | 116·75 |

*Import duty :* An initial duty of 5 per cent was introduced in May 1957. But this was increased to 10 per cent in March 1961 and 22 per cent in April 1963. With the regulatory import duty of 10 per cent introduced in Feb. 1965, the present duty comes to 32 per cent. But the excise duties on tyres, tubes footwear and cycle parts have been totally removed.

# SHIPPING INDUSTRY

INDIAN shipping is a potential and quick earner of foreign exchange. During the 2nd Five Year Plan period, India paid in terms of foreign exchange an average of Rs. 130 crores per annum to foreign shipping companies for obtaining their services.

The important shipping Companies are Scindia, India Steamship, Great Eastern Shipping, Bharat Line, Malabar Steam Ship, Bengal Assam Steamship, Port Shipping, Jayanti Shipping Company, Chowgule Steamships, Mogul Line Ltd., Shipping Corporation of India and South India Shipping Corporation Ltd.; Thakur Shipping Company Ltd., is a new Company formed during 1964-65.

In 1962, the Indian Shipping crossed the milestone of a million gross registered tons. The Jayanti Shipping Company registered its first tanker *Adi Jayanti* at Bombay in 1961 with g.r.t. of 20,418. With the delivery of *Lilavati Jayanti & Bhaskar-Jayanti* in Aug. 1965, the company's total tonnage exceeded 5,00,000 d.w.t.

The routes operated are India—U.K.—Continent, India—Black and Red Sea Ports, India—West Africa—Mediterranean, India—U.S.A., India—South America, India—Japan Far East and India—Australia.

During 1963, Indian shipping companies acquired 30 vessels totalling 275,206 g.r.t. 415,099 d.w.t. bringing the strength of the Indian merchant fleet to 208 vessels of 1,233,853 g.r.t. (1,777,945 d.w.t.) as on Jan. 1, 1964.

A notable feature of the past two years is the acquisition of bulk carriers and tankers which formed a major part of the total acquisition during this period.

Since the end of 1963, seven more vessels, totalling 47,582 g.r.t. have been acquired bringing the strength of the Indian fleet to 215 vessels aggregating 1,305,861 g.r.t.

Indian shipping now proposes to aim at a target of 2.5 million grt, inclusive of orders placed for new constructions or acquisitions at the end of Third Plan. It had crossed the one million mark a couple of years ago and if firm orders already placed for the construction or acquisition of more vessels are taken into account, it would go well beyond the 1.5 million mark.

**Analysis of Tonnage as on 1st January 1964**

| Trade | No. of vessels | G.r.t. | D.w.t. |
|---|---|---|---|
| OVERSEAS | | | |
| Drycargo | 87 | 665,910 | 942,931 |
| Cargo-cum-passenger | 6 | 43,000 | 46,370 |
| Tanker | 1 | 20,418 | 33,015 |
| Banana carrier | 5 | 107,819 | 166,373 |
| Total Overseas | 99 | 837,147 | 1,188,689 |
| COASTAL | | | |
| Drycargo | 96 | 357,625 | 542,717 |
| Cargo-cum-passenger | 3 | 9,138 | 9,812 |
| Passenger | 7 | 6,114 | 2,204 |
| Tanker | 3 | 23,829 | 34,523 |
| Total Coastal | 109 | 396,706 | 589,256 |
| Grand total of overseas and coastal tonnage | 208 | 1,233,853 | 1,777,945 |

**Agewise Analysis of Indian Tonnage**
**(1st January 1964)**

| Age of vessels | Overseas | | Coastal | | Total | |
|---|---|---|---|---|---|---|
| | No. of vessels | g.r.t. | No. of vessels | g.r.t. | No. of vessels | g.r.t. |
| Under 10 years (built in 1954 or later) .. | 76 | 676,773* | 11 | 42,777 | 87 | 719,552 (58·3%) |
| Between 10 and 14 years (built between 1949 and 1953) .. .. | 11 | 73,230 | 31 | 107,478 | 42 | 180,708 (14·7%) |
| Between 15 and 19 years (built between 1944 and 1948) .. .. | 11 | 81,268 | 31 | 137,427 | 42 | 218,695 (17·7%) |
| 20 years and over (built in 1943 or earlier) .. | 1 | 5,876 | 31 | 107,258 | 32 | 113,134 (9·2%) |
| Small Companies† .. | — | — | 5 | 1,764 | 5 | 1,167 (0·1%) |
| | 99 | 837,147 | 109 | 396,706 | 208 | 1,233,853 (100 %) |

* As much as 80·8 per cent. of the Indian tonnage operating in the overseas trades is under 10 years of age.

† Owning total tonnage not exceeding 1,000 g.r.t. and plying in short coastal range.

*Source :* Indian Shipping.

The Shipping Corporation of India operates regular services in the eight international trade routes: India—U.K./ Continent; India—Poland; India—U.S.S.R.; India—East Africa; India—Malaysia; India—Australia; East Coast of India—Japan; West Coast of India—Japan; India—U.S.A.

The Shipping Corporation of India is now having a fleet of 32 ships, the total dead weight tonnage of which is 4,05,768 and gross registered tonnage is 2,82,491. In addition to this three bulk carriers will be delivered during 1967-68 each of 35,000 dead weight tons. 20 more ships are on order with different Shipyards out of which 12 dry Cargo Vessels are with Hindustan Shipyard.

The future expansion is expected to be still faster and the gross registered tonnage of over half a million ton is expected to be reached by 1967.

A significant step taken during the Second Plan period was the establishment of a non-lapsing shipping development fund for grant of loans to shipping companies for the acquisition of tonnage.

The Fund is composed of annual contributions from the Consolidated Fund of India, the quantum of which will be determined from year to year. Repayments against loans already granted to shipping companies are also to be credited to the Fund.

Another significant step taken in the field of shipping was the establishment of a Shipping Co-ordination Committee in the Department of Transport. The Committee is intended to bring about better liaison between various Ministries of the Government of India and other Government organisations which have cargoes requiring transport, on the one hand, and the Indian shipping companies, on the other, so as to ensure the maximum utilisation of the available Indian tonnage.

The Government of India has agreed to permit the acquisition of second-hand tonnage on deferred payment terms which involve not more than 20 per cent down payment, with the balance of the price spread over a period of 5 years. Despite the foreign exchange difficulty, not a single proposal for the acquisition of tonnage on deferred payment basis has been turned down by Government. The Government has also agreed to consider orders for building new ships provided the payment of price is spread over a period of 7 years after delivery, with a small initial cash payment.

## PROGRESS OF INDIAN TONNAGE

*Note :* While the fleet tonnage figures are as on the dates mentioned in column 1 of the Table, the tonnage of coastal cargo carried (column 5)† is for the year ending on those dates and the tonnage of the total overseas and coastal cargoes (column 6) is for the twelve months ended 31st March of the year mentioned in column 1.

| (1) | FLEET | | | | | | TRADE | |
|---|---|---|---|---|---|---|---|---|

* In respect of these figures, there has been a slight discrepancy amounting to a few thousand tonnes when compared with figures of licensed tonnage published in the earlier issues of this journal because of one or two ships having been acquired but not licensed on the dates indicated.

† The Planning Commission appears to have taken the figure at the end of the year (31-12-1951) as the tonnage at the beginning of the Plan.

‡ Metric tonnes. § Including 23,000 tons of tankers and salvage tug of 1,000 tons. *Source :* Indian Shipping.

At the end of 1964 the total tonnage rose to 13·87 lakhs from 12 34 lakhs at the end of 1963. The operative tonnage at the end of the Third Plan is expected to be 15 lakhs and another 5 lakhs would be on order or under construction.

### SHIPPING ACT

The Merchant Shipping Act 1958 provides for the establishment of a National Shipping Board and a Shipping Development Fund. It also provides for the safety and the efficiency of the merchant marine and the welfare of seamen and passengers.

There is a Director-General of Shipping to administer the provisions of the Act. There will also be officers under the Act at all ports.

There is a National Welfare Board for Seafarers to advise Government on welfare problems.

An important provision is about the definition of an Indian ship.

The Act was brought into force in its entirety with effect from 1st January 1961.

#### Shipping Board

The National Shipping Board mentioned in the Act was set up on 1st March 1959. It consisted of 22 members.

Immediately after the 1st Board was set up, it appointed a Committee under the chairmanship of Mr. A. Ramaswami Mudaliar to formulate the shipping target for the Third Five-Year Plan. The Board was reconstituted with Mr. C. H. Bhaba as Chairman and Mr. Govind H. Seth as Member-Secretary. Mr. Bhabha resigned in the middle of 1964. The present Chairman is Mr. Raghunath Singh, M.P.

### MERCHANT NAVY TRAINING

Besides "Dufferin," there are six training establishments for the training of Merchant Navy personnel. Till the end of 1963 the Union Government spent about Rs. 4·9 crores for the training of merchant navy personnel and about 25,000 candidates had been trained since 1947.

A Merchant Navy Training Board was set up by the Government of India in Aug. 1959 to advise the Government on all training problems and to supervise the training imparted in the merchant navy establishments. The Board was reconstituted in April 1963. The address of the Board is : C/o Directorate General of Shipping, Currimbhoy Building, Ballard Estate, Bombay 1.

To focus attention on the problems connected with the life and service of seamen and the role they play in promoting the economy, it was decided to observe National Maritime Day on April 5 of every year. The First National Maritime Day on April 5, 1964 was celebrated on a grand scale.

### FIVE-YEAR PLANS

Taking into account the financial resources available, a programme of development was formulated which aimed at raising the total gross registered tonnage to over 600,000 by the end of the period of the First Five-Year Plan.

At the beginning of the First Five-Year Plan India had a tonnage of 390,707* G.R.T. (174,000 G.R.T. overseas and 217,000 G.R.T. coastal). On 31st March 1956, the actual tonnage stood at 480,000 G.R.T. (240,000 G.R.T. overseas and 240,000 G.R.T. coastal) but taking into consideration the tonnage of 109,000 G.R.T. (17 ships) on order in Indian and foreign yards, the target had been exceeded.

In the Second Five-Year Plan it was proposed that about 301,000 tons should be added after allowing for obsolescence of 90,000 tons. Thus by the end of the Second Plan, the total tonnage is believed to have reached 905,000 G.R.T. (613,000 G.R.T. overseas and 292,000 G.R.T. coastal).

With the achievement of this target, Indian tonnage was expected to carry at least 15 per cent of the country's overseas trade, as against 7 to 8 per cent, in the beginning of the 2nd Plan, 50 per cent of the trade with adjacent countries as against 40 per cent, besides 100 per cent of coastal trade.

The Third Plan has fixed a target of 374,500 gross registered tons to be acquired by 1965–66 made up as follows :—

(Gross registered tons.)

| | Private sector | Public sector | Total |
|---|---|---|---|
| *Coastal :* | | | |
| Replacement .. .. .. .. .. | 100,000 | — | 100,000 |
| Addition .. .. .. .. .. | 25,000 | 7,500 | 32,500 |
| Total .. .. .. .. | 125,000 | 7,500 | 132,500 |
| *Overseas :* | | | |
| Replacement .. .. .. .. .. | 56,000 | 37,600 | 93,600 |
| Addition .. .. .. .. .. | 35,200 | 113,200 | 148,400 |
| Total .. .. .. .. | 91,200 | 150,800 | 242,000 |
| Grand Total .. .. .. .. | 216,200 | 158,300 | 374,500 |

The 3rd Plan allocation of funds is Rs. 55 crores. In addition, Rs. 4 crores are likely to be available from the Shipping Development Fund. The shipping companies are expected to contribute Rs. 7 crores from their own resources. A little more than half of the total amount is proposed to be spent in the private sector.

Programmes for ship-building during the Third Plan include the expansion of Hindustan Shipyard, the construction of a drydock at Visakhapatnam and a ship-yard at Cochin in collaboration with the Mitsubishi group of Japan. When the schemes are fully implemented, the Visakhapatnam Shipyard will be capable of producing ships of total tonnage of 50,000 to 60,000 d.w.t. per year. A second shipyard is also to be established at Cochin at an estimated cost of Rs. 20 crores and a scheme for the manufacture of marine diesel engines is to be undertaken at the cost of Rs. 5 crores.

#### Sailing Vessels

The Sailing Vessels Committee emphasised that if the industry were to survive, the owners of sailing vessels should be encouraged to mechanise their vessels. Government have, therefore, approved a scheme for the grant of loans for this purpose. Under the scheme, loans are being granted for mechanisation of sailing vessels of 100 tons and over upto a maximum of 75 per cent of the cost of auxiliary machinery, provided the vessels in question are considered seaworthy and suitable for installation of machinery.

The effective rate of interest to be charged on these loans is 2¼ per cent and the period of repayment ordinarily extends to 5 to 6 years, but may be extended by one or two years more if the circumstances of the loanee so justify. Other measures taken by the Govt. of India to develop the sailing vessels industry include the constitution of Central and Regional Advisory Committees, education of *tindals* in the traditions of the sea, training of seamen under sail, and issue of identity cards to the crew of sailing vessels proceeding to Ceylon.

The Government of India has signed an agreement with the Mitsubishi Heavy Industries, Japan in June 1964 for the construction of India's Second Shipyard at Cochin. The shipyard will be built as a part of India's Third Five-Year Plan and will comprise among other things a dock of 30,000 deadweight tons and a slipway of 15,000 deadweight tons.

### SHIP-BUILDING

(See 'Hindustan Shipyard', 'Mazagon Docks Ltd.' and 'Garden Reach Workshop Ltd'.) Under Government Industrial Undertakings.

* Allowing for obsolescence.

# SMALL-SCALE INDUSTRIES

Indian industry is made up primarily of small-scale rather than large-scale units. It is reckoned that there are about two crore persons engaged in small-scale and cottage industries.

The small-scale industry is primarily the responsibility of the State Government and not of the Centre. But the Centre supplements the efforts of the State Governments.

Small-scale industries include all industrial units with a capital investment of not more than Rs. 5 lakhs irrespective of the number of persons employed.

Under the State Aid to Industries Act/Rules State Governments are empowered to provide finance in the form of loans, guarantees for loans raised from banks, subscription to shares and debentures, etc. Although loans under the Act are generally for medium and long-term needs, advances are made for short-term requirements also.

In most of the States, loans up to Rs. 1,000 are being advanced on personal bonds, up to Rs. 5,000 against one or more personal sureties and above Rs. 5,000 at 75 per cent of the security (land, building, machinery, equipment, stocks and other assets including those created out of the loans) offered. These loans are repayable in easy equal instalments spread over 10 years. No loan to any single party can normally exceed Rs. one lakh and to an industrial co-operative Rs. two lakhs without the prior concurrence of the Central Government.

The rate of interest on loans advanced under State Aid to Industries Act would be governed by the capital investment of small scale industries —it would be 3 per cent to industrial undertakings with capital investment up to Rs. 2 lakhs, 4½ per cent to undertakings with capital investment of Rs. 2 to 4 lakhs and 6 per cent to undertakings with capital investment of more than Rs. 4 lakhs. This does not, however, apply to industrial co-operatives in the small scale sector

which will continue to receive loans at 2½ per cent.

New industries as well as industries which need revival or development in the cottage and small-scale sectors are eligible for grant of loans, and preference is given to such industries. Preference would also be given to small scale units in the light of their capital investment *i.e.* units with smaller capital investment would be given preference over others.

While much is not yet known about the role of commercial banks in this process, the State Bank of India under its liberalised scheme made significant progress. Another landmark had been initiation from 1st July 1960 of the Credit Guarantee Scheme by the Reserve Bank of India. Loans are also guaranteed to small industries by the National Small Industries Corporation and the State Financial Corporations. The N.S.I.C. has been extending financial assistance through its scheme under which it supplies machines on hire-purchase basis.

Small-scale industries are distinct from village industries and handicrafts. Generally speaking village industries are of traditional nature catering primarily to local markets.

Small-scale industries can and do produce a large variety of consumer goods :—bicycles, agricultural implements, sewing machines, domestic electrical appliances, builders' hardware, cutlery and domestic hardware, furniture, wood work, footwear and other leather products, ceramics, glassware, sports goods, hand tools, surgical and drawing and surveying instruments, mechanical toys, matches, chemicals, paints and varnishes, polishes, etc.

Small-scale industries can really be classified into four main groups :—manufacturing industries, feeder industries to large industries, servicing industries, and ancillaries to large industries.

Manufacturing industries include complete articles or products manufactured for sale directly to consumers (consumer items) and in some cases used as spare parts.

Feeder industries are a kind of general engineering shops which specialise in certain types of products and services such as castings, forging tools and dies, electroplating and galvanizing, welding and other services for large scale industries. They do not have a regular line of work but take job orders from time to time depending upon the need of the large industry.

Servicing industries mostly cover light repair shops which are necessary to maintain mechanical equipment owned by the community. They cater to such works as auto repairs, repair of cycles and radios, photographic studios, repair of pumps, motors and other kinds of light machinery used in industry, agriculture, etc.

Ancillaries to large scale units include parts and components for several light engineering products such as cycles, sewing machines, electric motors, radios, clocks, automobiles, diesel engines, textile and other machinery and machine tools.

## REVIEW

The Small-scale Industries Board which helps the Government in formulating various policies and programmes relating to the development of small-scale industries was reconstituted with effect from July 1961. The Board met twice during the year. For implementing the existing and new schemes for the development of small-scale industries, Central assistance amounting to Rs. 922 lakhs in the shape of loans and grants was sanctioned to the various State Governments during 1962-63. The total Central assistance during the first two years of the Third Plan amounted to Rs. 1,445 lakhs. By the end of the Second Five-Year Plan, there were about 92 industrial estates providing factory accommodation to small-scale industries at suitable sites with facilities of water, electricity and transport. These provided employment to more than 20,542 persons.

Reviewing the growth of small-scale industries during the last 10 years, Shri Dasappa said that there were in June 1964, over 57,000 small scale units registered with the various State Directorates of Industries. The number of on-register small scale factories which availed of facilities from Central Small Industries Organisation have been estimated at about 2 to 2·5 lakhs. Even the limited data available on the production and employment potential of this sector show that the gross value of output in the small-scale sector is about Rs. 1,400 crores or about 31 per cent of total output in the industrial sector and 26 per cent of the value added by manufacture.

A number of schemes designed to help the small entrepreneurs have been implemented. Apart from the Central and State assistance to the small-scale industries, the State Bank of India and the State Financial Corporations have been advancing long and medium term loans. During the Second Plan period (1956-61), the total credit both long-term and short-term provided to small-scale industries by various institutional agencies and State Governments, amounted to Rs. 70 crores.Under the Credit Guarantee Scheme, the Reserve Bank of India issued till the end of November 1963, 6,925 guarantee certificates amounting to Rs. 25·74 crores. The Directors of Industries of the State Governments continued to render special assistance to these industries by arranging procurement of scarce raw materials such as steel, tin plates and non-ferrous metals.

The Third Plan has earmarked Rs. 112 crores for the development of small-scale industries.

During the first three years of the Third Plan the State Governments advanced Rs. 8·81 crores to small units. The State Financial Corporations sanctioned loans to the extent of Rs. 14·49 crores to 1,718 units up to end of Sept. 1963 out of their own funds out of which Rs. 6·88 crores were actually advanced. Under the agency arrangements, the State Financial Corporations of Punjab, Maharashtra, Kerala, Andhra Pradesh, Assam, U.P., Rajasthan and Gujarat sanctioned loans to the extent of Rs. 4·94 crores to 3,331 applicants out of which Rs. 3·56 crores had been actually advanced upto Sept. 30, 1963.

The State Bank of India sanctioned Rs. 20·42 crores by the end of March 1964.

The intensive campaign which aims at the development of small-scale industries in underdeveloped areas in various districts of States was launched in the States of Andhra, Uttar Pradesh, Madhya Pradesh, Mysore, Punjab and West Bengal during 1961-62, bringing the total number of such districts to 42. Similarly, under the impact programme, out of 455 schemes prepared up to December 1961, 348 schemes were finalised.

There are now 16 small Industries Service Institutes, 5 Branch Institutes and 63 Extension Centres, including Production Centres. They give valuable assistance to the small-scale units such as giving technical advice and demonstrations, preparing drawings for various types of improved tools and small machines and giving training in the handling of modern tools and equipment. The various training programmes initiated by the Small Industries Service Institutes include training of block level extension officers, evening classes in business management for the benefit of Government Officers and small-scale industrialists. Forty-seven mobile workshops fitted with modern machine tools attached to the S.I.S.I. have been touring rural areas with a view to imparting technical knowledge

To encourage the spirit of inventiveness amongst industrial workers, artisans and technicians, the Inventions Promotion Board has been giving financial incentives in the form of grants and prizes. Prizes worth Rs. 11,000 were distributed among sixteen inventors during 1962. Out of 250 applications received during the year for grant of loans, the Board sanctioned loans to 87 applications aggregating Rs. 110,416.

The responsibility for the development of *khadi* and village industries, which help in relieving unemployment and under-employment in rural areas, has been vested in the Khadi and Village Industries Commission. (For details of the progress achieved in village industries, see article *Cottage Industries* in this book).

The development of the coir industry, which is entirely in the small-scale sector, is the responsibility of the Coir Board. A sum of Rs. 3 crores has been allotted for its development during the Third Plan.

An outlay of Rs. 114·83 crores was made in the Third Plan for the development programme of small-scale industries and industrial estates as compared to Rs. 55·57 crores in the Second Plan. The break-up of the Plan allocation under the major heads is as follows (in Rs. crores): State Government schemes : 62·62; Industrial Estate : 30·21; Central Government schemes : 22·00; Total 114·83.

## DEVELOPMENT AGENCIES

The nature of assistance available and the organisations responsible for rendering such assistance are given below :—

1. (*i*) Technical know-how; (*ii*) industries information service; (*iii*) model schemes and industrial designs; and (*iv*) market research : Central Small Industries Organisation (Small Industries Service Institutes and Extension Centres); (*v*) Common facilities (Small industries service institutes, extension centres and State Govts.).

2. Training : both technical and managerial (Small industries service institutes, State Govts. Directorates of Industries), Directorate of Training and Employment (Industrial Training Institute).

3. Finance : (*a*) For cash loans :—(*i*) Long term (State Govts. under State Aid to Industries Acts, State Financial Corporations); (*ii*) Short term (State Bank of India, cooperative banks, scheduled banks under the Guarantee Scheme of the Reserve Bank of India); (*b*) For machinery on hire purchase (National Small Industries Corporation, New Delhi and its branches).

4. Marketing Services (Specially Govt. Purchase Scheme) (National Small Industries Corporation and its branches).

5. Factory accommodation in industrial estates (State Govts. Directorates of Industries), National Small Industries Corporation (for accommodation at Okhla and Naini industrial estates only).

6. Raw material and power supply (State Directorates of Industries).

The agencies mainly concerned with the development of small-scale industries in the country are thus the State Directorates of Industries, Small Scale Industries Organisation under the Development Commissioner, Small Industries Service Institutes functioning in the States as well as in New Delhi and the National Small Industries Corporation, with four branches one each at Bombay, Calcutta, Delhi and Madras.

## INDUSTRIES AND LOCATION

The Office of the Development Commissioner of Small-Scale Industries, New Delhi, carried out a survey in certain areas relating to location of industry and production. The findings of this survey which show what industries were located in the area surveyed and what the production was in that area are given in the 1959-60 edition of the *Directory*.

## EXPORTS

The following items of small industries' products have been selected by the National Small Industries Corporation for promoting their sales in overseas markets :—Leather footwear and leather goods; Cotton and Woollen hosiery; Sports goods; Builders' hardware, locks and scissors; Tinned fruits, chutneys and pickles; Paints and varnishes; Glass beads. Nearly six lakh pairs of shoes supplied by small scale units have been exported to countries like Russia, Poland and German Democratic Republic through the agency of the Corporation.

National Small Industries Corporation and the State Trading Corporation also assist in import and distribution of some articles like copper, zinc, copper and brass scrap, cycle and sewing machine parts, knitting needles.

## NATIONAL SMALL INDUSTRIES CORPORATION LTD.

(See article 'All India Corporations').

## SERVICE INSTITUTES

Economic and commercial information useful to small industrialists, who want to start new industrial units, is provided by the Small Industries Service Institutes set up by the Government of India early in 1956.

The Institutes give broad outlines of the potentialities of different small-scale industries. They supply information on the number of existing units, their production and installed capacities as well as the present consumption, future demands and export possibilities for their products.

Information about the working capital required for a new unit, suppliers of machinery and raw materials and markets for the sale of products, is also made available by the Institutes.

There are 21 Small Industries Service Institutes including five branch institutes in the country.

They are located in New Delhi, Bombay, Calcutta, Madras, Agra, Jaipur, Ludhiana, Bangalore, Indore, Rajkot, Patna, Cuttack, Gauhati, Srinagar, Kanpur, Allahabad, Hubli, Hyderabad, Trichur, Ahmedabad and Goa.

There are also 63 Extension Centres to provide specialized technical assistance to particular industries.

## INDUSTRIAL ESTATES

Another feature of the industrial policy is the establishment of industrial estates. This was initiated in 1955.

The main object is decentralization. Government seeks to remove small industrial units from crowded urban areas and thus reduce the pressure on the latter, and secondly it seeks to provide small units with factory space and common facilities for efficient working.

The State Governments acquire and develop land, construct roads, put up factory buildings, arrange for supply of water and electricity and also set up common service workshops. The factory buildings in the States are then let out at concessional rents, outright sale or hire-purchase basis to small entrepreneurs.

The Government of India advance to the States the entire cost of the estates as loans Grants are also given for specific purposes, such as planning and designing of these estates. The loans will carry interest at 4½ per cent.

These industrial estates provide better accommodation for small industries with facilities of power, water, etc. They bring industries together and facilitate the establishment of common servicing centres, introduction of modern techniques, collective purchase of raw materials and sale of finished products. They stimulate the co-operative spirit among them.

Industrial estates are of two kinds—large estates near big cities and urban areas and small ones in community development blocks.

The larger estates cost roughly from Rs. 20 to 30 lakhs, the smaller ones from Rs. 2 to 3 lakhs.

Only two—the one at Naini and the other at Okhla—are under the National Small Scale Industries Corporation. The rest are under the States.

The Second Plan provision of Rs. 15 crores for Industrial Estates was revised and fixed at Rs. 11·12 crores to set up 120 Estates by the end of Second Plan period. Of these 20 Estates are located in the Community Project Blocks, 9 in the Pilot Project areas and 20 in the backward area. The cost of these Estates was restricted to Rs. 5 lakhs each out of which a total of Rs.2 lakhs was to be spent up to the Second Five Year Plan.

During 1963-64, 35 new Industrial Estates were approved bringing the total number of Estates sanctioned to 291 till the end of March 1964. Out of these, 141 industrial estates were completed and 100 were functioning; 1,985 units were engaged in the production of an estimated value of products worth Rs. 27·5 Crores and provided employment to 30,000 persons as at the end of December 1963.

During 1960, the Government took decision to establish several new types of Industrial Estates namely Industrial Estates by private agencies, Ancillary Industrial Estates, functional Industrial Estates, University Industrial Estates and smaller Industrial Estates.

Apart from the government sponsored industrial estates a number of estates are being set up by Cooperative Societies and Joint Stock Companies of industrialists. In Maharashtra and Gujarat 20 such estates were functioning at the end of March 1964.

A State-wise list of Industrial estates approved by this organisation is given below :

**Industrial Estates Approved (as on 31st March 1963)**

*Andhra Pradesh :* Sanatnagar ; Vijayawada ; Samal Kot ; Visakhapatnam ; Nandyal ; Warangal ; Karim Nagar ; Mehboob Nagar ; Nellore ; Nirmal ; Prodattur ; Masulipatnam ; Amadalavalasa ; Khammam ; Suriyapat ; Janagaon ; Hyderabad ; Kisannagar : Sadalpalli.

*Assam :* Gauhati ; Dhekiajute ; Nalbari ; Tinsukhia ; Silisagar.

*Bihar :* Patna ; Biharshariff ; Darbhanga ; Muzaffarpur, Purulia ; Daltanganj ; Katihar ; Jasidih ; Kishanganj ; Ranchi ; Lakhisanai ; Ramnagar ; Tilaiya ; Baroon, Murliganj ; Adityapur ; Bhagalpur.

*Gujarat :* Rajkot ; Ahmedabad ; Baroda ; Udhna ; Gandhidham ; Bhavnagar ; Sanjan ; Godhra ; Mehsana ; Navsari ; Baroda ; Mehmedabad ; Junagadh ; Amreli.

*Jammu and Kashmir :* Gandhinagar ; Srinagar ; Anantnag ; Gandarbal ; Bandipura ; Baramula ; Sopore ; Shopian ; Kulgaon ; Kulgua ; Sonawari ; Udhampur ; Bijbehara ; Pulwana ; Tral ; Pattan ; R. S. Para ; Akhnoor ; Samba ; Hiranagar ; Ramnagar ; Poonch ; Reasi ; Rajauri.

*Kerala ;* Pappanamcode ; Ettumanoor ; Kollakadava ; Olavakkod ; Ollur ; Veli & Kozhikode ; Palayad.

*Madhya Pradesh :* Indore ; Gwalior ; Bhopal ; Jabalpur ; Burhanpur ; Sagar ; Raipur ; Ujjain ; Satna ; Ratlam ; Durg ; Kathi ; Bilaspur.

*Madras :* Guindy ; Madurai ; Trichy ; Erode ; Virudhunagar ; Marthandam ; Pettai ; Tanjore ; Katpadi ; Salem.

*Maharashtra :* Kolhapur ; Hadapsar ; Karad ; Nagpur ; Amravati ; Kurla ; Sangli ; Ichalkaranji ; Nanded ; Lonavla ; Parvati ; Jalgaon ; Bapty Road ; Parli ; Malegaon ; Goregaon ; Miraj ; Ahmadnagar ; Kopargaon ; Chanda ; Sholapur ; Nasik ; Shivarampur ; Dhulia ; Jalna ; Satara ; Hingoli.

*Mysore :* Mysore ; Bangalore ; Hubli ; Harihar ; Gulbarga ; Mangalore ; Belgaum ; Ramanagram ; Bijapur ; Dandeli ; Jamkhavali.

*Orissa :* Cuttack ; Jharsuguda ; Rourkela ; Berhampur ; Kendrapara ; Baripada ; Dhenkanal.

*Punjab :* Ludhiana ; Sonepat ; Malerkotla ; Nilokheri ; Batala ; Bhatinda ; Patiala ; Kangra ; Narnaul ; Industrial Colony (Hoshiarpur); Nokodar ; Kaithal ; Mohindergarh ; Bahhanpura ; Hariana ; Pinjore ; Una ; Fatehgarh ; Kanthunangal ; Dudhike ; Fatehabad ; Sunam ; Lal ; Ramgarh Sardaran ; Dera Gopipur ; Gurgaon ; Hissar ; Ferozepur ; Rajpura.

*Rajasthan :* Jaipur ; Bhilwara ; Makhapura ; Kotah ; Jodhpur ; Udaipur ; Sumerpur ; Bharatpur ; Sriganganagar ; Bikaner ; Alwar ; Dholpur ; Gangapur ; Pali.

*Uttar Pradesh :* Kanpur ; Agra ; Naini ; Deoband ; Loni ; Vanarsi ; Aligarh ; Joya ; Jhansi ; Farrukhabad ; Bhojeepura ; Lalanei Khera ; Bharaich ; Lalitpur ; Khairabad Sitapur ; Muzaffarnagar (Harijan); Muzaffarnagar (General); Deoria ; Mirzapur ; Khalilabad ; Gorakhpur ; Bijnor ; Etah ; Varanasi ; Lucknow ; Meerut ; Clutter-buck-Ganj ; Roorkee ; Dehra Dun ; Unnao ; Azamgarh ; Moradabad ; Saharanpur ; Khurja ; Agra ; Chauharpur ; Rundrapur ; Orai ; Banda ; Sultanpur ; Mahoba ; Bikapur ; Bhalthat ; Salempur ; Ghose ; Auraiya ; Phoolpur ; Nagina ; Chandrawal ; Golagokernath ; Atrauli ; Shyam Mandi ; Gobardhan ; Jaunpur ; Barabanki ; Faizabad ; Rampur ; Shahjahanpur ; Lakhimpur ; Firozabad ; Mathura ; Manipuri ; Hathras.

*West Bengal :* Baruipur ; Kalyani ; Saktigarh ; Howrah ; Siliguri ; Baruipur (No. 2).

*Delhi :* Okhla ; Badli.

*Himachal Pradesh :* Solan.

*Manipur :* Tekyal.

*Pondicherry :* Thattanchavadi.

*Tripura :* Arundhutinagar ; Korikal ; Udaipur ; Kumarghat.

# STEEL INDUSTRY*

THE first successful and the most outstanding attempt to manufacture steel in the country on a commercial basis was that of the Tata Iron & Steel Co. which started its Steel Works at Sakchi in the year 1908. Pig iron was made in 1911 and the first steel ingot a year later.

The Indian Iron & Steel Company was started in 1918 at Hirapur about 4 miles from Asansol junction on the Eastern Railway for producing pig iron. Eighteen years later it floated another company, the Steel Corporation of Bengal to manufacture steel. Towards the end of 1952 the two companies were merged.

An iron works was started at Bhadravati in Mysore State in 1921 to which a steel plant was added in 1934. During World War II, a 25-ton basic furnace and two small electric furnaces were installed.

The total capital investment in the private sector is about Rs. 191 crores and the number of workers employed about 60,000. Of the total investment, Tatas account for Rs. 135 crores and the Indian Iron and Steel Co. for Rs. 56 crores.

The three steel plants set up in the public sector during the Second Plan period are Rourkela, Bhilai and Durgapur mills under the management of Hindustan Steel Ltd. The shares are owned wholly by the Central Government. The authorized share capital is Rs. 600 crores. The Government of India has advanced loans amounting to Rs. 357.1 crores upto the end of December 1964. The Government of India has subscribed Rs. 510 crores up to the end of 1964, towards share capital.

The revised overall cost of the three public sector steel projects are: Rourkela Rs. 170 crores (excluding Rs. 44 crores representing the cost of all other ancillaries including township, water supply system, iron ore mines, limestone quarries and railway sidings); Bhilai Rs. 131 crores; Durgapur Rs. 138 crores (excluding the township, fees to consultants and other ancillaries estimated to cost Rs. 29 crores).

Each of these has a production capacity of about a million tons with scope for increase. All the three have already gone into production.

Another public sector company the Bokaro Steel Ltd. for setting up the Bokaro Steel Plant at Bokaro, was registered in New Delhi on Jan. 29, 1964. The Company will have a share capital of Rs. 100 crores.

(For details see under 'Government Industrial Undertakings').

The Second Plan target of steel (ingots) production was fixed at 6 million tons (or about 4·5 million tons of saleable steel), as against the production level of 1·3 million tons in 1955-56. This was proposed to be achieved by raising the capacity of the Tata Iron and Steel Works at Jamshedpur from 900,000 tons to 2 million tons, of the Indian Iron and Steel Company's works at Burnpur from 500,000 tons to 900,000 tons and of the Mysore Iron and Steel Works from 30,000 tons to 100,000 tons. The remaining three million tons were to be produced by setting up three new works in the public sector at Rourkela, Bhilai and Durgapur. The estimated capacity and production (ingots) in 1960-61 was 6·0 million tons and 3·5 million tons, respectively. By the end of Second Plan (1959–60), the actual production of saleable steel amounted to 4,488,898 tons for the entire Plan period.

## PRODUCTION

The recent trend of production in India is given below :—

(In thousand tons)

| Year. | Pig iron. | Steel ingots. | Semi-finished steel. | Finished steel. |
|---|---|---|---|---|
| 1957 | 1,789 | 1,715 | 1,440 | 1,346 |
| 1958 | 2,003 | 1,813 | 1,600 | 1,300 |
| 1959† | 2,994 | 2,434 | 2,542 | 1,832 |
| 1960† | 4,130 | 3,287 | 3,463 | 2,280 |
| 1961† | 4,960 | 4,072 | 1,201 | 2,851 |
| 1962† | 5,764 | 5,113 | 1,086 | 3,799 |
| 1963† | 6,600 | 6,000 | 1,200 | 4,260 |
| 1964† | 6,600 | 6,030 | 1,080 | 4,344 |
| Installed Capacity. † at the end of 1964 | 5,643 | 4,572 | 1,390 | 3,640 |

† In thousand metric tons.

Steel production in India in 1963 increased to 4,443,600 tonnes from 3,718,200 tonnes in 1962. The figure includes production of different categories of steel in all the public and private sector plants. In 1963 8 lakh tannes of steel was imported.

The per capita consumption of crude steel in India was only 14 kg. in 1962 as against Czechoslovakia 513; West Germany and U.S.A. 488; U.S.S.R. 334; U.K. 332: Japan 242 and China 20.

Against a target capacity of 1·5 million tons of pig iron envisaged in the Third Plan, the integrated steel works will be producing a million tons and the balance of half a million tons will be available from small and medium sized pig iron plants in the private sector. So far, a capacity of about 285,000 tons (which includes two medium-sized plants each with a capacity of 100,000 tons per annum) has already been licensed. It is also proposed to license a further capacity to cover the gap in the private sector.

The Tata expansion plans took place in two stages, first to 930,000 tons, and then to 2,000,000 tons of steel ingots to be rolled into 1,500,000 tons of finished steel. The Tata expansion, which had practically been completed by March 1959, cost Rs. 95 crores, including expenditure on ore mines, collieries and other ancillaries.

The Company obtained for this purpose two loans from the World Bank totalling 32·5 million dollars and one from the Government of India of Rs. 10 crores.

The expansion was undertaken through agreement with Henry J. Kaiser Co. of California, U.S.A.

The Indian Iron and Steel Co. obtained from the World Bank two loans totalling 50·02 million dollars to meet the foreign exchange cost of the expansion programme. The Central Government gave a loan of Rs. 7·9 crores and a special advance of Rs. 10 crores.

The first of the two new blast furnaces went into operation in Feb. 1958 and the second went into production in 1959. The cost of the expansion was Rs. 50 crores (original estimate).

The targets fixed for the steel industry under the Third Five Year Plan are as follows :

| | 1965-66 Capacity | 1965-66 Production | Fixed investment during 1961-1966 (Rs. crores) |
|---|---|---|---|
| Steel ingots (mln. tons) | 10·2 | 9·2 | 640 |
| Finished steel (mln. tons) | 7·5 | 6·8 | |
| Pig iron for sale (mln. tons) | 1·5 | 1·5 | |
| Alloy, tool and special steel ('000 tons) | 200 | 200 | |
| Grey iron castings (mln. tons) | 1·2 | 1·2 | 30 |
| Steel castings (mln. tons) | 0·20 | 0·20 | |
| Steel forging ('000 tons) | 200 | 200 | |

Of the total capacity target of 10·2 million tons (ingots), public sector accounts for 7·0 million tons and private sector for 3·2 million tons. The break-down is as follows :

*Public Sector* (in million tons): Bhilai 2·5; Rourkela 1·8; Durgapur 1·6; Mysore Iron and Steel Works 0·1; Bokaro Steel project 1·0.

In addition, there is included in the Plan a project for a pig iron plant using the iron ore from Salem and the Neyveli lignite, the capacity of which is to be still decided.

*Private Sector* (million tons): Tata Steel and Indian Steel 3·2.

Total 10·2 mln. tons.

The demand projections were made by three different agencies as follows (at the end of the IV Plan).

Dastur & Co.: 14·214 million tonnes.

U.S. Steel Cansultants: 11·235 million tonnes.

N.C.A.E.R.: 12·270 million tonnes.

A cut in the steel out-lay during the IV Plan has been made, recently from Rs. 1,100 crores to Rs. 800 crores and this may cause a proportionate reduction in the tentative target put at 16 5 million tonnes.

(For the Mysore Iron and Steel Works see under 'Government Industrial Undertakings').

## PRICE AND DISTRIBUTION

Since the war in 1939 the price and distribution of steel have been controlled by the Government.

The prices of all controlled categories of steel were raised by Rs. 70 per ton uniformly in May 1957. The increase followed the enhancement of excise duty on steel from Rs. 4 per ton to Rs. 40 per ton with effect from 16th May 1957.

On 11th November 1959, the Government of India again raised the retention prices payable to the Tata Iron and Steel Company (T.I.S.C.O.) and the Indian Iron and Steel Company (I.I.S.C.O.) by Rs. 5 per ton to Rs. 424 per ton, excluding the excise duty of Rs. 45·75 per ton for the period 1955-56 to 1959-60 for all categories of steel taken together. The I.I.S.C.O. had represented to the Government in December 1958 that their costs had risen as a result of increases in wages, railway freight, prices of coal etc. A similar representation was made by the T.I.S.C.O. in January 1959. The two representations were

* See also under "Hindustan Steel Ltd." in *Late Particulars*.

considered by the Government and the matter was referred to the Cost Accounts Branch of the Ministry of Finance in April 1959 for examination, which made the following recommendations:

(i) The average retention price payable to the T.I.S.C.O and the I.I.S.C.O. for the period 1955-56 to 1959-60 on all categories of steel taken together should be increased by Rs. 7 per ton, if negotiated labour settlements are to be accepted and Rs. 5 per ton if such settlements are not accepted.

(ii) The 1954-55 retention prices for the I.I.S.C.O. as adjusted from time to time, should be increased by the same amount as mentioned in (i) above and consequently, the average amount per ton to be credited by the Company to its development fund during the period 1955-56 to 1959-60 shall remain unchanged.

(iii) As the 1954-55 retention price for the T.I.S.C.O. has increased only by Rs. 4 per ton, as against the present increase of Rs. 7 per ton in the retention price if negotiated settlement is to be taken into account and Rs. 5 per ton, if negotiated settlements are to be ignored. The average amount to be credited by the T.I.S.C.O. to its development fund during the period 1955-56 to 1959-60, should be increased by Rs. 3 per ton, if negotiated settlements are admitted and Re. 1, if they are not accepted.

The Government of India stated in November 1959 that they were examining separately the question of admitting increases in labour costs due to negotiated settlements. The latest increase in the retention price, it was claimed, had enabled the T.I.S.C.O. to increase its contribution by Re. 1 to its development fund, i.e to the level of Rs. 50 per ton and the I.I.S.C.O. to maintain its contribution of Rs. 7 per ton.

A year later, that is, in November 1960, the Government raised the average retention price payable to the two companies by Rs. 4·85 per ton for the period 1955-56 to 1959-60. This brought the total increase for the five years to Rs. 29·85 per ton. The latest price increase did not, however, involve any rise in the official selling prices of steel which average Rs. 598 per ton uniformly at all rail-heads.

On September 7, 1962, the Union Government raised the average retention price of saleable steel for 1960–61 and 1961–62 by Rs. 10·50 per tonne over the provisional price of Rs. 512. This increase was to be uniformly applied to products of both public and private sector plants.

The increase is of a much lower order than that of Rs. 38 a tonne recommended by the Tariff Commission but the two figures are not comparable because the figure proposed by the Commission included an element of Rs. 8 a tonne for payment of interest and repayment of special advances made by the Government to the two private sector producers, T.I.S.C.O. and I.I.S.C.O.

Again on June 17, 1963, the Union Government decided to allow an increase of Rs. 10 per tonne in the steel retention prices with effect from July 1, 1963, to enable the producers to cover the cost of the Emergency War Risks Insurance. This amount will, however, be finally adjusted with the equalisation fund on the basis of the actuals of each steel plant.

Simultaneously the Government allowed a further increase in the escalation of rupees eight per tonne in the case of steel and rupees four per tonne in the case of pig iron with effect from April 1, 1963. For the period 1962–63 it was decided to allow the escalation element of Rs. 10 per tonne on the 1960–62 retention prices of saleable steel and pig iron respectively. These increases will be inclusive of the escalations already allowed. The Government decision was in response to representations made by steel producers.

A World Bank mission, which visited India early in 1963, strongly pleaded for higher steel retention prices.

The four-member committee headed by Dr. K. N. Raj was appointed by the Government to go into the question of distribution and control of iron and steel. In its report, the Committee not only suggested decontrol, but also favoured a higher retention price. These measures, it pointed out, would, on the one hand, remove market aberrations, and give, on the other, the much needed financial support to the steel producers.

Finally on March 2, 1964, the Government came out with its decision to abolish the statutory control over the price and distribution of all categories of steel except pig iron and ingot moulds and bottom plates, billets and tin bars, plates, sheets and wide strip, skelp, tin plates, hoops and their respective defectives, with effect from March 1, 1964.

A Joint Plant Committee was set up with the Iron and Steel Controller as Chairman and representatives of the main producers and the Railways as members. The Committee will announce and list *ex*-works prices (including base prices and extras) of the decontrolled categories to which a fixed element of equalised freight will be added. The Joint Plant Committee will plan the production of both controlled and de-controlled items on the basis of priorities determined by the Government from time to time.

### SUPPLY POSITION

A large level steel priority committee with the Secretary of the Department of Iron and Steel as chairman will make bulk allocations of steel for priority purposes.

Intents for the controlled categories will have to be backed by quota certificates as hitherto.

The operations of the Steel Equalisation Fund have been discontinued from March 1, 1964, as freight equalisation has been entrusted to the Joint Plant Committee and statutory price control over the bulk of the production (two third) has been abolished. In consequence there will not be any distinction between sale prices and retention prices whether in the case of controlled or non-controlled items and therefore no surcharges.

At present the J.P.C. accepts the intents from the registered and controlled stockists and actual users and non-registered and non-controlled stockists as well.

It has been reported that the Government had decided to permit an average increase of Rs. 30 per tonne on the main producers retention price for controlled items.

Further, that the Joint Plant Committee for steel will raise the producers price for decontrolled items by about Rs. 50 per tonne shortly ( Nov. 1965 ).

The total output of saleable steel during the Second Plan period was estimated at about 11 million tons, as against the overall requirements over the five years assessed by the Planning Commission at about 17 million tons. Production was expected to be equal to the demand only in the last year of the Plan. The total demand of steel in 1961-62 was 6·02 million tons against 5·06 million tons in 1960-61.

Steel production in India in 1963 increased to 4,443,600 tonnes from 3,718,200 tonnes in 1962. The figure includes production of different categories of steel in all the public and private sector plants.

Imports of steel on barter basis were also continued against export of pig-iron, ingots, blooms, billets etc. produced by Hindustan Steel Limited as well as against export of scrap and ores etc. Only those categories of steel which are essential to the economy of the country were allowed to be imported. In 1964-65 India imported Rs. 104 crores worth of finished iron and steel products. During 1964-65 (up to December 1964) India exported Rs. 5·5 crore worth of finished steel and scrap.

### WAGE BOARD

The Govt. of India have appointed a Central Tripartite Wage Board for the iron and steel industry with Mr. G. K. Shinde as Chairman, to determine the categories of employees who should be brought within the scope of the proposed wage fixation and to work out a wage structure based on the principles of fair wages as set forth in the report of the Committee on Fair Wages. The headquarters of the Board is at Patna.

### Special Steels Plant

Stainless steel vessels are made of one of the varieties of steel commonly known as alloy and special steels. Domestic production of the entire category is insignificant. So India's requirements are met by imports. India spent about Rs. 6 crores in 1960 on import of these varieties. The demand is expected to reach 200,000 tons by the end of the Third Plan.

The new plant to be located at Durgapur next to the integrated steel works is estimated to produce 80,000 tons of ingots per year or about 48,000 tons of finished products. The plant is estimated to cost Rs. 38·4 crores.

A special steel plant is to be set up in Maharashtra. The plant which will be in the private sector is promoted by the well-known business house of "Mahindras".

## RE-ROLLING MILLS

The steel re-rolling industry in India had its beginnings about the year 1928. In March 1961, there were over 175 re-rolling mills in the country, of which three were making distinctly special products, namely tin plates and tubes. Geographically the re-rolling units are well dispersed in almost all parts of the country. Largest concentration, however, is in Calcutta, Punjab, Kanpur and Bombay regions. In the south the mills are too few in number.

The Committee which reported on re-rolling mills (in April 1957) estimated the capacity of all the re-rollers in the country at about 700,000 tons on single shift.

While in the country as a whole, there is an adequate number of re-rolling units, the Committee recommended the establishment of new re-rolling units in certain States where there are no units at present. One new re-rolling unit each has been sanctioned in Assam, Andhra Pradesh, Bihar (north of Ganges) and Kerala and a few more in other regions too.

In addition, some plant and machinery have been licensed by the Iron and Steel Controller to be obtained from abroad or indigenously, mainly for replacement. The additional capacity during the Second Plan was assessed at 104,760 tons per annum.

In planning the development of the steel industry in the Third Plan, the position of the steel re-rolling industry was reviewed taking into account the demand for sections which could be rolled in the re-rolling mills. The review showed that it should be possible to license about 100,000 to 150,000 tons of additional capacity in the re-rolling industry to small units to meet local demands. Accordingly, a capacity of 128,600 tons for setting up new re-rolling mills in Assam, Bihar, Gujarat, Kerala, Madras, Madhya Pradesh, Andhra, Maharashtra and Jammu and Kashmir has been sanctioned, and a further capacity of 15,000 tons each for Mysore and Orissa is proposed to be sanctioned. The Bawa Steel Re-rolling Mill near Nagpur went into production in Feb. 1962.

By virtue of the Government's decision to abolish the statutory control on steel with effect from March 1, 1964, the re-rollers are practically free from all control as they are mostly engaged in the rolling of non-flat products, which have been decontrolled.

Against the alloy steel requirements of the Third Plan which have been estimated at 200,000 tons a year, 85,000 tons are estimated to

be available from the Central Alloy and Tool Steel Plant and Ordnance factories. A further capacity of 120,100 tons has been sanctioned for the manufacture of such steel in the private sector. This is in addition to an existing capacity of about 10,000 tons. For the manufacture of alloy steel castings and such alloy steels as do not require special rolling equipment, capacity already existing and licensed is about 100,000 tons. Recently, an additional capacity of 126,500 tons was also sanctioned.

Electric furnaces already sanctioned and those in progress are likely to provide a total of about 200,000 tons of billets a year for the re-rolling industry.

The question of permitting further capacity will be considered in the light of the recommendations of the Scrap Investigation Committee.

It is estimated that the requirements of tin plates by the end of the Third Plan period will be about 300,000 tons to 350,000 tons. The capacity so far approved is about 330,000 tons, of which the existing capacity is 80,000 tons. This figure also includes the capacity planned on the Rourkela Steel Plant—50,000 tons of hot dip plates and 100,000 tons of electrolytic tinplates.

Re-rollers use steel semis (Billets) and steel re-rollable scrap for rolling steel sections mostly lighter sizes of bars, rods, flats, hoops and strips, etc. The main sources of supply are the main producers, Messrs. Tata Iron & Steel Co., Ltd., Indian Iron & Steel Co., Ltd., Hindustan Steel Ltd. (Bhilai and Durgapur). Re-rollable scrap is also available from miscellaneous other sources such as, the Railways, Engineering Concerns, etc. Present availability both of billets and scrap is inadequate and so the full capacity is not being utilised.

Raw materials required by the industry:—Having regard to the recent developments it is estimated that the recognised sector of the re-rolling industry including the Secondary Producers would require about 1·8 million tons of semis by the end of the Third Plan period. As against this provision has been made for supply of only 1 million tons of semis during the Third Plan from the main producers.

The re-rollers at places like Amritsar, Jullundur, etc. situated at considerable distance from the ports had to incur heavy freight charges which inflated their production costs. Relief was given to all outstation rerollers from 1953 when the maximum statutory prices became applicable to deliveries f.o.r. all railhead stations in India.

Production during 1964-65 was 81 lakh tonnes as against 96 lakh tonnes in 1963-64. This fall is discouraging in view of the fact that the industry as a whole is capable of producing 2·5 million tonnes to which it is geared.

Total investment in the industry is estimated to be of the order of Rs. 25 crores.

It is estimated that about 40,000 persons are employed by the industry in various parts of the country.

A seamless tube plant belonging to the Indian Tube Company (1953) Ltd. was formally inaugurated in Jamshedpur in the last week of January 1960. Work on the tube project commenced in 1953 and the first plant, the Fretz-Moon tube mill, came into operation in November 1955. The second plant, the Rs. 2-crore electric resistance weld mill and the ancillary cold rolled strip plant, went into production in April 1957.

The seamless tube plant, which has now been added, represents the third and final phase of the project. The present capacity of the works is about 140,000 tons of steel tubes per year. The Company has also established capacity at Jamshedpur for the manufacture of 30,000 tons per year of cold rolled steel strip for use in tube making and for sale as strip. In addition, a plant has been installed for the fabrication of upto 150,000 tubular steel poles per year.

With the commissioning of the 140,000-ton Jamshedpur tube plant, the total installed capacity of the tube industry now works out at 175,000 tons a year.

The Kalinga Tubes (Cuttack) account for a capacity of 30,000 tons and the Tube Investments in Madras for 5,000 tons.

The great bulk of the total capacity—about 68 per cent—is in Fretz-Moon tubes used for conveyance of gas, water and steam.

The other category of electrically welded precision tubes, used mainly in railway locomotives, bicycles and steam boilers, accounts for another 14 per cent. Seamless tubes make up the balance of 18 per cent, the main applications being high-pressure conveyance of gas, manufacture of transmission poles and lighting columns for water-well casing, besides numerous other industrial applications.

Generally speaking, the industry is a small to medium scale one. The individual units are, however, of varying sizes and capacities. There has been some increase in the capacities of mills due to improvements effected. The potential capacity of the industry is of the order of 2·5 million tonnes. The Government of India appointed a Technical Committee headed by S. C. Mukherjee to assess the capacity of re-rolling mills on bullets and scraps.

In allowing further capacity the Government has taken a stand that it will be decided only after the recommendations of the above Committee.

A project has, however, been approved for setting up a unit at Rourkela which will produce 100,000 tons of tubes a year in sizes varying from 8″ to 20″ in diameter. Thus, the Third Plan will see India manufacturing substantial quantities of tubes in sizes ranging from ¼″ to 20″. The foundations of self-sufficiency have thus been laid.

# WOOLLEN INDUSTRY

THE woollen industry is more or less scattered all over the country but the major concentrations are in Maharashtra and the Punjab The Punjab occupies a very prominent position inasmuch as 25 woollen spinning mills are working in the State out of about 40 in the whole of India. Maharashtra comes second with 10 mills. The remaining are in the rest of India. Similarly, out of 30 woollen composite mills, about 14 are in the Punjab and 6 in Maharashtra. Amongst livestock products, wool ranks second only to hides and skins as an earner of foreign exchange. The total production of wool in India, based on an *ad hoc* survey in 1961, has been reckoned at 72 min. lbs. Forty per cent of the total internal production of wool is from Rajasthan. During the Third Plan, this is to be raised to 90 min. lbs.

The total capital investment in the industry is reckoned at about Rs. 25 crores.

The organized sector of the industry employs about 20,000 workers.

The raw material used is wool tops (imported), shoddy wool (all of which is imported), wool waste, rags etc. (imported and indigenous) and raw wool (imported and Indian). In addition, the industry uses some quantities of man-made fibres.

In order to meet the wool top requirements of worsted spinning units, 5 wool top manufacturing factories, with a total capacity of 17·2 million lbs. per year, have been licensed. In addition, the establishment of a combing unit of five million lbs. capacity to be set up as a co-operative venture by the spinning mills in Ludhiana, has been approved. Licence for the establishment of synthetic fibre tops upto a capacity of 3·36 mln. lbs. has also been given. Of these, the installed capacity is at present 8 million lbs. per year.

According to the Development Council for the Woollen Industry, the potential demand for woollen cloth stood at 22 million yards in 1960. They have visualised a 10 per cent growth in demand and put the Third Plan target at 33 million yards. The requirements at the end of the Third Plan are expected to be as follows: Worsted yarn: 28 million lbs.; woollen and shoddy yarn: 24 million lbs.; staple fibre tops: 4·5 million lbs. In addition, production of 4·5 million lbs. of terylene staple fibre is envisaged. While part of the output may be consumed by cotton mills, it is assumed that the entire production will be used for manufacture of staple fibre tops to serve as a substitute for wool tops in worsted spinning.

There are at present about 300 organised woollen units in India of which 36 are purely spinning units, and 30 composite.

The production figures were as follows:

| | Woollen/worsted fabrics | Woollen/worsted yarn |
|---|---|---|
| | (million yds.) | (million lbs.) |
| 1959 .. | 14·83 | 28·60 |
| 1960 .. | 14·61 | 27·80 |
| 1961 .. | 13·20* | 14·76+ |
| 1962 .. | 18·29* | 18·01+ |
| 1963 .. | 20·40 | 22·73 |
| 1964 .. | 11·74 | 20·91 |

* Million metres + Million kgs.

The region-wise distribution as on 31-3-1961 was as follows:

| State | Woollen | Shoddy | Worsted |
|---|---|---|---|
| Delhi .. | — | — | 864 |
| Mysore .. | 9,556 | — | — |
| Punjab .. | 18,657 | 3,751 | 43,780 |
| U.P. .. | 11,287 | — | 9,672 |
| West Bengal | 1,380 | — | 6,472 |
| J. & Kashmir | 2,018 | — | 1,576 |
| M. Pradesh | 876 | — | — |
| Maharashtra | 4,500 | 7,668 | 53,132 |
| Gujarat .. | 5,280 | — | 9,168 |
| Total .. | 53,554 | 11,419 | 124,664 |

If all the schemes licensed are implemented, the position will be as follows: Woollen spindles: 54,169; worsted spindles: 1,45,680; and shoddy

spindles : 20,057. There are about 4,000 looms including both registered and unregistered. The wool combing capacity now stands at 16 million lbs.

The Government of India have approved a scheme of Messrs. Duncan Bros., Calcutta for the establishment of Wool Tops Combing Plant in collaboration with Messrs. Isaac Holden & Sons Ltd., Bradford for a productive capacity of 10 million lbs. per annum. The installation of this unit was completed towards the end of the Second Plan period.

The Tariff Commission has been asked to report on the price structure of all types of woollen yarns and fabrics. The Woollen Textiles (Production and Distribution Control) Order, 1960, empowering the Textile Commissioner to regulate the production of all types of woollen yarn, and to fix the prices of all types of such yarn and woollen fabrics manufactured therefrom had been promulgated during 1960. The Tariff Commission's recommendation that ex-mill and retail prices of woollen manufactures be fixed was rejected by the Central Government recently on the ground that conditions in woollen industry are not normal because of emergency. A panel for the development of carpets and druggets has been constituted to examine the various problems of the carpet industry and also to suggest measures to be taken for the development of the industry during the Third Plan period.

There are about 900-1,000 hosiery units in the country of which nearly 800 units are situated in Ludhiana. It is estimated that about 10,000 machines of different types are installed in this sector. The capital investment in the sector is estimated at about Rs. 3·5 crores. A large number of the machines employed are hand operated and locally fabricated. Industry caters practically to the whole of the domestic market. The Govt. of India appointed a Working Group to consider the problem of the hosiery industry.

The quantity of yarn consumed by the hosiery industry in the country is estimated at more than 5 million pounds.

The export of wool (raw) amounted to 30 million pounds worth about Rs. 8 crores in 1964-65. In 1964-65 wool and wool products worth Rs. 9 crores were exported. The main destinations were U.S.S.R., U.K., U.S.A., Canada and Australia. India's exports have risen from 20 mln. lbs. in 1953-54 to an average of over 35 mln. lbs. within the course of the last few years.

**Imports :** During 1964-65 India imported Rs. 66·8 million worth of raw wool, Rs. 30 million worth of wool tops and about Rs. 1 million worth of yarn and fabrics.

## FIVE-YEAR PLANS

For increasing wool production in the country and for improving the quality of wool, four sheep breeding farms and two wool testing laboratories were established during the Second Five Year Plan for carrying out wool development programme in rural areas. 222 sheep and wool expansion centres were organised in ten States.

Among the various measures envisaged for the improvement of the industry in terms of both quantity of production and quality are the setting up of : (1) a central sheep and wool research institute at Malpura with a Plan outlay of Rs. 75 lakhs, (2) one wool research institute at Bombay, (3) wool processing plant at Visnagar, and (4) two central sheep breeding farms, one at Kulu (Punjab) and the other at Kodaikanal (Madras). The Government of India has negotiated with Australia for securing the help of Australian experts to instruct Indian wool graders. It is also proposed that merino studs be brought to India from Australia or Russia.

The estimated population of 40 million sheep produces about 70 million pounds of wool annually which forms only 1·3 per cent of the world production. A wool combing plant is expected to be set up in Jammu and Kashmir.

The yield of wool varies from three-fourths of a pound to four pounds per sheep per year. The present average yield per sheep in India is estimated at 1·7 pounds per annum. Annually about 50 per cent of the clip, is exported. The mill industry concerned with the manufacture of superior cloth has to depend on the import of raw or semi-processed wool to the extent of 15 million pounds estimated to cost about Rs. 100 to Rs. 110 million in foreign exchange. If the quality of indigenous wool is improved, India can gradually decrease the import of wool.

The latest position regarding installed capacity and production (on three shift basis) as also the production targets at the end of the Third Plan and the tentative targets for IV Plan are set out in the following table.

| | Installed capacity* | Production for the year 1964–65 | Target for III Plan | Tentative target for IV Plan |
|---|---|---|---|---|
| 1. Raw wool (million lbs.) .. .. | — | 74·00 | 90·00 | 90·00 |
| 2. Wool tops (million lbs.) .. .. | 38·80 | 25·60 | 9·70 | 46·00 |
| 3. Shoddy yarn (million lbs.) .. | 8·43 | 11·85 | 10·00 | 18·00 |
| 4. Worsted yarn (million lbs.) .. | 28·17 | 14·06 | 28·00 | 40·00 |
| 5. Fabrics (million yards) .. .. | 37·50 | 12·30 | 35·00 | 41·00 |

* On double shift basis.

The woollen industry may not require installation of any additional spindles and looms during the Third Plan period, if the programme of development tentatively drawn up by the Planning Commission were finally implemented. This programme is in accordance with the recommendation made by the Development Council for woollen textiles. The Council is of the view that the present installed capacity of the industry is more than sufficient to produce the entire requirements of woollen worsted yarn and cloth, inclusive of export demand.

The report of the working group for rehabilitation and modernisation of the woollen industry, 1960, appointed by the N.I.D.C. has indicated that the industry would require a substantial amount of rehabilitation and modernisation during the Third Plan, costing about Rs. 11·25 crores of which the foreign exchange element would be about Rs. 9·25 crores.

The weaving sector of the industry, is working, on an average, a little over 1½ shifts and the spinning sector only about one shift. The existing installed capacity of the industry (calculated on the basis of two shifts and 300 working days) is estimated at 67 million lbs. of woollen worsted yarn and 48 million yards of cloth. The production targets for the Third Plan are 52 million lbs. of yarn and 35 million yards of cloth. The productive capacity of wool tops including synthetic tops has been fixed substantially higher, at 31·5 million lbs. for the Third Plan. The production of woollen textiles is expected to be only 22 m. yards by the end of the Third Plan against the target of 35 m. yards.

During the Third Plan six new sheep breeding farms and 4,000 new extension centres are proposed to be established, the sheep population covered by each centre varying from 10,000 to 15,000. It is envisaged that 300 wool grading and marketing centres to be run by co-operatives of producers should be set up during the Third Plan. Facilities for shearing, grading, baling and storing of wool will be provided at these centres.

The employment potential in this industry is expected to increase by about 5,000 persons during the Third Five-Year Plan.

The consumption of electric power during 1960-61 in this industry was approximately 13,000 KWH. This is likely to go up to about 20,000 KWH. by the end of the Third Five-Year Plan.

Since the declaration of emergency following the Chinese aggression in October 1962, the wool industry is geared to meet the enhanced defence requirements. The Government has, therefore, made a special foreign exchange allocation of Rs. 5 crores for the import of raw wool and wool tops. It has also considered the imports of spare parts.

The Government have recently approved of the setting up of a synthetic wool fibre project near the Barauni refinery.

Within the next two or three years about 50 per cent of the woollen industry will be modernized in terms of a programme finalized by the Union Commerce Ministry. Imports of machinery under various credit and barter agreements have already been made.

# FOREIGN AID TO INDIA

INDIA has received technical assistance from many friendly foreign countries and specialised institutes of the United Nations. The total amount of external assistance (other than commodity assistance under U.S. P.L. 480 and 665) for the public and private sector authorised upto the end of the Second Plan period (31-3-1961) is now estimated at Rs. 17,784·6 million. Of this Rs. 12,669·8 million were repayable in foreign currencies. In addition, commodity assistance authorised under P.L. 480 was of the order of Rs. 13,864·3 million. Authorisations during the Third Plan period upto December 31, 1964 total Rs. 18,804·3 million of which grants amount to Rs. 699·6 million.

(1) Suppliers' credit other than those forming a part of Consortium AID.
(2) Rockefeller Foundation.
(3) Assistance Under Title II & III of P.L. 480.
(4) Technical assistance in the form of experts, trainees etc.
(5) Ad hoc grants, in the form of equipment and supplies where the value is not known.
Third Country Currency Assistance from U.S.A.

## WORLD BANK

The loans sanctioned by the World Bank for various projects in the public and private sectors, upto Dec. 31, 1964 amounted to $847·13 million (Rs. 4,034 million) out of which a sum of $742·70 million (Rs. 3,536·6 million) was actually drawn up to that date. These loans are available for import of machinery and equipment from all countries which are members of the Bank as well as from Switzerland.

The particulars of the loans sanctioned upto Dec. 31, 1964 including the terms of repayment applicable to each loan and the present status of withdrawals and repayments, are given in the following statement :

| Sl. No. | Name of the Loan | Date of Agreement | Rate of Interest | Period of loan (years) | Amount of loan after cancellation $ mil. | Amount drawn $ mil. | Amount Repaid $ mil. |
|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |

'A'—These loans were sanctioned according to the commitments made in the Consortium meetings from 1961 onwards.

## INTERNATIONAL DEVELOPMENT ASSOCIATION

I.D.A. Credits are generally repayable over periods ranging upto 50 years with a moratorium of 10 years. No interest is charged on these credits though a service charge of 3/4 of one per cent per annum, to cover the Association's administrative expenses, is payable on the amounts outstanding from time to time. Upto end of December, 1964 the IDA has extended sixteen credits to India in pursuance of the commitments made in the Consortium meetings. The names of the projects for which the credits were sanctioned and the amounts of credits and drawals upto end of December, 1964 are given below :—

### CONSORTIUM AID TO INDIA

The Aid-India Consortium been considering India's requirements of external assistance for the Third Five Year Plan in its periodical meeting since May-June 1961. Taking into account the aid pledged by the Consortium in its last meeting in April 1965 (to consider aid to India for the year 1965-66), the total aid made available by the Consortium for India's Third Five Year Plan amounts to $5472 million (Rs. 26,058 million) as shown in the table below.

(U. S. $ million)

# OFFICIAL LANGUAGE PROBLEM

IN accordance with the provisions of Article 344 of the Constitution the President constituted a Commission to make recommendations on the progressive use of Hindi and restriction on the use of English and also on the languages to be used for communication between the Union and a State or between one State and another.

This Commission called, for short, Official Language Commission, submitted its report to the President on 31st July 1956, and was laid on the table of Parliament on August 12, 1957.

A summary of the report was given in the previous edition of the *Directory* as well as the background of the language controversy.

It may be mentioned that the Constitution requires that the recommendations of the Language Commission have to be examined by a Parliamentary Committee consisting of 30 members (20 from the Lok Sabha and 10 from the Rajya Sabha). The President will base his final order on the report of this Committee.

### PARLIAMENTARY COMMITTEE

The Committee held its first meeting on 16th Nov. 1957 at which Pandit Govind Ballabh Pant was elected chairman.

A summary of the Committee's report is given in the *Directory* for 1959-60.

With the permission of the President the report was laid on the tables of the two Houses on April 22, 1959 and later discussed in Parliament.

The general sense of Parliament appeared to be, and this was reflected in a Government of India resolution on the subject, that while the date for the switch-over to Hindi as the principal language should be retained there should be a flexible approach in the matter of the discontinuance of the use of English — an approach that should take into account the views of the non-Hindi speaking areas. In effect this means that English would continue to be used along with Hindi though to a progressively diminishing extent, and there would be no dead-line.

Apart from permitting the use of English for official work at the Centre for an indefinite period, the Government of India resolution gives the States the option to address communications to the Government of India or other States in that language.

It also urges the provision of adequate facilities in schools and at the university-level for the continued study of English.

On the other hand, the resolution recommends that all judicial courts, up to the level of the High Court, should entertain applications in Hindi and generally provide facilities for transaction of work in this language to the extent possible.

Candidates appearing for examinations conducted by the Union Public Service Commission will have the option of answering question-papers in Hindi.

The resolution discusses in some detail the lines along which the various regional languages of the country should develop. In the interests of national unity, it urges that, as far as possible, these languages should come closer together, particularly in the matter of vocabulary. It praises in this context the work of the Sahitya Akademy.

### PRESIDENT'S ORDER

The President then made his order published in a gazette notification of April 27, 1960.

The President broadly accepted the recommendations of the Parliamentary Committee on Official Language and the Government of India's resolution and directed that after 1965 Hindi with international numerals should be the principal official language and English should continue as an associate language. No restrictions are therefore to be imposed for the present on the use of English for any of the official purposes of the Union.

The President directed that the Home Ministry should take necessary action in consultation with the UPSC for the introduction of Hindi as "an alternative medium of examinations for recruitment to all-India services and higher Central services."

It has, however, been clarified that, "for the present, only an optional Hindi language paper may be introduced." Such candidates as are selected and have qualified in this paper may be exempted from passing the Hindi departmental test after recruitment.

It is directed that international numerals be adopted uniformly in all technical and statistical publications of the Government of India. A uniform basic policy should be adopted for the use of Devnagari numerals, in addition to international numerals, in the Hindi publications of the Central Ministries.

The President has accepted the recommendation that the functioning of the Supreme Court should eventually be in Hindi. But it is pointed out that this will "require appropriate action only when the time comes for the change-over."

In respect of the language of the High Courts, the President has urged that the Ministry of Law may undertake necessary legislation in their case to provide for the use "optionally of Hindi and other official languages of the States for the purposes of judgment, decrees and orders, with the previous consent of the President."

The Union Government should prepare and implement a plan of action for the progressive use of Hindi as the official language.

The details of the President's order was given in the previous editions of the *Directory*.

The Congress Working Committee broadly endorsed the Union Government's scheme to give legislative effect to late Prime Minister Nehru's assurances regarding the continued use of English for administrative purposes in June 1965. The resolution is as follows :

(*a*) It will be obligatory for all the States to introduce the three-language formula in their educational curriculum, extend it to the University stage and to apply it strictly ; (*b*) The U.P.S.C. examinations will be conducted in English, Hindi and the other national languages ; (*c*) In the U.P.S.C. examinations, there will be compulsory papers in Hindi and English and in the case of candidates whose medium for the

U.P.S.C. examinations is Hindi, a paper in any other language in the Schedule; (*d*) The national language of each State will become the medium of administration as well as instruction at the University stage as early as possible; (*e*) The standard of teaching of Hindi will have to be raised progressively in the schools as well as at the University stage; (*f*) English will continue to be taught as a language which has an important role.

*Note:* Owing to National Emergency, the Official Language Bill has not been finally drafted.

## PROPAGATION OF HINDI

### Assistance to Voluntary Organisations

The work of propagation of Hindi through voluntary organisations gained momentum. Grants-in-aid amounting to Rs. 4.22,168 were given to voluntary organisations for this purpose, during 1963-64.

### Appointment of Hindi Teachers

Under the programme of direct propagation of Hindi through schools under the control of the State Governments, the Union Government have been placing funds at the disposal of the State Governments in their development budgets for appointment of Hindi teachers at various levels.

During the past years the Ministry has been providing funds for the appointment of at least one Hindi teacher in a high or higher secondary school. In 1962-63 this provision was extended to cover primary and middle schools as well. Also from 1962-63 the Union Government agreed to meet hundred per cent expenditure on the appointment of Hindi teachers at high/higher secondary, middle and primary school levels.

### Hindi Teachers' Training Colleges

Several Hindi teachers training colleges have been opened at various centres in the country. Full expenditure is being met by the Union Govt. During 1961-62 and 1962-63, Kerala, Mysore, Gujarat and Madras States were assisted to start one Hindi teachers training college each. Financial assistance was also given to Andhra Pradesh and Maharashtra to expand the existing facilities. In 1964 one additional training college was set up in Mysore to meet the growing demand of trained Hindi teachers there and West Bengal has also been assisted to open a similar college in the State.

Grants given to training Colleges of Non-Hindi speaking States: Kerala—Rs. 1,50,700; Mysore—Rs. 2,14,650; Andhra Pradesh—Rs. 30,423; Gujarat—Rs. 89,414; Maharashtra—Rs. 42,000 and Madras—Rs. 1,21,800.

### Kendriya Hindi Shikshana Mandal, Agra

In order to supply up-to-date expert knowledge and professional guidance in respect of teaching methods and allied pedagogical problems, the Union Government had set up an autonomous body entitled Kendriya Hindi Shikshana Mandal, which is running a Hindi Teachers Training and Research Institute at Agra. The Institute is catering for three different courses equivalent to T.T.C., B.Ed., and M.Ed. and is also conducting research on vocabulary, content of various courses and techniques of teaching with special reference to the requirement of non-Hindi regions. Teachers from different parts of the country as well as regional teachers training colleges have been benefited by the expert guidance and research work done by the Institute. During 1963-64 a grant of Rs. 2·75 lakhs was given to the Mandal for the training of Hindi teachers and various other projects launched by it.

### Scholarships

To encourage and help non-Hindi-speaking students to prosecute higher studies in Hindi and to conduct research, the Union Government have instituted a large number of scholarships. During 1963-64, 427 scholars of previous years continued their studies under the scheme. Two hundred and twenty scholarships were announced for 1963-64.

### Free Supply of Hindi Books

As a follow-up programme, arrangements have been made to supply books worth Rs. 2 lakhs free of cost to different schools, colleges and public libraries in the non-Hindi-speaking areas during 1964-65. Certain selected books have also been supplied to Hindi-speaking States and universities and private Hindi organisations.

### Preparation of Bilingual Primers

Under this scheme, Hindi-Malayalam, Hindi-Kannada and Hindi-Telugu primers are under preparation by the Dakshina Bharat Hindi Prachar Sabha, Madras, on behalf of the Ministry. Hindi-Tamil self taught is under print.

### Regional Offices

Two Regional Offices had been set up, one at Calcutta and the other at Madras, to effect greater coordination and cooperation between the Union Government and the voluntary Hindi organisations. The direct contact thus established with these organisations has helped considerably in the propagation of Hindi in non-Hindi-speaking areas. It was proposed to establish more Regional Offices in 1964-65.

### Shiksha Samiti

A conference of voluntary Hindi organisations was called in 1951 to consider the measures that might be necessary for the propagation and development of Hindi. On a recommendation of the Conference, an Advisory Committee known as the 'Hindi Shiksha Samiti' was set up to advise the Government on matters relating to the propagation and development of Hindi in the country.

### Encouragement of Hindi Abroad

Two schemes have been followed under this programme during 1963-64. Under the first, facilities for teaching Hindi to African students studying in Indian Universities were provided and paid for by the Ministry, particularly in the form of stipends. Under the second, prizes in the form of free round-trip to India are provided to foreign students learning Hindi and also other Indian languages.

In addition, the Indian Council for Cultural Relations, an autonomous organisation financed by the Ministry follows a programme of promotion of teaching Hindi abroad. This programme includes the appointment of or subsidising the appointment of Hindi lecturers in institutions in other countries, grant of scholarships to foreign students and scholars for study in Hindi and presentation of Hindi books to universities, schools, libraries and private organisations.

**Development and Enrichment of Hindi:** *Production of Literature:*—The Ministry of Education is primarily engaged in the production of such literature as would enrich Hindi and make it a powerful medium of instruction and vehicle of administration. The activities in this behalf include the evolution of terminology in scientific and technical subjects, publication of lists of such terminology, pamphlets, booklets, dictionaries and glossaries of technical terms in English with Hindi equivalents and their Hindi-English version.

### Periodicals

Four regular issues of the 'Bhasha' quarterly were brought out during 1963-64. In addition, one special number 'Shanti-Raksha' has been brought out. It is also proposed to bring out a monthly magazine, 'Bhartiya Shiksha'. The Commission for Scientific and Technical Terminology propose to bring out a quarterly periodical entitled, 'Indian Journal of Scientific and Technical Terminology'.

### Dictionaries

The definitional dictionaries (Hindi-English) in Physics, Mathematics and Botany have been reviewed and their press copies are under preparation (May 1964).

A Hindi-English Dictionary of Common Words has been compiled. It has about 6,000 words, and is under print.

### Devanagari Key-Board

A new key-board designated the Devanagari (Hindi-Marathi) key-board has been designed, and this supersedes the Hindi key-board announced in 1962. This Devanagari key-board for standard typewriters will have 46 keys. In portable typewriters keys Nos. 44 and 45 will be dropped and key No. 46 will become key No. 44 and will be positioned next to key No. 31. This key-board has also been approved by the Government of Maharashtra for use on the Marathi typewriter.

Key-boards according to this design were to be ready during 1964.

### Terminology Work

An organisation has been set up at Roorkee, under the auspices of the Roorkee University, for review and evolution of terminology in engineering subjects in collaboration with the Commission. It will work under the member-in-charge of the subject in the Commission.

### Hindi in Foreign Universities

According to available information the undermentioned foreign universities and institutions (name within brackets) in the following countries teach Hindi:

Hindi:—Belgium (Brussels, Ghent, Liege and Catholic); Ceylon (Vidyalankara and Vidyadaya); China (Peking); Czechoslovakia (Charles); East Germany (Free University, Berlin); France Ecole de Langues Orientale Vivantes); Hungary Budapest); Iran (Tehran); Italy (Ismeo, Rome); Japan (Tokyo, Osaka and Kyoto); Mauritius (Teachers Training College); Nepal (Nepal University); Netherlands (Utrecht); Poland (Warsaw); United Kingdom (School of Oriental and African Studies, London); U.S.A. (Johns Hopkins, Washington); U.S.S.R. (Moscow, Leningrad); Yugoslavia (Zagreb).

## HINDI EXAMINATIONS

About 2·6 lakh employees have completed one or more of the prescribed courses and nearly 1·4 lakh employees have passed the prescribed examinations. There are still about 3 lakh employees who have yet to be trained in Hindi. There are 225 training centres in the country, including six centres for training in Hindi typewriting and Hindi stenography.

Employees are offered three courses—Prabodh, Praveen and Pragya—lasting for 9 months, 9 months and one year respectively. Prabodh is intended for those who do not know Devanagiri script and who speak a South Indian language or English. Praveen is meant for those who pass Prabodh examination or those whose mother tongue is Marathi, Gujarati, Bengali, Assamese, Sindhi or other allied language. Pragya is intended for those who pass the Praveen examination or whose mother tongue is Punjabi, Urdu, Kashmiri or other allied language.

Training in Hindi is obligatory for all non-Hindi knowing employees who were below 45 years of age as on 1st January 1961, excepting employees below class III grade, industrial establishments and work-charged staff. It has, however, been laid down that no penalty will be imposed for failure to attain the prescribed standard by the due date. Teaching facilities are provided to the employees free of cost during the office hours. Cash awards are granted creditably in the Praveen, Pragya and Hindi typewriting and Hindi stenography examinations. Incentives are also given in the form of one advance increment to be absorbed in future increase in pay to non-Hindi knowing non-gazetted Central Government employees passing the Pragya examination or the Hindi typewriting and Hindi stenography examinations.

On the recommendation of the Hindi Shiksha Samiti the Government of India have recognised, for purposes of employment under them, the Hindi Examinations conducted by certain organisations. The names of the organisations, examinations recognised and the standard of Hindi prescribed in the equivalent examinations are given in the table below :

| Name of the Organisation. | Name of the Examinations recognised. | Standard of Hindi prescribed in the equivalent examination. |
|---|---|---|
| Hindi Sahitya Sammelan, Allahabad. | Prathma<br>Madhyama<br>(Visharad)<br>Uttama<br>(Sahityaratna) | Matric<br>B.A.<br><br>Higher than B.A. but not equal to M.A. |

## REGIONAL LANGUAGES

Central grants are made to States and private institutions under the Union Education Ministry's scheme for the development of modern Indian languages.

The purpose is to provide for, among other things, the preparation and publication of encyclopaedias and old manuscripts, rare books, bilingual dictionaries, popular books on science and culture, works bringing out similarities among different Indian languages on points of grammar, syntax or specialised vocabulary and for literary conferences.

The total allocation for the scheme for 1964-65 has been Rs. 5,63,998.

State-wise allocations for 1964-65 in rupees were : Andhra Pradesh 9,000 : Assam 9,626 ; Kerala 7,260 ; Madras 62,325 ; Maharashtra 1,23,178 ; Mysore 1,13,500 ; Orissa 1,01,152 ; Uttar Pradesh 14,000 ; West Bengal 1,21,547 ; India 2,400 ; Total 5,63,988.

Language-wise allocations for 1964-65 in rupees were : Bengali 1,23,173 ; English 13,700 ; Kannada 1,11,300 ; Malayalam 8,760 ; Marathi 1,08,178 ; Oriya 1,01,152 ; Tamil 35,825 ; Telugu 26,500 ; Maithili 10,000 ; Miscellaneous 22,400 ; Total 5,63,988.

Hindi and Sanskrit are not included in the programme as their development is undertaken through a separate scheme.

Under the scheme of development of modern Indian languages each State Government could develop any language and not confine itself only to those languages prevailing in its area. Further, all institutions in a State, engaged in the development of a modern Indian language, other than Hindi, will be eligible for assistance although that language be not the regional language of the State.

Generally, the Centre shares 50 per cent of the expenditure incurred by the State Governments or institutions on approved scheme. In special cases, however, a cent per cent grant is permissible.

State Governments may also recommend grants to private institutions engaged in language development work. In such cases the grants by the Centre equal the assistance given by the State Governments.

The Central grants of Rs. 20 lakhs for the teaching of Hindi in schools and colleges in non-Hindi speaking areas for 1964-65 have been increased to Rs. one crore.

*Languages Bill :* The seal of the Parliament's approval was set on the Official Languages Bill on 7th May 1963, which was passed in the Lok Sabha on 27th April 1963, permitting continuance of English as an associate official language with Hindi, even after the expiry of the present time limit on Jan. 26, 1965, for an indefinite period. The use of English in the State legislatures will also be debarred after January 26, 1965 unless amending laws are passed by the States providing for continuing the business in English.

Even after that date, those States conducting business in the regional languages will be required to have authoritative texts of the laws and amending Bills in English. These implications of the Official Languages Bill were explained to the Chief Ministers at their informal meeting with the Union Home Minister.

The Punjab Government had decided to introduce Hindi in the Hindi region and Punjabi in the Punjabi region of the State as court languages upto the district level from Jan. 1, 1962. The Maharashtra Govt. has been taking steps to facilitate an early and smooth switch-over from English to Marathi as the official language. In Kerala steps are being taken by the Government for the progressive introduction of Malayalam as the official language in the State.

The Kerala Government has adopted Malayalam as the official language since Nov. 1, 1965 in specified departments.

Communications received by the Govt. in Malayalam would be replied in the same language.

The Mysore Assembly passed on Sept. 5, 1963, the Official Language Bill making Kannada the official language of the State, but providing for the continued use of English in the Legislature and for other purposes beyond 1965.

In July 1964, the Andhra Pradesh legislature passed a Bill permitting the continuance of English as the official language of the State beyond Jan. 1965. Legislation for adopting Telugu as the medium of administration was expected to be introduced in the November session of the legislatur . There has been progress in evolving a Telugu typewriter key board and shorthand script. The glossary of 26.000 words prepared by the Kaleswara Rao Committee would be adopted for translating into Telugu, words from other languages.

As far as possible, it would be necessary to evolve uniform equivalent words in various regional languages, taking Sanskrit or Arabic roots.

Orders have been passed requiring Government offices at the taluka and lower levels to use Telugu as the official language of administration. In due course, the district and State levels would also start employing Telugu.

The Gujarat Government, which has adopted Gujarati as the language of administration since May 1, 1965, has decided to correspond with Hindi speaking States in Hindi only, instead of English.

### Official Language (Legislature) Commission

The Commssion has been appointed by the Government of India to prepare and publish a standard legal terminology for use in all official languages. It has to prepare and publish authoritative texts in Hindi of all Central Acts, ordinances, regulations and orders and to arrange for translation of the same in various languages of the States. The 15-member Commission includes five full-time members and is headed by Mr. C. P. Sinha, retired Chief Justice of Assam High Court.

# EDUCATION

SINCE August 15, 1947 Education at the Centre has been constituted into a separate Ministry of Education. The State Governments are fully autonomous in regard to educational matters except in respect of educational development programmes for which they receive grants-in-aid from the Central Government. Such programme has to be approved by the Central Government who have to examine whether it is in accord with the All-India approved educational policy.

The Ministry has offices in London, Washington. Nairobi and Bonn.

The work of the Ministry has been distributed mainly in five Bureax : (1) The Bureau of school education ; (2) the Bureau of higher education ; (3) the Bureau of scholarships ; (4) The Bureau of planning and ancillary education services ; (5) the Bureau of languages, literature and fine arts. Each Bureax is under the charge of a Joint Secretary/Joint Educational Adviser. These Bureax consist of various divisions and units.

The Ministry is also respgonsible for the four Central Universities of Aligarh, Banaras, Delhi and Visva Bharati and some Institutions of higher learning. Other Departments that come within its purview are Anthropological Survey of India, Archaeological Survey of India, National Archives, National Library, Calcutta, Council of Scientific and Industrial Research, Survey of India, Botanical Survey of India, Zoological Survey of India, National Museum, etc. The Ministry is also responsible for cultural relations with foreign countries and UNESCO.

An Education Commission has been set up in Oct. 1964 to survey the entire field of educational development and to have a comprehensive review of the country's educational system. The commission will advise the government on the national pattern of education and on the general principles and policies for the development of education at all stages and in all its aspects, except legal, medical and adult education.

Some of the other educational bodies associated with the Ministry are :

All-India Council for Elementary Education, All-India Council for Secondary Education, National Council for Women's Education and the University Grants Commission.

For secondary education, there is a division in the Ministry itself, and a subordinate office called Directorate of Extension Programmes for Secondary Education. The latter performs advisory as well as executive functions. This Directorate has since been merged in the National Council of Educational Research and Training which has been set up as an autonomous organization. Education in the Union Territories is also one of the responsibilities of this division.

In the States, the Secretary, Department of Education, is the permanent head of the Department and the Director of Education acts as an expert Adviser to the Minister in charge of Education. The Director controls the inspecting staff and the teaching staff of the Government institutions. In some States the functions of Director are discharged by the Educational Officer, in others by the Education Secretary.

There are two types of Union Territories *viz.* one with Legislatures and the other without Legislatures. The Territories which have Legislatures are Himachal Pradesh, Manipur, Tripura, Pondicherry and Goa, Daman and Diu. The Territories which do not have Legislatures are Delhi, Andaman and Nicobar Islands, L. M. A. Islands and Dadra and Nagar Haveli.

The Government of India is ultimately responsible for education in Union Territories. In case of Territories which have their own Legislatures, some of the powers are enjoyed by the respective Governments.

The authority of Government in controlling the system of public instruction is in part shared with and in part delegated to Universities, and Boards of Secondary and Intermediate Education as regards secondary education, and to local bodies as regards elementary education in some States.

The control over higher education is exercised through the University Grants Commission.

In 1965 there were 62 universities, nine deemed to be universities and 15 Boards of Secondary Education.

Scientific Research, Technical Education and Cultural activities also come within the purview of the Ministry of Education after the merger with the Ministry of Education of the Ministry of Scientific Research and Cultural Affairs.

Institutions under private management are controlled by Government and by local bodies by "recognition" and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and by local bodies.

For every 100 rupees of the Central Government expenditure on education in 1960-61, 52·5 were for indirect expenditure which includes direction and inspection, construction of buildings, scholarships, hostel charges etc., 19·9 for universities and general education colleges, 14·3 for professional and technical education (school and college standards), 6·2 for secondry education, 6·2 for primary (including pre-primary) education and 0·9 for special education (school and college standards).

During 1965-66, two of the States and Union Territories have earmarked more than 30 per cent of their total state budget to education, two between 25 and 30 per cent, seven between 20 and 25 per cent, eleven between 10 and 20 per cent.

During 1962-63, the expenditure on education in the States was highest in Uttar Pradesh, followed by Madras, Andhra, Maharashtra and West Bengal. Among the Union Territories Delhi hopped the list.

The average annual cost per capita (of population) was Rs 8·7 in 1961-62 as against Rs. 3·2 in 1950-51, representing an increase of about 172 per cent in a decade.

It is found that 4,623 foreign students were studying in Indian Univs. and Colleges on March 31, 1963. Of these, 789 were in receipt of Govt. of India scholarships.

## NATIONAL DISCIPLINE SCHEME

The National Discipline Scheme is a national reconstruction drive combining physical instructions with cultural songs and dance activities as well as training in team work and administration with emphasis on India's past glory, traditions, culture and heritage. The story of the Scheme is one of rapid growth and solid worth. It continues to make headway in the Third Five Year Plan and into the Fourth Plan under the charge of the Ministry of Education.

The National Emergency which came in the wake of the massive Chinese invasion across our northern border in the winter of 1962, added an element of urgency to the importance of the scheme. On the death of its arch-designer, Shri J. K. Bhonsle, in 1963, Major General Anant Singh Pathania, M.V.C., M.C., took over as the Director General of the scheme on 1st August 1963.

During the national emergency, the National Discipline Scheme has been transformed into an integrated scheme of National Discipline and Physical Education bringing together within its scope the advantages of conventional physical education schemes and the noble conceptions of the National Discipline Scheme.

The broad aspects of the integrated scheme are :—

(1) *Objects :* (*a*) to make the youth physically strong and resilient for the defence of the country by developing in them physical efficiency, toughness, endurance, courage, discipline and patriotic fervour ; (*b*) to develop among the students a sense of appreciation for the democratic values of life and love for their country, its past history and future destiny.

(2) *Programme :* The programme of the scheme includes the best of all the essentials of the various schemes in force for school children with due regard to the national requirements during the emergency. It consists of :—(*i*) Exercise Tables ; (*ii*) Drill and Marching ; (*iii*) Lezium ; (*iv*) Track and Field Events ; (*v*) Games and Relays ; (*vi*) Gymnastics for boys/Folk Dances for girls ; (*vii*) Simple Combats, Wrestling, Jodo, Jambia ; (*viii*) Hiking and Cross-Country ; (*ix*) Instruction and Practice in Tests ; (*x*) Field Craft (for boys)/Home Nursing (for girls); (*xi*) General Information, Practical Projects and Community Singing.

### School Curriculum

Each school has to provide five periods per class per week for all classes including the highest class for implementing the programme. The scheme has to cover all students in the age-group of 9 to 16 numbering about 1·02 crores. A teacher in full-time charge of the programme in a school is expected to handle a minimum of 250 and upto a maximum of 400 children.

The training programme has been drawn up by experts and is a synthesis of whatever is the best and practicable in Physical Education, A.C.C., National Discipline Scheme etc. In selecting the activities, care has been taken to include those which can be carried out by a majority of the schools with whatever facilities available with them. The programme does not unnecessarily emphasise the Western aspects of physical education but attempts to include our traditional activities.

The Government of India has carefully planned for the training of teachers to handle the scheme in schools. The two institutes, situated at Sariska near Alwar in Rajasthan and Barwaha near Indore in Madhya Pradesh offer a six months vigorous training schedule to a batch of about 600 instructor-trainees. The selection of the trainees is done on an all-India basis through the Regional Employment Exchanges. A matriculate satisfying the prescribed medical standards and preferably in the age-group of 18 to 25 is eligible for this training. During the period of training, a trainee receives a stipend of Rs. 85 per mensem. After successful completion of the training course, they are accredited to various schools as National Discipline Scheme Instructors. Roughly 7,000 instructors have been so far trained and through them nearly 20 lakh school children in about 4,500 schools are receiving training.

### Physical Education Teachers

The services of qualified and trained physical education teachers, serving in schools, are also being geared into this gigantic nation-building programme. A network of training centres have been planned for their reorientation in the integrated scheme. At present these centres are located at Chiki in Gujarat and Habra near Calcutta. The teachers are deputed to these centres for the three months intensive training course for which they are paid travelling allowance and a stipend of Rs. 45 per mensem each in addition to the usual pay and allowance that they get from their schools. On successful completion of training, they are employed wholetime in implemdnting the scheme syllabus on return to their schools.

Steps are also being taken to give a short-term training to National Discipline Scheme Instructors at selected physical education colleges in such aspects of the physical education activities, which are included in the integrated scheme but not covered under the training course, which they had earlier undergone.

The Government of India have allotted a total sum of Rs. 8·83 crores during the Third Five Year Plan.

The scheme is in operation in all States of the country including Union Territories, except Madras, who have not conveyed their final acceptance of the programme.

The most significant feature of the scheme and indeed its appeal and strength lies in the unique absence of compulsion in its varied activities. It is non-political in character. It is a "harmonious blend of beauty and discipline" and carefully

avoids regimentation of any kind. It is democratic in its outlook and approach and socialistic in its ideals. It teaches self-discipline and self-knowledge and by infusing self-confidence and courage equip the youth better for social and national service both in times of peace and war.

### PHYSICAL EDUCATION

An integrated programme of physical education named "National Fitness Corps" for all middle, high and higher secondary schools was launched from the academic year 1965-66 replacing the existing programmes of Physical Education, National Discipline and A.C.C. It will be a compulsory curricular activity for all students.

During 1965-66 as a first priority all high and higher secondary schools numbering over 22,000 are expected to be covered. The middle schools are expected to be covered in a phased programme during the Fourth Plan period. By the end of the Fourth Plan, the new programme is expected to achieve a full coverage of all the middle, high and higher secondary schools (one teacher per school).

The National Physical Efficiency Drive which has been launched by the Government of India to make the country fitness conscious, was organised all over the country in Nov. 1964. About 4,900 testing centres were set up all over the country with over nine lakh persons participating in the drive. At the fourth annual competition for the national awards in physical efficiency held in Feb. 1965, 11 persons won the national awards.

The Lakshmibai College of Physical Education, Gwalior which was set up by the Government of India in 1957 as a national institution is progressively extending its activities. The college, which is co-educational, offers a three year degree course and also a two year post-graduate master's degree course in physical education.

### PRIMARY EDUCATION

Primary Education in India has made considerable progress since the attainment of Independence. Under Article 45 of the Constitution, the State is required to provide free and compulsory education for all children up to the age of 14 years. In 1947, only about 35 per cent of the children in the age-group 6-11 were in schools. This percentage rose to 40 at the beginning of the First Plan; to 50 at the end of the First Plan and 61·3 at the end of the Second Plan. The Third Plan proposes to raise it still further to 80 per cent. The total enrolment in this age-group has increased from about 140 lakhs in 1947–48 to 185 lakhs in 1950–51; to 251 lakhs in 1955–56; and to 349 lakhs in 1960–61. By the end of the Third Five Year Plan, this enrolment is expected to rise by 163·07 lakhs and reach the figure of 512·07 lakhs. It is now estimated that by the end of the Third Plan the total enrolment in classes I–V would be 512·07 lakhs or 77·8 per cent of the population of the corresponding age-group. Of these, the number of girls will be 196·01 lakhs.

The increase of enrolment in the age-group 11-14 has also been equally satisfactory. In 1946-47 only 12 per cent of children in this age-group were at school. By 1950-51, this percentage increased to about 18, and it was expected to rise to about 28 by 1960-61. At the end of the Third Five Year Plan, about 107·96 lakhs of children are expected to be enrolled in classes VI-VIII and the percentage of children in the age-group 11-14 actually enrolled in schools is expected to rise nearly to 31·6 per cent.

The most important programmes about expansion relate to the raising of the minimum qualifications for primary teachers from a pass at the middle school to a pass at the secondary stage, increasing the percentage of trained teachers and raising the duration of the training course uniformly to two years; improving the remuneration of primary teachers; provision of free supply of books and writing materials to needy children; associating the local communities with the administration of Primary Education; the provision of midday meals; the conversion of primary schools to the basic pattern.

The proportion of trained teachers in primary schools has increased from 58·8 per cent in 1950–51 to 64·1 per cent in 1960–61 and 64·3 per cent in 1961–62. As against 3,16,124 trained primary school teachers in 1951, the number has gone upto 5,11,246 in 1961–62. During the Third Five Year Plan, there will be 70·2 per cent trained teachers in primary schools.

The outlay on primary education alone will be Rs. 209 crores during the Third Plan. The number of primary schools is likely to increase from about 210,000 in 1950–51 to 415,000 in 1965-66.

During the Third Five Year Plan, intensive efforts have been made, particularly in the backward States, to organise annual enrolment drives and increase the enrolment of children. Special attention will be paid to increasing the enrolment of girls and a number of programmes have been drawn up for this purpose. These include: educating public opinion to overcome traditional prejudices against the education of girls; recruitment of women teachers in increasing numbers; provision of amenities and inducements for girls to be enrolled in the schools, etc.

*Basic Education :* The objective of this scheme is to develop the entire personality of the child by imparting instruction in a correlated manner through a useful and productive craft. A good deal of progress has already been made in this sector and a fair percentage of schools has already been converted to the basic pattern. During the Third Five Year Plan, a programme of orientating all primary schools to the basic pattern has been undertaken. The problem, being gigantic, will take some time to complete.

### THREE LANGUAGES IN SCHOOLS*

The State Education Ministers' Committee reviewed in detail and noted with satisfaction the progress made in implementing the three-language formula.

According to the committee, at least three languages should be taught at the school stage, and the provision for teaching should ensure that a student passing out of the secondary school has an adequate knowledge of these languages.

The committee pointed out that in Hindi-speaking States the three-language formula should be so implemented that, progressively and as early as possible, teaching of one of the modern Indian languages also becomes compulsory in the school curricula. It further recommends that financial assistance on 100 per cent basis should be given to these States to enable them to provide for the teaching of modern Indian languages on the same lines as is being done at present for teaching of Hindi in non-Hindi States.

Under the Third Plan, the Centre bears 50 per cent of the cost of the conversion of high schools into higher secondary schools and 75 per cent of the cost for improvement of science teaching in secondary schools. In addition, there is a centrally sponsored scheme under which grants are given for strengthening of selected multi-purpose schools.

## SECONDARY EDUCATION

No. of secondary schools in 1963-64 : 22,810.

At the beginning of the Third Plan 11·7 per cent of the boys and girls in the age group of 14–17 were going to schools. This percentage is expected to increase to 17·8 at the end of the Third Plan.

No. of multi-purpose schools in 1963–64: 2,340.

No. of Higher Secondary Schools in 1963–64 : 5,511 (including 1,000 Intermediate Colleges of U.P. called Higher Secondary Schools).

Third Plan allotment for reorganization of secondary education : Rs. 88 crores.

Under the Third Five Year Plan the Centre bears 50 per cent of the cost of the conversion of high schools into higher secondary schools and 75 per cent of the cost for improvement of science teaching in secondary schools, 100 per cent for teacher training and 50 per cent for improvements in emoluments of teachers. In addition, there are centrally sponsored schemes for setting up State Bureaux of Educational and Vocational Guidance, State Education Evaluation Units, strengthening of selected multi-purpose schools and improvement of secondary education.

The accepted pattern of education comprises eight years of elementary (Basic) education; three years of secondary education with diversified courses to give it a vocational bias and make it a terminal point for entry into trade or profession; and three years of university education leading to the first degree. Some of the States have adopted a pattern of seven years of elementary (Basic) education followed by four years of secondary education.

At the secondary stage, a child in a multi-purpose school should in addition to the core curriculum which would include languages, social studies, general science and one compulsory craft, opt for one of the following diversified courses to be provided in reorganized multi-purpose schools :—humanities, science, technical, commerce, agriculture, fine arts or home science.

Except science, humanities and commerce, the groups are relatively new to secondary schools. Multi-purpose schools are schools in which these have been introduced.

#### Strengthening of Multi-purpose Schools

Multi-purpose schools have grown rapidly. The schemes to consolidate and improve their working are provided in the State sector of the Third Plan. The Ministry is helping the State Governments to develop a few selected schools to a high level of effectiveness so that they may serve as models for future plans. A scheme in this regard had been finalised and was being implemented from 1963–64.

The scheme for the conversion of high schools into multi-purpose schools was launched in 1954 along with a number of ancillary schemes, such as the training of teachers in new subjects, improvement of teaching facilities particularly in science, of school libraries, the introduction of craft in middle schools, and also other miscellaneous schemes like teachers' seminars, training of career masters, etc.

The three-language formula now generally accepted is as follows :—

(1) Regional language and mother tongue when the latter is different from the regional languages; (2) Hindi or in Hindi-speaking areas another modern Indian language; and (3) English or any other modern European language.

#### Examination Reform

The Ministry of Education (Govt. of India) formulated a comprehensive long-term programme of examination reform in 1957. This plan was unanimously accepted by the Chairmen and Secretaries of the Boards of Secondary Education and its implementation had gradually started from 1958.

The reform is directed towards improvement of examinations of the board and the school level in such a manner that they become better measures of pupil achievement and that evaluation becomes one of the vital forces in the improvement of instruction and other aspects of education. To accomplish these purposes the Central Examination Unit staffed with trained evaluation officers operates at the Directorate

* The recommendations of the Implementation Committee of Education Ministries on Three-Language Formula were forwarded to State Govts. or consideration.

of Extension Programmes for Secondary Education (National Council of Educational Research and Training), New Delhi.

During the past eight years of its existence, the Central Examination Unit has worked extensively with the State Boards of Secondary Education, the Teachers Training Colleges and the Secondary School teachers in several conferences, seminars, workshops and working groups for the purposes of orientation as well as the production of evaluation material. The Unit has sponsored and undertaken several research studies in evaluation and from time to time, provided consultative services in respect of quite a few experiments undertaken and the problems faced by different educational agencies in the country.

A fresh venue of the activity for the Unit has also been opened with the establishment of State Evaluation Units in 13 States and in one Union Territory of the country. The Unit is planning a short term training course for the officers of the State Evaluation Units. It helps them in developing their programmes by holding annually a joint conference of the officers of the State Evaluation Units and the Central Unit.

The Central Board of Secondary Education has already introduced objective type tests in its examinations from 1964 onwards.

Another significant activity of the Central Examination Unit has been with regard to the training of paper-setters in setting better question papers for the Boards of Madhya Pradesh, Maharashtra, Rajasthan, Gujarat, Mysore, Vidarbha and the Punjab University.

The Rajasthan Board started its programme of examination reform, in collaboration with the Central Examination Unit, by organising two workshops for the training of paper-setters in the subjects of elementary mathematics, general science and social studies. These workshops were followed up by two working groups in which six brochures consisting of sample papers and specimens of objective based items were compiled and published in the months of July and August, 1964 and circulated to all the secondary schools in the State. Simultaneously the Board made an announcement that it was going to introduce improved question papers in its examination of 1965. To prepare the teachers for this change, the Board organised district level workshops and covered almost all the teachers connected with these three subjects. It also conducted orientation workshops for all the teachers of general science. Administration of the improved question papers by the Rajasthan Board marks a significant step forward in the movement of examination reform in the country.

The Board of Secondary Education, Rajasthan has extended this programme to the elective subjects of physics, chemistry, biology and maths. The Board proposes to extend its programme of examination reform further by taking up the subjects of Hindi and English during 1965-66.

In addition to the improvement of external examinations, the Board is also taking action to improve the practical examinations in chemistry, physics and biology. Two try-outs have been done under the guidance of the officers from the Central Examination Unit. The results are under analysis and suitable instructions will be issued by the Board when the procedures and tools are finalised as a result of these try-outs.

The Central Examination Unit is also trying to develop satisfactory procedures for conducting oral examinations. It has already carried out three try-outs to develop the necessary procedures.

The various activities of the Unit are already reflected in its publications which among others include brochures on evaluation in different subjects, the pools of objective-based items, unit tests and sample papers, and research and studies in examinations.

### Crash Programme

A Centrally sponsored scheme known as "Crash Programme" was formulated in Sept., 1964 with the object of strengthening science laboratories, school libraries and science teaching in secondary schools. Central assistance is given at 100 per cent basis for all these programmes to the State Government through whom the scheme is being implemented.

### Educational and Vocational Guidance

The provision of diversified courses has given rise to the need for Educational & Vocational guidance in schools. Accordingly it was recommended by the Secondary Education Commission in its report (1952–53) that a Central Bureau of Educational & Vocational Guidance as well as a Bureau of Guidance in each State should be established. Bureaus now exist in all the States except Madras, Jammu and Kashmir.

The Central Bureau of Educational and Vocational Guidance was set up by the Ministry of Education, Government of India in Oct. 1954 to foster the Guidance Movement in the country and to provide leadership at the national level to help develop it along right lines. The various activities of the Central Bureau include promoting awareness of the nature of guidance services and the need for them, planning at the national level and bringing about co-ordination among the various agencies working in the field of guidance, offering professional training in the field of guidance, undertaking research, preparation of guidance tools and offering educational and occupational information. To meet the needs of the nation during the present emergency, the Central Bureau has brought out a number of publications giving detailed information about the defence services and held short term training courses for Delhi school teachers to help in the dissemination of occupational information about the defence services in the schools.

To develop the guidance movement and to give a uniform direction to the guidance services in the schools, a centrally sponsored scheme has been drawn up in the Third Five Year Plan. It aims at: (*a*) establishing State Bureaus of Educational and Vocational Guidance in the States where they have not been set up; (*b*) Strengthening existing bureaus in other States; and (*c*) Providing guidance services in 120 multi-purpose schools as a preliminary stage in extending such services in future.

The Third Plan provision for the implementation of this scheme is Rs. 30 lakhs.

In May 1962, an All-India Workshop on the Implementation of the Centrally Sponsored Scheme for guidance was held in Bangalore with a view to involving the representatives of all the State Bureaus of Guidance and some private Bureaus in co-operative thinking and planning regarding various issues related to the development of guidance.

### Science

The Secondary Education Commission made two recommendations with regard to the provision of science: 1. That every secondary school should provide general science as a core subject. 2. That elective science should be provided in as many secondary schools as possible to encourage students with a special talent in the subject to pursue further study.

To strengthen science education in schools, a Department of Science Education has been created. This Department is working in the following directions:—

(*i*) *Curricular Development*:—

Based on the syllabus of general science for elementary schools, classes I–VIII, guide-books for classes VI–VIII, indicating the activities for teachers and pupils have been prepared. Similar guide books for classes I–V, are under preparation.

(*ii*) *Text-books*:—

Three expert panels of scientists, professors and teachers have been set up to prepare mode text-books for elective sciences (Biology, Physics and Chemistry). The books were expected to be ready in 1964.

A series of text-books for classes VI–VIII based on the new draft syllabus are also under preparation.

Forty-nine Summer Institutes in elective sciences for teachers are proposed to be held during the summer of 1965-66, against sixteen Summer Institutes during the previous year.

(*iii*) *Science Clubs*:—

To provide a forum for creative activities and development of scientific attitude, 816 Science Clubs have been sponsored in the secondary schools during 1964-65, by the grant-in-aid of Rs. 1,200 each. To strengthen the activities of the science clubs by providing orientation to the teachers, both in-service and pre-service, 64 Central science clubs have been established in Teacher Training Institutions by an award of a grant of Rs. 2,000 each.

(*iv*) *Science Fairs*:—

To energise activities in the school science clubs, give recognition to the talented and to infuse competition among the young boys and girls at the school level, 90 science fairs are being organised in the Extension Service Centres/Units all over the country.

The Science Talent Search Scheme initiated as a pilot project in 1962–63 was extended all over the country from the year 1964-65. About 6,395 students of the secondary schools of the country participated in the 1965 contest for the award of 350 scholarships and 200 Certificates of Merit for higher studies in basic sciences. Out of these, 325 scholarships and 190 certificates of Merit for higher studies in basic science have been awarded.

The Central Institute of English, Hyderabad, was established by the Govt. of India as an autonomous organization, with the assistance of the Ford Foundation and the British Council in November 1958, to improve the teaching of English, specially at the secondary school stage. Besides doing research in the problems of teaching English as a second language and preparing suitable teaching materials to meet the present requirements, the Institute had been running 4-month training courses for lecturers of training colleges, university lecturers and secondary school teachers. It started from July 1962 a 9-month diploma course for training key personnel in the States.

Extension services had been provided in the 93 training colleges covering about 11,700 high and higher secondary schools.

Extension services had already been provided in 29 training institutes for primary teachers.

### Higher Secondary Pattern

Below we describe the position in regard to the reorganisation of secondary education in the various States.

Nine States and two Union Territories (Assam, Jammu & Kashmir, Madhya Pradesh, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, West Bengal, Delhi and Tripura) have already introduced the revised pattern of Secondary Education. However, Andhra Pradesh and Kerala States have decided to hold over the implementation of the higher secondary pattern of education.

With regard to the progress of reorganisation, by the end of the Second Plan 3,763 schools were of the higher secondary pattern. At the end of the Third Plan it is expected that 6,735 Secondary Schools would have been converted to the new pattern.

A new body known as the National Council of Educational Research and Training has been set up by the Government of India and it has been registered under the Societies Registration Act. Its main aims are to undertake, aid, promote and coordinate research in all branches of education and to organise both pre-service and in-service training for teachers and other educational personnel and to meet other demands of educational reconstruction. The Directorate of

Extension Programme for Secondary Education and the Bureaus of Text-book Research and Education and Vocational Guidance have been merged into it. A number of important Plan Schemes like the establishment of four regional colleges for the training of teachers of multi-purpose schools have been entrusted to it for implementation.

(A summary of the difficulties experienced by multi-purpose schools is given in the 1959-60 edition of the *Directory*).

### Text Books

All the State Governments except Gujarat have introduced the programme of nationalisation of text books upto different stages of education.

**Midday Feeding :** The States of Andhra Pradesh, Gujarat, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, U. P. and West Bengal have adopted the scheme of midday feeding of children in schools.

The Governments of Madhya Pradesh and Uttar Pradesh were expected to implement this scheme from 1965-66.

**UNESCO Aid for Technical Education :** UNESCO had approved assistance to the extent of $ 1,500,000 for the period 1965-66 for technical education and scientific research programmes in India.

**Assistance to Blind and Dumb Students :** The Government proposed to set up a training centre for the adult deaf and dumb during the Third Plan.

During 1960–61, about Rs. 1,27,000 had been distributed by way of scholarships for the blind, deaf and dumb. Over Rs. 2½ lakhs had been spent on the Training Centre for the Adult Blind at Dehra Dun and about Rs. 97,000 on the Model School for Blind Children in the same city.

## UNIVERSITY EDUCATION

(*See Late Particulars*)

## UNIVERSITY GRANTS COMMISSION

(Mathura Road, New Delhi)

The members and staff of the Commission are as given below :

*Members :* Dr. D. S. Kothari (*Chairman*), Pandit H. N. Kunzru, Dr. A. C. Joshi, B. Shiva Rao, P. N. Kirpal, D. C. Pavate, Prof. A. R. Wadia, S. R. Das, Dr. D. S. Reddi, T. P. Singh.

*Secretary*, K. L. Joshi; *Development Officer (S)*, Dr. V. S. Patankar; *Development Officer (Humanities)*, Dr. S. Bhattacharya; *Deputy Secretary*, R. K. Chhabra.

The statement given below shows the grants paid to the universities during 1963-64 :

*Central Universities :* (in Rs.) : Aligarh Muslim University, 71,65,000; Banaras Hindu University, 91,00,000; Delhi University, 1,28,74,745; Visva Bharati University, 25,00,000; Indian Institute of Science, Bangalore, 60,50,000; Indian School of International Studies, New Delhi, 4,50,086; Total : 3,81,39,831.

The grants* paid to the Universities for development schemes during 1963-64 : Rs. 6,46,00,641.

The grants paid towards Engineering and Technological education in Universities during the year 1963–64 : Rs. 1,13,89,631.

The grants paid to colleges for development during 1963–64 : Rs. 98,65,453.

The grants paid during 1963–64 for the implementation of the Three-Year Degree course scheme in Universities and their colleges : Rs. 1,44,06,164.

The grants paid to affiliated colleges for the development of Post-Graduate studies in Science subjects during 1963–64 : Rs. 21,70,620.

The grants paid to the Universities towards the revision of salary scales of college and University teachers during 1963–64 : Rs. 61,43,183.

The grants paid under Plan and Non-Plan Projects during 1963–64 : Rs. 12,58,50,286.

### Fellowships & Scholarships

*Followships :* During 1963-64, 25 senior fellowships in the humanities (including social sciences) and 26 in science subjects were awarded. Grants amounting to Rs. 2·66 lakhs were paid to the universities for these fellowships.

69 junior research fellowships were awarded in science subjects and 53 in the humanities (including social sciences) during 1963-64. Grants amounting to Rs. 4·97 lakhs were paid to the universities for junior fellowships in the humanities and Rs. 2·74 lakhs for those in science subjects.

During 1963-64, 30 research fellowships in engineering and technology, each of the value of Rs. 400 per month, were awarded. These fellowships also carry a grant of Rs. 1,000 per annum each for expenditure on contingencies relating to the research undertaken. The total grants paid to universities during the year for these fellowships was Rs. 1·88 lakhs. With effect from 1964-65, the research fellows in engineering and technology may be paid a further sum of Rs. 1,000 per annum each for the publication of their research work and for meeting the necessary expenditure on field work.

*Scholarships :* 250 scholarships each of the value of Rs. 200 per month are provided every year for promoting advanced study and research in humanities and science subjects. A sum of Rs. 7·68 lakhs was spent for this purpose during 1963-64.

### Three Year Degree Course

For implementing the three year degree course scheme, an expenditure of Rs. 23·41 crores in 36 universities had been approved, the Commission's share being Rs. 11·91 crores upto 1963-64.

### Revision of Salary Scales

The Commission's assistance is available to universities for the introduction of the following scales of pay for their teaching staff : Professors Rs. 1,000–50–1,500; Readers Rs. 700–40–1,100; Lecturers Rs. 400–30–640–800; Instructors Rs. 300–25–350.

The Commission shares 80 per cent of the additional expenditure required for the introduction of these pay scales provided the universities or State Governments concerned pay the balance and give an assurance that the revised scales of pay will be maintained after the Commission's assistance ceases. Assistance to central universities is provided on a cent per cent basis.

About 4,000 university teachers in 39 universities have received the benefit of the enhanced scales of pay so far during the Third Plan period.

In order to improve the salaries of teachers in affiliated colleges, the Commission decided to provide assistance to the colleges for introducing the following scales of pay during the Second Plan period : Principals Rs. 600–40–800; Heads of Departments Rs. 400–25–700; Senior Lecturers Rs. 300–25–600; Lecturers Rs. 200–15–320–25–500; Demonstrators/Tutors Rs. 150–10–200.

So far about 14,000 teachers working in 461 colleges affiliated to 23 colleges have received the benefit of the above mentioned scales of pay.

The question of improving the salary scales available to college teachers was examined by the committee dealing with collegiate education. The need for a further revision of these pay scales was reiterated. The following scales of pay were recommended : Principals Rs. 700–40–1,100; Heads of Departments/Senior Lecturers Rs. 500–30–800; Lecturers Rs. 300–20–600.

### Examination Reform

The Commission provided assistance to the universities of Aligarh, Baroda and Gauhati for setting up examination reform units. A report on the investigations undertaken by the Aligarh Muslim University is under preparation. The examination reform unit of the Gauhati University started functioning with effect from June 1, 1963. A brochure entitled *Three Studies in Examination Techniques* by Dr. H. J. Taylor, Ex-Vice-Chancellor, Gauhati University, has been published.

### Agricultural Education

Six agricultural universities, constituted by Acts of State Legislatures, are at present functioning in the country. They are : U. P. Agricultural University, Pantnagar; Panjab Agricultural University, Ludhiana; Udaipur University, Udaipur†; Orissa University of Agriculture and Technology, Bhubaneswar; Andhra Pradesh Agricultural University, Rajendranagar, Hyderabad; University of Agricultural Science, Hebbal, Bangalore.

In 1963-64, 48 agricultural colleges were functioning in the country. Facilities for education in agriculture at the degree level were also available in 18 multi-faculty colleges.

An amount of Rs. 17 crores has been made available to the Central Ministry and State Departments of Agriculture in the Third Plan for education in agriculture and veterinary science at the university level.

### Measures for the Promotion of General Education

General education necessitates a reorientation and modernisation of the existing undergraduate studies in order to raise academic standards and enable students to have a better understanding of problems relating to present day life and environment.

The Standing Advisory Committee constituted earlier by the Commission continued to advise and assist the Universities in the implementation of their general education programme.

*Health Centres :* Grants are being given to universities for establishing health centres to provide facilities for medical examination and treatment of simple ailments. During 1963-64 grants amounting to Rs. 1·78 lakhs were paid to the universities on this account.

### Medium of Instruction

The University Grants Commission has suggested that the change from English to an Indian language should not be hastened and that it should be preceded by adequate preparatory measures. The Commission has further appointed a working group of educationists representing all the Indian languages to study further the question of medium of instruction in the universities and to draw up a plan of action for the change-over from English to an Indian language with primary regard to the effectiveness of teaching and learning and consistent with the maintenance of high standards in English which should continue as a common second language even after the change is made.

### U.G.C. REPORT 1963-64

During 1963-64, the total number of universities that were functioning in the country was 61. The new universities that have recently come into existence are Andhra Pradesh Agricultural University, Rajendranagar, Hyderabad; University of Bangalore; Indore University; Jiwaji University, Gwalior; Ravi Shankar University, Raipur; University of Agricultural Sciences, Hebbal, Bangalore. The total enrolment in the universities and colleges including Intermediate Boards was 13·85 lakhs as against 12·73 lakhs during 1962-63. In 1963-64, the number of affiliated and university colleges in the country was 2,111 as against 1,938 in 1962-63 (These figures do not include Intermediate colleges under the Board of Intermediate Education, U.P.). During 1963-64, 135 new arts, science and commerce colleges were established and the number of women's colleges rose from 235 in 1962-63 to 254 in 1963-64. There were 270 colleges affiliated to various universities which provided facilities for post-graduate courses in arts, science, commerce, education and law in 1963-64.

Upto 1963-64, the Commission approved an expenditure of Rs. 23·41 crores for the implementation of the three-year degree course scheme in 36 universities and 723 colleges. The Commission's share of this expenditure was estimated to be Rs. 11·91 crores.

* Exclusive of grants paid for Engineering and Technological education, revision of scales and introduction of three-year degree course.

† This has since become a multi-faculty university.

The total grants paid during 1963-64 for higher scientific education and research amounted to Rs. 1·53 crores. For the Third Plan period Rs. 8·47 crores were allocated for the development of teaching and research in humanities and social sciences.

An amount of Rs. 7·95 crores was allocated to the universities and institutions deemed to be universities for the Third Plan period for general schemes such as hostels, staff quarters, guest houses, non-resident students centres, hobby workshops, health centres and printing presses.

### Engineering and Technological Education

Against a provision of Rs. 6·50 crores for the Third Plan made for the development of engineering and technological education in the universities and the institutions maintained by them, the Commission has so far sanctioned development grants amounting to Rs. 3·29 crores. In addition to the grants mentioned above, there was a spill-over of about Rs. 3·35 crores in respect of the schemes approved during the Second Plan but carried over to the next Plan period. Thus the total commitment amounts to Rs. 6·63 crores.

During 1963-64, there were 118 institutions in the country conducting courses in engineering and technology for the first degree.

During 1963-64, the Commission awarded 378 junior fellowships, each of the value of Rs. 250 per month, to students of various post-graduate courses in engineering and technology. An amount of Rs. 6·62 lakhs was paid on this account. 30 fellowships, each of the value of Rs. 400 per month, were awarded during 1963-64 for advanced study and research in engineering and technology beyond the post-graduate degree.

### Centenary Grants to Colleges

The U.G.C. has been making a special grant of Rs. one lakh to every college on its attaining the age of hundred years of its history.

Centenary grants have so far been sanctioned to 53 colleges for various projects such as the construction of college buildings, hostels, staff quarters, libraries, laboratories, auditoria and sports pavilions.

During 1963-64, the proposals of Lucknow Christian College and the Government Law College, Bombay, for the admissible grants were approved. A sum of Rs. 1·91 lakhs was paid under the scheme to the colleges concerned. Payments are regulated in accordance with the progress made in the implementation of the approved projects.

## RURAL HIGHER EDUCATION

On the recommendation of the Rural Higher Education Committee, a National Council for Rural Higher Education was established in 1956 to advise Govt. on all matters relating to the development of rural higher education.

Under the scheme, 14 Rural Institutes are at present functioning in different parts of the country. These are Gandhi Gram Rural Institute, Madurai; Ramakrishna Mission Vidyalaya Rural Institute, Coimbatore; Lok Bharati Rural Institute, Sanosara; Rural Institute, Amravati; Karmaveer Hire Rural Institute, Gargoti; Vidya Bhavan Rural Institute, Udaipur; Balwant Vidyapeeth Rural Institute, Bichpuri, Agra; Rural Institute, Jamia Millia, New Delhi, Institute of Rural Higher Education, Sriniketan, West Bengal; Rural Institute of Higher Studies, Birouli, Bihar; Kasturba Rural Institute, Rajpura, Punjab; Rural Institute, Wardha and the Rural Institute at Hanumanamatti, Mysore State and Rural Institute, Thavanoor.

The courses, as approved by the Council and adopted by the Rural Institutes, are:

(*i*) a three-year Diploma Course in Rural Services; (*ii*) a three-year Diploma Course in Civil and Rural Engineering; (*iii*) a two-year Certificate Course in Agricultural Science; (*iv*) a one-year Sanitary Inspectors' Course; (*v*) a two-year Post-Diploma Course in Rural Sociology and Community Development; (*vi*) a two-year Post-Diploma Course in Rural Economics and Cooperation; (*vii*) a three-year Diploma Course in Rural Services (Education), and (*viii*) a one-year Preparatory Course to initiate matriculates into the three-year Diploma Course in Rural Services: (*ix*) a one-year Advanced course for Health Inspectors.

The Post-Graduate Diploma in Rural Economics and Cooperation has been recognised by the Government of India povisionally for two years as equivalent to M.A. degree of a recognised university for purposes of appointment under the Central and State Governments. The Post Graduate Diploma in Rural Sociology and Community Development has also been privisionally recognised by the Government of India for two years as equivalent to M.A. degree for purposes of appointments under the Central and State Governments.

(*ii*) The Diploma in Rural Services has been recognised by the Central and most of the State Governments as being equivalent to the first degree of a recognised university for purposes of employment under them. Many Indian Universities have also recognised this Diploma for admission to certain post-graduate courses.

(*iii*) The Diploma in Civil and Rural Engineering has been recognised by the Central and most of the State Governments, for purposes of employment under them. The Diploma has also been recognised for admission to part-time degree courses in Engineering at the Jadavpur University and the Delhi Polytechnic.

(*iv*) The Certificate in Agricultural Science and the Sanitary Inspectors Certificate have been recognised by most of the State Governments for purposes of employment under them.

(*v*) The Diploma in Rural Services (Education) has been recognised by the State Government of Maharashtra as equivalent to B.T. degree for purposes of employment under the State Government.

## TECHNICAL EDUCATION

The All-India Council for Technical Education was set up by the Government of India in November 1945 to advise them on all matters relating to the co-ordination and development of technical education in the country after the high school stage. Its personnel have been drawn from Government of India Departments, State Governments, Parliament, industry and commerce, professional and educational bodies.

Five Higher Technological Institutions of national importance, one in each region, at Kharagpur, Bombay, Madras, New Delhi and Kanpur have been set up. Besides these higher technological institutions, fourteen large-sized regional engineering colleges, a number of other engineering colleges, technological institutions and polytechnics have been set up. For specialised courses such as Mining, Engineering and Metallurgy, a number of centres have been established both for degree and diploma courses. For Printing Technology, four regional schools one each at Madras, Calcutta, Allahabad and Bombay have been established. New faculties have been added in institutions whose activities were previously restricted. For instance, Tele-communication Engineering, Chemical Engineering, Architecture, Textile Technology, Petroleum Technology, Production Technology, Geophysics are some of the subjects in which several institutions are today offering courses. Besides the establishment of new institutions and new courses, the old institution have also been expanded and developed. In 1947 there were only 38 institutions for degree courses in engineering and technology and 53 institutions for diploma courses with an admission capacity of 2,940 and 3,670 respectively. By the end of the Second Plan period *viz.* by 1960-61, the number of institutions for degree and diploma courses rose to 102 and 195 with an admission capacity of 13,824 and 26,501 respectively and by 1964-65 the number of institutions has risen to 131 and 264 with an admission capacity of 23,757 and 46,243 respectively. Thus since 1947 admissions to degree courses have increased nearly eight-fold and admissions to diploma courses more than twelve-fold. Prior to 1947, facilities for post-graduate courses were practically non-existent. Today a large number of Centres have been developed and more than 1,500 places have been made available for advanced training for post-graduate courses and research. Thought has also been given to technical training at secondary stage and facilities for technical education at this level have been created by establishing junior technical schools, a special type of schools, designed specially for those who wish to enter industry and other technical occupations. Eighty-six Junior Technical Schools have been established by the academic year 1964-65.

### All India Council

The Council represents all the interests which are concerned with the technical education. It consists of representatives of all State Governments, Ministries of the Central Government, Parliament, Industry, Commerce, Labour, Professional and learned societies, Universities, Technical Institutions and various other concerned interests. Its functioning, *inter-alia*, includes the preparation of plans for the development of technical man-power of different types and suggesting measures to meet them, suggesting improvement in the pattern of technical education from time to time to suit changing conditions, establishing liaison between industry, Government departments and other organisations on the one hand and technical institutions on the other, coordinating the activities of States, recommending grants and other forms of assistance that might be given by the Centre to the State Government institutions, University institutions and other organisations for development of technical education. For the proper discharge of its functions, the Council has set up a Coordinating Committee, four Regional Committees and seven Boards of Technical Studies. The regional committees assist the Council in promoting a coordinated development of technical education in the regions. The coordinating committee is the Executive of the Council and coordinates work of the regional committees and the boards of studies.

### Courses

Technical Education in India is a four-tiered structure comprising post-graduate courses and research; first degree courses; diploma courses; and Vocational or Industrial training. Each tier is a self-contained aspect intended to serve a specific purpose.

A scheme has also been formulated for a two-year diploma course for training technicians, with higher secondary as the admission qualification. The scheme aims at giving specialised training in particular fields of engineering directly related to the functions of a diploma holder in Industry. It is proposed to introduce the scheme in about 30 selected engineering colleges each with an annual capacity of 90 students.

Another scheme has been formulated for part-time diploma courses in engineering for persons working in the Industry. To begin with, 25 centres with about 2,500 annual admissions will be organised at existing polytechnics. Out of 25 centres approved for the purpose, 16 centres have already started functioning.

*Higher Institutes of Technology*: Five Higher Technological Institutes have been established one in each region, at Kharagpur, Bombay, Madras, Kanpur and Delhi. The institutes have started functioning since 1951, 1958, 1959, 1960 and 1961 respectively. The ultimate student enrolment at the Kharagpur institute is 2,500 (2,000 under-graduates and 500 post-graduate and research workers). In the case of other institutes, the target is 1,600 under-graduates and 400 at the post-graduate and research level. These institutions have been declared as institutions of national importance by an Act of Parliament. A high-powered council under the chairmanship of Minister of Scientific Research and Cultural Affairs as provided under the Act, has been set up to

coordinate the activities of these Higher Technological Institutions. The concept behind the establishment of these institutions is that for the training of the highest possible grades of technologists who are required in large numbers, national institutes provided with all necessary resources and full freedom to adapt themselves to the fast changing situations are necessary. In addition to the training of technical personnel, the institutions should be the fountain-heads of scientific and technical knowledge and should contribute through research and other activities to the industrial achievement of the country.

The admission to these institutes at the undergraduate level are made on the basis of a common entrance examination conducted at several centres in the country and one centre at London.

*Indian Institute of Science, Bangalore :* An important centre of post-graduate studies in Engineering is the Indian Institute of Science, Bangalore, established in 1911. In the last 15 years, the institute has become a centre of advanced technology with particular reference to Power Engineering, Aeronautical Engineering, Metallurgy, Internal Combustion Engineering and Electrical Communication Engineering.

*School of Planning and Architecture, Delhi :* The School offers graduate courses in Architecture for the Bachelor's degree course of the university of Delhi and the National Diploma course of the All India Council for Technical Education. Besides, post-graduate courses in Town and Country Planning — both part-time and full-time and in Housing (full-time) are run by the School.

*All India Institute of Management, Calcutta and Ahmedabad :* The institutes were established by the Central Government in 1962-63 in collaboration with the State Governments, local industrialists and Ford Foundation. They conduct post-graduate courses and research in management and related fields. The institutes also do consultancy work in response to requests from Government departments and private enterprises.

*Administrative Staff College, Hyderabad :* Established in 1957 as a joint enterprise of the Central Government and private industry and commerce, this institute offers a 12-week course to young administrators from all walks of national life in the principles and techniques of organisation, administration and leadership in civil life.

*Central School of Printing, Kalyani :* To meet the demands for trained technical personnel at the higher executive levels for efficient and economic management of the presses particularly those engaged in quality printing, the Central Government will establish during the Fourth Plan a Central School of Printing at Kalyani near Calcutta. Apart from preparing students to degree level, the School will also provide research facilities and prepare students to play an effective role in the ever expanding areas of graphic arts, photography, printing and packaging.

*National Institute for Training in Industrial Engineering, Bombay :* Established in 1964 with the U.N. Special Assistance Fund, the institute is intended to train suitably qualified persons in industrial engineering and to conduct research in industrial engineering methods and techniques.

*National Institute of Foundry, Forge Technology, Ranchi :* With a view to providing training facilities in foundry engineering and forging, the Central Government have approved the establishment of the institute in 1965-66. It will also conduct short-term refresher courses in the latest methods and techniques of production, design and development for persons working in the industry.

### Finance

In the First Plan period, the Centre provided about Rs. 16·33 crores for technical education and for the Second Plan, Rs. 40 crores. Exact figures of expenditure incurred by private societies are not readily available but it is estimated that this sector has contributed on an average about Rs. 5 crores per year in the last three to four years.

In the Third Plan a much larger outlay has been made. An amount of Rs. 140·35 crores is proposed to be spent on the expansion of technical education — Rs. 69·44 crores by the Central Government and Rs. 70·91 crores by the States.

*Foreign Aid :* The extent of foreign aid received for technical education during 1963 is as below :

(*i*) Number of foreign experts—16: (*ii*) Equipment—Rs. 0·44 million; (*iii*) Number of Fellowships for the training abroad—17.

### Third Plan Programmes

The Third Plan envisages provision of 25,000 admission to first degree courses and 50,000 admission to diploma courses in engineering and technology by 1965-66. To achieve these targets, plans have been formulated to develop fully higher technological institutions, certain other institutions and establishment of 23 new engineering colleges and 94 new polytechnics. Out of these, 18 engineering colleges and 68 polytechnics have been started in the first four years. Intake capacity of certain existing institutions has also been increased. It is proposed to reach the remaining physical targets by expansion of existing institutions and establishment of new institutions provided for in the Third Plan.

A provision for the establishment of 117 junior technical schools and 24 technical institutions for girls has also been made in the Third Plan out of which 48 junior technical schools and 17 technical institutions for girls have been started in the first four years of the Plan-period.

### Fourth Plan Programme

The A.I.C.T.E. has approved the draft outline of the Fourth Plan for technical education. The draft provides for a target of about 35,000 admissions at the degree level and 72.000 admissions at the diploma level in the various engineering and technological courses. To achieve these targets, it is proposed that the existing institutions be expanded to the maximum possible extent and correspondence courses be introduced.

The Plan also envisages to provide post-graduate and research training facilities for 20 per cent of the output of graduates in engineering.

The Council has approved in principle, the establishment of institute for training in foremanship and supervision in collaboration with industry.

The Council has recommended that for the needs of automobile industry, special courses at the diploma level in automobile engineering should be provided at various centres on full-time as well as sandwich pattern basis.

The Council has also recommended that the institutions charging fees at high rate should bring down their fees so that no institution in the country realises a fee more than Rs. 400 for degree courses and Rs. 220 for diploma courses per year from the students.

*Practical Training Stipends Scheme :* Under this scheme, senior stipends of the value of Rs. 150 per month are given to degree holders and junior stipends of the value of Rs. 100 per month are given to diploma holders. The duration of the training is one to two years.

*Merit-cum-Means Scholarships Scheme :* Under the scheme, 1,969 scholarships were instituted during the Second Five Year Plan. Under the Third Plan, 9,305 scholarships for fresh entrants for degree and diploma courses have been instituted during the first four years of the Third Plan. Each scholarship is tenable for the full course of studies of the students concerned (provided the progress is satisfactory), and is of the value of Rs. 75 per month for degree students and Rs. 50 per month for diploma students. In addition, the scholarship holders are either exempted from the tuition fees by their own institutions or have their scholarship increased by an equal amount.

*Technical Teachers Training Programme :* Under the scheme, fellowships of the value of Rs. 400 per month are awarded to young graduates on the at least 60 per cent marks in the qualifying examination in the appropriate branch of engineering, metallurgy or architecture. The training period lasts for two to three years. On the completion of training, they are posted as lecturers in the technical institutions.

*Mine Surveyor's Examination :* The examinations for the Mine Surveyor's and the Second class Manager's Certificate of Competency are held twice a year.

The State Governments have been advised to create facilities for part-time education of mine workers to prepare them for " Shortfirers " and " Sirdors " examination.

The Government of India have under consideration a scheme for vocational training of all mine workers. It has been decided to set up a National Mine Safety Council *inter alia* to arrange for refresher courses for members of supervisory staff.

Below is shown the progress made in this field—the number of institutions in existence; the intake of students and the outturn of students :

| | | 1947 | 1951 | 1956 | 1961 | 1964 |
|---|---|---|---|---|---|---|
| Institutions | Degree .. .. | 38 | 53 | 71 | 111 | 131 |
| | Diploma .. .. | 53 | 89 | 109 | 209 | 264 |
| Intake | Degree .. .. | 2,940 | 4,788 | 6,612 | 15,850 | 23,757 |
| | Diploma .. .. | 3,670 | 6,216 | 10,318 | 27,701 | 46,243 |
| Outturn | Degree .. .. | 1,270 | 2,693 | 4,337 | 7,026 | 9,456 |
| | Diploma . | 1,440 | 2,626 | 4,103 | 10,349 | 15,202 |

The increase in the seating capacity sanctioned by Western region technical institutes for degree and diploma courses for the year 1963-64 respectively were : Maharashtra 248, 740 ; Gujarat 240, 420 and Madhya Pradesh 245, 300.

### Medical Colleges

The Union Health Ministry have sanctioned Rs. 15,000 for non-recurring expenditure and Rs. 2,000 a year for recurring expenditure for each admission beyond the present quota of 7,000. The money provided under the scheme will be over and above the State Plan ceiling. With this extra financial assistance the existing 71 medical colleges were expected to be able to admit 3,000 more students for the academic year 1963-64.

### Residential Schools for Children of Defence Personnel

A scheme for opening a chain of residential schools for the children of Defence personnel and other Government officials had been formulated. The schools under this scheme would offer instruction in Hindi and English, follow a common syllabus and prepare pupils for the examinations of the Central Board of Secondary Education.

The cost of tuition and board for a resident student would not exceed Rs. 75 p.m. Hotel charges of Central Government employees of low income groups would also be subsidized on a sliding basis.

### Central Schools

The Central Schools Scheme has been implemented by the Government of India in pursuance of the recommendation of the Second Pay Commission to provide educational facilities to the children of transferable Central Government employees. Under this scheme, 100 higher secondary schools are to be established, with a common syllabus, with a common medium of instruction Hindi/English and preparing students for a common examination *viz.* the all-India

higher secondary examination of the Central Board of Secondary Education, New Delhi. These schools are being developed as quality schools, at a moderate cost to the parent. The children of the following categories of personnel liable to transfer are eligible for admission in the following order of priority : Central Government employees including Defence personnel; All-India Services; employees of autonomous and semi-autonomous bodies fully financed by the Central Government; floating and local population.

The scheme was started in 1963-64. 54 schools were functioning during 1964-65 with an enrolment of 25,200 children. At the beginning of the school year 1965-66, the number of schools has increased to 86.

These schools fall under two categories, *viz.*, (1) schools established in regimental centres, on the recommendation of the Ministry of Defence, to serve concentrations of Defence personnel: (2) schools established at important concentrations of other Central Government employees, in State capitals and other towns, on the recommendations of the State Governments, either by taking over existing schools or by starting new schools.

The entire expenditure on the schools is borne by the Ministry of Education, through grants. Each school is administered by a local school management committee, composed of highly placed and responsible persons, including educationists, with the chairman being either the Station Commander of a service formation or a very senior State Government Officer or a distinguished educationist. It is envisaged that as soon as the schools are established, a Central Schools Society (a registered body) will be formed to run the schools.

No tuition fee is charged in classes I to VIII. Tuition fee at the rate of Rs. 6, Rs. 7 and Rs. 8 per month is charged in classes IX, X and XI respectively.

Scheduled Caste/Tribe students are exempted from payment of tuition fee. Children of JCOs, ORs and equivalent ranks are exempted from payment of tuition fees during the Emergency. A Pupils' Fund fee at the rate of Re. one per month in classes I to V and Rs. two per month in classes VI to IX is also permitted to be collected in the school. As soon as possible, residential accommodation will be provided to a part of the students, with subsidised boarding facilities for low-income Central Government employees. A wide range of elective subjects in humanities and science is provided for in the higher secondary classes.

The schools are located at the following places : *Andhra Pradesh :* Secunderabad (2 schools), Tirupathi; *Bihar :* Dinapore Cantt., Patna ; *Gujarat :* Ahmedabad, Baroda (2 schools), Jamnagar, Rajkot, Surat ; *Kerala :* Cochin, Ernakulam, Kozhikode, Trivandrum ; *Madhya Pradesh :* Amla, Bhopal, Gwalior, Indore, Pachmarhi, Saugor ; *Madras :* Avadi, Madras (2 schools), Tambaram ; *Maharashtra :* Ahmednagar, Ambarnath, Bombay (3 schools), Dehu Road, Deolali, Khadakvasla, Kirkee, Lonavala, Nagpur, Nasik Road Camp, Poona, Pulgaon Camp ; *Mysore :* Hubli, Bangalore (5 schools) ; *Orissa :* Puri, Sambalpur ; *Punjab :* Adampur, Ambala (2 schools), Ferozepur, Halwara, Jullundur, Simla ; *Rajasthan :* Alwar, Bikaner, Jaipur, Jodhpur, Kotah ; Udaipur ; *Uttar Pradesh :* Agra (2 schools), Babina Cantt., Bareilly (2 schools), Dehra Dun (2 schools), Fatehgarh, Jhansi, Kanpur (2 schools), Lansdowne, Lucknow, Manauri, Mathura, Meerut (3 schools), Ranikhet, Roorkee (2 schools), Varanasi ; *West Bengal :* Barrackpore ; *Delhi :* Delhi Cantt., New Delhi : *Manipur :* Imphal.

## FOREIGN ASSISTANCE

Statement of foreign assistance in the form of services of foreign experts at Indian Institutions, training facilities for Indian trainees abroad and equipment obtained under various foreign aid programme till Dec. 1961.

| Programme | Foreign Experts | Fellowships abroad | Equipment (Rs. in lakhs) |
|---|---|---|---|
| T.C.M. (U.S.A.) .. .. .. .. .. .. | 69 | 291 | 48·57 |
| Colombo Plan .. .. .. .. .. .. | 18 | 34 | 12·75 |
| UNESCO/UNTAA .. .. .. .. .. | 68 | 43 | 103·70* |
| Indo-French .. .. .. .. .. .. | 2 | 2 | (*a*) |
| Indo-West Germany .. .. .. .. .. | 8 | 15 | 35·47 |
| Indo–U.S.S.R. .. .. .. .. .. .. | 7 | — | 4·80 |
| Total .. .. .. | 172 | 385 | 205·29 |

* Does not include the Survey Team of 7 T.C.M. experts which visited India in Nov. 1961 in connection with the project for establishment of the Indian Institute of Technology, Kanpur.

(*a*) Includes assistance obtained by the Indian Institute of Technology, Bombay.

About 40 million (Canadian) dollars from the Counterpart Fund of the Colombo Plan could be utilised by India for its educational advancement.

Canada had already contributed 10 million dollars for the setting up of Engineering Colleges in India under the Colombo Plan.

### Central Training Institute

The Prime Minister inaugurated the Central Training Institute of the Directorate General of Employment and Training, Ministry of Labour and Employment, at Bombay on March 20, 1963.

Technical assistance will be made available to the Institute through a cooperative programme between the United States Agency for International Development and the Government of India.

The U.S.A.I.D. will contribute advisory staff, machinery, equipment and books. Its planned expenditure on this assistance programme will be about 1,000,000 dollars in foreign exchange. The complementary investment by the Government of India will be about Rs. 120·40 lakhs.

This Training Institute will be one of the most modern craft-instructor training institutes in the country. Its workshops have been equipped with up to date machines. Latest techniques in teaching will be employed at the Institute, including audio-visual aids such as films, film-strips, tape recordings, charts and models of all kinds.

The Institute will enroll about 250 trainees annually. The main objectives of the Institute will be to provide instruction in various trades and in the art of teaching these trades ; to train the instructors required for the craft-training institutions ; and to provide refresher courses to enable trade-instructors to keep abreast of the latest industrial techniques and advances in teaching their respective trades.

Training will be offered in 15 trades and the duration of the course in each trade will be 9 months. The Institute will operate all the year round.

## LOAN SCHOLARSHIPS

Besides giving financial assistance to needy and meritorious students for completing their education, this scheme will encourage students to enter the teaching profession.

The loan will be written off at the rate of ten per cent every year, if the holder of a loan-scholarship takes to teaching at the end of his studies.

A meritorious student whose parent's income does not exceed Rs. 500 per month will be eligible for a loan-scholarship. The maximum limit of loans will vary from Rs. 720 to Rs. 1,500 per annum, according to the course of study and it will be raised by Rs. 250 in the case of students of engineering and other similar technical and professional courses. Candidates in full time employment are not eligible.

*Scope :* The loan scholarships are available for studies in India only. These will be given for all recognised full time courses of education and training after the Matriculation or School Leaving Stage on the basis of the results of any examination conducted by a Board of Education or a University or a recognised Education Authority. These scholarships are open to nationals of India only.

The total number of loan scholarships for the remaining three years of the Third Five Year Plan is 66,900. Its tentative break-up is as follows : Under-Graduate stage : 60,000 ; Post-Graduate stage : 6,600 ; Post M.A., M.Sc., stage : 300. The Scheme will cost Rs. nine crores.

**Repayment Date :** The repayment of a loan will be by monthly instalments commencing one year after the loanee secures employment. No interest will be payable on the loans so long as the monthly instalments are paid on the due dates. Interests will be chargeable for default.

The loan will be given without any security or surety, except in the case of minors. Each recipient will be issued a loan scholarship book wherein all amounts given to him and repaid by him will be entered.

The Union Ministry of Education will advance funds to the State Governments for paying loans on the basis of total enrolment at the different stages of education.

The procedure for applying for loans will be simplified so that a selected candidate is enabled to claim loan-scholarship immediately on joining an institution, as full-time student.

## FOREIGN-TRAINED TECHNICIANS

Among the scientific and technical persons who have been abroad after Jan. 1, 1957 for higher studies, training or employment 9,916 were registered in the Indians Abroad Section of the National Register by Dec. 31, 1964. Of these 4,688 had already reported their return.

The position in each field is briefly indicated below :

Registration and return of Indians Abroad as on Dec. 31, 1964 :

| | *Returned* | *Abroad* |
|---|---|---|
| Scientists .. .. | 1,433 | 1,573 |
| Engineers .. .. | 2,068 | 2,467 |
| Technologists .. .. | 418 | 382 |
| Medical Personnel .. | 769 | 806 |
| Total .. .. | 4,688 | 5,228 |

The broad distribution of the registrants abroad as on December 1, 1964 by country and category is shown below :

| Country | Science | Engg. | Technology | Medicine | Total |
|---|---|---|---|---|---|
| U.S.A. .. .. .. | 1,626 | 1,342 | 228 | 300 | 3,496 |
| Canada .. .. .. | 300 | 118 | 21 | 71 | 510 |
| U.K. .. .. .. | 515 | 1,727 | 279 | 1,099 | 3,620 |
| Germany .. .. .. | 172 | 823 | 150 | 23 | 1,168 |
| Other European countries | 168 | 282 | 57 | 32 | 539 |
| Australia & New Zealand.. | 44 | 32 | 22 | 7 | 105 |
| African countries .. .. | 60 | 45 | 12 | 17 | 134 |
| Burma & Ceylon .. .. | 30 | 52 | 10 | 15 | 107 |
| Other countries .. .. | 91 | 114 | 21 | 11 | 237 |
| Total .. .. .. | 3,006 | 4,535 | 800 | 1,575 | 9,916 |

In addition, 530 persons in the field of Business Administration and Accountancy and 11 persons in various Social Sciences have been registered by Dec. 31, 1964 who have been abroad for studies or training.

## SOCIAL EDUCATION

The new concept of social education is embodied in a five point programme; literacy, education in health and hygiene, training for trade, profession or calling, citizenship, and healthy recreation.

It is also directed to arouse interest in the development plans in Community Project areas and to provide leadership.

The programme of Social Education is put through literacy classes, Community Centres, Youth Clubs, including Gram Raksha Dal, Farmers' Clubs and Mahila Samities and libraries which are an essential agency of mass education.

The number of State, Central and District Libraries has steadily increased. In December 1959 there were 13 State Central and 180 District Libraries in the country.

Radio listening and Discussion Groups, demonstrations and excursions have been effectively used. Besides radio, visual aids and printed literature have served as means of imparting education to the masses.

The Ministry of Community Development, Panchayat Raj and Co-operation conducts a number of Social Education Organisers Training Centres under their scheme. The National Fundamental Education Centre, which is now a part of the National Institute of Educational Research and Training of the Ministry of Education, trains District Social Education Organizers. The Centre also conducts research and evaluation of social education programmes. So far (July 1965), 133 District Social Education Officers, 125 Adult Literacy Instructors of Indo-Tibetan Border Force under the Ministry of Home Affairs and 15 Educational Officers of the Central Board for Workers' Education under the Ministry of Labour and Employment have been trained at the Centre.

To encourage production of suitable literature for neo-literates and the new reading public, the Ministry has organized a number of schemes, including the award of prizes to authors, and the bulk purchase of good books and holding of Sahitya Shivirs (literary workshops) in different parts of the country.

The Ministry has also a programme of publishing literature for social education workers and neo-literates. Two volumes of an encyclopaedia for neo-literates called the "Gyan Sarovar" have been published. All the twelve volumes of Hindi Vishwa Bharati have been published. Twelve model books for neo-literates in Hindi are being brought out with the assistance of Indian publishers.

The Workers' Social Education Institute established at Indore in 1960 as a pilot project of social education for industrial workers continues to function.

The Central Government assists Voluntary Educational Organisations for development of their activities in the field of Social Education. The scheme which was started in the 1st Five Year Plan has been continued during the Second and Third Five Year Plans. During Second Five Year Plan grants to the tune of Rs. 25·03 lakhs were sanctioned to 50 institutions. A provision of Rs. 26 lakhs has been made for the Third Five Year Plan period including Mysore Vidyapeeth Programme assisted by the Ford Foundation. Out of this, 55 institutions have been assisted so far (June 1965) to the extent of Rs. 13 lakhs.

The Third Five Year Plan provides for the development of the Delhi Public Library and for the opening of branches for the use of residents in certain localities. Upto March 1965, four Branch Libraries and seven Community Libraries have been opened. Two mobile vans have also been added raising the total to four.

## VIJNAN MANDIRS

The Vijnan Mandir scheme was launched in 1953 by the Council of Scientific and Industrial Research, Ministry of Scientific Research and Cultural Affairs*, to make the rural people science conscious and to make them familiar with the scientific principles involved in the day-to-day problems arising in agriculture and village sanitation.

Upto the end of 1964, 50 Vijnan Mandirs were set up.

A Vijnan Mandir consists of a scientific wing, a library and a museum.

The scientific wing has a laboratory for analysis of soil, water and food and gives demonstrations about common insects and pests, health and hygiene, common diseases and general scientific principles. There are period lectures by teachers of science. A science club is generally attached to the science wing for purposes of discussion and information. There are in addition working models of steam engine, aeroplane, telephone and so on, which are probably made in the Mandir itself.

The library contains books on science in simple language.

The Museum displays specimens regarding the structure of the human body, the local flora, fauna, minerals, shells, corals, archæological relics as also improved models of utensils, ploughs, domestic implements etc.

To foster interest competitions are organized—such as essay writing, modelling, etc., and prizes are awarded.

In pursuance of the recommendations of the Assessment Committee on Vijnan Mandirs, the administrative control of the Vijnan Mandirs has been transferred to the State Governments/Union Territories with effect from 1st April 1963 (1st June 1963 in the case of Vijnan Mandirs in Madhya Pradesh).

Below we give a State-wise list of Vijnan Mandirs :

*Andhra Pradesh :* Amadalavalasa (Distt. Srikakulam); Kapileswarapuram (Distt. East Godavari); Vicarabad (Distt. Hyderabad); Kodur (Dist. Cuddappah).

*Assam :* Dimoria (Distt. Kamrup); Hailakandi (Distt. Cachar).

*Bihar :* Haveli-Kharagpur (Distt. Monghyr); Ormanjhi (Distt. Ranchi); Vaishali (Distt. Muzaffarpur); Pusa (Dist. Darbhanga).

*Delhi :* Najafgarh.

*Gujarat :* Shahpur (Dist. Junagadh); Valod (Dist. Surat).

*Himachal Pradesh :* Sundarnagar-2 (Bhojpur), (Distt. Mandi).

*Jammu and Kashmir :* Ranbir Singh Pura (Dist. Jammu Tawi).

*Kerala :* Chengannur (Distt. Alleppey); Ramavaramapuram, Pudur (Distt. Palghat); Tirur (Dist. Kozhikode).

*Madhya Pradesh :* Nowgong (Distt. Chattarpur); Sehore (Distt. Sehore).

*Madras :* Ariyagoundampatti (Distt. Salem); Shri Ramakrishna Mission Vidyalaya, Perianaickenpalayam (Distt. Coimbatore); S. V. Nagram (Distt. North Arcot); T. Kallupatti (Distt. Madurai); Korukathi (Dist. Thanjavur); Valavanur (Dist. South Arcot).

*Maharashtra :* Amravati (Shivajinagar) (Distt. Amravati).

*Mysore :* Devaraya Samudram (Distt Kolar); Mayasandra (Distt. Tumkur); Moodbidri (Distt. South Kanara); Konanur (Dist. Hassan); Shiralakoppa (Dist. Shimoga); Ilkal (Bijapur Dist.).

*Orissa :* Angul (Distt. Dhenkanal); Bhadrak (Distt. Balasore); Hinjilicut (Distt. Ganjam).

*Punjab :* Nilokheri (Distt. Karnal).

*Rajasthan :* Dabok (Distt. Udaipur); Pisangan (Distt. Ajmer); Sardarshahr (Distt. Churu); Sumerpur (Distt. Pali).

*Uttar Pradesh :* Masauli (Distt. Barabanki); Bachhrawan (Dist. Rae Barelli); Ratsand (Dist. Ballia); Pitaura (Dist. Farukhabad).

*West Bengal :* Barsul (Distt. Burdwan); Ergoda (Distt. Midnapur); Haroa (Distt. 24-Parganas); Itachuna (Distt. Hooghly); Jhilimili (Distt. Bankura).

## FREE AND COMPULSORY EDUCATION

In accordance with the Directive Principle of State policy contained in Article 45 of the Constitution, the State (this expression includes the Government of India, the State Governments and the local bodies) has to endeavour to provide for free and compulsory education to all children until they complete the age of 14 years. The progress so far achieved in this sector is indicated below :—

*Free Elementary Education :* During the last 16 years, considerable progress has been made in reaching the target set before the country by the Constitution. Primary education (classes I–IV in some States and I–V in others) is now free throughout the country. Middle school education is also free in a large number of States such as Andhra Pradesh, Jammu & Kashmir, Kerala, Madhya Pradesh, Maharashtra, Mysore and Punjab. In Gujarat, fee is charged in High Schools corresponding classes V to X. In those States where it is not wholly free as yet, steps have been taken to provide very liberal concessions in fees. Education at primary and middle stages is free for girls and students coming from Scheduled Castes and Scheduled Tribes.

*Compulsory Primary Education :*—Progress in compulsory education is usually measured by the ratio which the enrolment in Classes I to VIII bears to the total number of children in the age-group 6-14. The ultimate goal is to reach an enrolment in classes I-V which would be about 120 per cent of the population of children in 6-11 age-group (because a number of children below 6 or above 11 will also attend these classes). Similarly, the target for enrolment in classes VI–VIII is about 90 per cent of the children in the age-group 11–14 because, although a few children of 11 or 14 will attend these classes, a large number of children in the age-group 11-14 will be attending classes I-V. On this basis, the

* Now merged with the Ministry of Education.

progress made at the end of the Second Plan as well as that which is proposed to be achieved at the end of the Third Plan (revised targets) is given below :—

| Name of the State | Classes I-V | | Classes VI-VIII | |
|---|---|---|---|---|
| | Enrolment at the end of 1960-61 | Targets for 1965-66 | Enrolment at the end of 1960-61 | Target for 1965-66 |
| Andhra Pradesh | 68·3% | 85·6% | 16·8% | 23·7% |
| Assam | 67·7% | 81·8% | 25·8% | 37·5% |
| Bihar | 50·7% | 71·1% | 17·1% | 25·5% |
| Gujarat | 72·1% | 91·5% | 26·3% | 36·8% |
| Jammu & Kashmir | 46·6% | 54·9% | 24·6% | 29·1% |
| Kerala | 98·8% | 123·6% | 58·3% | 82·8% |
| Madhya Pradesh | 49·2% | 62·5% | 15·5% | 19·7% |
| Madras | 85·5% | 104·7% | 31·6% | 38·6% |
| Maharashtra | 77·3% | 86·7% | 27·8% | 40·1% |
| Mysore | 73·8% | 93·8% | 22·5% | 32·1% |
| Orissa | 63·7% | 82·6% | 9·1% | 23·5% |
| Punjab | 50·8% | 83·2% | 29·4% | 37·9% |
| Rajasthan | 40·9% | 68·1% | 14·5% | 24·9% |
| Uttar Pradesh | 44·7% | 59·5% | 16·6% | 21·1% |
| West Bengal | 64·9% | 82·7% | 21·7% | 40·5% |
| Delhi | 83·4% | 136·0% | 61·5% | 99·0% |
| Himachal Pradesh | 50·9% | 77·8% | 22·7% | 32·2% |
| Pondicherry | 45·2% | 125·8% | 31·6% | 35·7% |
| Other Union Territories | 78·6% | 84·0% | 28·4% | 36·1% |
| All India | 62·4% | 80·2% | 22·6% | 32·3% |

As against the target enrolment of 22·5 lakh additional children in classes I to V in 1961–62, the actual additional enrolment was 39·92 lakhs. The Third Plan target of 152·2 lakhs additional enrolment has been revised to 176 lakhs in classes I to V.

*Legislation regarding Compulsory Primary Education* :—Every State in India has a compulsory education law on its Statute Book. But the following States have revised them on the lines recommended by the Govt. of India: Andhra Pradesh (1961); Assam (1962); Gujarat (1961); Madhya Pradesh (1961); Mysore (1961); Punjab (1960); West Bengal (1963); Rajasthan (1963).

## WOMEN'S EDUCATION

Women's education in pre-independence India was confined largely to non-governmental efforts in urban areas. According to the census of 1941 the percentage of literacy for women was as low as 6·0 as against 22·6 for men.

The proportion of boys to girls then in educational institutions was 100 to 30 and the disparity was the widest in the colleges of professional and special education where only 7 girls were under instruction for 100 boys enrolled.

The total number of girls under instruction at the end of March 1947 was 42,97,785. Of these, 34,75,165 girls were at the primary, 6,02,280 at the secondary and 23,207 at the collegiate stage and 56,090 were in special schools which opened out varied careers for women and 1,41,043 in unorganised institutions.

Out of the total number of 2,18,165 educational institutions at the time, 28,196 were specially meant for girls.

The period after 1947 has been marked by a planned approach to the problem of women's education.

The percentage of literacy according to the 1961 census is 12·9 for women as against 34·4 for men.

In 1949-50 the number of universities and research institutes for girls was only one with an enrolment of 2,063; in 1961–62, the enrolment increased to 10,450.

In 1949-50 there were 66 colleges of General Education with an enrolment of 36,313 girls; their number increased to 182 and 1,42,939 respectively in 1961-62.

In 1949-50 there were 17 colleges of professional and technical education with an enrolment of 3,668 girls; in 1961-62 their number increased to 108 and 32,055 respectively.

In 1949-50 there were 438 schools of vocational and technical education with an enrolment of 35,714 girls; in 1961-62 their number rose to 896 and 82,368 respectively.

In 1961 total enrolment of girls at all stages was 1,66,44,758 or 45 for every 100 boys.

During the same period the number of women teachers rose from 1,16,666 to 3,26,433. Out of this increased number of women teachers, 1,39,094 were in primary schools, 94,264 in middle schools, 71,284 in High/Higher secondary schools, 8,928 in universities and colleges and the remaining in other types of schools.

There is a constantly widening disparity between the rates of progress of boys' and girls' education. The percentage of rise in the number of boys between 6 and 11 from 59·8 per cent in 1950-51 to 70·3 per cent in 1955-56 and 83·2 in 1960-61, where as in the case of girls the rise was from 24·6 to 32·4 and 41·8 respectively during the same period.

Similarly, in the age group 11 to 14, the percentage of rise in the number of boys was from 20·7 to 25·5 and 32·6 and in the case of girls the rise was from 4·5 to 6·9 and 11·0 respectively during the same period.

As regards the age group 14–17, the percentage of rise in the number of boys was from 8·7 to 12·8 and 18·5 and in the case of girls the rise was from 1·8 to 2·6 and 4·4 respectively during the same period.

The National Committee on Women's Education appointed in May 1958 under the chairmanship of Mrs. Durgabai Deshmukh submitted a report in Jan. 1959.

A summary of the report appeared in the previous editions of the Directory.

As per the recommendations of the National Committee on Women's Education the Government set up the National Council for Women's Education in 1959. Since then, 20 State Councils for Women's Education have also been set up in all the States and Territories (except Nagaland) and some Union Territories.

For the Third Plan, the Government have also decided to have a special programme for overcoming the peculiar difficulties of girls over and above the normal programme of development available for all children. The Government have also decided to have special measures for increasing the number of women teachers, the revised targets fixed for the Third Plan being 60·6 per cent of girls as against 94·6 per cent for boys at the primary stage, 17·2 per cent as against 45·6 at the middle stage and 7·8 per per cent as against 27·3 at the secondary stage. In absolute numbers according to revised estimates, this would mean enrolling additionally 99 lakhs of girls out of a total of 223·43 lakhs of children upto the secondary stage.

It will thus be seen that the targets fixed for the Third Plan will, at least at the primary stage, help in bridging the gap between the education of boys and girls as the percentage increase for boys at this stage is to be only 11·4 as against 18·8 for girls. The percentage increase at the middle stage would be 13 for boys as against 6·2 for girls. The percentage increase at the secondary stage would be 8·2 for boys as against 3·2 for girls.

A massive effort is needed even to achieve the moderate targets that have now been finally included in the Plan. To realise this target it has been estimated that of the resources about Rs. 175 crores will be devoted to education of girls including a sum of Rs. 12 crores for special programme. Of this Rs. 175 crores, Rs. 114 crores would be for education at the primary and middle school stages.

With a view to educating public opinion and organizing propaganda for the spread of women's education, it is proposed to hold 22 seminars every year in all the States (except Nagaland) and the Union Territories of Delhi, Tripura, Himachal Pradesh and Manipur. During 1964-65, however, only 16 seminars were proposed to be held by various States and Union Territories.

As an advance action for the Fourth Plan, it is proposed to introduce during 1965-66, a scheme for accleration of girls' education with a provision of Rs. 25 lakhs.

A survey on "Attitude of Women towards Part-time Employment" was conducted by two schools of social work in Delhi and Bombay. It was recommended that more attitude surveys should be conducted in smaller towns with greater emphasis on (1) differences in the attitude of women towards part-time employment *vis-a-vis* their educational attainment and vocational training; and (2) attitude of women towards part-time employment as teachers.

The Committee "to look into the causes for lack of public support for girls' education in rural areas and to enlist public co-operation" under the Chairmanship of Mr. M. Bhaktavatsalam, Chief Minister of Madras, emphasised that official action and the programme based on public initiative must move in close harmony.

### Plan and Education

The total outlay for General Education in the Third Five Year Plan is Rs. 408 crores. This is nearly double the anticipated expenditure during the Second Plan. The distribution of the outlays during the First, Second and Third Plan is given in the following table:

(Rs. in Crores)

| Group | First Plan (Actual Expenditure) | Second Plan (Estimated Expenditure) | Third Plan Outlay |
|---|---|---|---|
| Elementary Education | 85 | 87 | 209 |
| Secondary Education | 20 | 48 | 88 |
| University Education | 14 | 45 | 82 |
| Other Educational Schemes | 14 | 24 | 29 |
| Total | 133 | 204 | 408 |

The achievements under the First Plan and Second Plan and targets aimed at under the Third Plan are indicated below :

| Activity | 1950–51 | 1955-56 | 1960-61 (Estimated) | 1965-66 (Targets) |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Number of Pupils in Classes I to V (in lakhs) | 192 | 252 | 343 | 496 |
| Percentage thereof to Total Population of the Age Group 6-11 | 42·6 | 52·9 | 61·1 | 76·4 |
| Number of Pupils in Classes VI to VIII (in lakhs) | 31 | 43 | 63 | 98 |
| Percentage thereof to Total Population of the Age Group 11-14 | 12·7 | 16·5 | 22·8 | 28·6 |
| Number of Pupils in Classes IX to XI (in lakhs) | 12 | 19 | 29 | 46 |
| Percentage thereof to Total Population of the Age Group 14-17 | 5·3 | 7·8 | 11·5 | 15·6 |
| Number of Pupils at the University Stage (Arts, Science and Commerce) (in lakhs) | 4 | 6 | 9 | 13 |
| Percentage thereof to Total Population in the Age Group 17-23 | 0·9 | 1·5 | 1·8 | 2·4 |
| Percentage of Students Reading Science at University Stage | 38·1 | 33·0 | 35·8 | 42·5 |
| Number of Primary/Junior Basic Schools | 2,09,671 | 2,78,135 | 3,42,000 | 4,15,000 |
| Number of Middle/Senior Basic Schools | 13,596 | 21,730 | 39,600 | 57,700 |
| Number of High/Higher Secondary Schools | 7,288 | 10,838 | 16,600 | 21,800 |
| Number of Multipurpose Schools | .. | 255 | 2,115 | 2,446 |
| Number of Training Schools | 782 | 930 | 1,307 | 1,424 |
| Number of Training Colleges | 53 | 107 | 236 | 312 |
| Number of Arts, Science and Commerce Colleges | 542 | 772 | 1,050 | 1,400 |
| Number of Universities | 27 | 32 | 46 | 58 |
| Percentage of Trained Teachers— | | | | |
| Primary | 58·8 | 61·2 | 65·0 | 75·0 |
| Middle Schools | 53·3 | 58·5 | 65·0 | 75·0 |
| High/Higher Secondary Schools | 53·8 | 59·7 | 68·0 | 75·0 |

**Primary School Education :** In the field of primary education, the number of schools in 1946-47 was 1,72,661 as against 3,30,399 in 1960-61. By the end of 1965-66, it is expected to touch four lakhs, which would include 25,000 schools for girls.

*Enrolment :* Enrolment in primary/junior basic schools in 1946-47 was 130 lakhs as against 266 lakhs in 1960-61. It is expected to reach 400 lakhs in 1965-66.

*Teachers :* In 1946-47, the primary/junior basic schools had over four lakh teachers as against 7,41,515 in 1960-61. It is estimated to have 10,50,000 teachers including two lakh female teachers in 1965-66.

*Expenditure :* In 1950-51, expenditure on primary education was Rs. 36 crores as against Rs. 73·44 crores in 1960-61. In 1965-66, it is expected to be round about Rs. 112 crores.

**Middle School Education :** The number of middle schools was 12,843 in 1946-47 as against 46,663 in 1960-61. In 1965-66, it is estimated to have 78,000 such schools, which will include 8,000 schools for girls.

*Enrolment :* In middle/senior basic schools, the total number of enrolment in 1946-47 was about 18 lakhs as against 106 lakhs in 1960-61. It is estimated to touch 160 lakhs in 1965-66.

*Teachers :* The total number of teachers in middle schools was 72,413 in 1946-47 as against 3·5 lakhs in 1960-61. It is expected to be about 5,20,000 in 1965-66.

*Expenditure :* In 1946-47, the expenditure on middle school education amounted to over Rs. 480 lakhs as against Rs. 43 crores in 1960-61. It is expected to be round about Rs. 65 crores in 1965-66.

**Higher Secondary Education :** The number of institutions at this level in 1946-47 was 5,298 as against 17,257 in 1960-61. It is estimated to touch 27,000 including 4,000 for girls in 1965-66.

*Enrolment :* In high/higher secondary schools, the enrolment was 21·94 lakhs in 1946-47 as against 72·12 lakhs in 1960-61. It is estimated to be 110 lakhs, including 30 lakh girls in 1965-66.

*Teachers :* In 1946-47, there were 87,862 teachers in all high/higher secondary schools as against 2,96,305 in 1960-61. The total number of teachers in these institutions is likely to reach 4,40,000 including 95,000 females in 1965-66.

*Expenditure :* The total expenditure on high/higher secondary education was Rs. 12·22 crores in 1946-47 as against Rs. 68·91 crores in 1960-61. In 1965-66, it is expected to be Rs. 108 crores, including Rs. 22 crores for girls.

**Arts and Science Colleges :** In 1946-47, there were 420 arts and science colleges as against 1,039 in 1960-61. In 1965-66, the number of these colleges is estimated to touch 1,500 including 200 colleges fo girls.

*Enrolment :* In 1946-47, enrolment in these colleges was about two lakhs as against 6·91 lakhs in 1960-61. The totl enrolment is estimated to touch 10 lakhs, including 1·8 lakh girls during 1965-66.

*Teachers :* The number of teachers was 15,312 in 1950-51 as against 35,555 in 1960-61. It is estimated to have 50,000 teachers including 8,000 women in all the arts and science colleges in 1965-66.

*Expenditure :* In 1950-51, the total expenditure on arts and science education was Rs. 4·39 crores as against Rs. 21 crores in 1960-61. It is estimated to touch Rs. 30 crores, including Rs. five crores on girls' education in 1965-66.

**Professional Educations :** In 1946-47, the number of professional colleges was 140 as against 852 in 1960-61. It is estimated to have 1,200 professional colleges including 130 for girls in 1965-66.

*Enrolment :* The total enrolment in professional colleges was 34,000 in 1946-47 as against 1,94,000 in 1960-61. It is estimated to be round about three lakhs including 52,000 girls in 1965-66.

*Expenditure :* The expenditure on professional colleges amounted to Rs. 1·86 crores in 1946-47 as against Rs. 15·80 crores in 1960-61 while the estimates in 1965-66 are Rs. 32 crores.

## EDUCATION OF THE HANDICAPPED

Since the beginning of the Second Five Year Plan, the Government of India has been making special efforts to promote services for the education, training and rehabilitation of the handicapped. Some of the activities that have been undertaken are : Model school for blind children ; Training centre for the adult blind ; Sheltered workshop ; National library for the blind ; Training centre for the blind and deaf ; school for the mentally deficient children; central rehabilitation centre for the orthopaedically handicapped ; Training of teachers of the handicapped, Training in crafts ; Awards of fellowships to teachers of the handicapped ; Special employment exchanges ; scheme of assistance to voluntary organisations for the handicapped ; and scholarships for the handicapped.

## NATIONAL SCHOLARSHIP SCHEME DURING THIRD PLAN

This scheme was initiated in 1961-62 as a Third Plan scheme. In 1965-66, 2,650 awards are being made, 1,850 on the results of the school-leaving examinations and 800 on the results of the first degree B.A., B.SC., B.COM., and B.SC. (AG.) examinations.

The awards have been divided among the States/Territories on the basis of population.

The awards made on the results of the school-leaving examinations will terminate on the completion of the first degree examination and those made on the results of first degree examination will terminate on the completion of the Master's degree.

The rate of scholarship for inter/P.U.C. or first year of 3 years course is Rs. 50 per month ; for B.A./B.SC. etc. and second and third year of 3 years course Rs. 75 per month and for professional courses Rs. 100 per month ; for M.A./M.SC. studies also the rate is Rs. 100 per month. Those who stay in the hostel are paid Rs. 10 in addition.

*Means Test :* Rates of scholarship are subject to a means test which prescribes that full rate will be paid if the income of the parents is upto Rs. 500 per month ; at half the rate if the income is between Rs. 500 to 1,000 per month. If the income is bove Rs. 1,000 per month no scholarship is paid but a certificate of merit is issued.

## SCHOLARSHIPS FOR TEACHERS' CHILDREN

A scheme on the pattern of National Scholarships was introduced from 1961-62 for the meritorious children of primary and secondary school teachers. The number of scholarships is 500 every year and the child of a teacher, who secures at least 60 per cent marks in the school-leaving or pre-university examination is eligible to apply against the quota of a State/Territory. The rates under the scheme are the same as under the National Scholarships Scheme except that the additional allowance of Rs. 10 per month to resident scholar is not payable under this scheme.

## NATIONAL COUNCIL OF EDUCATIONAL RESEARCH AND TRAINING

With a view to promoting advanced study and research in educational problems and providing training for educational personnel the Govt. of India set up with effect from Sept. 1, 1961 a National Council of Educational Research and Training, an autonomous body recognised under the Societies Registration Act (Act XXI of 1960), with the Union Minister of Education as Ex-Officio President.

The main objectives of the Council are : (*i*) Promoting, organising and fostering research in all branches of education ; (*ii*) Organising pre-service and in-service training at an advanced level ; (*iii*) Organising extension services in the training institutions in the country in association with the State Governments and other authorities concerned and in other ways disseminating improved techniques and practices in the educational institutions in the country ; (*iv*) Establishing institutes for research and training, particularly for the teaching of vocational and

scientific subjects in schools and such other subjects as are required for the development of multi-purpose education; (*v*) Acting as a clearing house for ideas and information on educational research and training; (*vi*) Undertaking publication of such books, periodicals and other literature as may be necessary for the furtherance of its objectives; and (*vii*) Rendering advisory and consultative services.

The programmes of the Council are being implemented through the National Institute of Education which was formed by converting the institutes transferred from the Ministry of Education into departments of National Institute. To these, some new departments/units have since been added. The National Institute of Education now consists of the following Departments/Institutes: (1) Department of Science Education; (2) Department of Psychological Foundations; (3) Department of Curriculum, Methods and Textbooks; (4) National Institute of Basic Education; (5) National Institute of Audio-Visual Education; (6) Central Institute of Education; (7) Directorate of Extension Programmes for Secondary Education; (8) National Fundamental Education Centre (A Unit on Literacy is being developed in the Centre. A unit for the Study of the Educational Problems of Scheduled Tribes is also being developed); (9) Department of Teacher Education. (Set up as a Unit in the Central Institute of Education); (10) Department of Educational Administration; (11) Department of Foundations; (12) Publication Unit.

The Council has set up a Central Committee on Educational Literature with the following objectives: (*a*) To prepare and publish or assist in the preparation and publication of books, supplementary educational material for use in educational institutions, in languages in use in such institutions; (*b*) To organise conferences and seminars for writers, artists, illustrators, publishers, librarians and others concerned with the production of educational literature for use in educational institutions; (*c*) To promote and conduct research in the production of text books and other educational literature; (*d*) To commission writers, illustrators and other experts for preparing specific books; (*e*) To prepare and bring out book lists, arrange exhibitions and organise effective dissemination of improved techniques of text book production; (*f*) On behalf of the National Council of Educational Research and Training, to advise the Government of India, the State Governments and other educational organisations and institutions on matters relating to the production of text books and educational literature and to collaborate with them in the furtherance of the objects for which the Committee is set up.

The Committee has in turn set up subject panels for the preparation of model text books for various subjects. The subjects covered are Hindi, History, Mathematics, Physics, Chemistry, Biology, Geography, Technology, Commerce, General Science, Sanskrit, Teacher Training and Agriculture. Some of the panels have already made considerable progress in their work.

The Council, in cooperation with the Governments of Rajasthan, Madhya Pradesh, Orissa and Mysore, has established four Regional Colleges of Education at Ajmer, Bhopal, Bhubaneshwar and Mysore as a part of a broad programme of improving secondary education in general and multi-purpose schools in particular. The regional colleges of education at Ajmer, Bhubaneswar and Mysore started their second session and the college at Bhopal opened its first session (May 1965). The colleges started four year integrated courses in technology and science education and one year programme of teacher education in agriculture, commerce, science and home science. Different courses in industrial crafts education for preparing teachers in crafts were also started.

The enrolment in each college is in the range of 190 to 300 students. As planned, the demonstration multi-purpose schools attached to the college at Ajmer, Bhubaneswar and Mysore opened their first session and the average enrolment in each school is 260 students.

The schools are affiliated to the Central Board of Secondary Education, Delhi and will serve as a laboratory for new experiments in the fields of secondary education and teacher education. Courses leading to college education and preparation for gainful occupations in agriculture, commerce and technology have been introduced on an experimental basis.

The main objectives of the Department of Science Education are drawing up of syllabi for various courses, organising refresher courses for teachers in service; organising science clubs and science fairs as an extension work of the co-curricular activities of the pupils; implementing the science talent search scheme for the promising and talented students with an aptitude for science who are selected for pursuing higher education in the basic sciences; programme of text books, laboratory manuals (through panels and by the department), supplementary readers and other teaching aids; establishing an Instructional Material Centre where the schools and teachers can get information about laboratory equipment, literature, instructional material etc.; research studies of various problems of science education: dissemination of science information through periodicals, newsletters etc. All these programmes have already begun and considerable work has been done on them.

A considerable headway has been made in the field of educational research. In addition to assisting financially, the National Institute of Education has undertaken in collaboration with U.S. Office of Education, nine research projects of all India significance in different areas; (1) a survey of secondary schools in India, (2) curriculam for teaching of mathematics in higher secondary schools, (3) evaluation criteria for inspection and supervision of secondary schools, (4) achievement motive in high schools and training for it, (5) scholastic aptitude test in Hindi at two levels of school education, (6) survey of achievement in mathematics at three levels of school education, (7) identification and incidence of talent in elementary and secondary schools, (8) wastage and stagnation in primary, middle and secondary schools, (9) a study of costs of education in India during the period 1951-61.

For the training of research personnel, a training course in research methodology has been started.

Realising the importance of pre-primary education, a training course in early childhood education is being run in the Institute.

## BASIC EDUCATION

Basic Education has been adopted as national pattern for elementary stage of education. As a result of this all elementary schools are to be ultimately brought under basic system. About 20 per cent schools have already been converted to basic pattern. The rest are being gradually brought under this system through a programme of 'Orientation'.

By the end of the Second Plan about 18·3 per cent of the total number of primary schools had been converted to Basic and about 32·9 per cent of middle schools to Senior Basic. More than 76·6 per cent of the training institutions were also of the basic pattern. A programme of orientating all non-basic schools to the basic pattern has been undertaken, which envisages introduction of such of the activities of basic schools as do not require specifically trained personnel and large financial outlays. By the end of 1965-66, all training institutions for primary school teachers are expected to be converted into basic.

## TRAINING COLLEGES

The Government of India also proposed setting up four regional teachers' training colleges as a Central Scheme in the Third Plan.

The output of these training colleges would be 200 trained teachers per college a year.

The Extension Service centres would be attached to another 25 training colleges in the Third Plan.

## CATERING COLLEGE

The Union Government has started one Catering College at Delhi. Two colleges one each at Calcutta and Madras started functioning from December 1963. All the four Institutes of Catering Technology and Applied Nutrition, included in the Third Plan, have commenced courses. The Institute at Bombay has been reorganised as the nucleus of the College of Catering and Institutional Management. Arrangements are nearing completion for the establisment of food polytechnics in Uttar Pradesh and Kerala.

## DEVELOPMENT OF HINDI, SANSKRIT AND MODERN LANGUAGES

HINDI: The programme for the propogation of Hindi includes grant of financial assistance to voluntary Hindi organisations, appointment of Hindi teachers in primary, middle and higher secondary schools in non-Hindi speaking States, establishment of Hindi teachers' training colleges in non-Hindi speaking States, maintenance of an institute of research and training of Hindi teachers, free supply of Hindi books to school and college libraries particularly in non-Hindi speaking areas and award of scholarships for post-matric studies in non-Hindi speaking States. The programme of enrichment and development of Hindi includes schemes of preparation, translation and publication of standard books of university level in Hindi through official and voluntary agencies as well as universities and learned societies, preparation, and translation of books in Hindi with the assistance of private publishing concerns and preparation and publication of encyclopaedias, dictionaries and translation of official literature and evolution of scientific and technical terminology in Hindi.

SANSKRIT: Various schemes for propagation and development of Sanskrit are being continued. They include financial assistance to voluntary Sanskrit organisations, gurukulas and Sanskrit pandits in indigent circumstances; maintenance of Kendriya Sanskrit Vidyapeetha; reprinting of important out of print Sanskrit books; scholarships to the products of Sanskrit pathashalas and Sanskrit students in high/higher secondary schools.

MODERN INDIAN LANGUAGES: A separate programme is implemented for the development of modern Indian languages (other than Hindi) under which grants are given to various State Governments, voluntary organisations/institutions for bringing out suitable publications *e.g.* encyclopaedias, bilingual dictionaries, books of knowledge and books bringing out similarities among different languages.

## PROPAGATION OF HINDI

The work of propagation of Hindi through voluntary organisations particularly in non-Hindi speaking States has gained momentum during 1964-65. Grants totalling Rs. 10·41 lakhs have been given to voluntary organisations during 1964-65 as against Rs. 4·71 lakhs during 1963-64. The quantum of grant admissible under the scheme has been raised from 60 per cent to 75 per cent of the expenditure on approved activities from 1965-66 onwards.

The two regional offices set up at Calcutta and Madras serve as liasion between the Ministry of Education and voluntary Hindi organisations.

In order to supply up-to-date expert knowledge and professional guidance in respect of teaching methods and allied padagogical problems, the Government of India has set up an autonomous body entitled Kendriya Hindi Shikshana Mandal which is running a Hindi teachers' training and research institute at Agra. The institute is catering for three different courses equivalent to T.T.C.; B. Ed. and M. Ed. and is also conducting research on vocabulary, content of various courses and techniques of teaching Hindi with special reference to the requirements of non-Hindi regions.

*Preparation of Bilingual Primers (self-taught series)*: To facilitate learning of various south Indian languages through the medium of Hindi,

Hindi-Malaylam; Hindi-Kannada and Hindi-Telugu primers are under preparation by the Dakshin Bharat Hindi Prachar Sabha, Madras on behalf of the Education Ministry. A provision of Rs. 8 lakhs has been made for this project during 1965-66.

A standard key-board for Devanagari (Hindi-Marathi) typewriters has since been finalised and typewriters with this key-board are expected to be manufactured soon (May 1965).

To enrich Hindi lexicographical literature, dictionaries and encyclopaedias are being compiled by the Central Hindi Directorate as also by a few Hindi organisations and academic bodies.

Proposals for compilation of bilingual dictionaries with Hindi as one of the languages, preparation of encyclopaedia and dictionaries are under consideration (May 1965).

Two exhibitions of scientific books in Hindi and a few regional languages were organised at Gauhati and Bengalore during 1964.

In order to encourage Hindi writers and poets of non-Hindi speaking areas, a scheme to award prizes has been introduced in 1965.

## CENTRAL BOARD OF SECONDARY EDUCATION

17-B, Indraprastha Marg, New Delhi 1.

The Central Board of Secondary Education was reconstituted by the Government of India, Ministry of Education with effect from 1st July, 1962 to make the services of the Board available to various educational institutions in the country and abroad to meet the educational needs of students whose parents have to move from one State to another from time to time and to set up an All-India standard for the Secondary stage of Education.

The Board has since instituted an All-India Higher Secondary Examination. The All-India Scheme provides for a unified syllabus with Hindi and English as media of instruction and examination. The Board also conducts Higher Secondary, Higher Secondary Technical and Higher Secondary Multi-purpose Examinations (3-year course) and Higher Secondary (One-Year Course) Examination according to Delhi Scheme and Ratna, Bhushan and Prabhakar examinations in Hindi.

The Higher Secondary Technical Examination is being conducted for the last time this year (1965).

Any educational institution situated in or outside India can get itself affiliated to the Board. If such an institution is in receipt of a regular maintenance grant from the State Government, the application for recognition of the school is not entertained without the concurrence of the State Government concerned. All the Higher Secondary Schools of Delhi and all the Central Schools of the Government of India are affiliated to the Board besid s a number of other schools situated in different parts of the country. The Indian School in Tehran (Iran), three schools in Andaman and Nicobar Islands and four Demonstrational Multipurpose schools attached to regional colleges of education, started by the National Council of Educational Research and Training, are also affiliated to the Board. Union Territory of Manipur has also decided to follow the courses of the studies of the Board.

The Board has also proposed to introduce correspondence courses at the higher secondary stage for the benefit of such students as are unable to join any institution.

## NON-AFFILIATED INSTITUTIONS FOR DEGREE OR DIPLOMA IN ENGINEERING, TECHNOLOGY, COMMERCE ETC

[*Note :* See also under Universities in each State.]

### ANDHRA

Alladin Technical Training Institute, Begul Kunta, Hyderabad; Andhra Polytechnic, Kakinada; Engineering College, Anantapur; Govt. Technical College, Saifabad, Hyderabad; Government Ceramic Institute, Gudur; Vuyyuru Polytechnic, Vuyyuru; Central Crafts Institute, Mallepally, Hyderabad; Government College of Fine Art, Hyderabad; Industrial Training Institute, Anantapur; Industrial Training Institute, Kakinada; Visakhapatnam Polytechnic, Visakhapatnam; Warangal Polytechnic, Warangal; A.J.K. Industrial School, Masulipatam; E.S.C. Government Polytechnic, Nandyal; Government Polytechnic, Anantapur; Government Polytechnic for Girls, Kakinada; Government Polytechnic, Guntur; Government Polytechnic, Nellore; Government Mining Institute, Kothagudem; Hyderabad Polytechnic, Hyderabad; Polytechnic Engineering College, Kakinada; Polytechnic, Mahboobnagar; Sri Venkateswara Polytechnic, Tirupathi; Anwarul-Uloom Dip. College of Commerce, New Mallapally, Hyderabad; Govt. College of Commerce, Hyderabad; Domestic Science Training College, Saifabad, Hyderabad; Girls' Vocational Institute, Warangal; Girls' Vocational Institute, Hyderabad; Girls' Vocational Institute, Secunderabad; Andhra Medical College, Visakhapatnam; Govt. Ayurvedic College, Hyderabad; Nizamia Government Tibbi College, Hyderabad; Govt. College of Fine Arts, Gunfoundry, Hyderabad; Domestic Science Training College, Saifabad, Hyderabad; Govt. Post-Basic Training College, Pentapadu.

### ASSAM

Assam Engineering Institute, Gauhati; H.R.H. Prince of Wales Institute of Engineering and Technology, Jorhat; Silchar Polytechnic, Silchar; Nowgong Polytechnic, Nowgong; Silchar Polytechnic, Silchar; Assam Ayurvedic College, Gauhati; Gauhati Music College, Gauhati; Nalbari Sanskrit College, Nalbari; Post-Graduate Basic Training College, Titabar; Post-Graduate College, Jorhat; Assam Veterinary College, Gauhati.

### BIHAR

Bhagalpur School of Engineering, Bhagalpur; Dhanbad Polytechnic, Dhanbad; Indian School of Mines and Applied Geology, Dhanbad; Industrial Training Institute: Bhagalpur; Darbhanga; Dhanbad; Digha; Gaya; Katihar Kodarma; Muzaffarpur; Jamshedpur Technical Institute, Jamshedpur; Junior Technical School Dehri; Junior Technical School, Marhourah, (Saran); Kodarma Mining Institute, Kodarma; Mining Classes, P.O. Bhaga (Dist. Dhanbad); Patna Polytechnic, Patna; Patna School of Engineering, Patna; Ranchi School of Engineering, Ranchi; Tirhut School of Engineering, Muzaffarpur; Chaibasa Technical School, Chaibasa; Ranchi Technical Training School, Ranchi; Sindri School of Engineering, Sindri; Welfare Technical School, Dumka; Welfare Technical School, Ranchi; College of Commerce, Patna; Shiksha Bhawan Mandir Vidyapith, via Barahat (Dist. Bhagalpur); Ajodhya Shivkumari Ayurvedic College, Begusarai (Monghyr); Govt. Ayurvedic College, Patna; Govt. Tibbi College, Patna; Sheo Ganga Ayurvedic Mahavidyalaya, Madhubani; Sri Y. N. A. Aslaing Ayurvedic College, Bhagalpur; Govardhan Sahitya Mahavidyalaya, Hindi Vidyapith, Baidyanath, Deoghar; Institute of Post-Graduate Studies & Research in Arabic and Persian Learning, P.O Mahendra (Patna); Nava Nalanda Mahavihara, Nalanda (Patna); Govt. College of Health and Physical Education, Patna; Hirapur School of Physical Education, Dhanbad; Rural Institute of Higher Studies, Sundarnagar Birauli, Darbhanga; Teachers' Training College, Bhagalpur; Ranchi; Turki.

### DELHI

Delhi Polytechnic, Delhi; Govind Ballabh Pant Polytechnic, New Delhi; Pusa Polytechnic Delhi; Lady Irwin College, Delhi; Jamia Millia Islamia, Jamianagar, Delhi; Ayurvedic and Unani Tibbia College, Delhi; Jamia Millia Rural Institute, Jamianagar, New Delhi; Statistical Branch of Indian Council of Agricultural Research, New Delhi; Govt. Co-educational Teachers' Training Institute, Daryaganj, Delhi; Jamia Teachers' College, Jamia Mijlia Islamia, Jamianagar, New Delhi.

### GUJARAT

Birla Vishwakarma Mahavidyalaya, Vallabh Vidyanagar (*Via* Anand); C. N. Polytechnic, Ahmedabad; Dr. S. & S. S. Gandhy College of Engineering and Technology, Surat; Faculty of Technology, Baroda; Government Polytechnic, Ahmedabad; Lukhdhirji Engineering College, Morvi; R. C. Technical Institute, Ahmedabad; K. J. Polytechnic, Broach; Shri A. V. Parikh; Technical Institute Rajkot; Sir Bhavsinhji Polytechnic, Bhavnagar; B. B. Polytechnic, Anand; Govt. Polytechnic, Dohad; Govt. Polytechnic, Porbandar; K. D. # THE PRESS

THE Annual Report of the Registrar of Newspapers for India for the year 1964 shows that there were 8,161 newspapers and periodicals, including 514 dailies and 46 tri- and bi-weeklies, in 1964 compared to 7,790 newspapers and periodicals including 503 dailies and 49 tri- and bi-weeklies in 1963.

There was a 6·2 per cent increase in the circulation of newspapers and periodicals during 1964 (taking 3,992 papers for which circulation data for 1963 as well as 1964 were available). The total circulation of these papers rose from 181·36 lakhs in 1963 to 192·59 lakhs in 1964. The circulation of dailies common to both 1963 and 1964 rose by 5·9 per cent from 52·88 lakhs in 1963 to 56 lakhs in 1964.

### CIRCULATION

Of the total circulation (193 lakhs) of the common papers in 1964, the largest share was that of the English language papers (50·2 lakhs) followed by Hindi (36 lakhs) and Tamil (22·7 lakhs). The rate of increase in circulation was the highest in case of Malayalam (11·6%), followed by Tamil (9·4%), Bengali (8·5%) and English (7·9%) against the all India increase rate of 6·2 per cent. There was 16·7 per cent decrease in the circulation of Sanskrit papers and of 1·4 per cent in case of Punjabi papers. Marathi language papers recorded a rise of only one per cent and Urdu 1·9 per cent.

#### Periodicity-wise break-up of Circulation

*Circulation of Dailies :* The number of dailies in 1964 was 514 as compared to 503 in the previous year. The circulation (preliminary) of dailies in 1964 was 56·93 lakhs. The number and circulation of dailies in the various languages in 1964 are given below in descending order of magnitude of circulation :

English 56 papers (15·26 lakhs); Hindi 149 (7·99 lakhs); Tamil 28 (6·69 lakhs); Malayalam 35 (6·26 lakhs); Marathi 41 (5·52 lakhs); Gujarati 34 (4·24 lakhs); Bengali 7 (3·17 lakhs); Urdu 68 (2·91 lakhs); Kannada 36 (1·90 lakhs); Telugu 13 (1·54 lakhs); Oriya 4 (58,000); Punjabi 17 (40,000); Assamese 1 (7,000); Sanskrit 1 (1,000); bilingual 12 (12,000); others 12 (27,000).

At the end of 1964, there were 7,601 periodicals in India. The total circulation of 4,493 periodicals, for which circulation data for the year were available, was 150 lakhs.

Among the periodicals in 1964, monthlies were the most predominant category (3,365); followed by weeklies (2,311). In circulation also monthies topped with 66·1 lakhs followed by weeklies 62·6 lakhs.

In 1964, 802 periodicals (including 241 weeklies) commenced publication against 913 in 1963. Hindi had the largest number of new periodicals, namely 182, followed by English (178) and Urdu (88).

In 1964, 230 periodicals (including 82 weeklies) ceased publication as against 336 in 1963. The largest number of casualties (62) was in English. Hindi lost 47 and Urdu 19 periodicals.

There were 46 tri- and bi-weeklies in 1964 compared to 49 in the previous year.

*Readership :* The number of papers in India per lakh inhabitants in 1964 as well as in 1963 was 1·7 compared to 1·6 in 1962. Newspaper circulation per 1,000 inhabitants worked out at 52·4 in 1962 and 50·6 in 1963.

### OWNERSHIP

The number of common ownership units and the total number of papers owned by them decreased during 1964 though their combined circulation slightly increased.

Dailies under common ownership accounted for about two-thirds of the total circulation of all dailies in the country.

The predominant form of ownership of newspapers in 1964 was "individual" which accounted for 4,675 papers or 57·3 per cent of the total number. Societies and associations (including religious societies) was the second biggest ownership category accounting for 1,647 papers. Firms and partnerships, joint stock companies (public and private Limited) and Central and State Governments were the other important ownership categories accounting for 540, 460 and 368 papers respectively in 1964.

The total number of papers owned by political parties in 1964 was 71 (including 7 dailies and 33 weeklies), of which the Congress owned as many as 31, the Communist Parties of India 22 and the Praja Socialist Party 6.

The circulation of common ownership dailies rose by 42·2 per cent from 27·54 lakhs in 1960 to 39·17 lakhs in 1964 and that of the news interest weeklies by 62·4 per cent from 7·89 lakhs in 1960 to 12·81 lakhs in 1964. The total circulation of papers under common ownership rose by 46·7 per cent from 35·43 lakhs to 51·98 lakhs.

The largest number of news interest papers owned by a single common ownership unit in 1964 was 19, by the Express Newspapers which also owned the largest number of dailies (12) and the highest combined circulation (11 lakhs). The unit also commanded the highest daily circulation (6·64 lakhs) for any common ownership unit during 1964. The Bennett, Coleman and Company Limited (11 papers), commanded the second largest circulation among common ownership units, namely, 6·10 lakhs. The Hindustan Times and Allied Publications (11 papers), had a combined circulation of 3·14 lakhs.

The combined circulation of 138 dailies owned by 63 common ownership units, for which data were available, were 39·17 lakhs in 1964. This constituted 67·8 per cent of the total daily circulation.

There were 19 common ownership units which together owned 47 dailies in the metropolitan centres (Delhi, Calcutta, Bombay and Madras) and accounted for 25·72 lakhs or 95 per cent of the total circulation.

### NEWSPAPERS

There were 8,161 newspapers and periodicals, including 514 dailies and 46 tri- and bi-weeklies in 1964 compared to 7,790 newspapers and periodicals including 503 dailies and 49 tri- and bi-weeklies in 1963.

During 1959-64 the number of papers in India rose by 33·9 per cent from 6,096 to 8,161 and the number of dailies by 22·4 per cent from 420 to 514. The number of tri-and bi-weeklies rose by 84 per cent from 25 to 46 and of weeklies by 32·7 per cent from 1,741 to 2,361.

In 1964 there were newspapers in India in 44 different languages and dailies in 19 languages.

In Tangkhul Naga and Sevahili languages, newspapers were started for the first time in 1964.

*Dailies:* There were 514 dailies in 1964 compared to 503 in 1963. Twenty-seven new dailies and two tri-and bi-weeklies commenced publication in 1964.

Hindi had the largest number of dailies 149, followed by Urdu 68, English 56, Marathi 41, Kannada 36, Gujarati 34, Tamil 28, Punjabi 17, Telugu 13, Bengali 7, Oriya 4 and Assamese 1. There were 12 dailies in other languages and 12 bilingual papers. Hindi added the largest number of new dailies (10) followed by Urdu (6) in 1964.

Uttar Pradesh had the largest number of dailies (80), followed by Maharashtra (78). The number of dailies in other States was as follows: Madhya Pradesh 52; Mysore 45; Kerala 42; Madras 34; Punjab 30; Andhra Pradesh 28; Gujarat 27; Delhi 24; West Bengal 22; Rajasthan 15; Bihar 11; Orissa 5; Goa 9; Manipur 5; Tripura 2 and Andaman and Nicobar Islands 1.

There were no daily newspapers from Himachal Pradesh, Nagaland and Pondicherry, besides Dadra and Nagar Haveli, Laccadive, Minicoy and Amindivi Islands and NEFA which published no papers at all.

*Periodicals:* The number of periodicals in the country rose from 7,238 in 1963 to 7,601 in 1964. There were 367 periodicals brought out by the Government departments (194 Central Government and 173 State Governments) in 1964. These included 37 weeklies, 42 fortnightlies and 161 monthlies. As many as 164 among the Government-owned periodicals were in English, 84 in Hindi and 10 in Bengali. Among Government publications there were 15 papers in the languages other than the principal ones. The total circulation of the Government publications for which data were available for 1964, was 8·2 lakhs or about 4 per cent of the circulation of all papers in the country

*New Publications:* During 1964, 831 papers commenced publication against 947 in 1963. The number of dailies started in 1964 was 27 compared to 30 in 1963.

The number of new publications was the largest in case of Hindi (193), English (180) and Urdu 194.

The largest number of new weeklies was in Hindi (83), followed by Urdu (40) and English (22).

*Papers which ceased publication:* During 1964, 252 newspapers and periodicals ceased publication compared to 360 in 1963. These included 22 dailies.

The number of papers which ceased publication was the largest in the case of English (63), followed by Hindi (53) and Urdu (20). Of the 22 dailies, Malayalam lost 7 and Hindi 6. Among the weeklies which ceased the largest number was in Hindi (28) followed by English (13) and Urdu (11).

Newspapers were published in India in 1964 in 44 languages in all and dailies in 19 languages. In 1963, there were newspapers in 45 languages and dailies in 19 languages.

The largest number (1,179) was from Maharashtra followed by Uttar Pradesh (1,096), West Bengal (1,024), Delhi (826), Madras (730) and Punjab (595).

Of the 514 dailies in 1964, Uttar Pradesh had the largest number (80), followed by Maharashtra (78) and Madhya Pradesh (52). Uttar Pradesh had 9 tri-and bi-weeklies and Andhra Pradesh and Maharashtra 7 each.

Of the 8,161 papers, more than a third (2,858) were from the four metropolitan cities (Delhi, Calcutta, Bombay and Madras). The metropolitan cities had 106 out of 514 daily papers in the country. State capitals had 98, other cities with population of more than one lakh 229 and towns with population less than one lakh 81 dailies.

### Small Newspapers

The Government of India had set up in May 1965, a nine-member small newspapers' advisory committee under the chairmanship of Mr. R. R. Diwakar, M.P. to make an investigation of the difficulties and problems facing small newspapers and to advise the Government on the measures to be taken for assisting the small newspapers published in various languages.

The report was submitted to the Government in Oct. 1965 and was expected to be presented to Parliament in Nov. 1965.

The members of the committee are: A. D. Mani, A. R. Bhat, Joachim Alva, Hiren Mukherjee, Benarsi Das Chaturvedi, Prem Narayan, Durga Das and Hayatullah Ansari.

## PRESS LAWS

In general the laws which affect the Press in India today are Press and Registration of Books Act, 1867; the Indian Official Secrets Act No. XIX of 1923; Sections 124-A, 153-A, 171-G, 255, 292, 293, 294-A, 295-A, 489-A, 499–502 and 505 of the Indian Penal Code; Sections 99-A–99-G and 108 of the Criminal Procedure Code; Sections 81, 84 and 87 of the Indian Evidence Act No. I of 1872; Sections 11, 12, 44, 52 of the Customs Act No. LII, 1962; Sections 19, 20, 26, 27-A–27-D of the Indian Post Office Act No. VI of 1898; Section 5 of the Indian Telegraph Act No. XIII of 1885; Sections 40, 52 and 53(1)(*b*) of the Patents and Designs Act No. II of 1911; the Police (Incitement to Disaffection) Act, 1922; Section 69 of the Trade Marks Act No. V of 1940; the Contempt of Courts Act, 1952 (Act XXXII of 1952); The Indian Post Office (Amendment) Act LII of 1960; Article 19(1) (*a*) and (*g*) and Clause (2) and (6) of the same Article of the Constitution of India. The amendment to Article 19 (1)(*a*) reads: "Nothing in Sub-clause (A) of Clause 1 (the Citizen's Right to Freedom of Speech and Expression) shall affect the operation of any existing law or prevent the State from making anyl aw in so far as such law imposes reasonable restrictions on the exercise of the right conferred by the said sub-clause in the interest of the sovereignty and integrity of India, the security of the State, friendly relations with foreign States, public order, decency, morality, or in relation to contempt of court, defamation or incitement to an offence (Arts. 105 and 194 of the Constitution of India); the Tax on Newspapers (Sales and Advertisements) Repeal Act No. XXVIII of 1951; S. 7 of the Collection of Statistics Act (XXXII of 1953); the Press and Registration of Books (Amendment) Act No. 55 of 1955.

The Delivery of Books (Public Libraries) Act 27 of 1954.

The Drugs and Magic Remedies (Objectionable Advertisements) Act 21 of 1954. This Act controls the advertisement of drugs in certain cases and prohibits the advertisement for certain purposes of remedies alleged to possess magic qualities.

The Criminal Procedure Amendment Act contains a section (198B) which empowers the Government to prosecute a newspaper for defamation of public servants.

The Working Journalists (Industrial Disputes) Act (No. 1 of 1955). The Act extends the provisions of the Industrial Disputes Act, 1947 to working journalists.

The Parliamentary Proceedings (Protection of Publication) Act (No. 24 of 1956). It protects the publication of a substantially true report of any proceedings of either House of Parliament.

Section 11 of the Prize Competitions Act (Act 42 of 1955) contains rules regarding printing and publishing tickets, coupons, etc. in connection with prize competitions.

The Working Journalists Conditions of Service and Miscellaneous Provisions Act (Act 45 of 1955) regulates conditions of service of working journalists.

The Working Journalists (Amendment) Act No. 65 of 1962.

The Punjab Special Powers (Press) Act was passed on 5th September 1955. It empowers the authorities to control the irresponsible activities of the press indulging in and fostering communal disharmony, dissemination of 'violent' news and pernicious propaganda of a communal nature.

The Newspaper (Price and Page) Act 45 of 1956.

The Young Persons (Harmful Publications) Act No. 93 of 1956.

The Copyright Act 14 of 1957.

The Indian Post Office (Amendment) Act No. 7 of 1958.

The Working Journalists (Fixation of Rates of Wages) Act 29 of 1958.

The Press and Registration of Books (Amendment) Act No. 26 of 1960.

The Newspaper (Price and Page) Continuance Act No. 36 of 1961.

The Indian Penal Code (Amendment) Act No. 41 of 1961.

The Drugs and Magic Remedies (objectionable advertisements) Amendment Act No. 42 of 1961.

Defence of India Act No. 51 of 1962.

The Working Journalists Amedment Act No. 65 of 1962.

On 12th December 1958 the Supreme Court of India delivered a very important judgment* relating to freedom of the press *vis-a-vis* the privileges of legislatures. It laid down "that under the Constitution of India, Indian legislatures have the right or privilege to prohibit absolutely the publication of even a true and faithful report of the debates or proceedings that take place within the House and to inflict punishment for a breach of such privilege. The right to freedom of speech and expression must be read subject to Art. 194(3) and in Art. 105(3).

See 1959 S.C.J. p. 925.

## PRESS COMMISSION

The report of the Press Commission of 1952, the provisions of the Working Journalists Act of 1955, and the report of the Wage Board Committee for journalists appointed by the President are all given in previous editions of the *Directory.*

The recommendations of the Wage Board Committee and of the Journalists Act are now generally in force. No case of non-implementation of the recommendations of the Wage Committee has been brought to the notice of the Government.

**Wage Boards for Working Journalists & Non-Journalists**

A second Wage Board for working journalists was constituted by the Government of India on November 13, 1963 under the chairmanship of Mr. G. K. Shinde. The other members of the Board are Mr. Nettakalappan (*Prajavani*) and Mr. Upendra Acharya representing employers, Mr. L. Meenakshisundaram (*Madras Mail*) and Kedar Ghosh (*Statesman*) representing employees, P. Brahmayya and Sidheswar Prasad, M.P. (Independent members).

The Government of India constituted in February 1964 a Wage Board for the non-journalist employees of newspaper establishments under the chairmanship of Mr. G. K. Shinde.

The other members of the Wage Board are: Mr. Sidheswar Prasad, M.P., and Mr. P. Brahmayya (Independent members), Mr. Narendra Tiwari and Mr. Upendra Acharya (employers' representatives) and Mr. Amarnath Vidyalankar, M.P., and Mr. S. Y. Kolhatkar* (workers' representatives).

The board will also consider the demand for grant of gratuity to non-journalist employees of the newspaper establishments.

While making its recommendations, the wage board for non-journalists shall have regard to the cost of living, the prevalent rates of wages for comparable employments, the circumstances relating to the newspaper industry in different regions of the country, and to any other circumstances which to the board may seem relevant. The Secretary of both the wage boards is Mr. V. R. Kulkarni.

There is also a Registrar of Newspapers who makes an annual report based on the terms of reference mentioned in the Journalists Act.

The Advertising Council of India has also been set up.

### NEWSPRINT CONTROL ORDER

The Government of India promulgated on Jan. 17, 1962 the Newsprint Control Order to regulate the acquisition, sale and consumption of newsprint in the country. It came into force immediately. A revised policy was announced in April 1963. Details of the announcement were given in the 1963–64 *Directory*.

On April 2, 1964, the newsprint allocation policy for 1964–65 was announced by the Government of India, imposing cuts ranging from 12½ to 7½ per cent on newspapers consuming more than 500 tonnes. Smaller publications consuming less than 500 tonnes were completely exempted from these cuts.

No newsprint is to be made available to new newspapers proposed to be started by "chains, groups and multiple units." In the case of other new daily papers, newsprint would be allotted for a circulation of 5,000 copies of eight pages of standard newspaper size. But no newsprint would be allotted to any new periodicals.

Existing newspapers and periodicals with a circulation of fewer than 10,000 copies are to be allowed to increase their circulation up to 10,000 copies, or by 25 per cent of their circulation during the April '61–March '62 period, whichever is less. Smaller publications will be permitted to increase their circulation freely up to 5,000 copies.

On April 29, 1964 the Government of India announced another press note announcing its decision not to enforce the phased cuts in newsprint allocation announced on April 2, 1964.

A block cut of five per cent, will, however, be imposed on publications consuming 1,000 m. tonnes and above as from April 1, 1964.

The daily newspapers which were allowed a circulation increase in October, 1963, March, 1964, will be permitted to maintain the increased circulation.

In the case of newspapers with a circulation range between 10,000 and 25,000 copies per publishing day, the increase will be maintained to the full extent of 20 per cent and in the case of newspapers in the circulation range between 25,000 and 50,000 copies, to the extent of 10 per cent.

It has also been decided to raise the allocation of white printing paper to as much as 10 per cent of the annual entitlement of the newspapers concerned. This would enable the publishers using white printing paper to offset the cuts.

Newspapers and periodicals having annual entitlements of more than 100 tonnes will be given 30 per cent in NEPA newsprint and the remaining 70 per cent from imported stocks. Of the imported entitlement, 70 per cent will be given from free resources (sterling imports) and the remaining 30 per cent from the rupee account (Eastern European countries).

### PRESS COUNCIL

The Press Council Bill was passed in Nov. 1965. The President has given his assent. The object of the Council shall be to preserve the liberty of the press and maintain and improve the standards of newspapers in India. The Council may, in furtherance of its object, perform the following functions (*a*) to help newspapers to maintain their independence; (*b*) to build up a code of conduct for newspapers and journalists in accordance with high professional standard; (*c*) to ensure on the part of newspapers and journalists the maintenance of high standards of public taste and foster a due sense of both the rights and responsibilities of citizenship; (*d*) to keep under review any development likely to restrict the supply and dissemination of news of public interest and importance; (*e*) to keep under review any assistance received by any newspaper or news agency in India from foreign sources; (*f*) to promote the establishment of such common service for the supply and dissemination of news to newspapers as may, from time to time, appear to it to be desirable; (*g*) to provide facilities for the proper education and training of persons in the profession of journalism; (*h*) to promote a proper functional relationship among all classes of persons engaged in the production or publication of newspapers; (*i*) to study developments which may tend towards monopoly or concentration of ownership of newspapers, including a study of the ownership or financial structure of newspapers, and if necessary, to suggest remedies therefor.

# PUBLIC HEALTH

MATTERS connected with health fall largely in the State field.

The Centre is, however, directly responsible even for State subjects in the Union Territories of Delhi, Andaman and Nicobar Islands and Minicoy and Amindivi Islands.

The Central Health Service Rules, 1963 were notified in the Gazette during the first half of 1963. The rules came into force with effect from 15th May 1963. The Service will cover all medical and public health posts under the Central Government and the Union Territories other than those under the Ministries of Railways and Defence.

The strength of the Service at the initial constitution will be 1,030 permanent posts and 1,303 temporary posts. This includes posts under the Delhi Municipal Corporation, the New Delhi Municipal Committee, the All India Institute of Mental Health, Bangalore, the Employees' State Insurance Corporation and the Lady Hardinge Medical College, New Delhi. The posts under these organizations will be filled by members of the Central Health Service without any extra remuneration.

An 18-member Health Survey and Planning Committee was appointed in June 1959 to review developments in public health under the chairmanship of Dr. A. Lakshmanaswamy Mudaliar and to make recommendations for the Third and subsequent Five Year Plans. The Committee gathered information on different subjects from the States, and submitted their report to the Government in Jan. 1962. The report was considered by the Central Council of Health in their meeting held in New Delhi on 9th and 10th April 1963 and the action suggested by the Council on various recommendations of the Committee is being taken.

### CENSUS

Hospitals and Dispensaries 12,600 (March 1961); Beds 195,390 (1961); Primary Health Centres 3,352 (March 1963); Medical Colleges 79 (1963); Annual admission 8,000; Dental Colleges 13; Annual admission 400; Doctors 81,888 (March 1964); Vaids 150,000 (1961); Compounders 20,801 (1961); Vaccinators, 5,872 (1961); Dentists 3,802 (1961); Nurses 31,190 (March 1963); Auxiliary Nurses/Midwives 25,430 (March 1963); Health visitors 2,960 (March 1963); Nurse dais/Dais 15,200 (Sept. 1962); Sanitary Inspectors 11,000 (March 1962); Pharmacists 65,000 (1962); Malaria Units 391 (March 1963); Filaria units 47 (March 1962); T.B. clinics 263 (March 1963); T.B. Training Centres 13 (March 1963); T.B. Beds 27,809 (March 1963); B.C.G. Teams 174 (March 1963); T.B. tested by the teams 34 million (March 1963); B.C.G. vaccinated 13 million (March 1963); Leprosy Centres 137 (March 1963); V.D. Headquarters Clinics 5 (March 1963); V.D. District Clinics 91 (March 1963).

### VITAL STATISTICS

The registered All-India birth rates, death rates and infant mortality rates are given below:

| — | Birth rate. | Death rate. | Infant Mortality rate. |
|---|---|---|---|
| 1953 .. | 25·2 | 14·9 | 125 |
| 1954 .. | 24·6 | 12·5 | 114 |
| 1955 .. | 26·7 | 11·7 | 103 |
| 1956 .. | 22·4 | 10·4 | 109 |
| 1957 .. | 22·0 | 11·2 | 103 |
| 1958 .. | 22·3 | 11·5 | 102 |
| 1959 .. | 23·6 | 9·9 | 88 |
| 1960 .. | 22·8 | 10·0 | 87 |
| 1961 .. | 23·1 | 10·1 | 83 |
| 1962 .. | 22·9 | 9·7 | 81 |

The infant and maternal death rates in some of the Indian cities are given below:

| Name of the City | Infant mortality rate per thousand live births. | | Maternal mortality rate per 1,000 live and still births. | |
|---|---|---|---|---|
| | 1963 | 1962 | 1963 | 1962 |
| Ahmedabad .. .. .. .. .. .. .. .. | 101 | 96 | 0·7 | 0·1 |
| Bangalore .. .. .. .. .. .. .. .. | 67 | 75 | 0·7 | 0·6 |
| Bombay .. .. .. .. .. .. .. .. | 81 | 84 | 1·1 | 1·0 |
| Calcutta .. .. .. .. .. .. .. .. | 127 | 108 | 1·6 | 1·0 |
| Delhi .. .. .. .. .. .. .. .. | 67 | 75 | 0·3 | 0·5 |
| Hyderabad .. .. .. .. .. .. .. .. | 50 | 51 | 0·5 | 0·6 |
| Lucknow .. .. .. .. .. .. .. .. | — | 85 | — | 0·2 |
| Madras .. .. .. .. .. .. .. .. | 108 | 97 | 1·0 | 1·6 |
| Nagpur .. .. .. .. .. .. .. .. | 97 | 96 | 4·7 | 4·8 |

* Now under detention under the Defence of India rules.

## TROPICAL DISEASES

The following table gives the number of deaths and death rates (number of deaths for every million of the population) from different diseases recorded in the country for 1962 and 1961.

| | 1962* | | 1961* | |
|---|---|---|---|---|
| | Total | Rate | Total | Rate |
| Cholera | 11,404 | 28·29 | 26,947 | 66·78 |
| Dysentery & Diarrhoea | 1,79,714 | 445·87 | 2,19,654 | 544·36 |
| Fevers | 13,64,252 | 3,775·96 | 14,68,809 | 3,640·11 |
| Malaria | § | § | § | § |
| Plague | 200 | 0·49 | 131 | 0·32 |
| Respiratory disease | 3,12,144 | 849·38 | 342,391 | 848·54 |
| Smallpox | 35,173 | 87·26 | 38,180 | 94·62 |
| Tuberculosis | § | § | § | § |
| Other Causes | 15,92,957 | 3,941·91 | 15,98,101 | 3,960·54 |
| Total | 35,50,315 | 8,785·58 | 37,42,962 | 9,276·09 |

* Excluding Manipur and Tripura.

§ Not available.

Death rates from certain causes recorded in the various States of India (Number of deaths for every million of population) for 1961 and 1962.

| States/Territories | Year | Cholera | Smallpox | Plague | Fever | Dysentery and Diarrhoea | Respiratory | All other causes | Total |
|---|---|---|---|---|---|---|---|---|---|
| Andhra Pradesh | 1961 | 19·09 | 69·88 | 0·03 | 2,520·22 | 371·51 | 549·03 | 3,949·71 | 7,027·23 |

## NATIONAL INSTITUTE OF COMMUNICABLE DISEASES

The National Institute of Communicable Diseases was inaugurated on July 30, 1963.

The objectives and functions of the new Institute are to advise State Governments on all matters pertaining to communicable diseases and initiate investigations in these diseases. It will also assist State organisations in carrying out investigations taken up by them. In view of the fact that National Programmes already exist with reference to some of the communicable diseases, such as Malaria, Tuberculosis, Leprosy and Smallpox, the emphasis at the Institute to begin with would be on vector-borne diseases and infections of animals communicable to man.

The Institute will undertake research into all basic facts underlying the prevalence and spread of communicable diseases and their prevention and study of aetiological agents, vectors, mechanism of infection, including endemic and epidemic phenomena, and any zoonotic reservoirs.

The Institute will conduct epidemiological investigations, including mapping of endemicity, study communicable disease statistics on modern lines, and generally elucidate the underlying principles of prevalence of communicable diseases in the country. Another aspect of the Institute's work will involve clinical investigations in communicable diseases, including treatment and study of early diagnostic technique, relapse problems and effects of new drugs. The Institute will publish the results of its findings and bring out guides and bulletins for the use of the medical profession.

Arrangements will be made at the Institute for training research workers and teaching and training personnel in epidemiology, medical zoology and control of communicable diseases. One course of training in epidemiology (duration five months) attended by 14 medical officers was conducted in 1964. Another course (duration 3 months) commenced at the Institute with 22 candidates in April 1965.

With the expansion and reorganisation, the Institute will have six divisions for Biochemistry, Epidemiology and Statistics, Medical Entomology, Microbiology, Training and Administration, and Zoonosis. The Institute has been recognised by ten universities for the purpose of post-graduate research degrees of Ph.D. & D.Sc. (PH).

The Institute has been entrusted with the work of evaluating the National Smallpox Eradication Programmes in the country.

**Venereal Diseases & Other Allied Treponemal Diseases:** Among communicable diseases, venereal diseases will easily rank the third major problem, next only to malaria and tuberculosis. Their prevalence is relatively higher in the larger cities, ports, industrial areas and in some of the sub-Himalayan tracts. The common venereal diseases prevalent and of public health importance are six, namely, Syphilis, Gonorrhoea, Chancroid, Granuloma, Inguinale, and Lymphogranuloma Venerum. With the increasing shift of population from rural to urban areas as a result of rapid industrialisation of the country, venereal diseases are likely to assume even greater importance in the future.

Control measures against venereal diseases are distinctly different from those of other communicable diseases for various reasons. Here we have to deal with a chronic disease, with a long period of latency. It requires a lot of persuation to induce people to seek diagnosis and treatment. Epidemiological and educational measures are as important as treatment.

The first major step taken towards control of these diseases was the establishment of a W.H.O. V.D. Demonstration Team in Himachal Pradesh in 1949. The team carried out extensive survey and mass treatment programme in the area and also trained 16 teams deputed by the different State Governments. The team was withdrawn in 1951 and the work continued and expanded by the Himachal Pradesh Administration. As a result of these a reduction in the incidence of these diseases has been observed.

With the ultimate object of having a V.D. Clinic at the headquarters of each State, at the headquarters of every district and at important cities and industrial townships, a beginning was made by the inclusion of a scheme for control of Venereal Diseases in the Second Five Year Plan for the establishment of 8 State Headquarter Clinics and 75 district headquarter clinics. Provision was also made for free supply of penicillin (PAM) to all these V.D. Clinics. V.D. Training facilities were also made available at the Institute of Venereology, Madras, and at the V.D. Training & Demonstration Centre, New Delhi.

The expenditure in respect of the scheme was shared between the Central and State Govts. at the ratio of 75 : 25 in respect of non-recurring expenditure such as equipment and 50 : 50 in respect of recurring expenditure and training.

During the 2nd Plan, 5 State Headquarter Clinics and 95 district clinics were established in the country. During the Third Plan upto the end of March, 1965, two State Headquarter Clinics and 30 district clinics have been established. Further requests for establishment of 8 more V.D. Clinics during 1965-66 have also been received.

Social voluntary agencies such as the Association for Moral and Social Hygiene in India and the Delhi Maternity Hospital were given financial assistance to establish V.D. Clinics as a result of which 4 and 1 V.D. Clinics respectively were established by them.

According to reports received the number of patients treated in these clinics during the year 1964 was 4,30,916.

Further progress was made for the establishment of an inter-laboratory evaluation programme of serological methods at the V.D. laboratory of the Institute of Venereology, Madras with Central Govt. assistance.

Proposals have been included in the V.D. control programme as a Central sponsored scheme.

A V.D. Advisory Committee has been formed with the Director General of Health Services as the Chairman and its second meeting was held in 1964.

**Yaws:** Yaws is prevalent in some areas of Andhra Pradesh, Maharashtra, Madhya Pradesh and Orissa. While the work in Andhra Pradesh has been completed, it is expected that these teams would cover the entire area in Madhya Pradesh and Orissa shortly.

**Cancer:** The number of persons who die of cancer annually is believed to be in the neighbourhood of 2 lakhs.

Limited surveys conducted by the Indian Cancer Research Centre, Bombay, during the past few years showed that in India all types of cancer occurring in the different parts of the body were prevalent; that the total incidence of cancer was probably the same in India as in the other countries of the world; that there was a greater frequency of oral cancer in Western India than in Europe and North America; that smoking and chewing of tobacco had some causal relationship to the incidence of oral cancer; and that lung cancer was prevalent in India on the same scale as in Western countries.

There are 40 general hospitals in the country where facilities for cancer treatment are available.

Their locations are as follows: Three in the Punjab (Amritsar, Gurdaspur, Patiala), four in U.P. (Agra, Lucknow, Allahabad), four in Madras (Madras and Madurai), three in Maharashtra (Bombay, Nagpur), three in Gujarat (Ahmedabad, Bhavnagar, Jamnagar), four in Mysore (Bangalore, Mysore, Mangalore), three in Kerala(Trivandrum, Ernakulam and Kozhikode), two in Assam (Dibrugarh and Shillong), four in Rajasthan (Jaipur, Bikaner, Jodhpur, Ajmer), one in Orissa (Cuttack), one in Bihar (Patna), four in West Bengal (all in Calcutta), two in Delhi and two in Andhra Pradesh (Visakhapatnam, Hyderabad).

Research is conducted at the Cancer Research Centre, Bombay, Tata Memorial Hospital, Bombay, Chittaranjan Cancer Institute, Calcutta and the Cancer Institute, Madras.

### Cobalt Beam Therapy Unit

Undermentioned Hospitals/Institutions have so far been/being supplied one unit each under Colombo Plan Capital Aid Programme.

Chittaranjan Cancer Hospital, Calcutta; Tata Memorial Hospital, Bombay; Christian Medical College Hospital, Ludhiana; Cancer Institution (WIA), Madras; Christian Medical College Hospital, Vellore; Medical College Hospital, Trivandrum; Safdarjang Hospital, New Delhi; S. C. B. Medical Hospital, Cuttack; Radium Institute & Cancer Hospital, Hyderabad; J. K. Institute of Radiology & Cancer Research, Kanpur; Victoria Hospital, Bangalore; Patna Medical College, Patna; Medical College, Pondicherry; All India Institute of Medical Sciences, New Delhi; Sawai Man Singh Medical College, Jaipur; Medical College Hospital, Calcutta; Tata Memorial Hospital, Bombay; Recommended for allotment of Cobalt Therapy Units: Post-graduate Institute of Medical Education and Research, Chandigarh; Medical College, Dibrugarh; P. B. S. M. General Hospital for Men and Women, Bikaner; Miraj Medical Centre, Miraj; Gujarat Cancer Society, Ahmedabad.

## PUBLIC HEALTH AGENCIES

A Central Council of Health exists with the Union Health Minister as chairman and State Health Ministers as members.

The Council is an advisory body and in that capacity performs the following duties:—(*a*) to consider and recommend broad lines of policy in regard to matters concerning health in all its aspects; (*b*)to make proposals for legislation; (*c*) to examine the whole field of possible co-operation on a wider basis in regard to inter-State quarantine during times of festivals, outbreaks of epidemic diseases and serious calamities such as earthquakes, famines, etc., and to draw up a common programme of action; (*d*) to make recommendation to the Central Govt. regarding distribution of available grants-in-aid for health purposes to the States and to review periodically the work accomplished in different areas through the utilisation of these grants-in-aid and (*e*) to establish any organisation or organisations invested with appropriate functions for promoting and maintaining co-operation between the Central and State Health administrations.

The body in charge of research is the Indian Council of Medical Research.

A sum of Rs. 3·5 crores is provided for research programmes under the Council for the 3rd Plan. The annual grant to the Council amounts to about Rs. 50 lakhs.

There are five main medical depots — one each at Bombay, Calcutta, Hyderabad, Karnal and Madras. The depots at Bombay and Madras have pharmaceutical factories attached to them.

*List of Medical Research Institutes/Laboratories in India:* Indian Council of Medical Research, Medical Enclave, New Delhi; Indian Cancer Research Centre, Bombay; Central Research Institute, Kasauli (Himachal Pradesh); All India Institute of Hygiene and Public Health, Calcutta; School of Tropical Medicine, Calcutta; Malaria Institute of India (Central Institute for Communicable Diseases), Delhi; Central Drugs Laboratory, Government of India, 3, Kyd Street, Calcutta; Haffkine Institute, Bombay; Nutrition Research Laboratories, Tarnaka, Hyderabad-7 (Dn.); Pasteur Institute of Southern India, Coonoor; K. E. VII Memorial Pasteur Institute, Shillong; Government Vaccine Institute, Namkum (Ranchi); Regional Research Laboratory, Jammu, Tawi; B. C. G. Laboratory, Guindy, Madras-15; Vaccine Institute, Public Health

Institute ,Mysore, Bangalore ; Leprosy Research Centre, Madras ; King Institute, Guindy, Madras ; Virus Research Centre (B. J. Medical College, Old Building), Poona ; Vallabhbhai Patel Chest Institute, University of Delhi, Delhi ; Pasteur Institute, School of Tropical Medicine, Calcutta-12 ; Cancer Institute, Madras ; All India Institute of Mental Health, Bangalore ; Central Drug Research Institute, Lucknow ; Chittaranjan Cancer Research Centre, Calcutta ; Radium Research and Cancer Hospital, Hyderabad (Andhra Pradesh) ; Institute of Post Graduate Medical Education and Research, Calcutta ; Central Leprosy Teaching and Research Institute, Tirumani ; National Chemical Laboratory, Poona ; All India Institute of Medical Sciences, New Delhi ; National Institute of Experimental Medicine and Biochemistry, Calcutta-13 ; Central Food Technological Research Institute, Mysore-2 ; Institute of Child Health, Calcutta ; National Medical Institute, Calcutta ; Institute of Ophthalmology, Aligarh ; Pasteur Institute, Patna ; Bose Institute, Calcutta ; Institute of Venereology, Madras ; Institute of Obstetrics and Gynaecology, Madras ; Barnard Institute, Madras.

## CONTROL OF DISEASES

Steps are being taken to control a number of diseases that are rampant.

### Malaria

The National Malaria Control Programme was launched from April, 1953. This programme functioned for 5 years and with effect from April 1958 this programme has been switched over to National Malaria Eradication Programme.

At the end of 1958-59, 230 malaria eradication units, designed to afford protection to 230 million people, had been allotted. These units afforded protection to about 214·15 million people.

During 1959-60, another 160 units were allotted, bringing the total to 390 units (230 endemic and 160 hypo-endemic), covering the entire population of the country exposed to malaria, with spraying of residual insecticides like D.D.T. in every roofed structure.

With the liberation of Goa, malaria eradication operations were extended to that Territory and 0·50 unit was allotted in 1962-63. An additional 0·50 unit has been allotted to Orissa State in 1963-64 for Sundergarh area. Thus at present the number of units allotted and functioning is 391·00. The Government of India have also decided to extend malaria eradication measures to the neighbouring country of Bhutan in order to check infiltration of the infection from across the border and 1·00 unit has been allotted to Bhutan, thereby raising the total number of units to 392·00. However, the unit allotted to Bhutan has not been established yet.

As a result of eradication operations the child spleen rate, infant parasite rate and proportional case rate have shown a reduction of 94·9, 97·5 and 88 per cent respectively upto 1960-61 as compared to the data for 1953-54. The proportional case rate has shown further decrease from 88 per cent to 96·3 per cent upto end of 1962.

Six Regional Co-ordinating Organisations with headquarters at Hyderabad, Bangalore, Baroda, Bhubaneswar, Shillong and Lucknow are functioning for co-ordinating the activities of N.M.E.P. A special working committee constituted for advice and guidance in technical matters have been established at the Centre. High level working committees have been formed in almost all the major States.

The expenditure on National Malaria Eradication Programme during the Third Five Year Plan is now estimated to be Rs. 74·86 crores.

The W.H.O. is also assisting the programme by way of meeting partially the expenditure on the salaries of the staff at the Regional Co-ordinating Organisations, meeting travel cost of trainees and conference participants, providing fellowships for training abroad and making available services of W.H.O. epidemiologists etc.

The U.S.A.I.D. have also made available the services of two epidemiologists and one medical entomologist besides providing fellowships to Indian participants.

### Filaria

National Filaria Control Programme was launched as a large scale pilot project with the assistance of U.S.A.I.D. towards the end of 1955. A total provision of Rs. 236·61 lakhs has been made for the programme in the 3rd Plan under the States.

Under the Programme, 18 Survey Units and 47 Control Units were established.

The control measures adopted under the Programme consisted of : (1) mass therapy with diethylcarbamazine, (2) anti-mosquito measures and (3) anti-larval measures.

As the first two measures did not produce the desired results, they have been given up. Anti-larval measures continue to be in operation. Wherever these measures have been adequately applied, the mosquito densities have been considerably reduced and consequently the transmission of the infection has been reduced.

A Committee was appointed in 1960 to evaluate the National Filaria Control Programme. In its report submitted in July, 1961, the Committee had recommended :—

(1) Re-organisation of Filaria Control Units on the basis of population.
(2) Establishment of three more Research-cum-Training centres on the lines of the one already functioning at Kozhikode.
(3) Establishment of special bureau in each State as a part of State Bureau of Epidemiology.
(4) Establishment of Research-cum-Training units in each State for conducting research and evolving suitable methodology for the control of filariasis in rural areas.
(5) Establishment of six filaria clinics attached to hospitals.
(6) Taking up of *B. Malayi* project in Kerala State.
(7) Intensifying research in filariasis.
(8) Provision of proper facilities for health education for filariasis.
(9) As a long-term measure, provision of proper drainage facilities for the disposal of sewage.

It was estimated that for achieving the above targets, an expenditure of above Rs. 11 crores would be required. However, as the provision was for Rs. 236·61 lakhs only, it was left to the States to phase out the programme and make necessary provision in their plans. But due to financial stringency, the States have not been able to implement the recommendations.

A pilot project for the control of *B. Malayi* infection in Kerala is being established.

### Leprosy

It is estimated that there are about 2·5 million leprosy patients in India, the incidence in some places being as high as 40 per thousand. About 20 per cent of the estimated cases are in the infective type.

In India the problem of leprosy is massive in eight States. The estimation of cases in these States has been done on the basis of available epidemiological data. In between Andhra Pradesh and Madras, it has been estimated that there are nearly half the total number of cases of leprosy in India.

The names of the States with population in millions and estimated number of cases in lakhs respectively are as follows :—

Madras 33·6–6·4 ; Andhra Pradesh 36·0–5·2 ; Bihar 46·5–2·8 ; Maharashtra 39·6–2·2 ; Mysore 17·2 (Population of endemic zones only)—1·4 ; Orissa 17·5–1·9 ; U.P. 29·2 (Population of endemic zones only)—1·4 ; West Bengal 35·0–2·4 ; Remaining States N.A.—1·3 ; Total of estimated no. of cases in lakhs 25·0.

Treatment with sulphone is now regarded as the most potent and generally applicable weapon in the control of leprosy. Apart from clinical improvement, sulphone therapy brings about a gradual reduction in the number of leprosy bacilli in the near skin, and promotes healing of ulcers in nose and elsewhere. It also reduces infective discharge from patients.

The Leprosy Control Programme of the Government of India continued to function satisfactorily during 1964. The Central Assistance under the Scheme was given to the State Governments during the first two Plan periods. During the Second Plan period the Government of India met full non-recurring expenditure to the extent of 80 per cent for the first year, 70 per cent for the second year, 50 per cent for the third year, 30 per cent for the fourth year and 20 per cent for the fifth year. The grant was released after the State Governments submitted their proposals and the Government of India incurred the expenditure for their share.

During the First Plan, 33 Leprosy Control Units were established in various States. The programme was expanded during the Second Plan and 104 centres were added. Upto the end of 1964, 166 Leprosy Control Units have been functioning in the country.

104 Additional Subsidiary Centres were established during the Second Five Year Plan. During the first three years of the 3rd Plan, 28 leprosy control centres have been established. Thus a total of 162 centres have been located in various States (December 1963).

In areas having a prevalance rate of Leprosy less than 10 per thousand, the S.E.T. Centres (Survey Education and Treatment Centre) attached to Hospital, Primary Health Centre, dispensaries etc. have been established. Para Medical Workers are responsible to do the control work in and around the Hospital, Primary Health Centre, Dispensary and they cover a population of 20,000 in plain areas and 5,000 in hilly areas. Upto Second Plan 194 S.E.T. centres were established and during first four years of the III Plan 363 S.E.T. more Centres have been established. Thus upto December, 1964, 557 S.E.T Centres were functioning in the country.

During the III Plan period the Government of India decided to give cent per cent grant to suitable Voluntary Organisations for undertaking survey and domiciliary work in leprosy control. The amount of grant for one year per Institution is Rs. 30,800 (Rs. 18,000 non-recurring and Rs. 12,800 recurring). Sanction was accorded to 38 such Institutions out of which 33 were working in December, 1964.

Upto December, 1964 the consolidated work done by 166 Control Centres, 557 S.E.T. Centres and 33 Voluntary Agencies is as follows :—

Population covered 48·3 million ; persons examined 20·6 million ; cases detected 2,15,912 ; recorded cases 4,70,403 (inside project area 2,82,665 and outside project area 1,87,738) ; cases registered for treatment 4,38,400 (inside project area 2,50,662 and outside project area 1,87,738) ; healthy contacts registered 9,85,929 ; healthy contacts examined 2,27,099.

The Directorate General of Health Services, published an all India Leprosy Directory giving first hand information of the activities of both the Government and the voluntary organisations working in the field of leprosy. The second edition is under preparation.

The Government of India constituted a Leprosy Advisory Committee consisting of representatives of officials and voluntary organisations, with the Union Health Minister as Chairman, to review the working of leprosy Control Programme in different parts of the country, and to suggest measures for grants to voluntary institutions for assistance for participating in the Leprosy Control Programme. The Committee held ten meetings up to Dec. 1964.

The Central Leprosy Teaching and Research Institute was established in 1955 at Chingleput in Madras State. The Institute undertakes

research in the various problems concerning leprosy, promotes field studies for the application of the results of the researches to control the spread of leprosy in sufficient numbers and of the requisite quality, functions as a centre for offering technical advice and guidance for the promotion of anti-leprosy work on sound lines and participates actively in the organisation and development of State Leprosy Institutes when they are established and make available its services for the investigation of special problems in all parts of the country.

So far 256 Doctors, 328 Para-Medical workers, 33 Physiotherapy Technicians and 4 W.H.O. Fellows and one medical officer on a fellowship from Hind Kusht Nivaran Sangh have been trained by the Institute.

With the collaboration of the State Government of Maharashtra, a training centre at the Medical College and Hospital, Nagpur has been started from 22 July 1959 for giving six weeks training to doctors.

In collaboration with the Gandhi Memorial Leprosy Foundation, a training programme was started on 15th December 1960, at Chilakalapalli in Andhra Pradesh for the training of the senior medical officer from the public health department of the States which have established Leprosy Subsidiary Centres under the National Leprosy Control Scheme.

During the first four years of the Third Plan Leprosy Training Centres have been established one each in Andhra Pradesh, Kerala, Madhya Pradesh, Madras, Maharashtra, Bihar, Orissa and Uttar Pradesh for the training of Para-Medical workers. West Bengal is expected to start one shortly.

The physical targets for the Third Plan are to establish the 50 Leprosy Control Units, 786 S.E.T. Centres and 10 Training Centres for Para-Medical workers and the achievements upto Dec. 1964 are 32 Leprosy Control Units, 363 S.E.T. Centres and 8 training centres.

The WHO and the UNICEF are assisting the Government of India and the State Governments in the National Leprosy Control Programme. The assistance is being given in the shape of personnel, fellowships, transport, equipment, drugs, teaching aids and stipends for trainees.

The WHO has given two consultants to help National Leprosy Control Programme. The third consultant has been assigned Danish Leprosy Centre, Pogiri, Andhra Pradesh.

The UNICEF has so far released 34 different models of vehicles, 165·95 million depsone tablets, 10 sets of training equipments, 34 microscopes, one gramophone, one adding machine and $9,894·24 as stipends for trainees.

Private bodies like the Mission to Lepers, an international society, Hind Kusht Nivaran Sangh (Indian Leprosy Association) and Gandhi Memorial Leprosy Foundation have been taking active part in controlling leprosy.

The Hind Kusht Nivaran Sangh was formed in 1949 taking over the assets and liabilities of the British Empire Leprosy Relief Association (B.E.L.R.A.). It has its headquarters in New Delhi and branches in 10 States. The Sangh's activities include financial assistance to leprosy homes and clinics, propaganda through publication of posters and other material assistance in the training of medical workers and physiotherapists, and publication of the quarterly journal " Leprosy in India ".

The Gandhi Memorial Leprosy Foundation, a leprosy section of the Gandhi Smarak Nidhi (Gandhi National Memorial Trust) was established in 1951. The activities of the Foundation include house to house case detection work, out-patient treatment of all detected cases and training of leprosy workers. It has got 10 control units established in various States.

A draft Fourth Plan for Leprosy Control Programme has been approved by the Expert Committee. It is proposed to cover an additional 140 million population. The entire endemic population of Madras and Andhra Pradesh and the population of high endemic zones of Bihar, Maharashtra, Mysore, Uttar Pradesh, Orissa and West Bengal will be covered. The estimated expenditure works out to be about Rs. 17·6 crores.

### Tuberculosis

Mortality figures for cities show a tuberculosis death-rate ranging from 200 to 250 per 100,000 as far as can be ascertained. Little information is available from rural areas. About six to seven million people are estimated to be affected by the disease and about 1·8 million cases among them are infectious.

The national tuberculosis survey conducted by the Indian Council of Medical Research, came to the following conclusions :

1. The morbidity of T.B. varies from 13 to 25 per thousand persons in different areas ; 2. The prevalence of T.B. in villages, small towns and cities is not so markedly different as originally expected ; 3. The morbidity rates are lower for females than for males ; 4. The prevalence of T.B. among the persons of the age group of 45 years and above is considerably higher than for the age group of 5 to 34 years ; and 5. Bacteriologically positive cases varied from 2 to 8 per thousand persons in different areas.

The Government of India has an Adviser on Tuberculosis, who advises the Central Government and the various State Governments on tuberculosis control policy and helps in coordinating various tuberculosis control activities.

Prophylactic (BCG) Vaccination against tuberculosis was introduced in India on a restricted scale in August, 1948 with the assistance of WHO/UNICEF. The mass campaign was started in April, 1951 and has since been in progress in all the States. Upto the end of Dec. 1964, 22·15 crore persons had been tuberculin tested of whom about 8·12 crores were vaccinated with BCG and thus given protection against tuberculosis.

In Dec. 1964 the number of BCG teams each containing one team leader and six BCG technicians rose to 182.

With a view to covering the younger group of population more thoroughly house to house vaccination has been started and vaccination of the new born through maternity hospitals and maternity centres has been advocated in some States.

The contribution of UNICEF and WHO in terms of services of international personnel, provision of equipment and supplies consisting of vaccination kits, vehicles, film projectors, public address equipment, etc. would amount to approximately 2.3 million dollars upto end of 1964.

Field studies have indicated that it is quite safe to offer direct vaccination to the entire young age group and such a procedure will be able to cover the entire susceptable group in a reasonable period of time.

*T.B. Demonstration and Training Centres :* There are at present 15 anti-tuberculosis demonstration and training centres, one each at New Delhi, Patna, Trivandrum, Madras, Hyderabad, Bangalore, Patiala, Agra, Calcutta, Ahmedabad, Cuttack, Srinagar, Ajmer, Darbhanga, Nagpur.

*National Tuberculosis Institute :* This was started at Bangalore by the Government of India with the help of WHO and UNICEF, to give special training to key staff required for the National T.B. control programme and for investigating effective T.B. control methods which would be applied on a community basis. This Institute runs regular courses of three months' duration to train doctors, home visitors, laboratory technicians and x-ray technicians in batches of 100 each.

*T. B. Clinics :* It was proposed to establish or upgrade about 200 T.B. Clinics in the country during the Third Plan so as to have at least one T.B. Clinic in each District. Upto the end of 1964, 414 T.B. clinics have been established in the country. The UNICEF have so far supplied equipment to 53 TB clinics/centres out of which 41 centres are fully equipped. The necessary equipment is likely to be supplied to the remaining TB clinics when the clinic buildings are ready and the clinic staff has been trained at the N.T.I., Bangalore.

*University Training Centres :* There are about six University Training Centres in the country which train doctors for Diploma in Tuberculosis (T.D.D.). Attached to the Delhi University is the ' Patel Chest Institute ' for teaching and research in T.B. and other diseases of the chest. The Government of India also have provided for research in various aspects of T.B. by providing funds for the purpose to the ICMR.

Two hospitals for tubercular children have been established, one in Delhi and the other at Arogyavaram in Andhra Pradesh with 52 and 76 beds respectively. According to the latest available figures there are in the country 71 sanatoria, 70 hospitals, 225 clinics, 151 wards with a strength of a little over 34,000 beds for the treatment of T.B. patients. This includes beds established for isolating advanced cases of T.B.

*After-care and Rehabilitation Work Centres :* There are ten After-care and Rehabilitation Colonies in the country for giving vocational training to ex-tuberculosis patients.

The building of a Rehabilitation Centre at Dhubulia (West Bengal) has been completed and equipment is being procured. The centres at Amargarh, Hyderabad and Delhi are complete but work has not yet started for want of equipment.

The Union Ministry of Health proposed to establish 200 tuberculosis clinics, 5 T.B. Demonstration and Training Centres, 5,000 isolation beds, and about 25 mobile T.B. clinics for rural areas during the Third Plan in addition to continuing the mass BCG vaccination programme. Against this target of the Third Plan, 67 clinics were established upto the end of 1964 and about 40 more were expected to be established or upgraded during the last year of the Plan period ; 8 T.B. demonstration centres and over 1,500 T.B. beds have been established during the Plan period. The Central allocation for the supply of free anti-TB drugs to T.B. clinics is expected to total Rs. 70 lakhs in each of the remaining two years of the Plan.

*Publicity and Education :* This machinery is to form the nucleus of the health education and publicity work in connection with the overall tuberculosis control programme in the country.

### Goitre

Endemic goitre associated with critinism, deaf-mutism and various other grades of physical and mental deterioration is prevalent in the northern parts of Kashmir, Punjab, Himachal Pradesh, Bihar, Uttar Pradesh, West Bengal, Assam, N.E.F.A. and Manipur. According to the latest available data, approximately 40 million people inhabit this goitrous belt of the country and at least 9 million of them suffer from goitre.

The incidence of goitre with the names of States already surveyed and the figures in percentage are as follows :—

Himachal Pradesh 20·9 to 39·9; Uttar Pradesh 26·3 to 37·0; Bihar 20·3 to 41·7; Punjab 40·3 to 52·3 ; Naga Hills 26·1 to 50·2; Jammu and Kashmir 31 ; West Bengal 30·0 to 33·0.

At present there is one iodised plant supplied by UNICEF functioning at Sambhar Lake. A spray type iodisation plant had been received from the UNICEF in 1964 and has been installed in Calcutta. At the end of 1965, 9 more spray type plants were expected to be received from the UNICEF. All these plants would process two lakh tons of iodised salt per year.

A provision of Rs. 80 lakhs has been made during the Fourth Plan to process two lakh tons of salt.

**National Smallpox Eradication Programme:**

The National Smallpox Eradication Programme was launched as a centrally assisted scheme in most of the States in the last quarter of 1962. In 1964, 152 eradication units with full complement of staff operated in all the States and Union Territories. Upto the end of 1964, 66·8 per cent of the population has been given protection against smallpox and out of 328 districts (excluding Union Territories), 166 districts have been covered. During 1964, 35,627 cases with 10,067 deaths were reported as against 73,176 cases and 22,179 deaths in 1963.

To meet the requirements of the vaccine, the Government of the USSR have gifted 650 million doses of vaccine.

The Plan allocation for this programme is Rs. 10·5 crores. The U.S.A.I.D. have also given a sum of Rs. 471 lakhs towards this programme.

**Cholera:** The incidence of cholera is of a considerable magnitude in the States of West Bengal, Bihar, Uttar Pradesh, Orissa, Andhra Pradesh, Madhya Pradesh, Gujarat, Maharashtra, Madras and Mysore. At present the incidence is low in the Punjab, Assam and Kerala and is not a major public health problem in Rajasthan and Jammu and Kashmir. The incidence is more marked in most States in the second half of the year in contrast to smallpox which is prevalent in the first half of the year.

In accordance with the recommendations of the Central Expert Committee on Smallpox and Cholera, the Indian Council of Medical Research has established a Cholera Research Centre in the Central Food Laboratory building at 3, Kyd Street, Calcutta, to carry out continuous research on various aspects of the problem of cholera with a view to developing ultimately practical measures for the control and prevention of the disease.

The Government of West Bengal who are collaborating in the project have agreed to place two wards of 40 beds each in the Infectious Diseases Hospital, Calcutta, at the disposal of the Indian Council of Medical Research for this purpose.

The Centre started functioning in February, 1962, with the object of carrying out researches on various aspects of the cholera problem on a long term basis. A Pilot Project for the evaluation of the efficacy of different types of cholera vaccines has been started in Calcutta under the auspices of West Bengal Government in collaboration with the I.C.M.R. and W.H.O. The Cholera Research Centre is playing an active part in this project.

Researches on immunochemical, genetic and other aspects of cholera are also being conducted at various institutions under the auspices of the Council.

### Maternity

Maternity and Child Welfare are very important components of health service. Seventeen States and Union Territories, have established posts of Assistant Directors of Health Services to direct Maternity & Child Welfare Services, *viz.* the States of Andhra Pradesh, Assam, Bihar, Gujarat, Jammu and Kashmir, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh, West Bengal, Delhi and Himachal Pradesh. The Union Govt. has an officer in the Directorate General of Health Services who assists States and Union Territories on Maternity & Child Welfare activities.

Non-official bodies engaged in welfare work are the Indian Council for Child Welfare, New Delhi; The Kasturba Gandhi Memorial Trust; The Central Social Welfare Board; and the Indian Red Cross Society.

The Central Social Welfare Board through its State Boards assists voluntary organisations in promoting Maternity and Child Welfare services. As a result, a large number of agencies undertake services for mothers and children and training programmes for staffing the services with trained personnel.

In the rural areas maternity and child welfare services are incorporated as a function of the primary health centres. Upto Dec. 31, 1964, 4,373 primary health centres have been established. Every primary health centre has 3 subcentres and maternity and child welfare services are an integrate part of all these centres. It is expected that by the end of the Third Plan, a public health centre in each block will be established. This will raise the number of centres to 5,223. In urban areas maternity and child welfare services are available at maternity and child health centres established by local bodies and State Govts., in addition to those established by voluntary organisations. Separate maternity beds and paediatric beds are provided in major hospitals at most capital and district levels.

With a view to improving maternity and paediatric services the Govt. of India included in the IInd Five Year Plan, projects relating to the training of dais, auxiliary nurse — midwives and health visitors for assistance to establishment of paediatric centres in medical colleges. The former two schemes are continued during the Third Five Year Plan while the third one has not been included as UNICEF is assisting in the upgrading of paediatric departments of medical colleges.

The scheme for training of dais has been continued in the Third Five Year Plan. The pattern for financial assistance to State Govts. for implementation of this scheme is Rs. 250 per dais trained in the Third Five Year Plan. The training of dais is intended to give orientation training to hereditary indigenous dais in modern techniques of asepsis and make better use of their services. The target of the Third Plan is the training of 30,000 dais. The achievement by the end of the Third Plan is estimated to be not more than 12,000 dais.

During the Fourth Plan, a provision of Rs. 4·35 crores has been made to train 2,50,000 dais.

At the end of September 1964, 3,921 candidates qualified as health visitors from the inception of the scheme in the 1st Plan and 1,063 candidates are under training. The target of 2,000 health visitors is expected to be achieved by the end of the Third Plan and the number of trained health visitors will be raised to 5,000.

### Defectives

The last census of handicapped persons (blind, deaf, crippled, mentally retarded, etc.), took place in 1931. These put the number of blind at about 600,000 and the number of deaf and hard-of-hearing at 230,000.

It is estimated that the total number of blind is about 2,000,000 and the deaf about 700,000 (1961).

There is a Training Centre for the Adult Blind at Dehra Dun to impart training in engineering and non-engineering trades. The present capacity of the Centre is 150 men trainees and 35 women trainees. There is also a common Braille code for Indian languages known as Bharati Braille. The Central Braille Printing Press at Dehra Dun has already published several Braille books in English, Hindi and other regional languages.

At Dehra Dun the Govt. of India have also established a Model School for Blind Children. At present the school has nine classes. Eventually this school will become a Secondary School for blind children.

There are in all 109 institutions for the blind and 68 for the deaf and 22 for the mentally handicapped. 19 institutions cater for the orthopaedically handicapped children.

The Government of India give scholarships to blind and deaf persons between the age of 16 and 30 in order to help them to undertake higher academic education, or, professional, vocational or technical training in normal institutions of learning. Scholarships are also awarded to orthopaedically handicapped children and adults who fall in the age-group of 12-30.

The number of scholarships awarded upto 1962-63 was 1,278. During 1963-64, 517 scholarships were awarded.

The first special Employment Exchange for the physically handicapped under this scheme was established at Bombay in March 1959. The second Exchange in Delhi started functioning from April, 1961. The third exchange came into existence at Madras from April 1, 1962. A fourth exchange in Hyderabad started functioning from September 1962. Four more such exchanges were set up during 1963-64 at Bangalore, Calcutta, Ahmedabad and Chandigarh and one during 1964-65 at Kanpur.

The total number of placements made by these exchanges since their inception upto 31st Dec. 1964 is 1,500.

A separate scheme called "Assistance to Voluntary Organisations for the Handicapped" with a separate set of rules has been formulated. In the Second Plan period this scheme formed part of a general scheme of Assistance to Voluntary Educational Organisations". Under the revised scheme rules for grants-in-aid to Voluntary Organisations for the handicapped have been liberalised. The quantum of assistance has been raised from 60 per cent to 75 per cent.

A training centre for the adult deaf has been set up at Hyderabad during 1962-63 to provide facilities for training in engineering and non-engineering occupations. There were 30 trainees who completed their course in Oct. 1964. The training is now imparted in sheet metal, wiremanship and fitting trades. The Department of Social Security have established a National Library for the Blind at Dehra Dun. The library is being built from books produced by the Central Braille Press at Dehra Dun and books donated by organisations for the blind abroad. The library will have books both in Indian and Foreign languages.

During 1963-64, the Government of India launched a scheme for the Training of Teachers of the Blind on regional basis. The first centre under this scheme started functioning at Bombay with effect from 15th July, 1963, with a batch of 10 trainees. The second centre was started in Delhi with effect from 30th January, 1964, with a batch of 10 trainees. The third centre was set up at Narendrapur in West Bengal in Jan. 1965.

### Mental Disease

The number of mentally ill persons in India who need institutional treatment is estimated at 1·5 million, and of psycho-neurotics about 3 million. The number of hospital beds is a little less than 15,000. Qualified psychiatrists number about 175, and those practising but formally unqualified about 1,000.

There are at present 27 institutions for mentally retarded and handicapped.

Major centres are in: Chandigarh (1); Dehra Dun (1); New Delhi (4); Bombay (9); Trivandrum (1); Bangalore (1); Hyderabad (1).

At present there are 32 mental hospitals with accommodation for about 20,000 patients.

The Mysore Government Mental Hospital at Bangalore and the Hospital for Mental Diseases at Ranchi are the ones which are best equipped.

The following is a list of mental hospitals in India:

Mental Hospital, Tezpur; Hospital for Mental Diseases, Ranchi; Ranchi Manasika Arogyashala (Ranchi); N. M. Mental Hospital, Thana (Bombay); Mental Hospital, Ratnagiri (Maharashtra); Central Mental Hospital, Yeravada; Mental Hospital, Ahmedabad; Mental Hospital, Dharwar; Mental Hospital, Baroda; Mental Hospital, Nagpur; Government Mental Hospital, Madras; Government Mental Hospital, Waltair; Government Mental Hospital, Kozhikode; Punjab Mental Hospital, Amritsar; Mental Hospital, Agra; Mental Hospital, Bareilly; Mental Hospital, Banaras; Mental Hospital, Mankunda, Calcutta; Lambini Park Mental

Hospital, P.O Tiljala, 24 Parganas; Bangiyaunmad Ashram, 29-A, Vivekananda Road, Dum Dum; Mental Observation Ward, Bhawanipur, Calcutta; Mental Hospital, Jalna; Mental Hospital, Srinagar; Mental Hospital, Lashkar; Mental Hospital, Bonganga, Indore; Mental Hospital, Bangalore; Mental Hospital, Jaipur; Mental Hospital, Jodhpur; Mental Hospital, Udaipur; Mental Hospital, Bhavnagar; Mental Hospital, Trivandrum; Mental Hospital, Trichur.

The All-India Institute of Mental Health, Bangalore, established by the Government of India on 15th September 1954, conducts the various post-graduate courses in Diploma in Psychological Medicine (D.P.M.) and Diploma in Medical and Social Psychology (D.M. & S.P.). The M.D. in Psychiatry will be started in the near future. The University of Mysore to which the institute is affiliated and the Governing Body of the institute have approved the introduction of this course. A post-graduate Diploma in Psychiatric Social Work (D.P.S.W.) has also been approved for introduction at this institute. The institution is affiliated to Bangalore University.

Post-certificate course in Psychiatric Nursing is also conducted at the institute. The diploma awarded by the institute is recognised by the Government of India and the Indian Nursing Council.

## PUBLIC HEALTH MEASURES

4,034 primary health centres had been opened by the State Governments/Administration upto March 31, 1964 and 744 primary health centres were proposed to be established during 1964-65 out of which 466 were opened. Thus there were 4,500 primary health centres functioning in the country on March 31, 1965.

The aim is to have one primary health centre in each of the 5,200 blocks by the end of the Third Plan period.

Each primary health centre is getting Central subsidy upto a ceiling of Rs. 67,500 towards non-recurring expenditure on buildings and equipment and Rs. 8,500 per annum towards expenditure on staff and drugs. As against Rs. 19 crores provided in the Second Five Year Plan period a provision of Rs. 16·68 crores has been made by the Govt. of India in the Third Five Year Plan of the States/Union Territories for this programme.

The W.H.O. provides technical assistance and the UNICEF some material and equipment including transport for the programme. The UNICEF has so far allocated $9,610 000 (approximately Rs. 457 lakhs) for this programme. The U.S.A.I.D. has agreed to reimburse the Government of India upto Rs. 70 million for rupee expenditure incurred by the Ministry of Health with effect from 1st April 1961 towards Health Ministry's share of expenditure (which is at present upto Rs. 52,500 per centre) on buildings for Primary Health Centres. It is likely that additional funds will be made available by the UNICEF and the U.S.A.I.D. for the remaining period of the Third Plan.

Total number of primary health centres as on March 31, 1965 (Statewise): Andhra Pradesh 302; Assam 77; Bihar 582; Gujarat 267; Jammu and Kashmir 47; Kerala 146; Madhya Pradesh 374; Madras 144; Maharashtra 414; Mysore 419; Orissa 206; Punjab 220; Rajasthan 187; Uttar Pradesh 733; West Bengal 193; Delhi 8; Himachal Pradesh 41; Manipur 10; Tripura 18; Pondicherry 9; Laccadive, Minicoy and Amindivi Islands 7; NEFA 96.

### Central Government Health Scheme

The Contributory Health Service Scheme has been re-named as Central Government Health Scheme. This Scheme provides a comprehensive medical cover to the Central Government servants and members of their families stationed in Delhi and New Delhi. The Scheme is regarded as a fore-runner of the National Health Service and undertakes to provide facilities for hospitalisation, general and specialised treatment, supply of all medicines, diagnostic facilities including laboratory and X-ray facilities, electric treatment, physiotherapy and special arrangement for treatment of diseases like Tuberculosis, Cancer, Mental diseases, Polio, etc. On the preventive side, general check-up, mass X-ray of chest, preventive inoculations and special Yogic Classes have been provided.

### Water Supply and Sanitation

The National Water Supply and Sanitation Programme initiated by the Ministry of Health in August 1954 is continued during the Third Five Year Plan period with a provision of Rs. 88·95 crores and Rs. 16·33 crores for water supply and sanitation schemes under the urban and rural phases of the Programme. Long-term interest bearing loans were sanctioned for urban water supply and sanitation schemes and 50 per cent grant-in-aid for rural water supply and sanitation schemes.

*National Water Supply and Sanitation Programme (Urban):* Most of the 402 water supply schemes and 103 sewerage schemes estimated to cost Rs. 81·52 crores approved during the first two Plans have been completed and the remaining few are expected to be completed by the end of the Third Plan. In addition, 369 water supply schemes and 106 sewerage schemes, estimated to cost Rs. 62·33 crores and Rs. 25·93 crores respectively, have been approved during the Third Plan upto June, 1965. Loans to the extent of Rs. 46·91 crores were paid to the States during the first four years of the Third Plan for implementation of the scheme. A budget provision of Rs. 15 crores exists for 1965-66.

*National Water Supply and Sanitation Programme (Rural):* The 349 rural water supply and sanitation schemes estimated to cost Rs. 19·23 crores approved during the first two plan periods have been mostly completed. During the Third Plan period, 753 schemes estimated to cost Rs. 13·32 crores have been approved upto March, 1965. Grants-in-aid to the extent of Rs. 4·12 crores were released to the State Governments during the first four years of the Third Plan. A budget provision of Rs. 1·50 crores has been made for 1965-66 for the execution of the schemes.

## DRUGS

The Drugs Act, 1940, is now in force in the whole country except Jammu and Kashmir.

The control over import is exercised by the Central Government through its offices at the ports of Bombay, Calcutta, Cochin and Madras.

The control over manufacture, sale and distribution is exercised by State Governments.

The Drugs and Cosmetics Act has been amended empowering the Central Government to assist State Governments in exercising control over the quality of manufactured drugs. In order to control the sale of spurious drugs in the country, Drugs Act has been amended so as to prevent evasion and to enhance the punishment for the manufacture and sale of sub-standard and adulterated drugs so as to be deterrent. Cosmetics, Ayurvedic and Unani medicines have been brought under the purview of the Drugs Act. Rules for the control of Homœopathic medicines under the Drugs and Cosmetics Rules have been published and have been brought into force.

The Government of India have set up two Pharmacopœia Committees — one for Ayurvedic and the other for Unani for laying down standards of single drugs and compound preparations of these systems. The Chairman of these two Committees is Col. Ram Nath Chopra. The committees consist of leading Vaidyas, Hakims, Pharmacognists, Chemists and Pharmacologists. The two committees have commenced work and it is expected that Ayurvedic and Unani Pharmacopœial lists will be prepared in the first instance pending the preparation of Standard Ayurvedic and Unani Pharmacopœia.

### Hormones

Four firms are at present engaged in the manufacture of cortical and sex hormones with a total installed capacity of 398 kgs./annum.

A scheme for the manufacture of various corticosteroid hormones and intermediates based on indigenous raw materials with a total capacity of 3,000 kgs./annum is under implementation.

### Vitamins

Two units have been set up for the manufacture of Vitamin A with a total capacity of 20 MMU/annum. Production commenced in 1959. Production of Vitamin $B_{12}$ also started in the latter half of 1959.

A scheme for the production of Vitamin $B_6$ (1 ton/annum), Vitamin C (60 ton/annum) was licensed and was expected to go into production in 1961.

A new undertaking was established with a licensed capacity of 4 kgs./annum for the manufacture of Vitamin $B_{12}$. The firm has already gone into production from imported intermediate.

### Antibiotics

Besides the Hindusthan Antibiotics, two units were licensed for a capacity of 20 MMU/annum of penicillin and were expected to go into production early in 1962. In addition, three more units are going ahead with their plans for the basic manufacture of tetracyclines in the country. Four units have been licensed for the production of Chloramphenicol besides one firm which is already manufacturing it.

### Sulpha Drugs

A few units in the private sector produce sulpha drugs and the combined annual capacity is about 400 tons/annum. Two schemes have been approved for the basic manufacture of sulpha drugs.

### Anti-Malarial

Chloroquin and Amodiaquin are being produced by two units one in West Bengal and another in Bombay.

Quinine salts are being manufactured by three Government factories two in Madras State and one in West Bengal.

### Anti-Diabetic Drugs

At present only one firm is producing antidiabetic drugs tolbutamide and carbutamide on a small scale. Schemes have been licensed to other parties also for expansion in the capacity of those drugs and are under implementation

### Anti-Leprosy Drugs

In addition to the three units already existing, a fourth unit has installed capacity for this item. The total installed capacity is 18·3 tons per annum.

### Surgeons' Requisites

The first edition of the "Indian Pharmacopoeia" was published in 1955 and a supplement to it in 1960. The National Formulary of India which was published in May, 1960 has been revised. The second edition is also under print (Sept. 1964).

The Drugs and Magic Remedies (objectionable advertisement) Act, came into force on April 1, 1955 and was amended in 1963. This Act prohibits the publication of objectionable advertisements relating to drugs and certain magical remedies alleged to be useful in prevention, cure or mitigation of sexual disorders, venereal diseases, diseases peculiar to women and certain diseases enlisted in the schedule to the Act. The import and export of objectionable advertisements are controlled in close liaison with the customs and postal authorities who can, under section 6 of the Act, intercept articles suspected to contain objectionable advertisements. Liaison is also maintained with the Indian Embassies,

High Commissions, Legations and Consulates abroad. Advertisements of contraceptives which are approved by the Government of India are, however, permitted in view of their importance for the promotion of Family Planning activity in the country.

### AUXILIARY WORKERS

In order to meet extreme shortage of doctors in the country as a whole and particularly in the rural areas, it was proposed to introduce a new type of Auxiliary Medical and Public Health Worker.

He would not be entrusted with diagnosis and treatment of diseases beyond what is necessary as a part of ordinary first-aid work, and the training should be such as to enable him to assist the health authorities, in as large a measure as possible, in preventive measures including sanitation, health education, etc. The syllabus of training throws more emphasis on the preventive aspects of the training, rather than the curative side.

During training it was proposed to give the trainees free lodging and a stipend of Rs. 50 p.m.

The Government of India have approved the establishment of training centres at the following institutions:— Public Health Institute, Patna (Bihar), Medical College, Visakhapatnam (Andhra), S.M.S. Medical College, Jaipur (Rajasthan).

### NURSING

At the end of the year 1963 there were 42,635 registered nurses, 49,862 registered midwives, 2,336 registered health visitors and 6,817 auxiliary nurse-midwives. The total number of qualified health visitors in India on 31st Dec. 1963 was about 3,957. Separate figures for urban and rural areas are not available.

The Health Survey and Planning Committee recommended that there should be a ratio of one nurse to 5,000 of population. On this basis, the total requirements for nurses would be 1,10,940.

The number of training institutions for nursing personnel and of students under training at the end of 1963 were as follows (The figure in brackets shows the number of students):—

Nurses 228 (15,084); Midwives 247 (2,896); Health Visitors 17 (1,058); Auxiliary Nurse Midwives 260 (8,332).

The Indian Nurses Register, published by the Indian Nursing Council contains the names of all nursing personnel registered with the State Nursing Council upto 1959 except Bihar and Madras.

Training in nursing is offered in centres attached to almost all large hospitals. The Colleges of Nursing in New Delhi, Hyderabad, Bombay, Poona and Indore and the School of Nursing of the Christian Medical College, Vellore offer basic courses in nursing leading to B.Sc. degree. Apart from the basic degree course the College of Nursing, New Delhi also offers a course leading to Master of Nursing degree of the Delhi University and post certificate course for ward Sisters, Sister Tutors, Midwife Tutors and in Nursing Administration. Courses in Public Health Nursing are being given at the All India Institute of Hygiene and Public Health, Calcutta, Public Health Nursing School, Ahmedabad, Health School, Nagpur, Graduate School for Nurses, Indore, Lady Reading Health School, Delhi and the College of Nursing, Trivandrum. For qualified nurses, two post-basic courses leading to a B.Sc. degree have been established by the Universities of Kerala and Punjab at the Colleges of Nursing in Trivandrum and Chandigarh respectively. These courses offer advanced preparation in teaching, administration and public health nursing.

### FIVE-YEAR PLANS

As against an outlay of Rs. 140 crores and Rs. 225 crores in the First and Second Five Year Plans respectively, Health Programmes in the Third Five Year Plan involve a total outlay of about Rs. 342 crores (Rs. 297 crores being in the States and the rest at the Centre). There has been progressive increase in the expenditure on Health Schemes since the First Five Year Plan was initiated. The following table shows under broad headings the progress of expenditure during the Third Five Year Plan:—

(Rs. in Crores)

| Programme | Third Plan Outlay | Actual expenditure during 1961–62 | Actual expenditure, 1962–63 | Actual expenditure, 1963–64 | Actual expenditure, 1964–65 |
|---|---|---|---|---|---|
| Water Supply and Sanitation .. | 105·27 | 17·14 | 10·13 | 17·47 | 26·01 |
| Primary Health Units, Hospitals and Dispensaries .. .. .. | 61·69 | 8·10 | 8·56 | 8·32 | 12·91 |
| Control of Disease .. .. .. | 70·46 | 17·83 | 20·58 | 20·85 | 19·70 |
| Medical Education, Training and Research .. .. .. .. | 56·31 | 8·72 | 11·39 | 13·15 | 16·85 |
| I. S. M. .. .. .. .. | 9·82 | 0·60 | 0·71 | 0·81 | 1·44 |
| Family Planning .. .. .. | 26·98 | 1·38 | 2·69 | 3·97 | 6·05 |
| Other Schemes .. . .. | 11·27 | 1·59 | 1·26 | 1·50 | 1·53 |
| TOTAL .. | 341 80 | 55·36 | 65·32 | 66·07 | 84·49 |

The table given below shows the facilities which existed at the end of the Second Plan and facilities expected at the end of the Third Plan for training of health and medical personnel.

| Category | 1960–61 | | | 1965–66 | | |
|---|---|---|---|---|---|---|
| | Institutions | Intake | Outturn | Institutions | Intake | Outturn |
| Doctors .. .. .. | 57 | 5,800 | 3,200 | 80 | 11,500 | 4,830 |
| Nurses .. .. .. | 250 | 4,000 | 2,800 | 350 | 6,200 | 4,500 |
| Auxiliary Nurse-Midwives/Midwives .. | 420 | 5,200 | 4,000 | 550 | 9,100 | 7,000 |
| Health Visitors .. .. | 30 | 650 | 375 | 50 | 850 | 500 |
| Sanitary Inspectors .. | 20 | 2,250 | 2,250 | 38 | 2,850 | 2,850 |
| Pharmacists .. .. | 10 | 550 | 480 | 15 | 1,450 | 1,270 |

**Doctors, Nurses, etc.:**—The achievement at the end of the Second Plan and the target at the end of the Third Plan respectively are: Nurses 27,000 : 45,000 ; Doctors 70,000 ; 81,000 ; Auxiliary Nurses/Midwives 19,900 ; 48,500 ; Health Visitors 1,500 ; 3,500 ; Nurse/Dais 11,500 ; 40,000 ; Sanitary Inspectors 6,000 ; 19,200 ; Pharmacists 42,000 ; 48,000.

Under the auspices of the Central Public Health Engineering Organisation training courses for Public Health Engineers and auxiliary personnel are organised.

**Hospitals & Dispensaries:**—The number of hospitals and dispensaries has increased from 12,600 in 1960-61 to 14,600 in 1965-66 and of beds from 1,85,600 to 2,40,100. A basic type of health organisation providing an integrated preventive and curative service has been established in 2,800 development blocks with a population of about 200 million.

#### The Countess of Dufferin's Fund

The Countess of Dufferin's Fund was established in the year 1885. The main objects of the Fund were:—Medical tuition including teaching and training of women as doctors, nurses and midwives ; Medical relief by establishing hospitals for the treatment of women and children ; Founding of hospitals for women and children and opening of female wards under female superintendence in existing hospitals and dispensaries.

The Fund with its residue work including assets and liabilities has been taken over by the Government of India by an Act passed by Parliament No. 63 of 1957 (Countess of Dufferin's Fund Act, 1957). The main function is now to grant scholarship to Lady Post-graduate and Under-graduate Medical students and B.Sc. (Nursing) and Public Health Nursing students studying in Medical and Nursing Colleges respectively in India. The following scholarships are awarded from the Fund:—1. Post-graduate scholarships of the value of Rs. 200 p.m. 12 ; 2. Under-graduate scholarship of the value of Rs. 75 p.m. 75 ; 3. B.Sc. (Nursing) scholarships of the value of Rs. 75 p.m. 8 ; 4. P. H. Nursing course scholarships of the value of Rs. 100 p.m. 2.

The building of Countess of Dufferin's Fund situated near the President's Estate, Simla was converted into Holiday Home known as "Vishram" for the use of women doctors and nurses to enable them to have ideal holiday camping at cheaper rates and was formally inaugurated in Oct. 1964. The Home is fully furnished with all kinds of amenities.

During the year 1964, 9 Post-graduate, 27 Under-graduate, 3 B.Sc. (Nursing) and 2 P.H. Nursing Scholarships have been awarded.

#### President's Silver Medal

With a view to making women medical students interested in the medical studies, President's Silver Medal is awarded every year for each University in India having facilities of M.B B.S. examination to the woman candidate who stands first in the final M.B.B.S. examination at the first attempt among women candidates and obtains not less than 60 per cent of the aggregate marks.

Two medals are available for B.Sc. Nursing women candidates one each at the College of Nursing, New Delhi and Christian Medical College School of Nursing, Vellore.

In 1964, 24 medals have been awarded to women candidates who qualified in M.B.B.S. examination and one medal for B.Sc. Nursing Course.

#### National School Health Council

In Feb. 1963, a National School Health Council was set up. The term of the Council is 3 years in the first instance after which it may be reconstituted. The functions of the Council are mentioned below:—

(i) To assist in the formulation of National School health policies and to review the same

periodically; (*ii*) To encourage and assist the States in the establishment of school health services and school meal programmes and to co-ordinate them; (*iii*) To initiate and guide studies, research and training on problems connected with school health administration and services; (*iv*) To assist in the formulation of standards for school health services and to lay down minimum uniform procedures; (*v*) To advise the Central Government in the allocation of grants and other resources to the States for School Health Programme; (*vi*) To take steps to enlist the active participation of the people in the implementation of the programme; and (*vii*) To consider the problems raised by the State Advisory Committee, Ministries or individual members.

The student health programme has been included in the Fourth Plan as a Centrally-aided scheme and a provision of Rs. 36·99 crores has been proposed.

## DENTAL EDUCATION

The total number of registered dentists in the country as on 1st April 1964 was 5,259 excluding those who could not renew their registration at the close of the year. The number of dentists in the areas not covered under the Dentists Act, 1948, viz. the State of Jammu and Kashmir where the Act has not been extended, and the former State of Madhya Bharat where the provisions of the Dentist Act have not yet been enforced, can be roughly estimated at about 3,000. There are about 500 dental hygienists and 300 dental mechanics. The ratio of dentists to population at present is 1 : 75,000.

Dental Education in the country is making rapid progress. There are now 13 Dental Institutions all affiliated to Universities training students for the degree in dental surgery, viz.: B.D.S. (Bachelor of Dental Surgery) having facilities for about 450 admissions per year. Post-graduate dental education (M.D.S.) is available at the three dental colleges, two at Bombay and one at Lucknow, viz.: (*i*) Government Dental College and Hospital, Bombay, (*ii*) Nair Hospital Dental College, Bombay and (*iii*) Dental College, Lucknow.

With the decision of the Govt. of Madras to start the Dental Hygienists course at the Dental Wing, Madras Medical College, and the impending starting of this course at the Govt. General Hospital, Chandigarh, including the Dental College, Trivandum, where this training is already in operation, the number of the Dental Institutions training Dental Hygienists has risen to 3. Similarly, with the introducing of the Dental Mechanics course at the Dental Wing, Madras Medical College, Madras and the Dental College, Trivandrum from 1965, the number of Dental institutions for this course has now become four, after taking into account the Govt. Dental College, Bombay, and the Dental College Lucknow where such courses are already in existence.

In the field of Dental Research, there is already one project on 'Oral Calculus' going on at the Dental Wing, Madras Medical College, under PL 480 Grants since 1962 for a period of 4 years with a total budget of Rs. 4 lakhs. The other Unit established is in 'Periodontology' at the Dental College and Hospital, Lucknow under the aegis of the Indian Council of Medical Research.

As an 'Advance Action' to meet the requirements of experienced and qualified Dental Teachers in the Dental institutions during the 4th Plan, the Government of India propose to open out 10 more post-graduate Departments—two each in the Dental institutions at Trivandrum, Bangalore, Lucknow and the two Dental Colleges at Bombay, during the remaining period of the 3rd Plan. There are at present roughly 200 State Dental Clinics mostly at District Hospitals and by the end of the next five years more such clinics are expected to be opened at District and Tehsil Hospitals, of which some are to be mobile Clinics. Besides this, a sizeable number of School Dental Clinics are expected to be opened in various parts of the country. Each School Dental Clinic shall be designed to look after 3,000 school-going children between the age of 5-16 years. At present there exist Dental Departments in about 80 Medical College Hospitals and about 100 such departments in Railway Hospitals.

## MEDICAL EDUCATION

The Third Plan envisages the establishment of 15 new medical colleges. The admission capacity of the medical colleges as in December 1962 was about 7,394. At the end of 1962-63 there were 71 medical colleges. To meet the demand for doctors arising from the emergency, it has been decided to further increase the annual admission to medical colleges by upto 3,000 additional students and to treat this emergency programme as a Centrally sponsored programme.

There are 13 dental colleges in the country. The colleges have an admission capacity of about 400. In 1958 there were about 3,681 registered dentists in the country.

Below we give a list of medical colleges in India :

*Andhra Pradesh :* Andhra Medical College, Visakhapatnam; Guntur Medical College, Guntur; Kurnool Medical College, Kurnool; Osmania Medical College, Hyderabad-Dn.; Gandhi Medical College, Hyderabad-Dn.; Rangaraya Medical College, Kakinada; Kakatiya Medical College, Warangal; S. V. Medical College, Tirupati, Distt. Chittoor.

*Assam :* Assam Medical College, Dibrugarh; Gauhati Medical College, Gauhati; Medical College, Silchar.

*Bihar :* Prince of Wales Medical College, Patna; Darbhanga Medical College, Laheriasarai; Rajendra Medical College, Ranchi; Medical College, Damodar Road, Jamshedpur.

*Gujarat :* B. J. Medical College, Ahmedabad; Medical College, Baroda; M. P. Shah Medical College, Jamnagar; Municipal Medical College, Ahmedabad; Medical College, Surat.

*Jammu & Kashmir :* Medical College, Srinagar.

*Kerala :* Medical College, Trivandrum; Medical College, Calicut; Medical College, Kottayam; Medical College, Alleppey.

*Madhya Pradesh :* Medical College, Jabalpur; M. G. M. Medical College, Indore; G. R. Medical College, Gwalior, Gandhi Medical College, Bhopal; Medical College, Rewa; Medical College, Raipur.

*Madras :* Madras Medical College, Madras; Stanley Medical College, Madras; Kilpauk Medical College, Kilpauk, Madras-10; Christian Medical College, Vellore; Madurai Medical College, Madurai; Thanjavur Medical College, Thanjavur.

*Maharashtra :* Grant Medical College, Bombay; Seth G. S. Medical College, Parel, Bombay; Topiwala National Medical College, Bombay; B. J. Medical College, Poona; Medical College, Nagpur; Govt. Medical College, Aurangabad; Armed Forces Medical College, Poona; Medical College, Miraj; Medical College, Sholapur; Medical College, Sion, Bombay.

*Mysore :* Kasturba Medical College, Manipal; Medical College, Mysore; Bangalore Medical College, Bangalore; Medical College, Bellary; Karnatak Medical College, Hubli; St. John's Medical College, Bangalore; Medical College, Gulbarga; Medical College, Belgaum.

*Orissa :* S. C. B. Medical College, Cuttack; Medical College, Burla (Sambalpur); Medical College, Berhampur (Cuttack).

*Punjab :* Medical College, Amritsar; Christian Medical College, Ludhiana; Government Medical College, Patiala; Medical College, Rohtak; Dayanand Medical College, Ludhiana.

*Rajasthan :* S. M. S. Medical College, Jaipur; Bikaner Medical College, Bikaner; Medical College, Udaipur.

*Uttar Pradesh :* K. G. Medical College, Lucknow; Medical College, Agra; G. S. V. M. Medical College, Kanpur; College of Medical Sciences, Banaras Hindu University, Varanasi; Motilal Nehru Medical College, Allahabad; Medical College, Muslim University, Aligarh.

*West Bengal :* Medical College, Calcutta; R. G. Kar Medical College, Belgachia Road, Calcutta-4; Nilratan Sircar Medical College, Calcutta; Calcutta National Medical Institute, 32, Gorachand Road, Calcutta; Bankura Tammilani Medical College, Bankura.

*Delhi :* Lady Hardinge Medical College (for women), New Delhi; All India Institute of Medical Sciences, New Delhi; Maulana Azad Medical College, New Delhi.

*Goa :* Medical College, Goa.

*Pondicherry :* Medical College, Pondicherry.

## AYURVEDIC AND UNANI INSTITUTIONS

Below we give a list of Ayurvedic institutions (it is not an exhaustive list) :

Ayurvedic College, Gauhati, Assam.

Gopobandhu Ayurvedic Institute, Puri, Orissa.

The Asafia Tibbia College, Bhopal.

Shri Narain Prasad Awasthi Ayurvedic School, Raipur (M.P.).

Ayurvedic Vidyalaya, Jamnagar, Saurashtra.

Ayurvedic Medical School, Bhawnagar, Saurashtra.

Govt. Ayurvedic College, Gwalior (M.P.).

Shri Raj Kumar Singh Ayurvedic College, Indore (M.P.).

Nizam's Tibbi College, Hyderabad.

Govt. Ayurvedic College, Hyderabad.

Govt. Aided S.Y.N.A. Ayurvedic College, Bhagalpur, Bihar.

Govt. Ayurvedic College, Patna.

Govt. Tibbi College, Patna.

Ayodhya Shiva Kumari Ayurvedic College, Begusarai, Monghyr, Bihar.

Ayurvedic Vibhag Vidyalaya, Patiala.

Shri Dhanwantri College, Sangrur, Punjab.

Shri Ayurved Vidyalaya, Barnala, Punjab.

Shri Venkateswara Ayurvedic Kalasala, Vijayawada, Krishna District, Andhra Pradesh.

Shri Ram Mohan Ayurvedic College, Guntur.

Aryavaidyapatasala, Kottakkal, Kerala.

The Venkataramana Dy & Ayurvedic College, Mylapore, Madras.

College of Indigenous Medicine, Kilpauk, Madras.

Madhava Memorial Ayurvedic College, Cannanore.

Keraleeya Ayurvedic Mahapatasala, Shoranur (Kerala).

Akhila Travancore Sidhamruth, Kalloore & Siddha Medical Training College.

Govt. Ayurvedic College, Trivandrum.

J. S. Maha Gujarat Ayurvedic Medical College, Nadiad (Gujarat).

Shri Ochhavlal N. Ayurvedic Mahavidyalaya, Surat.

Ayurveda Mahavidyalaya, Poona.

Aryangla Vaidyak Mahavidyalaya, Satara City.

Ayurveda Vidyalaya, Jamnagar.

R. A. Podar Medical College (Ayurvedic), Worli, Bombay.

Ayurved Mahavidyalaya, Ahmednagar.

Jamini Bhushan Ashtanga Ayurved Vidyalaya (College), Calcutta.

Vishvanath Ayurvedic Mahavidyalaya (College), Calcutta.

Shyamadar Vaidya Shastrapith (College), Calcutta.

Govt. Ayurvedic College, Jaipur.

Maharana Ayurvedic College, Udaipur.

Rajputana Ayurvedic & Unani Tibbi College, Jaipur.

Dayanand Ayurvedic College, Amritsar.

Govt. Ayurvedic & Unani College, Mysore.

Ayurvedic College, Hindu University, Banaras.
Ayurvedic College, Lucknow University, Lucknow.
Ayurvedic College, Gurukul University, Kangri.
Ayurvedic College, Gurukul Vrindaban, Distt. Mathura (U.P.).
Bundelkhand Ayurvedic College & University, Jhansi.
Rishikul Ayurvedic College, Hardwar.
Lakit Hari Ayurvedic College, Pilibhit.
Kanya Kubja Ayurvedic College, Lucknow.
Ram Sahai Ayurvedic College, Meerut.
Lekh Ram Ayurvedic College, Dorli (Distt. Meerut).
Ayurvedic College, Dehra Dun.
Arjuna Ayurveda Vidyalaya, Banaras.
Baldeo Ayurvedic College, Baragaon, Banaras.
Ayurvedic College, Farrukhabad.
Narendra Vidya Mandir, Kirooli (Distt. Agra).
Moolchand Rastogi Ayurvedic College, Lucknow.
Uttra Khand Vidyapith Vidyalaya, Guptakashi (Distt. Garhwal).
Tibbia College, M.U., Aligarh.
Takmil-ut-Tib College, Lucknow.
Unani Medical College, Himmat Ganj, Allahabad.
Tibbia College, Saharanpur.
Darshanand Ayurvedic College, Banaras.
Shiv Ganga Ayurveda Mahavidyalaya, Madhubani, Bihar.
The Suddha Ayurved Vidyalaya, Sion, Bombay.
The Punarvasu Ayurved Vidyalaya, Bombay.
The Ashtang Ayurved Mahavidyalaya, Poona.
The Karnatak Ayurved Vidyalaya, Belgaum, Mysore.
The Suddha Ayurved Vidyalaya, Hubli.
The Suddha Ayurved Vidyalaya, Nasik.
The Suddha Ayurved Vidhalaya, Bijapur.
Vidarbha Ayurveda Mahavidyalaya, Amravati.
Government Ayurvedic College, Raipur.
Bidyabhushan Sanskrit College, Bolangir, Orissa.
Sanskrit College, Parlakimedi, Orissa.
Sadasiv Sanskrit College, Puri, Orissa.
Dayanand Ayurvedic College, Jullundur.
Ayurvedic College, Sikar.
Ayurvedic College, Bikaner.
Gurukul Vishwa Vidhyalaya, Virmdaban.
State Ayurvedic College, Lucknow.
Nabadwip Ayurvedic College, P.O. Nabadwip, District Nadia, West Bengal.
Vaidya Sastrapith Parisad College, Calcutta.
Ayurvedic Sewak Sangh Vaidyak Pathshala, P.O. Contai, Midnapore.
Banwari Lal Ayurvedic Vidyalaya, Delhi.
Jamia Tibbia College, Delhi.
Dharma Samaj Sanskrit College, Muzaffarpur, Bihar.
Shudha Ayurved Vidyalaya, Malbipole, Baroda.
Shri Ayurved Mahavidyalaya, Samanvaya Rugnalaya Mahal, Nagpur.
Ayurved Medical College, Nanded, Maharashtra.
Radhakrisan Toshniwal Ayurved Mahavidyalaya, Akola.
Government Ayurvedic College, Dabala.
Birla Sanskrit (Ayurvedic) College, Pilani.
Meerut Ayurvedic College, Nanchandi, Meerut.
Ayurvedic College, Atarra, District Band.
Mahila Ayurvedic College, Meerut.
Divedi Ayurvedic College, Kanpur.
Ayurvedya Partisthan, 123, Harish Mookerjee Road, Calcutta-26.
Dayanand Ayurvedic Kanaya Mahavidyalaya, Delhi.
Government College of Indian Medicine, Mysore.
Taranath Ayurveda Vidyapeetha, Bellary (Mysore).

### Pharmacy

The following institutions provide courses of study in Pharmacy in the country. The names of States and the course offered respectively are shown within brackets:

J.V.D. College of Science and Technology, Waltair (Andhra Pradesh; B. Pharm.); Girls' Polytechnic, Hyderabad (Andhra Pradesh; Dip. Pharm.); Andhra Medical College, Visakhapatnam (Andhra Pradesh; Dip. Pharm.); L. M. College of Pharmacy, University Campus, Ahmedabad (Gujarat; Dip. Pharm.; B. Pharm.; M. Pharm.; Ph.D.); Pharmacy School, Gulzar Bagh, Patna (Bihar; Dip. Pharm.); Department of Chemical Technology, Bombay University, Bombay (Maharashtra; B. Pharm.); Bombay College of Pharmacy, 213-219, Frere Road, Bombay-1 (Maharashtra; Dip. Pharm); Armed Forces Medical College, Poona (Maharashtra; Dip. Pharm.); Govt. Dental College, Bombay (Maharashtra; Dip. Pharm.); Poona College of Pharmacy, Poona (Maharashtra; Dip. Pharm); Nagpur University, Nagpur (Maharashtra; B. Pharm.); Madras Medical College, Madras (Madras; Dip. Pharm.; B. Pharm.); Madurai Medical College, Madurai (Madras; Dip. Pharm.); Christian Medical College, Vellore (S. India) (Madras; Dip. Pharm.); Bangalore Medical College, Bangalore (Mysore; Dip. Pharm.; B. Pharm.); Mysore Medical College, Mysore (Mysore; Dip. Pharm.; B. Pharm.); The Kasturba Medical College, Manipal (Mysore; Dip. Pharm.); S.C.D. Medical College, Cuttack (Orissa; Dip. Pharm.); Department of Pharmacology, Medical College, Burla, Sambalpur (Orissa; Dip. Pharm.); Medical College, Amritsar (Punjab; Dip. Pharm. and Dressers' Course); Govt. Medical College, Patiala (Punjab; Dip. Pharm.); Department of Pharmacy, Punjab University, Chandigarh-3 (Punjab; B. Pharm.; M. Pharm.; Ph.D.); Department of Pharmacy, Saugar University, Saugar (Madhya Pradesh; B. Pharm.; M. Pharm; Ph.D.); Birla College, Pilani (Rajasthan; B. Pharm.; M. Pharm.); College of Technology, Banaras Hindu University, Varanasi-5 (Uttar Pradesh; B. Pharm.; M. Pharm., Ph.D.); G.S.V.M. Medical College, Kanpur (Uttar Pradesh; Dip. Pharm); Pharmacy Training Centre, Jalpaiguri (West Bengal; Dip. Pharm.).

In addition to this the following institutions also intend to start Diploma course in Pharmacy shortly in accordance with the Education Regulations of the Pharmacy Council of India :— Andhra Univ., Waltair; Guntur Medical College, Guntur; Kakatiya Medical College, Warangal; Rangaraya Medical College, Kakinada; Mahila Seva Samaj, Nagpur; Grant Medical College, Bombay; G. B. Pant Polytechnic, Okhla, New Delhi; Women's Polytechnic, New Delhi; Govt. Girls' Polytechnic, Lucknow; V. M. Hospital, Agartala (Tripura); Osmania Medical College, Hyderabad; Assam Medical College, Dibrugarh; Govt. Medical College, Calicut; Kurnool Medical College, Kurnool.

### Pharmacy Council

During 1964-65 the Pharmacy Council of India continued its efforts towards the (*a*) complete enforcement of Pharmacy Act, 1948; (*b*) furtherance of training facilities for Diploma in Pharmacy course; (*c*) revision of the Education Regulations; (*d*) educating public about the profession and prospects in Pharmacy.

*Enforcement of the Pharmacy Act, 1948 :* The Pharmacy Act 1948 is endforced throughout the country except for the State of Jammu and Kashmir. The State Pharmacy Councils have been formed in the States of Andhra Pradesh, Assam, Bihar, Maharashtra, Madras, Orissa, Punjab, Uttar Pradesh, West Bengal and the Union Territory of Delhi. The State Pharmacy of West Bengal is also functioning for the Union Territory of Tripura. The Manipur Administration is contemplating the formation of a joint State Council with the Assam Pharmacy Council.

The Registration Tribunals have been set up in the States of Mysore and Kerala.

The Council has recommended that the displaced persons from Pakistan, Ceylon, Burma or from any other country be allowed registration according to the provision of section 31 of the Act giving relaxation for the date of submitting application for registration. This proposal is also under consideration of the Govt. of India.

The following institutions are approved by the Council for the courses mentioned within brackets :

Institute of Pharmacy, Gulzarbagh, Patna (Diploma); L. M. College of Pharmacy, Navarangpura, Ahmedabad-9 (Diploma & Degree); Bombay College of Pharmacy, Frere Road, Bombay-1 (Diploma); Christian Medical College, Vellore (Diploma); Madurai Medical College, Madurai (Diploma); Madras Medical College, Madras (Diploma & Degree); Deptt. of Pharmacy, Saugar University, Sagar (M.P.) (Degree); S. C. B. Medical College, Cuttack (Diploma; Medical College, Amritsar (Diploma & Dresser's); Punjab University, Chandigarh (Degree); Govt. Medical College, Patiala (Diploma & Dresser's); Birla College, Pilani (Degree); Pharmacy Training Centre, Jalpaiguri (Diploma).

The following institutions have started the Diploma course in Pharmacy: Department of Pharmacology, Medical College, Burla (Orissa); Kashmere Gate Polytechnic, Delhi; Rangaraya Medical College, Kakinada (Andhra Pradesh); Institute of Pharmacy, Medical College, Dibrugarh (Assam); Govt. Polytechnic, Karad (M.S.); Govt. Polytechnic, Jalgaon (M.S.); Govt. Polytechnic, Amravati (M.S.).

The following new institutions have started the Degree course in Pharmacy.

Madurai Medical College, Madurai; Jadavpur University, Calcutta; Escola Medical College, Goa.

*Approval of the Practical Training Institutions :* After completion of the regular course, the student pharmacists are required to undergo a practical training for 750 hours in a recognised Institutions/Hospital/Pharmacy/Dispensary.

The list of the number of approved institutions is given below :

| State | No. of institutions approved for practical training | |
|---|---|---|
| | Final | Provisional |
| Andhra .. .. | — | 13 |
| Bihar .. .. .. | 13 | 4 |
| Gujarat .. .. | — | 22 |
| Madhya Pradesh .. | — | 1 |
| Madras .. .. | 28 | — |
| Maharashtra .. .. | 31 | 1 |
| Punjab .. .. | 13 | 4 |
| Mysore .. .. | 1 | — |
| West Bengal .. | 2 | 19 |
| Delhi .. .. | 1 | 3 |

*Registration of Pharmacists :* The registration of pharmacists is the responsibility of the State Pharmacy Council. There are 71,146 registered pharmacists upto 31st December, 1963.

*Publicity of the Profession :* The National Pharmacy Week was celebrated from 22nd Nov. to 28th Nov. 1964. Popular lectures, film shows, radio talks, symposiums on different spheres of pharmacy were also held throughout the country.

A pamphlet entitled " Pharmacy as a Career " has been published by the Council in English. It has been proposed to bring out the Hindi Edition of the same and the work for the purpose has been taken in hand. The State Pharmacy Council have been requested to publish the same in regional languages also.

# AGRICULTURE

INDIA is predominantly an agricultural country. About half of the country's national income is derived from agriculture and allied activities which absorb nearly ⅓ of its working force (of about 152 million in 1956 inclusive of dependents).

Some major facts about Indian agriculture (1962-63); Area of India,† 806·3 mil. acres; area available according to village papers, 740·9 acres (rest is mostly unsuitable for cultivation); uncultivated area 410·8 mil. acres (forest 140·0 mil. acres, area not available for cultivation 120·8 mil. acres, other uncultivated area 91·7 mil. acres and fallow 51·7 mil. acres); area actually sown 336·6 mil. acres; total cropped area taking into account area sown more than once 385·8 mil. acres; area sown with foodgrains 283·1 mil. acres; area sown with other crops 96·6 mil. acres; gross area irrigated 72·6 mil. acres.

India virtually holds the monopoly in lac, leads the world in groundnut and tea production, and is the second largest producer of rice, jute, raw-sugar, rape, sesmaum and castor seeds.

Average rainfall 45″; deficiency of 25 per cent is classed dry; deficiency of 40 per cent severe drought; usually one year in five is a dry year, one in ten, a year of severe drought, one in 20 to 25 years widespread severe drought.

Out of the gross cultivated area in the Indian Union of 385·8 million acres in 1962-63, about 72·6 million acres are irrigated. Of this area 26·9 million acres are irrigated by canals, 11·6 million acres by tanks, 18·9 million acres by wells and 5·9 million acres from other sources. The percentage of irrigated area to total cultivated area is, however, small, being only about 16 per cent. Protective irrigation works have made agriculture stable instead of precarious in many districts.

Over one-fourth of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet.

* Latest available information. † According to Surveyor-General of India.

## PRODUCTION

The following table will show the area under principal crops and the yield :

### AREA AND PRODUCTION

| Crops | Area in '000 hectares | | | Production in '000 met. tons | | |
|---|---|---|---|---|---|---|
| | 1962-63 | 1963-64 | 1964-65 | 1962-63 | 1963-64 | 1964-65 |
| Rice | 34,934 | 35,474 | 36,076 | 31,914 | 36,489 | 38,732·3 |
| Wheat | 13,657 | 13,305 | 13.453 | 10,827 | 9,708 | 12,078·3 |
| Barley | 3,022 | 2,794 | 2,667·6 | 2,423 | 1,985 | 2,478·1 |

A total area of about 18.5 lakh acres had been covered by land reclamation and land development schemes during the last five years. The annual additional food production from reclamation of new lands was estimated at about eight maunds per acre.

*Note.*—Data for 1962-63 and 1963-64, relate to Partially Revised and Final Estimates respectively and are subject to revision :—(*a*) Production of rice is in terms of cleaned rice; groundnut as unshelled nuts; sugarcane as raw sugar or gur; cotton as lint jute and mesta as dry fibred in thousand bales (of 180 kg.); coconut as million nuts. (*b*) Pepper, Ginger and Chillies as dry. (*c*) Area and production of rubber and coffee relate to calendar year 1961-62. (*d*) Opium production in 1,000 maunds (of 82 2 7 lbs.). Other pulses include black and green gram and lentil, etc. in Tripura, Orissa and Delhi wherefrom pulsewise data are not available. Sanhemp figures in brackets relate to area under fibre. @ Negligible, below 500. † In thousand bales of 180 Kgs. each. ‡ Production in tonnes of cane was 122, 126 6 and 104, 907·9 thousand tonnes in 1964-65 and 1963-64 respectively.
N.A. Not available.

## INDEX OF PRODUCTION—ALL COMMODITIES

(Base 1949-50 = 100)

* Based on provisional estimates.

*Note.*—The indices for 1962-63 to 1963-64 are generally based on partially Revised Estimates and those for 1964-65 on Final Estimates. They are, therefore, subject to revision.

The agricultural season is divided into two main sub-divisions the Kharif season of the monsoon and the Rabi season of the cold weather. This is not well-marked in the extreme east or extreme south.

The ground is generally prepared for cultivation in April and May for kharif crops, and by the end of October or early November for rabi crops, *i.e.*, after the kharif crops have been harvested. Kharif crops are sown in the monsoon, generally after the first shower. The usual time for sowing of rabi crops is the middle of November. The crops are harvested from the middle of March to the end of April.

The chief Kharif crops are : rice, jowar, bajra, maize, cotton, sugarcane, sesamum and groundnut. The chief Rabi crops are : wheat, barley, tea, gram, linseed, rape and mustard ; and in south India rice, jowar and cotton.

### FOODGRAINS

Foodgrains production in 1964-65 reached the record level of over 88·4 million tonnes. This is nearly 9 million tons more than 1963-64. The increase is mostly due to the record rise in the production of wheat and rice in 1964-65. The previous record was 81 million tonnes in 1961-62.

### RICE

Rice crop occupies the largest area in the Indian Union, about 34 million hectares giving 32 million tons of rice. During 1964-65 the area under rice cultivation was 36·08 million hectares and the production was about 88·73 million tonnes.

Madras, Bihar, Bengal, Orissa, Madhya Pradesh, Uttar Pradesh, Assam, Andhra, Maharashtra, Mysore, Kerala and Gujarat are the main rice growing States and they together claim about 95 per cent of the total rice area in India.

Rice yield in India is, however, one of the lowest in the world. The average yield is a fourth of that of Spain and Italy, a third of Japan, and half of what the Chinese and the American rice farmers obtain. At present 76 research stations spread almost all over the States of the country are working on similar problems of rice. Though about 4,000 distinct types of rice differing in essential characteristics occur in this country, 455 superior strains giving an average of 10 to 20 per cent better yield than the farmers' varieties have been evolved. It is proposed to saturate 12·5 million acres of irrigated paddy lands in 30 districts with an improved and high yielding paddy variety from Taiwan, *i.e.* Taichurg Native 1. This could be cultivated in all the seasons and the expected yield is 70 to 90 mds. of paddy per acre if manured well (120 lbs. nitrogen per acre).

### WHEAT

The area under wheat is about 13 million hectares and production about 10 million tons. During 1964-65, the area under wheat was 13·45 mill. hectares and production 12·08 mill. metric tons. Wheat is grown widely throughout the north as a winter crop, U.P., M.P. and Punjab supplying over 72 per cent of the total outturn in the country. This crop occupies, on an average, about 10 per cent, of the total cultivated area.

More than one-third of the crop is irrigated.

The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. The crop is generally harvested in February to April and the threshing and winnowing go on up till the end of May.

A virulent fungus disease called rust affects the production of wheat to a great extent. In normal years, the loss is about 5 per cent involving about sixty million rupees.

Systematically planned work on the development of rust resistant wheats is being done under the ægis of the Indian Council of Agricultural Research and a large number of rust resistant varieties have been produced.

At present improved varieties form only 16 per cent in M.P., 33 per cent in U.P. and about 70 per cent in the Punjab, of the wheat area of the respective States. It is proposed to saturate 8 mill. acres of irrigated wheat lands with Mexican wheat varieties (Sanora 64, Lerma Rojo, and V. 18) to produce an additional 8 million tons of wheat. These dwarf varieties are highly responsive to manuring and yield about 60 mds. per acre.

### MILLETS

Mostly of short duration (2½ to 6 months from seed to seed) millets are grown in localities and in conditions where most of the other cereal crops are not grown, such as poor and infertile soils and low rainfall (of 20–50").

**Jowar :**—Among the millets jowar occupies a premier position because of the size of the crop and the economic importance of the grain

About 17 million hectares are grown under this to yield about 9 million tons of grain. Maharashtra, Andhra, Mysore, M.P. and Gujarat contribute to over ¾ of the natural acreage. The jowar area and production respectively during 1963-64 were 18·2 mill. hectares and 9·2 mill. tonnes and in 1964-65 were 18·01 mill. hectares & 9·81 mill. tonnes. A hybrid CSH. 1, suitable for growing under irrigated and rainfed conditions and yielding upto 60 mds. per acre under intensive manuring is prepared to be put under cultivation in about 40 lakh acres.

**Bajra** :—Occupies about 27 million acres to yield about four million tons of grains. U.P., Rajasthan, Punjab, Gujarat and Maharashtra, are the chief growing tracts. The duration of the crop varies from about 2½ to 5 months. During 1963-64 bajra was cultivated in 10·8 mill. hectares and produced about 3·7 mill. tons. The all-India final estimate of bajra production for 1964-65 is : area under bajra crop 11,712,100 hectares and production 4,465,200 met. tons. Hybrid bajra evolved to yield over 30 mds. per acre is being put under intensive manuring in about 40 lakhs of acres.

**Ragi** :—Ragi ranks third in importance among the Millets and occupies about 2 million hectares to produce about 1·8 million tons of grain. Its average yield is rather high, 800 kg. per hectare compared to jowar and bajra with 500 and 350 kg. respectively. More than half the area is in Mysore, Madras and Andhra. Sixteen improved strains of ragi evolved in Madras and two in Mysore are being grown in these States. The area and yield during 1963-64 were 2·4 mill. hectares & 1·8 mill. tonnes respectively & during 1964-65, 2·43 mill. hectares & 1·92 mill. tonnes respectively.

**Other Millets** :—The others grouped under lesser or minor millets form about 1/6 of the total area under millets and are grown in about 4·6 mill. hectares and yield about 1·9 million tons of grain. The area and yield during 1964-65 were 4·6 mill. hectares and 1·98 mill. tons respectively. The most important among them are Kora or Kangi, Kodon, Cheena or Varagu, Oodalu, and Sawan.

**Maize** :†—Maize is cultivated in India in about 4·5 mill. hectares to produce about 4·5 mill. tons of grain. The major growing areas, U.P., Bihar, Rajasthan, Punjab and M.P. which between th mselves account for about three-fourth of the maize area. As in other crops the per acre yield is limited in the crop also. The average yield is only about 10 mds. per acre. Seven hybrids (Ganga 2 and 3, Ganga Saffed, Ganga high Starch, Raxyit, Deccan and Himalaya) giving 56-70 per cent more than local varieties have been produced. Seeds have been distributed to farmers particularly through the Seed Corporation set up by the Government of India. About 40 lakhs of acres are prepared to put under hybrid maize in the intensive programme for food grain production during 1964-65.

**Barley** :—During 1964-65 barley was cultivated in an area of 2,667,600 hectares and the production estimate was 2,478,100 met. tons.

### COTTON ‡

The area under cotton during 1964-65 was 8·15 mill. hectares against 8·16 mill. hectares in 1963-64.

The Sea Island cotton is gradually assuming commercial status. This cotton is grown on marginal lands in Mysore and Kerala. The acreage of cultivation of the Sea Island cotton for Mysore and Kerala States for 1961-62 and 1962-63 respectively were 3,928 and 1,230 and 4,109 and 1,052 acres. The production during 1961-62 for the above States were 300 and 175 bales.

Hybrid cotton is grown in Surat. But it has not made much progress. It is hoped that the use of a chemical FW-450 might reduce sterility.

The most important in the matter of self-sufficiency is the long staple variety—those possessing 1" to 1⅛" which are capable of spinning 40's and over. The acclimatised Egyptian variety being grown in Mysore could be raised as a summer crop in the Babbur area.

The evolution of Indo-American varieties and of Sea Island, Andrews and hybrid cottons which can replace imported cottons constitute an important landmark in the progress of cotton research. Further work for isolating still better and finer types continues under three schemes in operation in the Punjab, Bombay,* Madras.

Cotton extension schemes initiated in 1950 were continued in the Third Plan and were in operation in Andhra Pradesh, Gujarat, Madhya Pradesh, Maharashtra, Mysore, Orissa, Punjab, Rajasthan and Uttar Pradesh. Measures taken to increase production include provision of manures and fertilizers, extra irrigational facilities, improved seeds, bunding of cotton fields and improved agricultural practices including plant protection. During the years 1961-62 and 1962-63, 57 and 60 research schemes respectively were in operation on various aspects of cotton production.

Package programme for increased production of cotton in cotton growing states has been prepared. Under this, 4,35,000 acres will be brought under intensive cultivation in 20 selected districts of nine cotton growing states. Production incentives such as subsidies for phosphate fertilizers/composts (25 per cent), green manure (Rs. 2 per md.) and pesticides (25 per cent) are also provided. The programme initiated in Andhra and Madras in 1962-63 was expected to be implemented during 1963-64 in other major growing areas.

The deficit in large and medium staple cotton has now been wiped out and we are now self-sufficient in 1 1/16" mesta cotton. This is reflected in the imports which is restricted to the above 1 1/16".

## FRUIT

A wide variety of fruit and vegetables is cultivated in the country.

The total area under all fruit at present is about three million acres.

During the Second Plan period about 166,000 acres of new orchards were planted, 132,000 acres of old orchards renovated and over 4,000 gardeners were trained. About six million acres are under fruits and vegetables. This is expected to be increased to seven million acres in the Third Plan. The fruits and vegetable production of 40,000 tons at the end of the Second Plan is expected to rise to about 1,00,000 tons by the end of the Third Plan.

Fruit products amounting to over 23,000 tons are now manufactured in the country by over 800 licensed factories in Amritsar, Bombay, Calcutta, Delhi, Lucknow, Madras, Mathura and other centres.

During the three years 1960-63, 5,532, 5,448 and 5,144 metric tons of walnuts costing Rs. 17·483 mln., Rs. 15·034 mln. and Rs. 12·832 mln. respectively were exported. It is now proposed to set apart 1,000 acres in Himachal Pradesh for growing walnuts of exportable variety. A plant to manufacture banana-based ice cream powder for export purposes only is to be set up shortly.

In order to encourage the production and export of fruit products several concessions are given to the manufacturers through Directorate of Marketing by way of loans for starting new factories and renovating old ones, subsidy on tin-plate, rebate on excise duty on sugar etc

EXPORT OF FRUITS

| Fruits | 1961-62 | | 1962-63 | | 1963-64 April '63 to Jan. '64 | |
|---|---|---|---|---|---|---|
| | Quantity in met. tons | Value in Rs. mln. | Quantity in met. tons | Value in Rs. mln. | Quantity in met. tons | Value in Rs. mln. |
| Apples .. .. .. | 3 | 0·012 | 9 | 0·025 | 2 | 0·007 |
| Bananas .. .. .. | 7,082 | 1·976 | 11,269 | 3·181 | 9,025 | 3·064 |
| Citrus .. .. .. | 3,913 | 1·468 | 3,559 | 1·188 | 1,286 | 0·387 |
| Grapes .. .. .. | 3 | 0·01 | 4 | 0·009 | 2 | 0·006 |
| Mangoes .. .. .. | 2,109 | 1·912 | 1,803 | 1·521 | 1,548 | 1·562 |
| Pine apple .. .. | 73 | 0·051 | 251 | 0·008 | — | — |

(Citrus fruits include orange, lemon, lime and others).

## REGULATED MARKETS

One of the visible benefits of regulated markets, which work on democratic principles, has been the reduction in the market charges to extents varying between 29 to 50 per cent. The saving to the producer on this account is estimated to be Rs. 3 for every Rs. 100 worth of goods sold by him. Open auction system which yields better price to the producer has also been introduced in a majority of the markets. New market yards with modern amenities are also being provided.

Training of personnel in Agricultural Marketing is provided through three courses. (1) One year course for training superior personnel of the State Marketing Dept. at Nagpur ; (2) Five months course for training market secretaries and superintendents at Sangli, Hyderabad and Lucknow ; (3) Three months course for training grading supervisors and assessors at Nagpur and Madras. The total number of trainees in the three courses were 196, 621 and 264 respectively. A Central Government stipend is paid at Rs. 75 p.m. for one year course and Rs. 50 for other courses.

The Directorate of Marketing is entrusted with the development of the fruit and vegetable preservation industry and administers the Fruit Products Order promulgated under the Essential Commodities Act of 1955. This Order envisages the compulsory licensing of the manufacturers of fruit products for sale. During 1964-65, 80 licences were granted to the manufacturers of fruits and vegetable products bringing the total number of licences so far granted to 908.

Surveys of market conditions were started soon after the Directorate was set up. As a result, five reports dealing with the production, qualitative and quantitative, internal and external demands, prices and price spreads, standardisation, markets and their operation, distribution channels, and the improvements imperative for the better marketing of 41 agricultural commodities (including cereals and pulses), 12 dealing with live-stock and live-stock products, 24 dealing with special crops have been published.

Ten major commodities among these, have been re-surveyed and reported again.

Two reports, one on marketing of wheat (second revision) and the other one on fruits and vegetables (in selected cities) were published in 1964. Reports on wool, tobacco, turmeric, co-operative marketing of cotton, walnuts, cardamom, coconut and its products, etc. are under print.

#### Grading and Standardisation

The Government of India passed the Agricultural Produce (Grading and Marketing) Act of 1937 to promote orderly marketing on the basis of statutory grades.

* Bilingual. † During 1964-65, the area under maize was about 4·6 mill. hectares and production 4·56 mill tonnes. ‡ Production of cotton during 1964-65 was 5·4 mill. tonnes (in thousand bales of 180 kgs. each) as 5·49 mill. tonnes in 1963-64.

The Act authorised the Agricultural Marketing Adviser, to fix grade standards for different types and varieties of agricultural produce, prescribe grade designation marks to indicate each quality, and issue certificate of authorisation to persons or co-operative societies to grade and mark with "Agmark" their commodities on the basis of the standards laid down.

The organisation has developed standards for 33 commodities covering 124 varieties.

The following important commodities are graded under "Agmark" for consumption within the country : Rice, paddy, wheat, atta, gur (Jaggery), fruit (mangoes, oranges, grapes, apples and sapota), potatoes, cotton, sugarcane, honey, creamery butter, ghee, vegetable oils and eggs. The Govt. is contemplating the introduction of compulsory grading of all agricultural produce meant for internal consumption.

The following commodities are graded primarily for export purposes ; myrobalans, walnuts, cigarette tobacco leaf, sann-hemp fibre, essential oils (sandalwood, lemon-grass and palmarosa oils), vegetable oils (castor and linseed), wool, goat hair and bristles. Compulsory grading of black pepper, cardamom and chillies meant for export came into force from 1st Dec. 1962. Primary grading of these is done by the Spices Export Promotion Council, which will set up laboratories at important centres for this purpose. Analysis of the check samples (for which the Directorate of Marketing and Inspection will be responsible) will be done at the Regional laboratories at Madras and Cochin.

Compulsory quality control before export in respect of onion, garlic, ginger, turmeric, pulses, tender leaves and senna leaves and edible mushrooms, potatoes, etc. is contemplated.

To ensure that the producer may get an adequate return commensurate with the quality of his produce 242 grading units at the producer level have been set up in the regulated markets and selected marketing co-operatives in various States. Specific programmes have also been undertaken to operate some pilot grading centres for grading tobacco at Ongole (A.P.) and of Kapas in Hubli-Gadag area (Mysore).

The State Agricultural Produce Market Acts, are in force in all the States except Assam, Kerala and West Bengal.

The number of regulated markets was 730, at the end of 1960-61, 970 at the end of 1961-62, 978 at the end of 1962-63, 1,035 at the end of 1963-64 and 1,204 in 1964-65.

**Marketing, Processing :** An integrated programme of marketing development embracing rural credit, marketing, processing, and ware-housing is working in the country, as a result of the recommendations contained in the Rural Credit Survey Report.

The main features of the programme are :— (1) Linking credit with marketing in the form of marketing societies ; (2) Developing processing and distribution of farming requisite on co-operative lines, and (3) Promotion of storage and warehousing.

A National Agricultural Co-operative Marketing Federation was established in 1958 to promote inter-State and export trade through co-operatives.

The marketing societies are also being encouraged to take up inter-State export of surplus agricultural commodities.

During the Third Plan period it is expected to set up 783 co-operative pressing units including 48 cotton ginning and pressing, 36 rice mills, 29 jute baling plants, 33 oil mills, 63 groundnut decorticators, 77 fruit canning units, 411 rice hullers and 86 other units.

## COLD STORAGE

The wastage on fruits and vegetables produced in the country amounts to 15 to 20 per cent due to want of proper storage and marketing facilities.

The Cold Storage Order, 1965 issued under the Essential Commodities Act, 1965, came into force from Jan. 1, 1965. It makes obligatory for all cold storages with a capacity of 300 cft. or more for storing articles of food like fruits, milk, dairy products, eggs, fish, vegetables, potatoes etc., to take licences for the purpose from Agricultural Marketing Adviser to the Government of India. Since the promulgation of the order, 24 licences were granted by the end of Jan. 1965.

The present capacity of cold storage in the country is about 2·5 million maunds provided by 200 cold storages mostly run by private traders.

The total number of Central Warehouses, under the Central Warehousiug Corporation, functioning in the country at the end of 1965 was 85 with a total capacity of 4·40 lakh tonnes.

Rs. 2 million had been earmarked by the Cooperative Wing as financial assistance for cold storage. West Bengal, Maharashtra, Gujarat, Jammu & Kashmir, Mysore and Punjab States have co-operative cold storage plants.

## AGRICULTURAL ECONOMICS

The Directorate of Economics & Statistics is one of the main organizations under the Central Government which deals with all agro-economic problems in the sphere of food and agriculture. It also co-ordinates all works relating to planning in agriculture sector, including financial reserves for the development programme, policies and procedures in Central and State Sectors.

The Directorate has a scheme for the improvement of marketing intelligence. This has been implemented in all States and Territories. Arrangements have been made for broadcasting daily prices of important agricultural commodities and weekly reviews on food and price positions on the rural programme of AIR. Market news bulletins are also issued regularly in regional languages for wider dissemination. About 400 markets in relation to 70 commodities are covered in the broadcasts.

A Price Intelligence Organisation has been set up in the Directorate to study on a regular basis the flow of market supplies, market sentiment, factors leading to rise or fall in prices, crop outlook, market behaviour etc. to advise the Govt. from time to time in formulating proper price control measures.

A research division has been set up in the Directorate to co-ordinate Farm Management investigations and also to conduct research in production economics. Various economic surveys on productivity aspects of agriculture and the pattern of input/output, agroclimatic alignment etc. are also taken up.

The statistical wing of the Indian Council of Agricultural Research does fundamental and applied investigation in statistics and also trains statisticians for field work. It has issued comprehensive index of field experiments carried out in the different States during the last decade.

## SOIL CONSERVATION

It is estimated that in the country as a whole about 200 million acres are exposed to erosion. Out of this about 100 million come under land under cultivation, 50 million acres are fallow and other uncultivated land and 50 million are desert mainly in Rajasthan.

National Soil Conservation programme was first initiated in 1953.

The co-ordination of soil conservation work between the States and Territories is achieved through the agency of the Central Soil Conservation Board which was set up in the Ministry of Food and Agriculture in 1953. Similar boards are also set up in most of the States and Territories.

The Union Ministry of Food and Agriculture have also set up a National Co-operating Committee to organize research in arid and semi-arid regions of India and to collect information on arid zone research in the country and abroad and make it available to other countries through the UNESCO.

The Union Minister for Food and Agriculture is the chairman. The Committee will also approve fundamental and applied research programmes for the several Divisions of the Central Arid Zone Research Institute, Jodhpur.

The Secretary of the Soil Conservation Board is the Secretary of the Committee.

According to the Third Five Year Plan, contour bunding and terracing were to be carried out in about 16 million acres of agricultural land. At the end of the third year of the Third Plan coverage achieved was only 4 million acres and it was expected to cover another 2.6 million acres during 1964-65.

Altogether 10 research-cum-training centres have been established at the following places :—

1. Ootacamund (Madras) for erosion control in the Nilgiri and other hills ; 2. Bellary (Mysore) for soil conservation studies in black soils ; 3. Kotah (Rajasthan) with sub-centre at Agra for erosion control in the Chambal and Jumna ravines ; 4. Jodhpur (Rajasthan) for afforestation in the Rajasthan desert ; 5. Dehra Dun (U.P.) for studying problems of afforestation in the Sivalik hills with the sub-station at Chandigarh (Punjab) for training *chos* (hill torrents) ; 6. Vasad (in the Gujarat tract for erosion control in the ravines along rivers in Gujarat) ; 7. Chandigarh (outer Sivaliks) ; 8. Chatra (water shed management) ; 9. Agra (Yamuna ravines) ; 10. Ibrahimpatnam (Andhra) for tackling red soil problems.

The Board proposes to set up one more in Orissa.

Research and training in soil and water conservation are intensified at the Regional Research Centres. During 1963-64, 30 officers and 121 assistants were trained and another 26 officers and 111 assistants were under training, bringing the total upto date to 160 officers and 907 assistants trained during the four years of the Third Plan.

The station at Jodhpur has been upgraded as a Central Arid Zone Research Institute to carry out research on fundamental and applied problems of arid zones.

During 1963-64 over 200 soil conservation schemes to cover 2·877 mill. acres of contour bunding, 6.364 mill. acres under dry farming and 0.203 mill. acres of saline and alkali soils, wastelands etc., were in progress. Centrally sponsored soil conservation schemes were in operation in the catchments of river valley projects in 14 States to reduce silt in dams and reservoirs. During 1964-65 about 0·186 mill. acres were expected to be treated bringing the anticipated achievement since initiation of Third Plan to about three-fourth of the Plan target.

An Integrated All-India Soil and Land Use Survey Scheme has been and is being executed by the Central Soil Conservation Board with four Zonal Centres at Delhi, Nagpur, Bangalore, and Haringhata, with effect from 1st March 1959. This scheme, since inception, had surveyed about 9.8 million acres by the end of 1964-65.

## RESEARCH

The Indian Council of Agricultural Research co-ordinates research work, suggests programmes of research, gives financial assistance for approved schemes, and also undertakes schemes of its own.

The annual grants made to I.C.A.R. fall under two main heads :—(a) An annual Government grant for running the administration. This

varies from year to year according to requirements, and averages about Rs. 1·35 million a year. (*b*) Payment of the net proceeds of the cess on agriculture produce. The income from this source is estimated at about Rs. 4·4 million annually.

Besides these, specific grants are made to I.C.A.R. for undertaking certain schemes from time to time. The total estimated expenditure (including the special grant) will be Rs. 5 to 8·5 million annually.

During 1964-65, 53 new research schemes were sanctioned at a cost of Rs. 3.643 million.

## NEW SCHEMES

Studies on soil such as biological fixation of nitrogen (at the Bose Institute), physico-chemico studies on acid soil (West Bengal), soil structure in relation to tillage implements (Kharagpur) are being undertaken. Similarly, studies on irrigation, *viz.*, impact of minor irrigation in farm economy (Banaras Hindu University), effect of Bhakra Nangal Project on the different regions of the Punjab are also being implemented. Studies on the adoption of improved agricultural practices in the Punjab Agricultural University and the behaviour of the prices of jowar in some of the markets of Vidarbha (at Sitabai College, Akola) are some of the socio-economic studies promoted.

Among fruit crops, co-ordinated studies on commercial storage of mango, citrus and banana and the incidental studies are being taken up in Andhra Pradesh, West Bengal, Madras, Mysore and Punjab. Cocoa is proposed to be tried on pilot trials basis in Andhra Pradesh. Floriculture is also proposed to be studied in Andhra Pradesh. Chickori is being taken up for study at the Punjab Agricultural University. Pests and diseases are also given adequate place in the investigational programme, as for example, virus on vegetable crops, in Lucknow, and white rust or Cruciferi in the Presidency College, Calcutta. Nematodes are proposed to be studied in five States and also at the Aligarh Muslim University. Mite problem is to be tackled in the Punjab Agricultural University, while dynamics of the Hemipterus pests are to be tackled at the Pilani College of Science.

On the Animal Husbandry side, a number of studies are being undertaken on livestock and its products. Poultry problem is being studied ranging from breeding to the economy of poultry keeping. Similarly, the pests and diseases of livestock like virus, Helminth are being proposed for study through various schemes. Studies on Animal Products such as on the fundamental chemico-physico properties of Casein in the Punjab Agricultural University, effect of carbonisation on Indian Wool at Sri Ram Institute, Delhi, are also proposed.

## CURRENT SCHEMES

For the saline areas situated along the coastal belt of Andhra Pradesh, a short-duration hybrid culture of rice C. 1327 has been released as MCM-1. In the Nellore delta where monsoon reaches late, culture M. 1834 has been released as BCP. 6. A hybrid called Co-ordinated Sorghum Hybrid No. 1 (CSH-1) has been released for general cultivation in the irrigation summer sorghum tract. In Maharashtra, the strains of cotton, AK. 235 and AK. 277 in the Vidarbha tract and Y.I. in the Khandesh tract were confirmed to be superior to the existing strains in yield and quality and were, therefore, approved for release for general cultivation in their respective tracts. The extra long strain ISC. 67 was recommended for release for general cultivation in the Taloi area of Gujarat, for its resistance to blackarm, better spinning count and higher yield. Two tomato varieties, Sioux and Perfection, were finally selected and released for general cultivation at Kalimpong (West Bengal). Amongst the round and long varieties of brinjal at Rajendranagar (Andhra Pradesh), Green Long Cluster and Green Long Stripped, Milk White Round and Black Round were selected for their outstanding performance. The Onion Research Station, Niphad (Maharashtra) has released scarlet onion variety N. 53 for kharif sowing. At the Banana Research Station, Tanuku (Andhra Pradesh), the growing of pineapple as an inter-crop in banana gave encouraging results. Trial cultivation of the White-Burley tobacco variety in the Darsingh Sarai areas of Bihar, has indicated the possibility of growing this type which is so suitable for export.

A number of central committees have been set up to promote production and marketing of agricultural commodities. Those committees are being wound up to be merged with the reorganised I.C.A.R., which will control also the Central Research Institutes and laboratories and regional crop institutes. The whole agricultural research set up is being reorganised under I.C.A.R. which will control all agricultural, animal husbandry, fish and forestry research institutes in India. The ICAR will be headed by a career scientist as Director General and will control three national research institutes (I.A.R.I., I.D.R.I. and I.V.R.I.).

### Research Laboratories

The Ministry of Food and Agriculture maintains directly a number of research laboratories: 1 Indian Agricultural Research Institute, New Delhi. Sub-stations at Karnal (Punjab) and Pusa (Bihar). Two new divisions of Microbiology and Plant Introduction were created. 2. Central Potato Research Institute, Simla. Laboratory at Potato Multiplication Subdivision, Bhowali (U.P.). Laboratory at Potato Breeding Sub-Station, Patna. The services of an expert, Dr. William Black, were obtained for organising research on fungal diseases. An amount of $ 65,000 was provided by the Rockefeller Foundation for the supply of laboratory equipment and books for the Institute. 3. Central Rice Research Institute, Cuttack. 4. Sugar Cane Breeding Institute, Coimbatore. Sub-station at Karnal (Punjab). 5. Central Vegetable Breeding Station, Kulu, P.O. Naggar, District Kangra (Punjab). 6. Sahni Institute, Lucknow.

Bose Institute in West Bengal, Vivekananda Laboratory in U.P., Agricultural Institute at Allahabad, and Agricultural Institute at Anand, are some of the private institutions apart from some of the universities dealing with agricultural research problems.

### Agricultural Colleges

There are 70 agricultural colleges in India, Bapatla, Tnirupathi and Hyderabad (Andhra), Jorhat (Assam), Ha inghatta, Sriniketan (Bengal), Sabour, Pusa and Kanke (Bihar), Nava Sarai and Solan (H.P.), Anand and Junagadh (Gujarat), Ranbirsinghpura and Sopore (Jammu and Kashmir), Vellayani (Kerala), Poona, Nagpur, Akola, Parbhani, Dapoli, Dhulia, Amravati and Kolhapur (Maharashtra), Madurai, Coimbatore and Annamalai (Madras), Gwalior, Jabalpur S hore, Rewa, Indore and Raipur (M.P.), Dharwar and Hebbal (Mysore), Bhubaneshwar (Orissa), Ludhiana, Karnal, Amritsar, Hissar and Mashvana (Punjab), Jobner, Udaipur, Ajmer and Sangaria (Rajasthan), Azamgarh, Allahabad, Barhalganj, Baleswar, Baraut, Banaras, Agra, Lakhoti, Kanpur, Ajitmal, Narsan, Muzaffarnagar, Simboli, Rampur, Ballia, Bijnor Ajitmal Hamirpur, Allahabad, Jaunpur, Deoria, Machhara, Pantnagar, Sheoka bad and Ghazipur (U.P.).

Eight agricultural universities of the pattern of Land Grant Colleges have already been established in Bengal (Kalyani), in Orissa (Univ. of Agri. and Technology, Bhubaneshwar), Punjab (Chandigarh), Rajasthan (Udaipur), U.P. (Pantnagar), Andhra (Rajendranagar), Madhya Pradesh (Jabalpur), and in Mysore (Hebbal). The Indian Agricultural Research Institute, New Delhi, now declared as the only National institute for agricultural research in India also gives coaching and examination and tests for post graduate degree courses in agricultural diplomas.

## LAND POLICY

The land policy of the Government of India has been formulated for the promotion of agricultural production and for the provision of social justice in the rural economy. The agrarian reform undertaken by the various State Governments during the past few years fall generally into four broad classes :—

(1) The abolition of intermediaries.

(2) Tenancy reform designed to, (*a*) Scale down rents to 1/4–1/5 of the produce, (*b*) to give permanent rights to the tenants (subject to the landlord's rights to resume a minimum holding for his personal cultivation within a limited time) and (*c*) to enable tenants to acquire ownership of their lands (subject to the landlord's right of resumption for personal cultivation) on payment of moderate compensation to the landlord spread over a period of years.

(3) Fixation of ceiling on holdings.

(4) Reorganisation of agriculture including (*a*) Consolidation of holdings, (*b*) Prevention of fragmentation and (*c*) Development of co-operative village management and co-operative farming.

The view taken in the Planning Commission is that once the land is redistributed on the basis of the current legislation, the land system should not be disturbed for a period of about 15 years thereafter.

### Land Reforms

The National Development Council called upon the State Governments to complete implementation of the land reform programmes before the end of the Third Plan and constituted a Committee of Chief Ministers under the Chairmanship of the Union Minister for Home Affairs to review at regular intervals, progress of the land reforms in different States and to suggest measures for strengthening and improving implementation.

At the suggestion of the Committee, an officer was specially deputed to go round the States to study the implementation of land reform programmes and the difficulties experienced in expeditious and effective implementation. The difficulties encountered in giving effect to the land reform programmes have been examined in detail in respect of Andhra Pradesh, Assam, Bihar, Gujarat, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh, West Bengal and Himachal Pradesh and the resulting recommendations relating to Bihar, Gujarat, Madras, Maharashtra, and U.P. have since been considered by the Implementation Committee, in consultation with the Chief Minister concerned. Questions relating to Mysore were considered in the Central Committee for Land Reforms. The conclusions reached in respect of these States are now engaging the attention of the State Governments concerned.

With a view to strengthening implementation, the Committee of the National Development Council made a number of general suggestions such as appointment of special officers and necessary staff for implementing the programme according to the fixed schedule and of a high level Committee in each State to review the progress of implementation, periodical reports to the Government of India on the state of implementation, steps for ensuring that tenant-cultivators are provided with necessary financial assistance to enable them to participate fully in the production plans and the preparation and revision of a record of tenancies.

## ABOLITION OF INTERMEDIARIES

The programme for the abolition of intermediary tenures has been almost entirely completed. During the year 1964-65 legislation has been enacted in Madras for certain tenures prevalent in parts of the State, i.e. *Sreepandaravaka*, *Thirippuvaram* and *Jenmikaram* payments. In Rajasthan legislation was enacted providing for acquisition of estates held by ex-rulers.

The position with regard to the abolition of intermediaries in the country as a whole is as follows :

| | In million acres | Percentage of total area. |
|---|---|---|
| Area in which intermediary tenures existed .. .. | 343·8 | 43 |
| Area in which legislation for the abolition of intermediaries has been passed .. .. | 322·3 | 40 |
| Area in which the abolition of intermediaries has been effected .. | 306·0 | 38 |
| Area in which intermediaries remain .. | 37·8 | 5 |

## COMPENSATION

Apart from the annual payment to be made to religious and charitable institutions whose estates were brought under the State, the compensation payable for the aquisition of intermediary rights was estimated at Rs. 641 crores (including for compensation, rehabilitation grants and for interest payments). Compensation to the extent of Rs. 230 crores has been paid to the ex-intermediaries.

## TENANCY REFORM

With the abolition of intermediaries, the tenures come under two broad categories, *i.e.* (*i*) owners who hold land directly from the State ; (*ii*) and the tenants who hold land from owners. Their rights and obligations are regulated under tenancy laws enacted in the States. Thus the multiplicity of tenancy has been considerably reduced, and in the most parts, tenants who hold land under intermediaries have now become owners of land.

**Scaling down rents—Land revenue assessment :** Legislation has been adopted in all States for the regulation of rent.

The Plan recommendation is that it should not exceed one-fourth or one-fifth of the gross produce.

But the rent fixed however varies with the State.

Legislation has been enacted in all the States for regulating maximum rents which a landlord may receive.

| States | Maximum rent payable as fraction of the value of the produce. |
|---|---|
| Andhra Pradesh .. .. .. | ¼–⅓ gross produce. |
| Assam .. .. .. .. .. | ¼ or less |
| Bihar .. .. .. .. .. | ¼ or less |
| Delhi .. .. .. .. .. | 1/5 (4 times of the land revenue) |
| Goa .. .. .. .. .. | 1/5 of the produce |
| Gujarat .. .. .. .. .. | ¼ or less |
| Himachal Pradesh .. .. .. | ¼ or less |
| Jammu & Kasbmir .. .. .. | ¼ or less |
| Kerala .. .. .. .. .. | ¼ or less |
| Madhya Pradesh .. .. .. | not to exceed 2—4 times of the land revenue |
| Madras .. .. .. .. .. | ⅛—2/6 or less |
| Maharashtra .. .. .. .. .. | ⅛ or less |
| Manipur .. .. .. .. .. | ⅛—1/5 (4 times of the land revenue) |
| Mysore .. .. .. .. .. | ¼ or less |
| Orissa .. .. .. .. .. | ¼ or less |
| Punjab .. .. .. .. .. | ⅛ or less |
| Rajasthan .. .. .. .. .. | ⅛ (twice the land revenue or less) |
| Tripura .. .. .. .. .. | ⅛—1/5 (4 times of the land revenue) |
| West Bengal .. .. .. .. .. | ⅛ or less |

**Security of Tenure :** Legislation providing security of tenure has been enacted in all the states. In Andhra Pradesh and Madras the existing provisions are of temporary nature and a comprehensive bill is under consideration. In Orissa the provisions are yet to be enforced. During the year the provisions of the Kerala Land Reforms Act, 1963 (Act I of 1964) regarding security of tenure, regulation of rent etc. were brought into force. In Goa legislation has been brought on the Statute Book.

**Temporary Protection :** Pending enactment of adequate legislation, ejectment of tenants and sub-tenants has been stayed for varying periods prescribed by law in Andhra, Kerala, Madras, Madhya Pradesh, Manipur, Mysore, Orissa and Punjab.

**Fixity of Tenure :** A number of States legislated to provide for fixity of tenure and restricted grounds on which landlord could eject them, either on a qualifying basis (*i.e.* tenants holding land for a specified period and or by prescribing conditions for the resumption of limited land by the landlord). Security of tenure on the qualifying basis of occupancy or other conditions has been granted in some States 6-10 years in Andhra ; 12 years in Mysore, the PEPSU area of the Punjab and Bihar ; 3-7 years in Madhya Pradesh, and 6-12 years in the Punjab.

**Resumption :** Legislation has been put through in most of the States prescribing a basis for the resumption of the land by the landlords, as shown below : *Assam :* Landlords can resume ⅔ of the area owned subject to a minimum of 5⅓ acres and a maximum of 33⅓ acres ; *Bengal :* Limit on resumption has been placed at ⅔ of the area owned ; *Jammu and Kashmir :* 2-6 acres ; *Madras :* Owners with 12½ acres of wet land or less can resume for personal cultivation half the area leased, subject to a maximum of 5 acres ; and in *Orissa :* Owner has a right to resume an area upto 7 standard acres of wet land or 14 acres of dry land for personal cultivation. But in Bengal with regard to *Bargadars* (crop sharers) the landlord may resume only ⅓ of the area if it is more than 7½ acres, but all, if it is less.

*Himachal :* ¼ upto a maximum of 3 acres ; *Andhra :* 3 family holdings (12-48 acres); *Mysore :* 50 to 75 per cent ; *Maharashtra :* ¼ upto a maximum of 3 family holdings (12-180 acres) ; *Telangana :* 3 family holdings (12-180 acres).

A basis for resumption had to be found to prevent large-scale ejectments. In the Second Plan a distinction was made between owners who own a family holding or less and others who own land exceeding a family holding. It was suggested that owners in the former class may be permitted to resume one-half of the area leased, and if thereby a tenant's holding is reduced to less than a basic holding the Government should find extra land for the tenant. About land-owners in the second category resumption is subject to the tenants' right to retain minimum land between a basic and a family holding.

The definition of 'personal cultivation' also presented difficulty. In most State legislation the definition is made specific and comprehensive.

**Ownership Right for Tenants :** Tenants were declared owners on payment of compensation to owners in almost all States.

The right of purchase is optional in Punjab. In Assam, Bihar, Jammu and Kashmir, Madras and West Bengal the right of ownership is available only to tenants cultivating lands above the ceiling limit of land holders.

Implementation of the provision has been completed only in Bengal (in respect of raiyats), Delhi and U.P. while it is in progress in other States.

| States | Purchase price determined in no. of tenants (in lakhs) | Holdings in lakhs of acres |
|---|---|---|
| Gujarat .. .. | 4.60 | 14.00 |
| Maharashtra .. | 4.36 | 15.50 |
| Punjab .. .. | 0.19 | 1.30 |
| U.P. .. .. | 0.19 | 0.12 |

**Restrictions and Conditions :** In some parts of certain States tenant's right to purchase was restricted as follows : *Andhra* (Hyderabad), *Maharashtra* (Marathwad), *Gujarat* (Kutch). Only protected tenants were conferred the rights. *Madhya Pradesh and Himachal :* Only for occupancy tenants in M.P. more than 5 years possession with the tenants ; *Punjab :* Only such tenants of non-resumable areas (in continuous possession for six years) were permitted to buy ; *Bihar and Mysore :* For continuous possession for twelve years. The time limit for purchase was fixed as follows : Where the right to purchase ownership is optional, the tenant can exercise it in time at his discretion. But in Gujarat, Maharashtra and Madhya Pradesh (former Madhya Bharat area) the right must be exercised within a prescribed period.

**Compensation to Landlords :** The joint committee on the Constitution (17th Amendment) Bill has recommended on March 25, 1964, that no land under personal cultivation held within the prescribed ceiling limits can be acquired by the State without payment of compensation at a rate not less than its market value.

For the purpose of achieving this object, Clause I of Article 31A of the Constitution has been suitably amended.

Compensation payable by tenants for the requisition of ownership varied from State to State except in the Punjab (where it is fixed at ⅓ of the average market value). Compensation is generally a multiple of rent or land revenue. In Andhra (Hyderabad 6–15) ; Madhya Pradesh (Madhya Bharat : 2–8 of the net income of landlord) ; Ajmer : 12 ; former Vindhya Pradesh : 15 ; former Madhya Pradesh (7–10) ; Rajasthan (for unirrigated lands) ; 10 and Uttar Pradesh 10.

In the Travancore part of Kerala it is fixed at eight and a half times the net annual income.

The compensation is fixed as a multiple of the assessment in five States :—Gujarat and Maharashtra : 20–200 times of the assessment ; Delhi : 20-40 ; Himachal Pradesh : 48 and Punjab (PEPSU) : 90 times of the assessment. This compensation is generally payable in instalments (except in former Madhya Pradesh) spread over a period of 5–15 years.

The optional right to purchase is seldom exercised. Tenants required persuasion and help. In Gujarat and Uttar Pradesh the State Governments had to organise administrative drives to persuade tenants to become owners of land. The State Government (in former Saurashtra) provided even credit facilities amounting to about Rs. 20 million through the Land Mortgage Banks to enable the tenants to acquire ownership rights.

The Second Five Year Plan had recommended that tenants of non-resumable areas should be brought into direct relationship with the State, but the total burden, including land revenue and instalment payments towards purchase price, should not exceed the level of rent recommended in the Plan.

## FIXATION OF CEILING

**Ceiling on Holding :** There is a general movement towards fixing a maximum and minimum on land holdings, as an aspect of land reform. This relates to (1) the absolute amount of land which any individual may hold and (2) the future acquisition of land.

Legislation placing ceiling on agricultural holdings have been enacted in all states and territories except Punjab. Though there is no outright ceiling on ownership in Punjab, the Government is empowered to settle ejected tenants on lands under personal authorities of owners in excess of the prescribed limits.

The following table shows ceiling on existing and future holdings in different States :—

| State | Existing Holding in Acres | Future Holding in Acres |
|---|---|---|
| Andhra Pradesh | 27—324 | 12—260 |
| Assam | 50 | 50 |
| Bihar | 20—60 | 20—60 |
| Gujarat | 19—132 | 19—132 |
| Jammu & Kashmir | 22¾ | 22¾ |
| Kerala | 15—37½ | 15—37½ |
| Madhya Pradesh | 25—75 | 25—75 |
| Madras | 24—120 | 24—120 |
| Maharashtra | 18—126 | 12—126 |
| Mysore | 27—216 | 18—144 |
| Orissa | 25—100 | 25—100 |
| Punjab | 30 Std. | 30 Std. |
| Rajasthan | 30 Std. | 30 Std. |
| U.P. | 40 | 12½ |
| W. Bengal | 25 | 25 |
| Delhi | 30 Std. | 30 Std. |
| H.P. | 30 Std. | 30 Std. |
| Manipur | 25 | 25 |
| Tripura | 25—75 | 25—75 |

As a result of implementation of legislation for ceilings on holdings considerable acreage has become surplus and allotted to tenants etc. as below :—

Land declared surplus & allotted :

(million acres)

| States | Declared surplus | Allotment made |
|---|---|---|
| Andhra | 0·0521 | .. |
| Assam | 0·021 | 3,000 acres were taken over. |
| Bengal | 0·524 | Leased to landless workers on 3 yearly basis. |
| Jammu and Kashmir | 0·45 | Distributed to tenants. |
| Maharashtra | 0·1 | 37,000 acres were taken over. |
| Punjab | 0·42 | 0·15 acres settled by tenants and landless people. |
| U.P. | 0·16 | Of this 55,000 acres distributed. |

In Assam, Bihar, Delhi, Gujarat, Madhya Pradesh, Maharashtra and parts of Tripura provisions of the Bill have been enforced and implementation is progressing.

## CONSOLIDATION

**(a) Size of Holding :** The average size of a holding for the whole of India is 7·5 acres, but this varies from State to State : Assam 5·3 acres, Bihar 4·1 acres, Bombay* 4·5 acres, M.P. 13·9 acres, Madras 9·7 acres, Orissa 5·6 acres, Punjab 11·8 acres, U.P. 5·3 acres, W. Bengal 4·7 acres.

Kashmir 3·8 acres, Kerala 2·4 acres, Mysore 7·2 acres, Rajasthan 16·9 acres.

The majority of the holdings will be less than 5 acres, a great majority indeed less than 2.

The proportion of households that held either no land or less than five acres was about three fourths, and the total share was about one-sixth of the whole area of cultivated land.

Legislation has been enacted in most of the States and in the Delhi and Himachal Pradesh Territories for prevention of holdings and consolidation of fragmented holdings. Consolidation was completed over 29·5 million acres by the end of the Second Plan. 31 million acres have been targeted in the Third Plan. During the first three years of the Third Plan about 20.4 million acres have been consolidated and during 1964-65 about 4.6 million acres were likely to be consolidated.

**(b) Prevention of Fragmentation :** Legislation disallowing fragmentation has either been enacted or in the process of enactment in fifteen States. It has not been implemented in Bengal, Orissa & Punjab. Bills are under consideration in non-Hyderabad portion of Andhra Pradesh. U.P. below 6¼ acres ; former Hyderabad below a basic holding ranging from 2–24 acres ; Rajasthan below a size to be determined by the State Government ; Delhi below 8 standard acres ; Madhya Pradesh below 5 acres of irrigated or 10 acres of dry land.

## CO-OPERATIVE FARMING

Co-operative farming is an organization "in which each cultivator would retain his right in his own land, but the cultivation operations would be carried on jointly. The expenditure would be met from a common fund and deducted from the gross income. The net income would be distributed among the cultivators in the proportion of the land belonging to each".

The main features of co-operative farming are thus : that land is formed into a single unit ; proprietorship rests with the individuals ; management is carried on jointly, the members are paid for their work ; and the net profits distributed among the members after setting aside money for building reserves.

The main purpose of such type of farming is to secure economy in the use of machinery, and the advantages of large-scale farming.

The societies formed for co-operative farming get State assistance in the form of lower assessment, loans for the purchase of seeds, supply of manure and other implements at concessional rates, and contribution towards share capital without sharing in profits. The money along with the interest is repayable in instalments.

The co-operative farming societies have been classified into four kinds :—

**(i) Co-operative Better Farming Society :** This is organised for the purpose of introducing improved methods of agriculture. It helps to promote the use of improved seeds, implements and manures. It can undertake bunding, irrigation, joint harvest and marketing of produce. In this system each member is responsible for the cultivation of his own land except for the specific purpose for which he joins the society. Land is not pooled.

**(ii) Co-operative Joint Farming Society :** The objects are : to purchase or take on lease lands for cultivation ; to purchase, erect and repair residential buildings, cattle-sheds and godowns to facilitate joint farming ; to purchase farming requirements, to sell and process the farm produce ; to raise funds on the security of lands, crops and other assets for the purpose of giving loans to the members ; to undertake cattle breeding, dairy farming, vegetable growing and fruit gardening ; to arrange for expert advice and the spread of agricultural education among the members of the society. This type of society is particularly suited for solving the problem for fragmentation and sub-division of holdings.

**(iii) Co-operative Tenant Farming Society :** This type of society is suitable where large areas of land are available on lease from landlords or the Government. If the society owns land on free-hold or lease-hold, and its holding is divided into smaller holdings or plots, each of which is leased to individual tenants, who are members of the society for the purpose of cultivation, then it is called a co-operative tenant farming society.

**(iv) Co-operative Collective Farming Society :** Such a society undertakes joint cultivation. Lands are cultivated jointly, and the produce is raised collectively and distributed among the workers in proportion to the labour and other resources contributed by them. The co-operative collective farming society has all the features of a joint co-operative farming society except that in the former, the lands belong to the society as free-hold or lease-hold, whereas in the latter, the lands are held by the members as owners or tenants.

The programme for Cooperative farming in the Third Plan envisages acquisition of 320 planned pilot projects at a rate of one per district in selected C.D. blocks where Panchayati Raj institutes and cooperatives have made progress. Each of these pilot projects will consider a minimum of 10 Coop. farming societies demonstrating its advantages. Till the end of 1963, 180 such pilot projects were started and 1,200 Coop. farming societies with a membership of 24,000 covering an area of 1,51,000 acres were acquired.

For more details on farming societies see article entitled Co-operative Movement.

## AGRICULTURAL LABOUR

(*See under main article on "Labour".*)

## AGRICULTURAL PRODUCTION BOARD

As a result of the recommendation of the National Development Council in Nov. 1963, an Agricultural Production Board has been constituted with a view to ensuring an integrated approach in matters of agricultural policies and programmes on behalf of the Central Government.

* Bilingual.

The Board will have seven members with the Central Minister for Food and Agriculture as Chairman.

The main function of the Board will be to bring about expeditious implementation of the programmes for the development of agriculture including animal husbandry, forestry and fisheries.

## FIVE-YEAR PLANS

The outlay for agricultural programmes from First, Second and Third Plan respectively were Rs. 5,700 mill., 9,440 million and 19,150 million.

In the Second Plan agricultural programmes were intended to provide adequate food to support the increased population and the raw materials needed for a growing industrial economy and also to make available larger exportable surpluses of agricultural commodities. The basic objective of the Third Five Year Plan is to achieve self-sufficiency in foodgrains and increase the production of other agricultural and commercial crops to meet the requirements of the industry and the export trade.

Th efollowing table shows the estimates of agricultural production at the end of Third Plan period.

| Commodity | Unit | Base level of production 1960–61 | Target of additional production | Estimated production 1965–66 | Percentage increase |
|---|---|---|---|---|---|
| Foodgrains | Million tons | 76·0 | 24·0 | 100·0 | 31·6 |
| Oilseeds | ,, | 7·1 | 9·8 | 38·0 | 2·7 |
| Sugarcane (Gur) | ,, | 8·0 | 2·0 | 10·0 | 25·0 |
| Cotton | Million bales | 5·1 | 1·9 | 7·0 | 37·2 |
| Jute | ,, | 4·0 | 2·2 | 6·2 | 55·0 |
| Coconut | Million nuts | 4,500 | 775 | 5,275 | 17·2 |
| Arecanut | Thousand tons | 93 | 7 | 100 | 7·5 |
| Cashewnut | ,, | 73 | 77 | 150 | 105·5 |
| Pepper | ,, | 26 | 1 | 27 | 3·9 |
| Cardamom | ,, | 2·26 | 0·36 | 2·62 | 15·9 |
| Lac | ,, | 50 | 12 | 62 | 24·0 |
| Tobacco | ,, | 300 | 25 | 325 | 8·3 |
| Rubber | ,, | 26·4 | 18·6 | 45 | 70·5 |
| Coffee | ,, | 48·0 | 32 | 80 | 67·7 |
| Tea | Million lb. | 725 | 175 | 900 | 24·7 |

(For more details see 1959-60 and 1960-61 Directories).

### CLASSIFICATION OF AREA

(thousand acres)

| States and Territories | Forests | | Area not available for cultivation | | Uncultivated land excluding fallow | | Fallow land | | Total cropped area | |

# LABOUR

THE achievement of Independence and the emergence of India as a Republic wedded to the idea of a welfare State has made the welfare of the working classes a prime responsibility of the State. Several administrative and legislative measures of far-reaching significance have already been introduced in the country. Health, education, housing and social welfare for the masses found a prominent place in the First and Second Five Year Plans.

The general position in 1961-62 was as follows :—

**Total Labour Force (1961 census) : 18,84,10,000**

No. employed in factories coming under the Factories Act of 1948 .. .. 41,97,360

No. of trade unions on register .. 11,476

No. of trade unions which submitted returns of membership .. .. .. 7,044

No. of members of trade unions submitting returns .. .. .. .. 37,28,000

The Central co-ordinating authority in India for questions connected with labour legislation is the Ministry of Labour and Employment of the Government of India with the Labour Minister in charge. The administration of matters, connected with the English and Indian Merchant Shipping Acts, the Mercantile Marine Department and Indian Seamen is with the Ministry of Transport. In respect of all the Railways, the Labour Minister is responsible for the administration of the Payment of Wages Act, 1936, trade disputes, hours of work for employees not covered by the Factories Act and regulation of employment of children. He is also responsible for regulation of labour and safety in respect of mines and oilfields ; trade disputes in industries, businesses or undertakings carried on by the Central Government, and inter-State migration.

Among the more important Acts that govern labour conditions and relations in India are the following : 1. Indian Factories Act, 1948 ; 2. Indian Mines Act ; 3. Payment of Wages Act ; 4. Minimum Wages Act ; 5. Workmen's Compensation Act ; 6. Maternity Benefit Acts (States) ; 7. Indian Trades Union Act ; 8. Industrial Disputes Act ; 9. Industrial Disputes (Appellate Tribunal) Act ; 10. Tea Districts Emigrant Labour Act ; 11. Shop Assistants Acts (States) ; 12. Employees' State Insurance Act ; 13. Collection of Statistics Act ; 14. Employees Provident Funds Act.

## FACTORIES ACT, 1948

The Act covers all industrial establishments employing 10 or more workers and using power and establishments employing 20 or more workers and not using power. The State Governments have been empowered to apply the provisions of the Act to any premises, irrespective of the number of persons employed, where a manufacturing process is carried on with or without the aid of power, except where the work is done by the worker solely with the aid of his family.

The Act prescribes that every factory should be kept clean and free from effluvia arising from drains, privies, etc., and lays down stipulations regarding sweeping, cleaning, disinfecting, whitewashing, ventilation, temperature, drinking water, latrines, etc.

In existing factories 350 cubic feet of space should be provided for every workman. In new factories to be built the space for each workman should be 500 cubic feet.

Elaborate provision regarding safety such as fencing of machinery, etc., has been laid down. Women and children are prohibited from employment on certain types of machinery.

Washing facilities for the workers, appliances for first-aid, rest shelters, creches, canteens, etc., are prescribed under the Act. In every factory where 500 or more workers are employed the occupier shall employ Welfare Officers.

Weekly hours of work have been fixed at 48 and daily hours at 9. The maximum spread-over allowed is 10½ hours. No worker shall work for more than 5 hours before he has had an interval for rest of at least half an hour.

Payment for overtime has been prescribed at double ordinary rate of wages.

No woman or child shall be employed in any factory except between the hours of 6 a.m. and 7 p.m.

A weekly day of rest has also been prescribed.

No child who has not completed his fourteenth year shall be required or allowed to work in any factory. A child who has completed his fourteenth year or an adolescent (a person who has not completed his eighteenth year) shall not be allowed to work in a factory unless a certificate of fitness by a certifying surgeon is in the custody of the manager of the factory and he carries while at work a token giving reference to such certificate. No 'child' shall be employed or permitted to work in any factory for more than 4½ hours in a day or between the hours of 7 p.m. and 6 a.m.

Every adult worker who has completed a period of 12 months' continuous service in a factory (later amended, see below) shall be allowed during the subsequent period of 12 months leave with wages including dearness allowance for a period calculated at the rate of one day for every 20 days of work performed by him during the previous 12 months, subject to a minimum of 10 days. In the case of children the leave should be at the rate of one day for every 15 days of work subject to a minimum of 14 days.

It may be added here that the recent tendency for many units particularly in south India has been to allow holidays with pay in excess of the minimum stipulated.

In many awards given by Adjudicators leave with pay upto 14 days has been granted.

Where any worker in a factory contracts any disease specified in the schedule appended to the Act, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

The administration of the Act is left to the State Governments. The Central Government have set up an advisory organisation, namely the Office of the Chief Adviser, Factories.

The Act was amended in 1954. Under this amendment eligibility for leave with pay would be 240 days' service during a calendar year. Proportionate leave will be granted to those whose service starts after the beginning of the calendar year.

The annual leave with wages will be exclusive of holidays during or immediately before or after the period of leave.

The leave can be carried forward from one calendar year to another provided the maximum does not exceed 30 days in the case of an adult and 40 days in the case of a child.

No prior notice will be necessary when a worker requires leave to cover a period of illness.

The Act permits six hours' work at a stretch without any interval when the total number of hours to be worked on any day in a shift does not exceed six.

It also permits newspaper printing presses to work their entire night shift of six hours at a stretch.

It allows a worker a maximum of 50 overtime hours in a quarter year which is deemed to have begun on the first day of January, April, July or October.

It enables continuous employment of workers in case some of the subsequent shift workers do not turn up in time.

For the purpose of computing the rate of wages of a person who takes advantage of the concessional sale of foodgrains and other articles the basis will be the maximum ration admissible to a standard family of a specific number of consumption units.

Women and children are also prohibited from cleaning, lubricating or adjusting any prime mover of transmission machinery while it is in motion if such work exposes them to risk of injury.

## FACTORY STATISTICS

Under the provisions of the Factories Act, 1948, registered factories submit annual and half yearly returns on employment to the Chief Inspectors of Factories in the various States. All-India figures are compiled by the Labour Bureau and are published in the *Indian Labour Journal*.

The number of factories on registers in the areas covered by the States during 1962 and 1963 were 51,186 and 54,682 respectively.

The following table sets out the statistics of the average daily numbers of persons employed in factories during the half year ending 30th June 1963.

WORKERS EMPLOYED (1963 First-half)

| Industry | Average Number of Workers Employed Daily |
|---|---|
| Processes allied to agriculture .. | 1,54,929 |
| Food except beverages .. .. | 5,48,378 |
| Beverages .. .. .. .. | 9,015 |
| Tobacco .. .. .. .. | 1,73,776 |
| Textiles .. .. .. .. | 12,38,698 |
| Footwear, other wearing apparels and made up textile goods .. .. | 31,771 |
| Wood and Cork except furniture .. | 60,505 |
| Furniture and fixtures .. .. | 18,166 |
| Paper and paper products .. .. | 48,289 |
| Printing, publishing and allied industries .. .. .. .. | 1,14,531 |
| Leather and leather products (except footwear) .. .. .. .. | 24,279 |
| Rubber and rubber products .. | 47,117 |
| Chemicals and Chemical products .. | 1,66,793 |
| Products of petroleum and coal .. | 16,685 |
| Non-metallic mineral products (except products of petroleum and coal) .. .. .. .. | 2,08,483 |
| Basic metal industries .. .. | 2,13,557 |
| Metal products (except machinery and transport equipment) .. | 1,67,296 |
| Machinery (except electrical machinery) .. .. .. | 2,84,572 |
| Electrical machinery, apparatus, appliances and supplies .. .. | 1,13,689 |
| Transport equipment .. .. | 3,87,041 |
| Miscellaneous industries .. .. | 1,36,954 |
| Electricity, gas and steam .. .. | 50,381 |
| Water and sanitary services .. | 8,415 |
| Recreation services .. .. .. | 4,012 |
| Personal services (Laundries, Dyeing and cleaning) .. .. .. | 6,078 |
| Total .. | 41,97,360 |

### State-wise Figures

The following para. shows the average daily employment in factories in the first half of 1963 by State :—

Andhra Pradesh 2,27,467; Assam 64,713; Bihar 2,05,966; Gujarat 3,84,106; Kerala 1,77,315; Madhya Pradesh 1,86,140; Madras 3,48,598; Maharashtra 8,70,489; Mysore 1,99,467; Orissa 51,119; Punjab 1,45,990; Rajasthan 68,947; Uttar Pradesh 3,60,072; West Bengal 8,25,870; Andaman & Nicobar Islands 2,143; Delhi 74,815; Himachal Pradesh 2,175; Manipur 505; Tripura 1,463; Total 41,97,360.

## MINES ACT

With a view to amending and consolidating the law relating to the regulation of labour and safety in mines, the Mines Act, 1952 was passed and brought into force from July 1952. The Act extends to the whole of India except Jammu and Kashmir. The main features of the Act are given in the 1960-61 Directory.

The Mines Amendment Act, 1959, received the assent of the President on 27th December 1959 and came into force from Dec. 16, 1960. Some of the important features of the Amendment Act are as follows :—The definition of the term "mine" has been made clear so as to include quarries, open cast workings, private railways, aerial ropeways and conveyors etc. The Act provides for the maintenance of first-aid rooms in mines where more than 150 persons are employed instead of 500 persons as under the original Act. The Act prohibits the employment of persons in a mine when its owner fails to comply with the notice of the Mines Inspectorate for remedying any matter connected with a mine which is dangerous to human life, limb or safety. The Act provides also for the payment of over-time at a uniform rate of twice the ordinary rate of wages for persons employed both above and below ground whereas in the original Act the rates were 1¼ times and twice for persons employed above, and below ground respectively. Under the Amendment Act, workers employed below ground are entitled to annual leave with wage at the rate of one day for every 16 days of work and in any other case one day for every 20 days of work. The workers can accumulate the leave period upto a maximum of 30 days. The chapter on leave with wages was revised so as to be in line with similar provisions of Factories Act, which is considered to be more liberal. The present Act enhances the penalty for contravention of the different provisions of the Act by raising the scales of fines and also provides for imprisonment with fine for contravening orders under section 22 of the Act.

### Wage Boards

The Govt. of India has set up two wage boards —one for the iron-ore mining industry and the other for the limestone and dolomite mining industries—with headquarters in Calcutta.

The boards will determine the categories of employees who should be brought within the scope of the proposed wage fixation and work out a wage structure based on the principles of fair wages as set forth in respect of the Committee on Fair Wages.

### MINING STATISTICS

The average daily number of workers employed in mines in 1939, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958 and 1962 was 298,650; 549,048; 559,196; 593,868; 568,254; 590,776; 428,581; 651,321, 649,360 and 684,226 respectively. The available figures are given in the following table :—

**EMPLOYMENT IN MINES BY STATE 1963 AND 1962**

| States | Underground Males | | Opencast Workings | | | | Surface | | | | Total | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | 1963 | | 1962 | | 1963 | | 1962 | | | |

*Collieries :* During the month of Jan. 1965 the number of collieries working was 827 and the workers employed in them were 4,20,316. The average cash earnings of the workers per week for the whole of India was Rs. 28·95 and the number of working hours was 48.

## DOCK WORKERS' ACT

The Dock Workers' (Regulation of Employment) Act, 1948 passed in March 1948 has in view the elimination of hardship caused to workers on account of the casual nature of the work. It enables the Central and State Governments to frame schemes for the registration of dock workers to ensure greater regularity of employment and to regulate the employment of workers whether registered or not and the terms and conditions of such employment.

It provides for registration, rates of wages, hours of work, holidays with pay, prohibits, restricts or controls the employment of workers to whom the scheme does not apply, training and welfare, health and safety measures, minimum payment for the period of unemployment. It also provides for the setting up of an Advisory Committee consisting of Government, labour and employers, and for the employment of Inspectors.

## PAYMENT OF WAGES ACT

The Act applies only to wages and salaries which average below Rs. 400 per month.

For the purpose of the Act "wages" means all remuneration capable of being expressed in terms of money and includes any sum payable

under an award or settlement, any remuneration for overtime work or holidays and bonus but does not include the value of housing, employer's contributions to pension or provident funds or travelling allowance.

No wage period is to exceed one month and wages are to be paid within a prescribed time not exceeding 10 days from the end of the wage period. All wages are to be paid in coin and, or currency notes. Fines are not to exceed half anna in the rupee. Permissible deductions from wages have also been specified.

The administration of the Act, as far as factories are concerned, has been entrusted to the Inspectors of Factories in the States. In regard to persons employed in mines and in railways the responsibility of administering the Act rests upon the Chief Labour Commissioner (Central).

The Act was amended in Dec. 1964 with a view to removing difficulties experienced in the working of the Act.

## MINIMUM WAGES ACT, 1948

The Act covers the following industries or types of establishments. Woollen carpet making or shawl weaving; rice, flour or dal mills; tobacco manufactories (including bidi making); plantations; oil mills; employment under any local authority; road construction or building operations; stone breaking or stone crushing; lac manufactories; mica works; public motor transport; tanneries and leather manufactories; tanneries, and agriculture. The appropriate Governments can extend the application of the Act to any industry wherein, in their opinion, minimum wages should statutorily be fixed.

The Act requires the Central or State Governments, as the case may be, to fix minimum rates of wages payable to persons employed in the industries mentioned above.

The Act provides for the fixation of minimum time rates, minimum piece rates, guaranteed time rates and overtime rates appropriate to different occupations, or localities and for adults, adolescents, children and apprentices. The minimum rate may consist of a basic rate and a cost of living allowance and or cash value of concessions or it may be an all-inclusive rate.

The Act authorises the appropriate Governments to appoint Committees and Sub-Committees to hold inquiries and advise them to fix minimum rates of wages in respect of any scheduled employment or for the revision of these rates. They may also appoint an Advisory Board for co-ordinating the work of various Committees and also to advise Government generally in the matter of fixing or revising minimum rates of wages.

The Central Government have set up a Central Advisory Board for advising the Central and State Governments and for co-ordinating the work of State Advisory Boards. The Committees and Sub-Committees as well as the Central and State Advisory Boards are to consist of equal number of representatives of employers and employees, and of independent persons not exceeding a third of the total number of members.

The Central or the State Governments, as the case may be, can fix the number of hours of work per day, provide for a weekly holiday, etc., in regard to any employment in which minimum wages have been fixed under the Act.

## WORKMEN'S COMPENSATION ACT

Under the Act payment of compensation has been made obligatory on all employers whose employees come within its scope, and injured workmen or the dependents of those killed can obtain compensation in all cases where personal injury has been caused by accident *arising out of and in the course of employment* and where, except in the case of injury resulting in death, the accident is not directly attributable to the workman having been at the time of the accident under the influence of drink or drugs or to wilful disobedience of rules or orders or wilful disregard of safety devices.

Besides bodily injuries the contracting of certain occupational diseases such as anthrax and mercury, lead and phosphorus poisoning were deemed and treated for the purposes of compensation, as injuries caused by accident, provided however, that the worker concerned was in the service of the same employer for more than six months.

The main provisions of the Workmen's Compensation Act as it stands today are as follows:

In all cases persons employed in an administrative or clerical capacity and those whose monthly earnings exceed Rs. 400 (except Railway Servants) are excluded.

As far as seamen are concerned, those employed on ships registered in India are covered. But if accidents take place within the three mile limit of the territorial waters the Act applies even to those employed on ships not registered in India.

Not only workmen employed within the precincts of a factory or a mine but also men engaged in any kind of work incidental to or connected with a factory or any mining operation are entitled to the benefits of the Act.

Any person who is covered by the Employees' State Insurance Act, 1948, and who is entitled to receive disablement or dependent's benefit from the Employees' State Insurance Corporation is not entitled to claim any compensation from the employer under this Act.

The amount of compensation payable depends, in the case of death, on the average monthly wages of the deceased workman and in the case of an injured workman both on the average monthly wages and the extent of disablement. The term 'wages' includes overtime pay and the value of any concessions or benefits in the form of food, clothing, free quarters, etc.

The amounts of compensation payable in the case of an injured workman whose monthly wages are not more than Rs. 10 are Rs. 500 for death, Rs. 700 for permanent total, and half the monthly wages for temporary disablement. For a workman whose monthly wages are between Rs. 50 and Rs. 60, the corresponding figures are Rs. 1,800, Rs. 2,520 and Rs 15 p.m. respectively. The maxima for persons earning over Rs. 300 per month are Rs. 4,500, Rs. 6,300 and Rs. 30 per month respectively. In the case of minors the amounts of compensation for death and for permanent total disablement are at the uniform rate of Rs. 200 and Rs. 1,200 respectively, and half the monthly wage for temporary disablement.

The interests of dependents in cases of fatal accidents have been safeguarded by ensuring that (1) all cases of fatal accidents should be brought to the notice of the Commissioner; (2) in all cases where an employer admits liability the amount of compensation payable is to be promptly deposited with the Commissioner; and (3) in cases where the employer disclaims liability and there are good grounds for believing compensation to be payable, the dependents get the information necessary to enable them to judge if they should make a claim or not.

An employer is permitted to make to any dependent advances on account of compensation not exceeding an aggregate of one hundred rupees.

The Act is administered by Commissioners appointed by State Governments. In areas in which the Employees' State Insurance Scheme has been implemented, the payment of workmen's compensation is the responsibility of the E.S.I. Corporation.

The Workmen's Compensation Act was first enacted as already mentioned in 1923 and has since undergone a number of important amendments. The basic structure of the Act, however, has remained more or less the same.

An Amendment Bill—Workmen's Compensation Amendment Bill 1958—was passed by Parliament in Feb. 1959.

The Amendment aims broadly speaking at the following:

The removal of distinction between adult and minor in the matter of compensation; the waiting period during which the worker is not entitled to compensation would be reduced from seven to five; if the disablement lasts 28 days or more there would be no waiting period; if payment of compensation is delayed more than one month from the due date an interest of 6 per cent would be levied on the employer; there would be a penal compensation of 50 per cent if the delay in payment was not justified; the time limit for filing claims would be raised from one year to two years, delays in this might also be condoned; in case of transfer of assets of factory compensation would be the first charge; failure to carry out provisions of the Act would entail a penalty of Rs. 500 as against Rs. 100; factory inspectors and mine inspectors could be authorized to file claims; the number of injuries mentioned in the schedule would be raised from 14 to 54; the definition of workman would be enlarged; the definition of establishments to which the Act refers would also be enlarged; the schedule relating to occupational diseases would also be amended

The basic points relating to another amendment were: a revision of the current rates of compensation and extension of its coverage by raising the present wage limit from Rs. 400 to Rs. 500.

These two important matters were before an Actuarial Committee, which went into the question of the financial burden any such proposal would impose on the industry. The Sub-Committee constituted to examine the report of the Actuarial Committee had recommended that the system of payments of compensation should be replaced by a system of periodical payments which should be disbursed through the agency of the Employees' State Insurance Corporation and the rates of compensation should be raised in accordance with the recommendations of the Study Group on Social Security. The Sub-Committee had also supported the proposal to increase the wage limit for coverage from Rs. 400 to Rs. 500 p.m.

The Act has accordingly been amended since 19th Dec. 1962 to raise the applicability of the Act to persons getting Rs. 500 per month.

### STATISTICS

An annual note on the working of the Act is published regularly in the *Indian Labour Gazette*.

The latest available statistics on the subject will be found in the following table:—

| Year | Total number of cases | Total compensation paid |
|---|---|---|
| | | Rs. |
| 1950 .. .. | 61,958 | 57,37,278 |
| 1951 .. .. | 63,123 | 58,98,253 |
| 1952 .. .. | 58,734 | 56,37,368 |
| 1953 .. .. | 61,742 | 61,38,389 |
| 1954 .. .. | 66,118 | 64,25,062 |
| 1955 .. .. | 75,793 | 59,67,194 |
| 1956 .. .. | 61,610 | 51,83,057 |
| 1957 .. .. | 71,908 | 61,86,746 |
| 1958 .. .. | 83,338 | 84,87,795 |
| 1959 .. .. | 76,227 | 71,43,684 |
| 1960 .. .. | 88,955 | 94,93,304 |
| 1961 .. .. | 93,738 | 79,98,996 |
| 1962 .. .. | 89,356 | 74,37,147 |

Facilities for accident insurance are now being provided by a number of leading insurance companies in the country and the most important of these are the Claims Bureau in Calcutta and Madras.

The table below shows the accident rate per thousand workers and the average compensation paid in the main industry groups during 1962.

| INDUSTRY | 1962 | |

## MATERNITY BENEFIT ACT

The first Maternity Benefit Act in India was passed by the Government of the former Bombay State in 1929. After that, Maternity Benefit Acts were passed by the Governments of all the States.

The West Bengal Legislature passed a separate Act in 1948 for women employed in tea-plantations under the title of the West Bengal Maternity Benefit (Tea Estates) Act, 1948.

The Government of India passed the Mines Maternity Benefit Act in 1941.

The scope, qualifying conditions and rate of benefit are not uniform under the various State Acts.

The qualifying period of service is generally 9 months.

The rate of benefit is annas eight per day in Madras and Andhra under the Acts. In the Hyderabad Act and the Mines Benefit Act the rate is As. 12 or average daily earnings whichever is more. In Orissa, it is the actual daily wage or salary subject to a maximum of As. 12 per day. The Travancore-Cochin and West Bengal (Tea Estates) Acts provide for Rs. 5-4-0 per week. Women workers on plantations in Assam receive under the Act As. 11 Pies 6 per day in addition to the usual food concessions and women in other industries in the State get their average weekly earnings subject to a minimum of Rs. 2. Although maternity benefit legislation does not apply to plantations in other parts of South India, the employers' associations have recommended payment of benefit on a voluntary basis at the rate of As. 12 per day for a period of 8 weeks.

The Mines Maternity Benefit Act and the Assam, Bihar and U.P. Acts provide for some additional benefits which take the form of free medical treatment, maternity bonus, provision of creches, additional rest intervals for nursing mothers, etc. In the Central Act for women employed in mines and in the U.P. and Bihar Acts, an additional bonus of Rs. 3 and in Rajasthan Rs. 5 is paid if the women avail themselves of the services of a qualified midwife. But if such assistance is provided by or in an institution of an employer, the bonus is not paid.

The U.P. and Bihar Acts lay down that factories employing 50 or more women or where women employed form 25 per cent. or more of the workers, should maintain creches, and appoint female attendants to look after the children.

The administration of the Acts in the States is the responsibility of the Factory Inspectorates. The enforcement of the Mines Maternity Benefit Act in the coal mines is the responsibility of the Coal Mines Welfare Commissioner. In other mines, it is administered by the Chief Inspector of Mines.

MATERNITY BENEFIT PAID IN VARIOUS STATES, PLANTATIONS AND MINE DURING 1962

| States. | Average No. of women employed in establishments submitting returns. | No. of women who claimed maternity benefit. | No. of women who were paid maternity benefit in full or in part. | No. of cases in which bonuses were paid. | Total amount paid. |

| All-India Trade Union Congress | 1,697* | 1,668 | 11,59,395* | 10,73,534 |
| Hind Mazdoor Sabha | 423 | 375 | 6,59,703 | 5,86,179 |
| United Trade Union Congress | 346 | 338 | 1,94,089 | 1,83,813 |

## TRADE UNIONS ACT, 1926

This Act was brought into operation with effect from 1st June 1927 and was slightly amended in 1928.

Apart from the necessary provisions for administration and penalties, the Indian Trade Unions Act, 1926, makes provision for three matters : (1) conditions governing the registration of trade unions ; (2) the obligations to which a trade union is subject after registration ; and (3) the rights and privileges accorded to registered unions. 'Trade Union' has been defined in such a way as to cover both combinations of workers and of employers but not of workers and employers. Persons under the age of 15 are debarred from membership of any registered union.

The administration of the Act is entirely on a State basis and each State Government is required to appoint a Registrar of Trade Unions. Any seven or more members of a union can apply for registration but no union can be registered unless at least fifty per cent of the executive consist of members actually engaged in the unit or group of units which the union proposes to cover.

The general funds of registered trade unions cannot be spent on objects other than those specified in Section 15 of the Act nor on political objects ; but the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to it. All registered unions are required to submit annually to the Registrar duly audited statements of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date.

A registered trade union is immune from prosecution for criminal conspiracy in respect of an agreement, unless it is one to commit an offence, made between its members for the furtherance of a trade dispute or for restraint of trade and from any legal difficulties arising therefrom.

## INDUSTRIAL DISPUTES ACT

The Act provides for the setting up of two types of organisations, namely, (1) Works Committees and (2) Industrial Tribunals for the prevention or settlement of disputes. It makes conciliation compulsory in all disputes in public utility services and optional in other cases.

Section 22 of the Act declares any strike or lock-out in a public utility service to be illegal if it is commenced or declared (i) without giving to the employer or employees, as the case may be, a notice of strike or lock-out in a prescribed manner, within six weeks before striking or declaring a lock-out, or (ii) within 14 days of giving such notice, or (iii) before the expiry of the date of strike specified in any such notice ; or (iv) during the pendency of any conciliation proceedings before a conciliation officer and 7 days after the conclusion of such proceedings, etc. The Act also prohibits certain other strikes and lock-outs and declares them illegal if commenced or declared during the pendency of (i) conciliation proceedings before a Board and 7 days after the conclusion of such proceedings ; (ii) proceedings before a Tribunal and 2 months after the conclusion of such proceedings, or (iii) during any period in which a settlement or award is in operation, in respect of any of the matters covered by the settlement or award.

The Act was amended once in 1953 and twice in 1956. It now provides that no workman, who has been in continuous employment for more than a year, shall be retrenched unless he has been given a month's notice or wages in lieu thereof and also compensation calculated at the rate of 15 days' average pay for every completed year of service. If a workman who has put in more than a year's continuous service is laid off, he is required to be paid compensation which should be equal to 50 per cent. of the total of basic wages and dearness allowance for a maximum of 45 days in a year unless periods of lay-off after the first 45 days are of the duration of one week or more on each occasion.

According to a decision of the Supreme Court in November 1956 on retrenchment compensation, workers cannot, under the Act, claim compensation for retrenchment in case of *bona fide* closure of business or termination of their services by the employer on the business being sold to another employer.

The definition of the term "workman" has been extended to cover technical personnel and supervisory staff drawing upto Rs. 500 per month.

The machinery for adjudication of disputes has been recast and a three-tier machinery consisting of National Tribunals, Industrial Tribunals and Labour Courts is brought into being. Functions of these tribunals are demarcated and the importance of the dispute will determine which tribunal should adjudicate upon it. The tribunals are authorised to appoint experts having special knowledge as assessors to advise them. Schedules covering subjects which should go before each tribunal are attached to the Act.

Every employer who proposes to effect any change in the conditions of service of his workmen in respect of wages, hours of work, rationalisation, shift-working, increase or reduction in complement, etc. is required to give 3 weeks' prior notice to the workmen concerned.

The Act also provides for voluntary reference of disputes to arbitration by agreement between the employer and the workmen. Such a reference may be made to the Tribunals constituted under the Act.

All State Acts relating to the settlement or adjudication of disputes are expressly saved and the Industrial Disputes Act will not override them

The Act was further amended in Dec., 1964. The following are some of the important changes effected by the amended Act : (*a*) Provision for appointment of a serving or a retired district judge or additional district judge of not less than three years standing as a Presiding Officer

* Figures as on March 31, 1965.

of the Tribunal; (*b*) Provision for the appointment of Umpires in case of differences of opinion between an even number of arbitrators; (*c*) Prohibition of strikes and lock-outs during arbitration proceedings; (*d*) Only a majority of workmen shall have the right to terminate a settlement or an award; (*e*) Provision that every application for recovery of money due from an employer shall be made within one year.

During Nov. 1962 to May 1964, officers of the industrial relations machinery were able to persuade representatives of employers and employees to settle 215 cases of industrial disputes through voluntary arbitration.

## STATISTICS

Statistics presented in this section relate to industrial disputes which have resulted in work-stoppages involving 10 or more workers and exclude sympathetic and political strikes.

The time-loss due to industrial disputes was 7·8 million man-days in 1958, it was 5·6 million in 1959, 6·5 million in 1960, 4·9 million in 1961, 6·1 million in 1962 and 3·3 million in 1963.

There were 1,471 industrial disputes during 1963 as compared with 1,491 during 1962.

As compared with 1962, there was a decrease of 45·9 per cent in time-loss due to industrial disputes in 1963. While the time-loss was generally low in the first five months of the year, the highest time-loss was recorded in Dec., 1963.

Analysis of the statistics by industries shows that the manufacturing sector accounted for 77·2 per cent of the total time-loss. Among other sectors, electricity, gas, water and sanitary services accounted for 7·2 per cent, agriculture, forestry, fishing etc. for 4·1 per cent, mining and quarrying for 3·0 per cent, transport and communications (other than workshops) for 2·5 per cent, services for 2·5 per cent, activities not adequately described for 1·6 per cent, construction for 1·4 per cent and commerce for 0·5 per cent. In the manufacturing sector, the highest time-loss was recorded by the group "textiles" (51·3 per cent). As compared to the preceding year, the time-loss decreased in all the groups except electricity, gas, water and sanitary services, construction and commerce.

Classifying the disputes by causes, wages and allowances accounted for the highest number (408) of disputes followed by "personnel" 369 cases. Both these groups constituted together 53 per cent of the total number of disputes and accounted for 46·2 per cent of workers involved and 47 per cent of the total time-loss.

From the point of view of the employees 23·4 per cent of the total number of disputes were successful, 17·9 per cent were partially successful and 41 per cent were unsuccessful. In case of 17·7 per cent of the disputes, work was resumed without any final decision having been reached.

Distribution of the disputes according to their duration shows that 71·7 per cent lasted upto 5 days, 13·6 per cent lasted for more than 5 days upto 10 days, 6·2 per cent lasted for more than 10 days upto 20 days, 3·8 per cent for more than 20 days upto 30 days and 4·7 per cent for more than 30 days.

Of the 1,422 terminated disputes, during 1963, 610 were terminated as a result of Government intervention, 287 by mutual settlement and 453 by voluntary resumption.

The following table sets out the number of disputes in some of the years since 1953, the number of workers involved in these disputes and the total time lost in man-days:

| Year | Number of disputes | Number of workpeople involved | Number of man-days lost |
|---|---|---|---|
| 1953 .. | 772 | 466,607 | 3,382,608 |
| 1954 .. | 840 | 477,138 | 3,372,630 |
| 1955 .. | 1,166 | 527,767 | 5,697,848 |
| 1956 .. | 1,203 | 715,130 | 6,992,040 |
| 1957 .. | 1,630 | 889,371 | 6,429,319 |
| 1958 .. | 1,524 | 928,566 | 7,797,585 |
| 1959 .. | 1,531 | 693,616 | 5,633,148 |
| 1960 .. | 1,583 | 986,268 | 6,536,517 |
| 1961 .. | 1,357 | 511,860 | 4,918,755 |
| 1962 .. | 1,491 | 7,05,059 | 6,120,576 |
| 1963 .. | 1,471 | 5,63,121 | 3,268,524 |

An analysis of the disputes for the year 1963 by State is given in the following table:—

| State | No. of disputes | No. of workers involved | No. of man-days lost | No. of man-days lost per dispute |
|---|---|---|---|---|
| Andhra Pradesh .. .. .. .. | 92 | 31,061 | 1,44,629 | 1,572 |
| Assam .. .. .. .. .. | 18 | 8,448 | 10,603 | 589 |

| Punjab .. .. .. .. .. | 13 | 3,527 | 29,849 | 2,296 |
| Rajasthan .. .. .. .. .. | 12 | 2,451 | 18,691 | 1,558 |
| Uttar Pradesh .. .. .. .. | 95 | 41,144 | 1,23,623 | 1,301 |
| West Bengal .. .. .. .. | 172 | 81,326 | 9,30,822 | 5,412 |
| Andaman & Nicobar Islands .. .. | 2 | 98 | 430 | 215 |
| Delhi .. .. .. .. .. | 26 | 2,739 | 13,754 | 529 |
| Himachal Pradesh .. .. .. | — | — | — | — |
| Tripura .. .. .. .. .. | 7 | 662 | 6,930 | 990 |
| Total .. .. .. .. .. | 1,471 | 5,63,121 | 32,68,524 | 2,222 |

Average time-loss per dispute was 2,222 man-days.

## LABOUR APPELLATE TRIBUNAL

The Tribunal was abolished on May 31, 1959. The Law Commission has recommended that the Tribunal should be revived. This proposal is now under the active consideration of the Government of India.

The Industrial Disputes Amendments and Miscellaneous Provisions Act, 1956 abolished the Tribunal with effect from 1st September 1956. After that date no appeals were to be entertained. Pending appeals were however, to be disposed of by the Tribunal as if the Act had not been repealed.

## WORKING JOURNALISTS' ACT

*(See under article on the Press)*

## THE EMPLOYEES' PROVIDENT FUNDS ACT, 1952

The Employees' Provident Funds Scheme, 1952 framed under section 5(1) of the Employees' Provident Funds Act, 1952 came into force in its entirety with effect from 1st November, 1952.

The Act initially applied to factories engaged in any of the following six industries:—Cement; Cigarettes; Electrical; Mechanical or general engineering products; Iron and Steel; Paper; Textiles.

The Act has since then been extended to the following additional industries/classes of establishments raising the total number of industries covered to 97:—Edible oils and fats; Sugar; Rubber and rubber products; Electricity including generation, transmission and distribution thereof; Tea (except in the State of Assam where the Government of Assam have instituted a separate Provident Funds Scheme for the industry including plantations); Printing including the process of composing types for printing, printing of letter-press, lithography, photogravure or other similar process or book-binding, but excluding printing presses, covered under "newspaper establishments" to which the Employees' Provident Funds Act has separately been extended under section 15 of the Working Journalists (Conditions or Service) and Miscellaneous Provisions Act, 1955; Stoneware pipes; Sanitarywares; Electrical porcelain insulators of high and low tension; Refractories; Tiles; Matches; Glass; Heavy and fine chemicals, including fertilizers, turpentine, rosin, medical and pharmaceutical preparations, toilet preparations, soaps, inks, intermediates, dyes, colour lakes and toners, fatty acids, and oxygen, acetylene and carbon dioxide gases; Indigo; Lac including shellac; Non-edible vegetable and animal oils and fats; Newspaper establishments; Mineral oil refining; Tea plantations (other than the tea plantations in the State of Assam); Coffee plantations; Rubber plantations; Cardamom plantations; Pepper plantations; Iron-ore mines; Lime-stone mines; Manganese mines; Gold mines; Industrial and power alcohol; Asbestos cement sheets; Coffee curing establishments; Biscuit making industry including composite units making biscuits and products such as bread, confectionery and milk and milk powder; Road motor transport establishments; Mica factories; Mica mines; Plywood; Automobile servicing and repairing; Rice milling; Dal milling; Flour milling; Starch; Hotels; Restaurants; Establishments engaged in the storage or transport or distribution of petroleum or natural gas or products of either petroleum or natural gas; Petroleum or natural gas exploration, prospecting, drilling or production; Petroleum or natural gas refining; Cinemas including preview theatres; Film studios; Film production concerns; Distribution concerns dealing with exposed films; Film processing laboratories; Leather and leather products; Stone-ware jars; Crockery; Every cane farm owned by the owner or occupier of a sugar factory or cultivated by such owner or occupier or any person on his behalf; Every trading and commercial establishment engaged in the purchase, sale or storage of any goods, including establishments of exporters, importers, advertisers, commission agents and brokers and commodity and stock exchanges, but not including banks or warehouses established under any Central or State Act; Fruit and vegetable preservation; Cashewnut; Establishments engaged in the processing or treatment of wood including manufacture of hard-board or chip-board or jute or textile, wooden accessories, cork products, wooden furniture, wooden sports goods, cane or bamboo products, wooden battery separators; Saw mills; wood seasoning kilns; Wood preservation plants; Wood workshops; Bauxite mines; Confectionery; Laundry and laundry services; Buttons; Brushes; Plastic and plastic products; Stationery products; Theatres where dramatic performances or other forms of entertainment are held and where payment is required to be made for admission as audience or spectators; Societies, clubs or

associations which provide board or lodging or both or facility for amusement or any other service to any of their members or to any of their guests on payment; Companies, societies, associations, clubs or troupes which give any exhibition of acrobatic or other performances or both, in any arena circular or otherwise or perform or permit any other form of entertainment in any place, other than a theatre, and require payment for admission into such exhibition or entertainment as spectators or audience; Canteens; Aerated water, soft drinks or carbonated water; Distilling and rectifying of spirits (not falling under industrial and power alcohol) and blending of spirits; Paint and varnish; Bone crushing Pickers; China clay Mines; Attorneys as defined in the Advocates Act (25 of 1961); Chartered or registered accountants as defined in the Chartered Accountants Act (23 of 1959); Engineers and engineering contractors, not being exclusively engaged in building and construction industry; Architects; Medical Practitioners and medical specialists; Milk and milk Products; Travel Agencies engaged in (1) booking of international air and sea passages and other travel arrangements, (2) booking of internal air and mail passages and other travel arrangements, (3) forwarding and clearing of cargo from and to overseas and within India; Forwarding agencies engaged in the collection, packing, forwarding or delivery of any goods including car-loading, break-bulk service and foreign freight service; Non-ferrous metals and alloys in the form of ingots; and Bread. Extension of the Act to several other industries/classes of establishment is under active consideration.

The Act applies to all establishments employing 20 or more persons. The Act, however, does not apply to: (*a*) any establishment registered under the Co-operative Societies Act, 1912 or under any other law relating to co-operative societies employing less than 50 persons and working without the aid of power, (*b*) to any other establishment employing 50 or more persons or between 20 and 49 persons until the expiry of three years in the former case and five years in the latter, from the date of their establishment, (*c*) The State of Jammu & Kashmir (The State Government has instituted a separate provident fund scheme on the lines of Employees' Provident Funds Scheme with effect from 1st June, 1961).

The rate of contribution is 6¼ per cent of pay *i.e.*, basic wages plus dearness allowance including cash value of food concession and retaining allowance (if any). The statutory rate of provident fund contribution has been enhanced to 8 per cent of pay in respect of the establishments employing 50 or more persons and engaged in any of the following industries with effect from the date noted against them :—

From Jan. 1, 1963: Cigarettes; Iron and Steel; Electrical, mechanical or general engineering products; and Paper other than hand made paper.

From April 1, 1963: Cement.

From Nov. 1, 1963: Textiles (made wholly or in part of artificial silk and wool); Matches; Edible oils and fats other than vanaspati; Rubber and rubber products; Electricity including generation, transmission and distribution thereof; Tea; Printing (other than printing industry relating to newspaper establishments as defined in the working Journalists (Conditions of Service) and Miscellaneous Provisions Act 1955) including the process of composing types for printing, printing by letter press, lithography, photogravure or other similar process or book binding; Glass; Stoneware pipes; Sanitaryware; Electrical porcelain insulators of high and low tension; Refractories; Tiles; Heavy and fine chemicals excluding fertilizers but including turpentine rosin, medical and pharmaceutical preparations; Toilet preparations; Soaps; Inks; Intermediates; Dyes; Colour lakes and toners; Fatty acids; Oxygen; Acetylene and carbon-dioxide gases; Indigo; Non-edible vegetable and animal oils and fats; Mineral oil refining; and Newspaper establishments.

From Dec. 1, 1963: Textiles (made wholly or in part of cotton).

From Feb. 1, 1965: Tea plantations (other than the tea plantations in the State of Assam); Rubber plantations; Cardamom plantations; Limestone mines; Industrial and power alcohol; Asbestos cement sheets.

The members and employers are allowed to contribute at any higher rate if desired by them.

Qualifications for membership :—Basic wage, dearness allowance and cash value of food concession and retaining allowance (if any) not to exceed Rs. 1,000 per month; and one year's continuous service or 240 days' actual work during a period of 12 months or less.

Employees working outside the precincts of a covered establishment in connection with its work and also those with emoluments exceeding Rs. 1,000 per month, if they apply for membership of the Fund with the consent of their employers, have now been brought within the ambit of the Scheme.

Where an establishment has its own Provident Fund, gratuity or pension scheme and if the total quantum of benefits is not less than that under the statutory Scheme, either such an establishment could apply for exemption under section 17(1) of the Act from the provisions of the Scheme or any person or a class of persons employed in such an establishment can opt out under section 17(2) of the Act read with para. 27-A of the Scheme.

Full accumulations with interest are refunded in the event of death, permanent disability, superannuation, retrenchment or migration from India for permanent settlement abroad and also on leaving service for any reason after 15 years' membership, or ceasing to subscribe to the Fund consequent on the employer ceasing to give effect to the provisions of the Act in pursuance of the provisions of the proviso to section 1(5) of the Act. In other cases, the member's own share of contribution together with the interest thereon is refunded along with a portion of the employer's contribution depending upon the length of membership.

The Central Government have also authorised full refund of employer's contribution in the following contingencies :—Where a factory establishment is closed, the employees who are not retrenched but transferred by the employer to other establishments not covered under the Employees' Provident Funds Act; Where a member is transferred from a covered establishment to another under the same employer but not covered under the Act; Where employees are discharged and are given retrenchment compensation under the Industrial Disputes Act; where members cease to subscribe to the Fund as a result of an establishment going out of the purview of the Act under section 16(1)(a)thereof.

Non-refundable advances from the Fund can be made for payment towards a policy of life insurance of the member; for purchase of a dwelling house, a dwelling site or for construction of dwelling house privately or under the subsidised housing schemes for industrial workers, or for construction of a house under the Low Income Group Housing Scheme, or for purchasing shares of Consumers' Cooperative Societies, or in special cases to members who are thrown out of employment due to temporary closure of any factory or establishment, or in cases of (*a*) hospitalisation lasting one month or more or (*b*) major surgical operation in a hospital or (*c*) members suffering from T.B., leprosy, paralysis, cancer, or asthma for the treatment of which leave has been granted by the employer or in the case of an individual retrenchment pending final withdrawal of provident fund.

The Fund vests in the tripartite Central Board of Trustees. The Central Provident Fund Commissioner is the Chief Executive Officer. He is appointed by the Central Government and is subject to its general control and superintendence. He is assisted by fifteen Regional Provident Fund Commissioners one in each region.

In the following regions tripartite Regional Committees have been constituted to advise the Central Board of Trustees on matters referred to them :—Maharashtra, Bihar, Madhya Pradesh, Madras, Uttar Pradesh and West Bengal.

A special reserve fund has been created to pay the provident fund accumulations to outgoing members or their heirs, where the employers have failed to pay the whole or a part of the provident fund contributions to the fund and which were deducted from the wages of the members. A sum of Rs. 75 lakhs has been transferred to this fund from the reserve and forfeiture account of the fund. A sum of Rs. 50·06 lakhs has been paid out from this Fund till the end of Dec. 1964 and a sum of Rs. 7·70 lakhs was recovered from the employers towards the arrears against which payment was made from this Fund.

A Death Relief Fund has been set up for affording financial assistance to nominees/heirs of deceased members whose pay (*i.e.* basic wages, dearness allowance, etc.) does not exceed Rs. 500 per month. A sum of Rs. 10 lakhs has been transferred to this fund from the Reserve and Forfeiture Account of the Fund. This fund has been constituted on a trial basis for one year with effect from 1st January, 1964 and is being continued for a further period of one year more with effect from Jan., 1, 1965. Relief from this fund would be given in respect of deaths which take place on or after 1st January, 1964. The quantum of the benefits from this fund, will be the difference by which the amount standing to the credit of the deceased member falls short of Rs.500 so that a minimum of Rs.500 is assured to the nominee(s)/heir(s). The amount standing to the credit of the deceased member will comprise the sum actually credited to the member's account in the ledger card; any sum payable out of the Special Reserve Fund; the sum of non-refundable advance(s) taken by members; outstanding balance of any refundable advance and interest.

No. of industries covered : 97 (upto 31-3-1965).

No. of covered establishments (both exempted and unexempted) : 28,325 (as on 31-12-1964).

No. of subscribers : Over 41·30 lakhs (as on 30-12-1964).

Amount of Provident Fund contributions as on 31-12-1964 :

(*i*) Provident Fund Contributions collected : Rs. 602·47 crores.

(*ii*) Amount paid as loans, advances, in final settlement of claims, etc. : Rs. 181·84 crores.

(*iii*) Amount invested in Government Securities : Rs. 422·34 crores.

No. of unexempted establishments covered under the Act up to the end of December 1964 : 26,511; No. of subscribers in such establishments : Over 25·68 lakhs; total accumulations of provident fund in such establishments : Rs. 264·95 crores; Amount of provident fund invested in respect of such establishments : Rs. 204·24 crores.

Rate of interest paid at present on members' accumulations : 4·25 per cent (for 1964-65).

The Central Government has accepted the recommendation of the Central Board of Trustees of the Employees' Provident Fund to raise the rate of interest from 4·25 per cent to 4·5 per cent for the year 1965-66.

The provident fund contributions are invested in defence certificates and Government of India securities. The interest received on investments during 1964-65 amounted to Rs. 6·03 crores.

The number of establishments covered on a voluntary basis rose from 499 to 637 upto 31-12-1964.

## TEA DISTRICTS EMIGRANT LABOUR ACT

The Tea Districts Emigrant Labour Act, 1932, was brought into effect from the 1st of October 1933.

The forwarding of recruits to Assam must be made through the prescribed routes where arrangements for feeding, rest and medical treatment have been made and by authorised forwarding agents. It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardians. A married woman who is living with her husband may only be assisted to emigrate with the consent of the husband.

To start with, power was vested in the State Governments, subject to Central control, over recruitment as well as over the forwarding of assisted emigrants. Now this power is vested in the Central Government alone.

**Repatriation.**—It is provided that where an employer fails to make all the necessary arrangements for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15).

Section 3 of the Act makes provision for the appointment of a Controller of Emigrant Labour with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish.

The cess is collected by the Controller by the sale of certificates of emigration. Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate. All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it. Failure to provide a certificate is punishable with a fine which may extend to Rs. 500. The rate of the cess is fixed at Rs. 9.

According to the statistics collected under the Act the labour force in Assam in 1962 consisted of 1,68,074 men, 1,55,166 women and 3,58,210 minors representing 204 gardens out of 603.

There has been a fall in recruitment since 1953. This fall is largely attributable to illicit recruitment as is evident from the fact that by occasional checks on the forwarding route 4,562 such cases were detected in 1962 and 640 cases were regularised.

During 1962 the number of emigrants and their dependents repatriated was 16,397. In 1962 there was no recruitment of assisted emigrant labourers as envisaged in the Act due to the winding up of the recruiting organisation, the Tea Districts Labour Association, employing interests within the meaning of Section 2(J) of the Act.

## PLANTATION LABOUR ACT, 1951

The Plantation Labour Act was passed by the Government of India in 1951 with a view to ameliorating the working and living conditions of about 12 lakhs of workers employed in plantations. The Act applies to tea, coffee, rubber, cinchona and cardamom plantations and the State Governments have been empowered to extend it to any other class of plantations.

Though the Act came into force on April 1, 1954 only such provisions as could be given effect to without framing rules became operative on that date. Only eight States and two Union Territories have (April 1965) so far framed the Plantation Labour Rules: Assam, Bihar, Kerala, Madras, Mysore, Punjab, U.P., W. Bengal, Himachal Pradesh and Tripura.

The Act fixes the maximum weekly hours of work for adults at 54 and for adolescents and children at 40. The daily hours of work are so arranged that they do not spread over including rest intervals and the time spent in waiting 12 hours a day. Grant of leave with wages at the rate of one day for every 20 days of work for adults and for every 15 days of work for young persons has been provided.

The more important provisions of the Act in respect of health and welfare relate to supply of drinking water, provision of housing and medical facilities, establishment of canteens, maintenance of creches and appointment of Welfare Officers.

The Act applies to plantations of 10·117 hectares (25 acres) or more or where 30 or more persons are employed or were employed on any day during the preceding twelve months.

In the Second Plan Rs. 2 crores were allotted for welfare schemes.

The following table shows the total No. of estates/plantations covered by the Act and average daily labour employed in various States/Union Territories.

| State/Union Territory | No. of Estates/ Plantations | Average daily labour employed |
|---|---|---|
| Assam .. .. | 665 | 4,92,793 |
| Bihar .. .. .. | 13 | 579 |
| Kerala .. .. | 450 | 2,00,000 |
| Madras .. .. | 289 | 74,738 |
| Mysore .. .. | 274 | 27,229 |
| Punjab .. .. | 18 | 1,528 |
| Uttar Pradesh .. | 17 | 1,532 |
| West Bengal .. .. | 281 | 1,64,454 |
| Himachal Pradesh .. | 1 | 81 |
| Tripura .. .. | 57 | 1,808 |

## SHOPS AND COMMERCIAL ESTABLISHMENTS ACTS

Subject to certain exceptions the Acts apply to shops, commercial establishments, restaurants and places of amusement in certain selected urban centres. Some employees such as those employed in a confidential capacity and those whose work is of an intermittent character are excluded from the scope of the Acts.

The Bombay, Madhya Pradesh and Assam Acts have fixed daily hours of work at nine. In the U.P. and Madras Acts the daily hours are eight while in the West Bengal and the Punjab Acts a ten-hour day has been prescribed. Rest intervals, of half an hour are prescribed in the West Bengal, U.P. and the Punjab Acts while an hour's interval has been granted in the Assam, Bombay*, U.P. and Madras Acts. Opening and closing hours have also been fixed by the Acts. The Assam and West Bengal Acts, however, prescribe only closing hours. Most of the Acts also fix the maximum overtime work that can be taken from the employees. In some cases slightly different hours of work have been fixed for employees of commercial establishments, restaurants and places of amusement.

Provision has been made in all the Acts for weekly closure of shops and establishments although in some Acts, for example the Bombay and Assam Acts, theatres, hotels, etc. are exempted from this provision. In addition to the weekly holiday, provision for privilege leave of 12 to 15 days in a year has been made in all the Acts. The Assam, West Bengal, Madras and U.P. Acts make further provision for casual leave and sick leave of 10 to 12 days and 12 to 30 days respectively.

All the Acts, except the Bengal Act, have made provision for the regulation of employment of children and young persons. The minimum age for the employment of children in the Assam, and Madhya Pradesh Acts is 12 while in the Madras and U.P. Acts it is 14. The hours of work for children and young persons are 7 per day in the Punjab, Madras and Madhya Pradesh Acts and 6 in the Bombay* and U.P. Acts. Children cannot work after 7 p.m. according to the Bombay*, Madras and the Punjab Acts and after 9 p.m. according to the Madhya Pradesh Act.

By the Madras and U.P. Acts the wage period should not exceed one month and by the Punjab Act it should not exceed a fortnight. The Assam Act fixes the wage period at one month. After they become due wages should be paid within 10 days in Assam and West Bengal, 7 days in U.P. and 5 days in Madras. In the area covered by the Punjab Act wages should be paid on demand at the expiry of the wage period. Overtime wages are payable at twice the ordinary rates in Madras, U.P. and the Punjab, at one and a half times in Bombay* and the area covered by the Madhya Pradesh Act and at one and a quarter times the ordinary rate in West Bengal. Hotels, restaurants and other eating places in Bombay* are, however, required to pay overtime wages at twice the ordinary rate. Fines and deductions are regulated under the Madras and U.P. Acts.

One month's previous notice or one month's wages in lieu of notice before discharge is stipulated in the U.P., Punjab, Madras and Madhya Pradesh Acts. The Bombay* Act provides for only 14 days' notice or pay in lieu thereof. The Madras and Bombay* Acts make provisions relating to cleanliness, ventilation, lighting and precautions against fire in establishments covered by the Acts.

The Weekly Holidays Act, 1942 provides for a weekly closure of shops and for the grant of a weekly holiday to employees. The Act has been in force in the Bihar, Ajmer, Coorg, Orissa, Rajasthan, Vindhya Pradesh and Hyderabad areas.

The number of establishments and the number of persons employed by States for 1962 are given below.

| State/Union Territory | No. of Establishments | No. of persons employed |
|---|---|---|
| Andhra Pradesh .. | 1,36,054 | 1,17,668 |
| Assam .. .. | 7,853 | 12,093 |
| Bihar .. .. .. | 31,989 | 39,716 |
| Gujarat .. .. | 1,38,725 | 1,39,710 |
| Jammu & Kashmir .. | 19,702 | 6,905 |
| Kerala .. .. | 39,592 | 72,100 |
| Madhya Pradesh .. | 77,102 | 53,021 |
| Madras .. .. | 1,70,353 | 2,05,814 |
| Maharashtra .. .. | 2,53,813 | 5,14,241 |
| Mysore .. .. | 89,071 | 95,988 |
| Orissa .. .. .. | 4,555 | 21,176 |
| Punjab .. .. | 1,91,775 | 1,08,903 |
| Rajasthan .. .. | 1,07,158 | 65,933 |
| Uttar Pradesh .. | — | — |
| West Bengal .. .. | 2,17,068 | 4,28,711 |
| Andaman & Nicobar Islands .. .. | 254 | 305 |
| Delhi .. .. .. | 77,938 | 1,44,141 |
| Himachal Pradesh .. | 2,507 | 910 |
| Manipur .. .. | 1,033 | 2,250 |
| Tripura .. .. | 1,436 | 2,236 |
| Total .. | 15,67,978 | 20,31,821 |

## INDUSTRIAL EMPLOYMENT (STANDING ORDERS) ACT, 1946

The Industrial Employment (Standing Orders) Act, 1946 which applies to industrial establishments employing 100 or more workers provides for the framing of Standing Orders laying down the conditions of employment of workers employed in the establishments.

The Act extends to the whole of India except the State of Jammu and Kashmir, and is administered both by the Central and State Governments.

So far as the Central Government is concerned it is responsible for administering the Act on railways, major ports, mines, oil-fields and other establishments under its control. Both the Central and the State Governments have been empowered to extend the scope of the Act to establishments in any industry employing less than 100 workers or to any other class or classes of establishments or to exempt any establishment from any of the provisions of the Act.

The total number of establishments coming within the purview of the Act at the end of 1963 was 13,886 of which 12,242 establishments with 35·18 lakh workers belonged to the State sphere and 1,644 with 9·70 lakh workers, to the Central

* Bilingual.

sphere. The employment strength of all these establishments was about 44·89 lakhs.

The number of establishments which had certified Standing Orders in both the spheres at the beginning of 1962 was 9,533 which formed 68·7 per cent of the total covered. Of these 8,219 were in the State sphere and 1,334 in the Central sphere.

The percentage of workers having certified Standing Orders to the total number of employees came to 79·6.

## COLLECTION OF STATISTICS ACT, 1953

This Act which replaces and embodies the main provisions of the Industrial Statistics Act is designed to facilitate the collection of statistics of certain kinds relating to industries, trade and commerce. It empowers the Central and the State Governments to direct that statistics shall be collected about—

(*a*) any matter relating to any industry or class of industries,

(*b*) any matter relating to any commercial or industrial concern or class of commercial or industrial concerns and in particular any matter relating to factories, and

(*c*) any of the following matters, so far as they relate to the welfare of labour and the conditions of labour, namely, (1) price of commodities, (2) attendance, (3) living conditions including housing, water supply and sanitation, (4) indebtedness, (5) rents of dwelling houses, (6) wages and other earnings, (7) provident fund and other funds, (8) benefits and amenities provided for labour, (9) hours of work, (10) employment and unemployment, (11) industrial and labour disputes, (12) labour turnover, and (13) trade unions.

The Central or State Government can appoint an officer to be the Statistics Authority for the purpose of collecting any statistics and such authority has the power to call upon the owner of an industrial or commercial concern to furnish the necessary information. He has also the right of access to any relevant records or documents in the possession of any person required to furnish the information and can enter any premises where he believes such records or documents are kept for the purpose of inspecting them or taking copies. The Act prescribes penalties for improper disclosure of information or returns or for wilfully furnishing false information.

## MOTOR TRANSPORT WORKERS ACT, 1961

The Act seeks to regulate hours and limitations of employment (8 hours in a day and 48 hours in a week) with daily intervals for rest, weekly rest, provision for medical facilities, canteens, rest rooms, wages and leave of workers employed in motor transport undertakings. The Act is now in force in all States except Jammu and Kashmir. The Rules under the Act have been framed and enforcement machinery has been set up in the States of Bihar, Maharashtra, Rajasthan and Uttar Pradesh.

## THE APPRENTICES ACT, 1961

The Apprentices Act, 1961, received the assent of the President on 12th December 1961. The Act provides for the regulation and control of training of apprentices in trades and for matters connected therewith.

The main provisions of the Act relate to the rules governing the qualifications for being engaged as apprentices, contract of apprenticeship, novation of contract of apprenticeship, period of apprenticeship training and termination of apprenticeship contract. The Central Government have been empowered to determine the ratio of apprentices to workers other than unskilled workers in each trade. Where the employer employs in his establishment less than 500 workers the basic training shall be imparted to the apprentices at the cost of the Government in training institutes set up by the Government; but the employer shall, when so required, afford all facilities for imparting such instructions.

The Act also provides for the hours of work, overtime, leave and holidays of apprentices and for their health, safety and welfare.

In addition to the Government, there will be the National Council, the Central Apprenticeship Council, the State Councils, the State Apprenticeship Adviser for administering the Act.

The industries covered by the Act are (1) Food Stuffs, (2) Jute and Cotton Textiles, (3) Manufacture of wood and wood products, (4) Rubber, petroleum and coal products, (5) Chemicals and chemical products, (6) Non-metallic mineral products other than petroleum and coal, (7) Basic metals and their products except machinery and transport equipment, (8) Machinery and electrical equipment, (9) Transport equipment, (10) Miscellaneous manufacturing industries, (11) Electricity and Gas and (12) Transport.

The Rules framed under this Act provide for the constitution of a Central Apprenticeship Councils, which, besides a Chairman shall consist of not more than 9 representatives of employers each from the public and private sectors, 10 of the Central Government, 15 of State Governments and 6 persons having special knowledge and experience on matters relating to industry and labour. The Council shall be constituted for a period of 3 years and thereafter to be reconstituted at the end of every 3 years. The Council has been empowered to appoint such Standing or Special Committees as may be considered expedient to assist it in the discharge of its functions. The Rules also provide filling of vacancies and cessation of membership, time and place of meetings, fees and allowances to members and authentication of the Acts and proceedings of the Council.

## WAGES

Central Wage Boards were set up for eight industries—cotton, cement, jute, coffee plantations, tea plantations, rubber plantations, sugar, iron-ore, limestone and dolomite mining industries. All the eight Boards have made their reports. (See under individual industry.)

The function of a Wage Board is to fix a wage structure on the principle of fair wages.

A steering group consisting of representatives of Government, employers and workers is engaged in drawing up a wage map of India both industry-wise and region-wise to serve as a guide for authorities who have to fix wages.

AVERAGE ANNUAL EARNINGS IN STATES OF FACTORY EMPLOYEES DRAWING LESS THAN Rs. 200 PER MONTH. Figures in Rs. for 1961 and 1962 respectively: Andhra Pradesh 1,080; 1,077; Assam 1,234; 1,055; Bihar 1,484; 1,385; Gujarat 1,617; 1,666; Kerala 1,118; 1,126; Madras 1,411; 1, 488; Maharashtra 1,609; 1,699; Mysore 1,278; 1,210; Orissa 1,154; 1,311; Punjab 1,100; 1,179; Rajasthan 730; 1,310; Uttar Pradesh 1,201; 1,277; West Bengal 1,310; 1,325; Andaman & Nicobar Islands 1,149; 1,244; Delhi 1,531; 1,678; Himachal Pradesh—; 1,292; Average 1,414; 1,459.

† Obtained by dividing the total cash earnings for the week by the daily employment during the week.

## SHARE OF LABOUR

The Study Group on Wages appointed by the Central Government has prepared a paper on the share of labour in factory output. The available data covers the period 1948 to 1953 beyond which year it was not possible to carry forward the estimates.

The percentage share of workers' earnings in net value of factory output (29 major industries) was as under for different States:

PERCENTAGE SHARE OF WORKERS' EARNINGS IN NET VALUE OF FACTORY OUTPUT (29 MAJOR INDUSTRIES)

| | 1948 | 1949 | 1950 | 1951 | 1952 | 1953 |
|---|---|---|---|---|---|---|
| All India .. .. | 42·43 | 54·27 | 49·20 | 45·14 | 52·87 | 50·64 |
| Assam .. .. .. | 39·34 | 43·09 | 60·46 | 56·44 | 64·13 | 53·45 |
| Bihar .. .. .. | 41·32 | 41·81 | 37·51 | 44·81 | 37·89 | 41·60 |
| Bombay* .. .. | 44·52 | 57·72 | 47·30 | 47·24 | 59·51 | 59·05 |
| Madhya Pradesh .. | 47·83 | 72·72 | 59·31 | 53·23 | 50·94 | 54·60 |
| Madras .. .. .. | 39·42 | 43·04 | 49·55 | 42·32 | 49·74 | 47·96 |
| Orissa .. .. .. | 41·81 | 49·22 | 39·64 | 32·89 | 35·15 | 29·09 |
| Punjab .. .. .. | 43·35 | 49·73 | 46·48 | 41·02 | 48·08 | 45·13 |
| Uttar Pradesh .. .. | 38·56 | 52·25 | 44·25 | 44·32 | 47·87 | 48·06 |
| West Bengal .. .. | 48·69 | 58·68 | 45·05 | 44·42 | 47·59 | 49·83 |
| Delhi .. .. .. | 37·41 | 58·26 | 56·48 | 42·16 | 51·69 | 46·05 |

* Bilingual.

This table shows that Bombay had the highest percentage for workers' share and Orissa the lowest.

The following table shows the percentage share of workers' earnings in net value of factory output for 7 major industries:

PERCENTAGE SHARE OF WORKERS' EARNINGS IN NET VALUE OF FACTORY OUTPUT (7 MAJOR INDUSTRIES)

| | 1948 | 1949 | 1950 | 1951 | 1952 | 1953 |
|---|---|---|---|---|---|---|
| Sugar .. .. .. | 26·96 | 18·44 | 24·11 | 29·81 | 27·59 | 28·73 |
| Paper and Paper Products | 39·11 | 38·08 | 38·58 | 30·13 | 30·60 | 30·26 |
| Jute Textiles .. .. | 55·86 | 60·20 | 52·01 | 42·68 | 57·57 | 29·47 |
| Iron and Steel .. .. | 39·72 | 34·01 | 38·42 | 46·56 | 42·23 | 35·64 |
| General & Electrical Engineering .. .. | 50·07 | 53·04 | 50·52 | 45·68 | 50·01 | 53·05 |
| Cement .. .. .. | 27·38 | 29·64 | 25·78 | 26·31 | 21·32 | 23·31 |
| Cotton Textiles .. .. | 46·22 | 64·68 | 64·97 | 53·84 | 66·45 | 62·42 |

The State-wise distribution of the above figures shows that for the Cement Industry the share was highest for Uttar Pradesh and lowest for Bombay.

In the Paper Industry the figures for Bombay and West Bengal were comparatively stable while in Uttar Pradesh and Madras they were not. The share in the jute industry was generally highest but Madras was an exception. As regards the Iron and Steel Industry workers in the Punjab fared the best, those in Bihar the worst. In the Cotton Textile Industry no consistent trend in the inter-State variations was noticeable but Bombay,* Madhya Pradesh and Uttar Pradesh were generally in the vanguard.

* Bilingual.

An interesting departure from normal practice was suggested by the Ministry of Labour.

The Union Ministry of Labour and Employment has recommended that all State-owned industrial undertakings should try to increase productivity by introducing the system of payment by results as recommended by the Planning Commission.

The Labour Ministry circulated a memorandum in November 1957 directing those Ministries of the Government of India employing industrial labour to investigate the possibilities of bipartite agreements at the unit level in all industrial undertakings under their control to give effect to this system of payment of wages.

The Planning Commission had recommended that in addition to a basic minimum wage, all extra earnings of the workers should be based on a piece-rate system to step up productivity.

The Commission added, however, that adequate measures should be taken to avoid fatigue and undue speed-up of production.

A piece-rate scheme has been functioning for some years with success in Bombay port and has been extended to Madras. The private sector has made a beginning, notably at the Tata Steel Works, Jamshedpur.

At Jamshedpur, where the piece-rate scheme was introduced after the 1958 strike, it was made clear that wages could be stepped up only in line with increasing production.

## DEARNESS ALLOWANCE

The scale of the allowance varies not only from centre to centre and industry to industry, but also, except where these matters are adjudicated upon, from unit to unit in the same industry at the same centre.

Several Adjudicators have granted dearness allowance either at the Bombay Millowners' Association scale which was Rs. 127·65 in Aug. 1965 or at a percentage, varying from 66⅔ per cent to 85 per cent, of that scale. The rate of dearness allowance payable to Bombay City cotton mill workers itself was increased by a decision of the Labour Appellate Tribunal by 5 per cent when the Bombay Cost of Living Index Number is between 326 and 335; by 7½ per cent when it is between 336 and 350; and by 10 per cent when it is above 350. The enhanced rate was given retrospective effect from May 1953; the average dearness allowance for a month of 26 working days comes to Rs. 114·79 for 1964.

**INDEX OF EARNINGS (1939 = 100)***

| Year | All India Consumer Price Index | Factory workers | | Miners | |
|---|---|---|---|---|---|
| | | Index of money earnings | Index of real earnings | Index of money earnings | Index of real earnings |
| 1953 | 385 | 384·3 | 99·8 | 437·4 | 113·6 |
| 1954 | 371 | 384·3 | 103·6 | 441·9 | 119·1 |
| 1955 | 356 | 403·5 | 113·3 | 451·5 | 126·8 |
| 1956 | 390 | 411·7 | 105·6 | 593·0 | 152·1 |
| 1957 | 412 | 431·0 | 104·6 | 660·8 | 160·2 |
| 1958 | 431 | 423·9 | 98·6 | 704·6 | 163·9 |
| 1959 | 449 | 434·2 | 96 7 | 756·2 | 168·4 |
| 1960 | 460 | 464·2 | 100·9 | 783·0 | 170·2 |
| 1961 | 468 | 494·4 | 105·7 | 817·7 | 175·1 |
| 1962 | 482 | 513·8 | 106·6 | 846·2 | 175·6 |
| 1963 | 497 | 496·0@ | 99·8@ | 903·2 | 181·7 |

* The figures exclude those for Railway Workshops and groups of industries seasonal in character consisting of Food, Beverages, Tobacco and Presses. The indices for 1958 and 1959 do not include figures for Madras (including Andhra Pradesh), that for 1960 does not include figures from Madras (including Andhra Pradesh) and Madhya Pradesh and that for 1963 do not include those from Andhra Pradesh as figures are not available. Estimated all-India figures after inclusion of estimated figures from these States are 436·6, 451·0, 479·5, and 517·7 (Money earnings) and 101·3, 100·4, 104·2 and 104·1 (real earnings) respectively for years 1958, 1959, 1960, and 1963. @ Provisional.

## CENTRAL PAY COMMISSION

See article "Public Services."

## COST OF LIVING

It was recommended in the Second Five Year Plan that steps should be taken to institute family living surveys for the revision of the present series of consumer price indices at different centres. Accordingly, fresh family living surveys among working class population were conducted at the following 50 important factory, mining and plantation centres of the country during the period September 1958 to August 1959. These surveys were conducted on a uniform basis at all the centres under the technical guidance of the Technical Advisory Committee on Cost of Living Index Numbers set up by the Government of India. On the basis of the results of these surveys, new series of consumer price index numbers for industrial workers are now being compiled by the Labour Bureau. It was decided by the Technical Advisory Committee to adopt the Calendar year 1960 as the base period for all these new series of index numbers.

Labour Bureau, Simla has published new series of Consumer Price Index for industrial workers in all the centres except the following :

| State | Factory Centres | Mining Centres | Plantation Centres |
|---|---|---|---|
| Andhra Pradesh .. | Guntur | Gudur | |
| Bihar .. .. .. | Jamshedpur | | |
| Madhya Pradesh .. | Gwalior | | |
| Madras .. .. .. | Madras | | Coonoor |
| | Madurai | | |
| | Coimbatore | | |
| Maharashtra .. .. | Bombay | | |
| | Sholapur | | |
| | Nagpur | | |
| Punjab .. .. .. | Yamunagar | | |
| Rajasthan .. .. | Jaipur | | |
| | Ajmer | | |

## EMPLOYMENT AND TRAINING

Many of the larger and more progressive concerns have Labour Officers who are directly responsible for all new recruitment.

The Millowners' Association, Bombay conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association. Following the example of the Millowners' Association, Bombay, the University of Calcutta, in co-operation with the Indian Jute Mills Association, has a special course of social work for giving suitable training to Labour Welfare Officers engaged in jute mills. Among other institutions imparting training for Labour Officers mention may be made of the Tata Institute of Social Sciences, Bombay ; Institute for Training of Welfare Workers, Bombay ; Delhi School of Social Work, Delhi ; Institute of Social Sciences, Banaras ; Xavier Labour Relations Institute, Jamshedpur ; Department of Labour and Social Welfare, Patna University ; J. K. Institute of Sociology and Human Relations, Lucknow University ; and the training course conducted by the Madhya Bharat Millowners' Association, Indore.

### Employment Service Techniques

The Directorate-General of Employment and Training, Government of India have set up the Central Institute for Research in Employment and Training in Oct. 1964, which conducts training course for Employment Officers. Intensive training is given during such courses in employment exchange work and procedure as well as in the techniques of collection of employment market information and administration of Vocational Guidance and Adult Counselling.

### Employment Exchanges

The number of Exchanges functioning in Dec. 1964 was 391 which includes 26 University Employment Bureaux and eight Special Exchanges for the handicapped.

The Third Plan provided for the opening of 65 Employment Exchanges and 33 University Employment Bureaux.

Under the existing rules recruitment to all Central Government posts and services except those falling within the purview of the Union Public Service Commission or those for which special methods are prescribed is made through the exchanges. With the employment Exchanges (Compulsory Notification of Vacancies) Act coming into force on May 1, 1960 all employers, including those in the private sector have to notify certain categories of vacancies and furnish staff strength returns at regular intervals to Employment Exchanges.

### Employment Information

Government has also devised a scheme for the collection of employment market information so as to be in a better position to advise on future manpower requirements. The collection of employment market information in respect of the private sector (establishments employing 25 or more persons) has commenced in 271 selected employment market areas in different States. Complete information in respect of the public sector is, however, being collected from all over the country.

### Occupational Training

Directorate General of Employment and Training have, in fact, as one item on the programme, the collection and dissemination of occupational information. A National classification of occupations containing standard definition and description of all occupations in the country has been published under this programme. Information useful for young persons and school-leavers on various careers are also being prepared as a part of this programme. 101 pamphlets on careers have been published in English and 82 in Hindi and are available for sale at a nominal price of 5 Paise per pamphlet at all Employment Exchanges and establishments selling Government publications. Another publication issued by the D.G.E.T. is the handbook which contains information relating to training facilities, both inplant and institutional, available throughout the country. Separate State volumes giving training facilities in each State have also been brought out.

The number of registered applicants with the Employment Exchanges was 24,92,874 at the end of Dec. 1964. During the period Jan.-Dec. 1964 on an average 45,402 persons were placed in employment each month. The monthly average number of vacancies notified during the period was 76,381. Of the placements, 10,494 were under the Central Government, 20,285 under the State Governments, 7,827 under quasi-Government establishments and local bodies and 6,670 under private establishments.

In 1964 on an average 26,538 women were registered with the exchanges every month. On an average 3,980 women were provided jobs every month.

WORKING OF THE EMPLOYMENT EXCHANGES* IN INDIA

| | No. of exchanges at the end of the month | No. of registrations during the month | No. of applicants placed in employment during the month | No. of applicants on the live registers at the end of the month | No. of employers using the exchanges | No. of vacancies notified during the month |
|---|---|---|---|---|---|---|
| Average for 1963 | 353 | 3,45,982 | 44,690 | 25,18,463 | 12,475 | 75,748 |
| 1964 | | | | | | |
| January | 355 | 3,01,969 | 41,864 | 24,94,543 | 13,075 | 68,620 |
| February | 356 | 2,50,306 | 40,683 | 24,64,229 | 12,343 | 70,404 |
| March | 356 | 3,21,229 | 45,078 | 24,52,853 | 13,317 | 75,785 |
| April | 356 | 3,26,329 | 42,782 | 24,57,806 | 13,406 | 76,835 |
| May | 356 | 3,00,013 | 40,217 | 24,73,020 | 13,701 | 79,272 |
| June | 363 | 3,85,906 | 45,442 | 25,42,283 | 14,503 | 87,362 |
| July | 363 | 4,26,531 | 46,481 | 26,36,974 | 14,630 | 82,800 |
| August | 365 | 3,49,545 | 47,312 | 26,80,805 | 14,652 | 77,906 |
| September | 365 | 3,34,815 | 50,573 | 26,71,633 | 14,234 | 77,372 |
| October | 365 | 2,61,148 | 46,314 | 25,99,626 | 13,746 | 73,361 |
| November | 365 | 2,60,936 | 49,318 | 25,35,633 | 13,391 | 73,969 |
| December | 365 | 3,13,177 | 48,754 | 24,92,874 | 13,903 | 72,886 |

There is a Working Group of the National Employment Service consisting of representatives of the Government of India and representatives of Governments of States. This meets periodically to review Employment Exchange procedures and to effect such changes as are warranted by the experience gained in the working of the Employment Exchanges in all the States.

### Rural Employment Bureau

The scheme for setting up employment information and assistance bureau in selected community development blocks was put into operation in Nov. 1960. These bureaux disseminate information regarding employment opportunities and acts as a link between the rural employment seekers and the employment exchanges in the districts.

### Training of Craftsmen

Before the beginning of the Second Five Year Plan there were 59 I.T.Is. in the country and training was imparted in 29 engineering and 22 non-engineering trades. The total number of training places was about 10,500. At the end of the Second Five Year Plan the number of Institutes was increased to 167 and the total training places to 43,000.

The programme for the Third Five Year Plan envisages the introduction of about 58,000 additional training places thereby raising the total training places to a little over one lakh. The total additional institutes likely to be established during the Third Five Year Plan will be 156 thus bringing the number of institutes to 323 by the end of the Third Five Year Plan.

During 1964, 15 new Industrial Training Institutes were established and 12,294 additional seats introduced, bringing the total number of Institutes to 298 and the total training capacity to 90,494 at the end of 1964.

*Scheme of Part-time Classes for Industrial Workers :*

In order to improve the theoretical knowledge of industrial workers, a scheme of Part-time Classes for Industrial Workers has been started during the Second Five Year Plan. The classes are held in technical institutes or within the factory premises of an industrial establishment at convenient localities. The duration of the course is two years and the classes are held thrice a week. The course consists of instructions in workshop mathematics, reading of blueprints and elementary trade theory and use of precision instruments. At the end of 1964, 3,490 seats had been introduced under the scheme and 2,325 trainees were undergoing training in 31 centres where theory classes are being conducted.

### Training of Craft Instructors

The scheme for the training of Craft Instructors has been designed to improve the efficiency of the Instructors both in the public and private institutions with a view to meeting the increasing demands of the country. The Government of India in the Ministry of Labour and Employment have set up 7 Central Training Institutes for Instructors, one of which meant exclusively for women, is functioning in New Delhi while the other 6 are located at Calcutta, Bombay, Kanpur, Madras, Hyderabad and Ludhiana. The total training places at these Institutes is 1,820 at present, which is proposed to be raised to 1,932 before the end of the Third Five Year Plan. Training is imparted in 16 engineering and 4 non-engineering trades and the duration of training is 9 months. These Institutes provide instruction in the theoretical aspects of the various trades and also impart practical instruction in the latest techniques of workshop practice. Instruction is not restricted to the main trades chosen by the candidates but is extended to training in some allied trades as well. To each Central Training Institute is attached an Industrial Training Institute so as to give ample opportunities to the instructor trainees to obtain practice in the methods of instruction under expert guidance.

These Institutes are among the most modern Craft Instructors Training Institutes in the country. Their workshops are equipped with up to date machines. Latest technique in teaching is employed. The Institute at Bombay is receiving technical assistance in the form of expert and equipment from the United States AID while the other 5 Institutes are receiving similar assistance from the United Nations Special Fund.

### Apprenticeship Training Act, 1961 :

In accordance with the recommendations of the Shiva Rao Committee, after the voluntary measures to training apprentices in the industry failed, the Apprentices Act, 1961 was enacted in December, 1961 with a view to achieving the following dual purposes :—

(*i*) To regularise the programmes of practical training in industry in such a way as to conform to standards, syllabi, period of training etc.

(*ii*) To utilise fully the facilities available in industry for imparting practical training. The Act was brought into force w.e.f. 1-3-62 and has been implemented w.e.f. 1-1-63. 26 trades have so far been designated under the Act and it has so far been extended to 127 industries. About 14,500 apprentices have either so far already been trained or are receiving training under the Act (Dec. 1964).

The Central Apprenticeship Council and the State Apprenticeship Councils have already been set up under the Act to advise the Central and State Governments respectively regarding the implementation of the Act and also to propose other statutory functions assigned to them under the Act.

### Training of Supervisors

Pilot programmes for the training of supervisors have been arranged in some industrial establishments. In order to spread this activity further, it has been decided to run a special course for the training of the Deputy State Apprenticeship Advisers on the techniques of organising and running supervisory training courses so that they, in their turn, can implement this activity in their respective States.

Employment during 1961-65 rose by 29·1 lakhs from 120·9 lakhs to 150 lakhs, indicating an increase of 24·1 per cent.

Of the total rise, the public sector accounted for 19·1 lakhs, while establishments in the non-agricultural private sector employing 25 or more persons showed an increase of 10 lakhs.

## EMPLOYMENT IN FOREIGN COMPANIES

The position in regard to employment of Indians and non-Indians on salaries of Rs. 1,000 and above in foreign-owned/controlled concerns on the 1st of January each year was as follows :—

| Year | Indians | Foreigners* | Total |
|---|---|---|---|
| 1954 | 3,455 | 7,008 | 10,463 |
| 1955 | 4,139 | 6,810 | 10,949 |
| 1956 | 4,862 | 6,566 | 11,428 |
| 1957 | 5,906 | 6,025 | 11,921 |
| 1958 | 6,959 | 5,652 | 12,611 |
| 1959 | 7,916 | 5,304 | 13,220 |
| 1960 | 9,113 | 4,809 | 13,922 |
| 1961 | 10,229 | 4,364 | 14,593 |
| 1962 | 11,535 | 4,001 | 15,536 |
| 1963 | 12,434 | 3,570 | 16,004 |
| 1964 | 13,824 | 3,135 | 16,959 |

* Excluding short-term foreign technicians.

Salary-group Rs.1,000–Rs. 2,000 : The number of Indians increased from 9,273 in 1963 to 10,088 in 1964.

Salary-group Rs. 2,001 to Rs. 3,000: The number of Indians increased from 2,185 in 1963 to 2,510 in 1964.

Salary-group Rs. 3,001 and above : The number of Indians increased from 972 in 1963 to 1,226 in 1964.

* Exclude University Employment Bureaux.

### ABSENTEEISM

One of the commoner complaints of Indian industrialists has been the high percentage of absenteeism and the large labour turnover in Indian factories, mines, etc.

ABSENTEEISM IN MANUFACTURING INDUSTRIES IN INDIA

## EMPLOYEES' STATE INSURANCE CORPORATION

Head Office: E.S.I.C. Bldg., Kotla Road, New Delhi.

*Regions:*

Delhi: E.S.I.C. Bldg., Kotla Road, New Delhi.

Kanpur: 7-202, Swarup Nagar.

Bombay: E.S.I.C. Building, Colaba Causeway, Bombay 5.

Madras: 136, Peters Road, Royapettah, Madras 14.

Calcutta: 64, Ganesh Chandra Avenue, Calcutta 13.

Indore: 5, New Palasia, Indore.

Jaipur: Hathi Babu Ka Bagh, Station Road, Jaipur.

Hyderabad: 5-9-23, Hill Fort Road, Hyderabad 22.

Trichur: E.S.I.C. Bldg., North Swaraj Round, Trichur.

Amritsar: 1016A-XIII, Circular Road, Amritsar.

Bangalore: 13, Kumara Park East Extension, Bangalore 1.

Patna: Lakhmir Bhawan, Budh Marg, Gaya Road, Patna-1.

Gauhati: Dr. Bhubaneshwar Barooah Road, Morakhali, Gauhati.

Cuttack: 10, Cantonment Road, Cuttack 1.

Ahmedabad: Ashram Road, Ahmedabad-9.

The Employees' State Insurance Corporation came into existence as an autonomous body with the passing of the Employees' State Insurance Act in 1948, which applies to all non-seasonal factories using power wherein 20 or more persons work. All employees employed directly or through an immediate employer on any work of the factory whether in a manual or non-manual capacity, on a remuneration not exceeding Rs. 400 per month, are covered by this Act. The Corporation is entrusted with the administration of the Act, whereas a Standing Committee acts as the executive of the Corporation. On matters concerning administration of medical benefit, certification and the like, the Corporation is advised by a Medical Benefit Council. All these bodies are tripartite in character *i.e.* they include representatives of industrial workers, employers and the Government. The Scheme is contributory.

The Scheme at present provides for medical care for the insured persons and in some areas for their families also and sickness, maternity, disablement and dependents' benefit in cash.

The year 1964 saw implementation of the Scheme in Masulipatnam, Tanuku, Chittoor, (Andhra Pradesh), Jiwatpur, Nizamat, Bhuli (Bihar), Ahmedabad (Gujarat), Chathannur, Kalluvathukal, Kottarakara, Kundara, Chittariparamba; Thiruvangad (Kerala), Nagapattinam, Vellore-Katpadi, Suburbs of Coimbatore Tirunagar (Madras), Gulbarga, Gokak (Mysore), Barbil (Orissa), Sitapur, Churk, Ghazipur (U.P.) and 24-Parganas (West Bengal).

During the quarter ending March, 1965, the Scheme has been extended to Chalakudy, Kallettumkara, Karuvannur (Kerala) Abohar, Dadri, Bahadurgarh, Surajpur, Pinjore, Mathura Road (Punjab), Mohannagar (Ghaziabad Suburbs), Sasni, Balwali, Ujhani, Pipri, Kheria (U.P.); thus 24,900 more employees have been covered. The revised total number of insured persons, as on March 31, 1965 was 29,60,550 (26,89,200 employees).

The Scheme covered an additional number of about 3,52,900 employees and about 82,200 family (I.P.) units during 1963-64. A sum of Rs. 5,34,54,191 was disbursed by way of cash benefit during 1963-64.

Upto 31st Dec. 1964 the Act was extended to cover 26,64,300 employees, in 206 centres. 24,58,550 family (I.P.) units have been covered for medical benefit upto 31st Dec. 1964.

The Employees' State Insurance Scheme today (31-3-1965) covers about 29,60,550 insured persons working in 219 centres.

The total number of beneficiaries entitled to medical benefit is estimated at about 1,07,03,400 including the members of families of workers (as on 31-3-1965).

The Corporation hopes to provide medical care to well over 100 lakh persons by the end of the Third Plan period.

With this, the sceme is in force in all States.

#### New Hospitals and Dispensaries

It is proposed to set up hospitals under the E.S.I. Scheme at Adoni, Warangal, Vijayawada and Visakhapatnam in Andhra Pardesh; Maithon and Dalmianagar in Bihar; Delhi; Ahmedabad in Gujarat; Mulakunnathukavu, Asaraman, Alleppey, Udyogamandal, Trichur, Parippally, Paroorkada and Kottayam in Kerala; Indore and Ujjain in Madhya Pradesh; Madras, Madura, and Coimbatore in Madras State; Dandeli in Mysore; Amritsar, Yamunanagar, Ludhiana, Jullundur and Faridabad in Punjab; Kanpur (one T.B. and one W and C Hospital) and Modinagar in Uttar Pradesh and at Kumarhati, Bally, Serampur, Uluberai, Bankara-Kalyani, Kancharapara in West Bengal; plans and estimates in respect of these hospitals have already been approved and construction of most of these hospitals is in progress.

These hospitals will be in addition to the eleven hospitals already established under the Employees' State Insurance Scheme viz., (*i*) a 200-bed hospital at Madras, (*ii*) a 170-bed hospital at Bangalore, (*iii*) the 612-bed M.G.M. Hospital at Bombay, (*iv*) a 112-bed E.S.I. Hospital at Kanpur and (*v*) a 30-bed hospital at Monghyr, (*vi*) 120-bed Hospital at Worli, Bombay, (*vii*) 100-bed Hospital at Kamarhatti, West Bengal, (*viii*) 150-bed Hospital at Hyderabad, (*ix*) 50-bed

Hospital at Sirpur, (x) 100-bed Hospital at Sealdah, (xi) 50-bed Hospital and 12-bed T.B. ward at Choudwar.

It has further been decided to construct hospitals at Salem in Madras; Mulund (Bombay), Nagpur and Aundh in Maharashtra; Mangalore in Mysore; Jaipur in Rajasthan; Bundel, Manicktolla (Calcutta), Budge-Budge, Gouhatti, Kanyapur and Dullya in West Bengal.

*Dispensaries :* Dispensary buildings have been constructed at Delhi (6 buildings), Hyderabad and Sirpur-Kagaznagar in A.P.; Ahmedabad (29 dispensaries) in Gujarat; Nandanagar, Indore, Industrial Estate-Indore, Nagda, Ujjain, Gwalior and Dewas in Madhya Pradesh; Perambur in Madras; Choudwary and Brajrajnagar in Orissa; Bhilwara, Jodhpur, Beawar, Pali, Sriganganagar in Rajasthan; Dalelpurwa, Kanpur in U.P.

Construction work is in progress in respect of State Insurance Dispensary buildings in various centres. Besides these, plans and estimates have been approved for the construction of various other State Insurance Dispensary buildings in different centres all over India.

Specialists have been appointed to provide treatment to persons, insured under the Employees' State Insurance Scheme.

The Employees' State Insurance Corporation was maintaining 5,162 beds in hospitals. Out of these, 3,402 were in general and maternity hospitals and the balance of 1,760 were T.B. beds.

During the Third Plan, it is proposed to implement the Scheme in all the areas with an insurable population of 500 and above. It would cover a total of 33·6 lakh employees with their families by the end of the Plan.

Total receipts of Corporation for 1963-64: Rs.15,55,86,393. Total benefits: Rs.10,84,70,407. Administrative expenses: Rs. 1,50,85,724. Employees' Contribution: Rs. 6,64,13,980. Employers' Contribution: Rs. 8,10,90,051.

Budget estimates for 1964-65: Receipts Rs. 17,23,30,300; expenditure Rs. 15,14,51,000. Surplus Rs. 2,08,79,000.

During 1964-65, the Corporation sanctioned a sum of Rs. 512·08 lakhs for construction of hospitals, annexes and dispensaries under the E.S.I.S. in various States. This includes sanction for construction of 50-bed E.S.I.S. hospital at Warangal, Vijayawada and Adoni at an estimated cost of Rs. 14·50 lakhs each (Andhra Pradesh); a 620-bed general hospital and 304-bed T.B. hospital with staff quarters at Delhi at a total estimated cost of Rs. 2·31 crores; a 500-bed hospital at Ahmedabad at an estimated cost of Rs. 75 lakhs; a 60-bed hospital at Trichur at an estimated cost of Rs. 13 lakhs; a 100-bed hospital at Parippally at an estimated cost of Rs. 16 lakhs; a 50-bed hospital at Peroorkada at an estimated cost of Rs. 9·71 lakhs; an 80-bed hospital at Ludhiana at an estimated cost of Rs. 12 lakhs and a 60-bed hospital at Jullundur at an estimated cost of Rs. 10·45 lakhs.

By the end of the Third Plan period, the Corporation expects to have about 9,150-beds in hospitals of its own.

Today, there are about 5,167-beds under the scheme. The Corporation has so far sanctioned about Rs. 23·30 crores for the construction of hospitals, annexes and dispensaries throughout the country.

Eleven full-fledged E.S.I. hospitals have already been constructed and put into use.

The rates of contribution payable in respect of an employee have been fixed as follows :—

| Group of employees | Employees' contribution (recoverable from employees) | | Employers' contribution | | Total contribution (employees' and employers') | |
|---|---|---|---|---|---|---|
| | Rs. | nP. | Rs. | nP. | Rs. | nP. |
| 1. Employees whose average daily wages are below Re. 1 | *Nil* | | 0 | 44 | 0 | 44 |
| 2. Employees whose average daily wages are Re. 1 and above but below Rs. 1-50 | 0 | 12 | 0 | 44 | 0 | 56 |
| 3. Employees whose average daily wages are Rs. 1-50 and above but below Rs. 2 | 0 | 25 | 0 | 50 | 0 | 75 |
| 4. Employees whose average daily wages are Rs. 2 and above but below Rs. 3 | 0 | 37 | 0 | 75 | 1 | 12 |
| 5. Employees whose average daily wages are Rs. 3 and above but below Rs. 4 | 0 | 50 | 1 | 00 | 1 | 50 |
| 6. Employees whose average daily wages are Rs. 4 and above but below Rs. 6 | 0 | 69 | 1 | 37 | 2 | 06 |
| 7. Employees whose average daily wages are Rs. 6 and above but below Rs. 8 | 0 | 94 | 1 | 87 | 2 | 81 |
| 8. Employees whose average daily wages are Rs. 8 and above | 1 | 25 | 2 | 50 | 3 | 75 |

The insured persons are entitled to the following benefits :

(*i*) sickness benefit, (*ii*) maternity benefit, (*iii*) disablement benefit, (*iv*) dependents benefit and (*v*) medical benefit.

Amounts (Rs.) distributed under some heads for 1963-64 are as follows :—

| State | Maternity Benefit | Disablement | | Sickness (including extended sickness) | Dependent Benefit (Capitalise value) |
|---|---|---|---|---|---|
| | | T.D.B. (Actual payment) | Capitalise value of P.P.D. | | |
| Andhra Pradesh | 92,067 | 3,07,023 | 1,53,900 | 14,21,847 | 58,300 |
| Assam | 98 | 7,223 | 11,600 | 55,159 | — |
| Bihar | 57,313 | 53,266 | 99,500 | 5,15,302 | 84,800 |
| Delhi | 15,785 | 2,01,154 | 4,36,400 | 14,13,152 | 34,800 |
| Gujarat | — | — | — | — | — |
| Kerala | 3,62,460 | 1,13,698 | 1,69,400 | 17,39,198 | 52,200 |
| M.P. | 1,14,474 | 2,29,690 | 2,95,300 | 21,25,013 | 1,05,000 |
| Madras | 5,68,369 | 4,02,330 | 2,89,400 | 57,57,976 | 1,07,800 |
| Maharashtra | 6,15,951 | 12,49,686 | 18,10,500 | 1,56,32,497 | 8,60,700 |
| Mysore | 1,28,097 | 1,49,642 | 2,08,100 | 14,78,393 | 40,800 |
| Orissa | 7,950 | 39,270 | 1,26,100 | 2,61,109 | 8,100 |
| Punjab | 7,156 | 1,32,311 | 2,78,400 | 5,42,744 | 31,500 |
| Rajasthan | 30,445 | 41,947 | 1,01,100 | 2,95,591 | 16,600 |
| U.P. | 7,896 | 2,92,599 | 3,19,300 | 30,16,393 | 1,05,500 |
| W. Bengal | 60,240 | 8,22,510 | 12,21,700 | 58,76,167 | 1,86,200 |
| Total | 20,68,301 | 40,42,349 | 55,20,700 | 4,01,30,541 | 16,92,300 |

The employers' special contribution to the Scheme has gone up from 1·25 per cent to 2·50 per cent of the wages where the Scheme has been implemented with effect from April 1, 1962.

Total number of employees covered by E.S.I.S. in each State is given below: Andhra 79,200; Assam 8,750; Bihar 49,900; Delhi 75,000; Gujarat (figures not available); Kerala 1,13,300; M.P. 87,300; Madras 2,45,500; Maharashtra 6,93,200; Mysore 1,22,400; Orissa 23,900; Punjab 1,13,950; Rajasthan 37,000; U.P. 2,18,250; West Bengal 6,10,800.

Total number of employees covered in the country: 26,89,200.

## SOCIAL SECURITY REPORT

There is a report by a Study Group on Social Security published in Dec. 1958.

A summary of this is given in the 1959-60 edition of the *Directory*.

## ACCIDENTS

The Indian Factories Act requires the manager to report all accidents which cause death or bodily injury whereby the person injured is prevented from returning to his work in the factory during the 48 hours next after the occurrence of the accident.

It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act.

The Department of Mines has been strengthened to facilitate more frequent inspection of mines. As an emergency measure, the Coal Mines (Temporary) Regulations, 1955 have been promulgated for the prevention of apprehended danger and for the speedy remedy of the conditions likely to cause danger. The entire codes of coal and non-coal mines regulations are being revised to provide for more comprehensive measures for safety in mines.

Figures for the years 1956 to 1962 are given in the table below.

| Year | FACTORIES | | | MINES | | |
|---|---|---|---|---|---|---|
| | Fatal | Non-Fatal | Total | Fatal | Non-Fatal | Total |
| 1956 | 278 | 1,28,177 | 1,28,455 | 335 | 4,281 | 4,616 |
| 1957 | 346 | 1,31.149 | 1,31,495 | 261 | 3,732 | 3,993 |
| 1958 | 357 | 1,30,913 | 1.31 270 | 504* | 3,925 | 4,429 |
| 1959 | 341 | 1,41,675 | 1,42,016 | 288 | 4,084 | 4,372 |
| 1960 | 454 | 1,44,549 | 1,45,003 | 317 | 4,661 | 4.978 |
| 1961 | 474 | 1,59.271 | 1,59.745 | 344 | 5.173 | 5.517 |
| 1962 | 407 | 1,24,935 | 1,25,345 | 368 | 4,881 | 5,249 |

* Includes those killed in two disasters (Chinakuri 173 and Central Bhowra 26).

## WELFARE ACTIVITIES

Welfare work is undertaken by the Central Government, the State Government, private employers and trade unions.

### HOUSING

See under article "Housing".

### OTHER AMENITIES

Section 47 of the Factories Act, 1948 makes it obligatory for all factories employing more than 150 workers to provide adequate shelters and a suitable lunch room for the use of workers during periods of rest. Almost all large industrial establishments had provided tiffin rooms and rest shelters for their workmen. Most concerns had also permitted the establishment of tea stalls on the premises but apart from this, little effort had been made to run co-operative canteens on the lines of those which are associated with most of the large factories in the West.

The Act of 1948 provides for the setting up of creches in factories that employ more than 50 women.

Except for the Ahmedabad Textile Labour Association, the Railwaymen's Unions, and the Mazdoor Sabha of Indore, labour unions have not done much by way of labour welfare. This has been due largely to lack of funds. Some of the Railwaymen's Unions have organised co-operative societies, and various kinds of funds for the provision of specific benefits, such as, legal defence, death and retirement benefits, unemployment and sickness benefits and life insurance, etc.

Labour welfare centres exist in most States.

Other types of welfare work done by factories relate to the provision of recreational facilities, amenities for the education of workers and their children, the provision of cost price grain shops, the establishment of co-operative societies, etc.

On railways there are educational facilities for the children of the employees mostly free of charge. Staff Benefit Funds have also been created which give monetary help to the children and widows of the deceased employees.

Medical facilities provided by employers range from first-aid posts and dispensaries to first-class hospitals.

### WORKERS' EDUCATION SCHEME

The Scheme of Workers' Education, which is run by an autonomous Central Board, consisting of representatives of workers, employers, educational institutions and the Government comprises three stages of training. The first stage consists of training of top level instructors known as Teacher-Administrators who are post-graduates in one of the social sciences. After successfully completing the course they conduct whole-time training courses for selected workers who are called Worker-Teachers. This course is open to whole-time trade union officials also. This is the second stage of the scheme. The workers so trained revert to their places of employment and conduct programmes at the unit level for the rank and file of workers. This constitutes the third and final stage. The medium of instruction at the regional and unit level is the regional language and the syllabi are also adjusted to suit local conditions.

The object of the Scheme is to create over a period of time, despite lack of general education, a well-informed, constructive and responsible minded industrial labour force capable of organizing and running trade unions on sound lines without leaning heavily on outsiders and without lending themselves to exploitation by extraneous interests.

By the end of April 1965, 5,767 worker-teachers were trained in 164 sessions at the various regional and sub-regional centres under the Board while 3,300 worker-teachers were under training during the month ; and 2,12,836 workers were trained while 34,052 were under training.

A number of seminars on various subjects were organised at various places during April 1965 and a symposium on "Grants-in-aid" was organised by the Nagpur Regional Centre. Nearly 50 renowned trade unions participated in it.

Trade Union Organisations which are receiving grants-in-aid from the Board trained 2,153 workers including 68 worker-teachers. By the end of April 1965, a total number of 2,20,756 workers were trained under "Workers Education". at the various institutions under the Workers' Education Programme.

By the end of April 1965, 43 booklets in English and 324 in regional languages were published by the Board.

The new sub-regional centres were started at Bhiwandi and Sontikoppa under Bombay and Bangalore regional centres on 2nd and 6th Jan. 1964 respectively.

### COAL MINES WELFARE FUND

This Fund was constituted under the Coal Mines Labour Welfare Fund Act of 1947 for financing measures for promoting the welfare of labour employed in the coal mining industry. The principal objects for which this fund is to be utilised are : (1) the improvement of standard of living including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities for the benefit of the labour employed in the coal mining industry; (2) the provision of transport to and from work; (3) the improvement of educational facilities; (4) the provision and improvement of supplies of water ; and (5) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing facilities. The Fund is administered by the Central Govt. on the advice of an Advisory Committee consisting of Government Officers and an equal number of members representing colliery owners and workers employed in the coal mining industry with at least one woman.

Miners in about 900 collieries derive benefit from the Fund.

The main source of income to the Fund is a cess levied on all coal and coke despatched from collieries by rail and road. The cess is being levied at the rate of 49·21 Paise per metric tonne. The income of the Fund which was Rs. 303·78 lakhs during 1962-63 was expected to be Rs. 357·61 lakhs during 1963-64.

The Fund is maintained under two accounts, *viz.*, Housing Account and General Welfare Account. The money in the former account is utilised for providing housing accommodation to colliery workers and that in the latter on other general welfare measures.

Two modern well-equipped hospitals of 250 beds each for specialised treatment one in Bihar and the other in West Bengal are functioning. The hospitals being inadequate to cope up with the rush of patients, are being expanded to 300 beds each. A deep X-ray Therapy Section and a Blood Bank have been provided at the Central Hospital, Asansol. A Blood Bank has also been provided at each of the hospitals at Asansol and Dhanbad. A network of Regional Hospitals—with facilities for maternity treatment has been provided at Katras and Tisra in the Jharia Coalfields, Chora and Searsole in Raniganj Coalfields, Naisarai and Phusro in the Hazaribagh Coalfields and Jamai and Dhanpuri in Madhya Pradesh Coalfields. Establishment of 12 more Regional hospitals and expansion of five hospitals from 30 to 50 beds were taken up and in some of these cases the work is already under way.

Besides the maternity and child welfare facilities provided in the hospitals, about 60 centres are also run through Mines Boards in Bihar and West Bengal in addition to 8 centres run by the Fund in Madhya Pradesh, Andhra Pradesh and Orissa Coalfields. A few more centres are to be provided in Madhya Pradesh and Assam Coalfields.

Facilities provided for the treatment of T.B. include 162 beds maintained by the Fund in a 100 bedded hospital attached to the Central Hospital, Dhanbad and a clinic at Katras and a hospital at Searsole and 86 beds reserved in various Sanatoria in Bihar, Madhya Pradesh, Andhra Pradesh and Assam. A scheme of domiciliary treatment has been introduced in all the Coalfields in India with provision for treatment of 1,255 patients at a time. A network of Chemotherapy Centre has been set up, throughout the coalfields for treatment of patients under this scheme.

In addition to free treatment the Fund gives grants-in-aid for special diet up to a maximum of Rs. 50 per month per patient for a maximum period of 6 months. Subsistence allowance up to Rs. 50 is also paid to dependents of each T.B. patient under treatment for a maximum period of 6 months. Two 100 bedded T.B. blocks as adjuncts to the two Central Hospitals are almost completed. The out-patient wing of the 100 bedded T.B. block attached to the Central Hospital, Dhanbad started functioning in full swing from 11th June, 1963.

Two allopathic and 17 ayurvedic dispensaries are run in various coalfields. A Central Ayurvedic Pharmacy has been established at Patherdih, Dhanbad for supplying genuine medicines to all Ayurvedic Dispensaries established by the Coal Mines Labour Welfare Fund and Mica Mines Labour Welfare Fund of Bihar. Three mobile medical units have also been provided by the Fund. Colliery owners are paid annual grants-in-aid for maintaining dispensary services of the prescribed standard and interest-free loan is also given to them for building and equipping dispensaries.

Fifty-four beds are maintained for the treatment of leprosy cases at three Leprosy Hospitals run by voluntary organisations in Bihar and West Bengal. A scheme of payment of diet and subsistence allowance to patients suffering from leprosy has been sanctioned. Supply of X-ray plants to colliery hospitals and of artificial limbs, dentures and spectacles free of cost to miners are also made by the Fund.

Free advice on family planning is given and contraceptives supplied free of cost at the Funds hospitals. Two model family planning clinics are run at the central hospitals and an urban clinic

is run at each regional hospital. Some urban and rural clinics have also been opened. A scheme for payment of grants-in-aid to colliery owners for family planning work has been introduced.

The Malaria Control Operations of the Organisations have been switched over to eradication programme. Filaria survey is being carried out in all the coalfields.

Miners' Institutes each comprising a Welfare Centre for women and children and an Adult Education Centre for miners are maintained—25 in Bihar, 11 in West Bengal, 10 in Madhya Pradesh, 7 in Andhra Pradesh, 2 each in Chanda and Orissa and 1 in Assam. One hundred and sixty-seven Feeder Adult Education Centres are also being run. Five Mobile Cinema Units have been provided, 2 in Bihar and one each in Raniganj and Madhya Pradesh coalfields and one in Korea Coalfields in Madhya Pradesh.

Award of scholarships to the children of colliery workers at rates from Rs. 20 to Rs. 50 per month per scholar for higher general education and Rs. 50 per month per scholar for technical education, grants-in-aid to educational institutions, in different coalfields are some of the other welfare measures on the education and recreational side.

A little over 2,153 houses for miners were constructed by the Fund in the beginning under its township scheme. Under the subsidised housing schemes introduced later, about 3,698 more houses have been constructed. Under the new housing scheme envisaging the construction of about 30,000 houses direct by the Fund, 21,433 houses have been completed and most of the remaining houses are at various stages of construction (March 1965).

A low cost housing scheme envisaging construction of one lakh cheap houses at a cost of Rs. 1,600 each has been approved for the Third Plan, against which 25,000 houses and 417 barracks have been sanctioned for construction during 1961-62. Under the scheme 5,762 houses and 33 barracks have been constructed.

A scheme "Build your House Scheme" has been introduced. Under this scheme a sum of Rs. 325 would be paid as subsidy in the shape of materials in each case to the colliery workers who intend to build their own houses on land owned by them, in the neighbouring villages. 35 houses were sanctioned for construction under the scheme (March 1965).

Other welfare measures include a scheme of financial assistance to the wives and school-going children of those colliery workers who die of accidents in mines, provision of a Holiday Home for miners at Rajgir, running of a Special Train for Bharat Darshan, provision of rehabilitation centres for disabled colliery workers and cured T.B. patients, for imparting training in physical education, leadership and discipline, mass physical efficiency test for coal miners, etc.

The Fund Organization is also responsible for enforcement of Coal Mines Pithead Bath Rules, 1959 and Mines Creche Rules, 1961, which require provision of pithead baths and creches at collieries by their owners.

The Organisation pays grants in aid to colliery managements and other bodies for implementation of water supply scheme in the coalfield areas.

The drive launched by the Organisation in the year 1958 for organising Co-operatives in the Coalfields has gained considerable momentum. Already 461 Co-operative Credit Societies/Stores have been organised in the various coalfields. Nine wholesale/Central Co-operative Stores have been opned.

**Mica Mines Labour Welfare Fund.**—The Mica Mines Labour Welfare Fund Act, 1946, which was designed to constitute a similar fund for the benefit of mica workers, provides for the levy of an *ad valorem* duty not exceeding 6¼ per cent on all mica exported from India. The Govt. of India apportions the cess so realised annually among Bihar, Andhra Pradesh, Rajasthan and other States. Under the Act Advisory Committees for Bihar, Madras, and Rajasthan were constituted.

In Bihar, the Fund has provided the following facilities for the Welfare of mica miners:—

*Medical Facilities :* A 100 bedded Central Hospital, attached with a T.B. Ward of 50 beds; a 30 bedded Regional Hospital, 5 Static Dispensaries; 3 Mobile Medical Units; 5 Maternity and Child Welfare Centres; 7 Ayurvedic dispensaries; 10 beds for the Mica miners and their family members suffering from T.B. at the Mahadevi Birla T.B. Sanatorium, Ranchi. A scheme of domiciliary T.B. treatment has been introduced with provision for treatment of 150 patients.

*Educational and Recreational Facilities :* 6 Primary Schools; 2 Middle Schools; 8 Miners' Institutes; 8 Feeder Centres; 7 Community Centres; 2 Mobile Cinema Units; Provision of 22 Radio Sets at different mines; Provision of Scholarships to miners children for technical and general education; Excursion-cum-Study tour of mica miners; grant of tuition fees to 50 mica miners' children.

*Departmental Wells :* 37 wells have been sunk departmentally and three under subsidy scheme. Construction of 13 more wells is in hand (Dec. 1964).

*Other Welfare Activities :* Payment of financial assistance to dependents of mica miners who die from accidents in mines; Payment of subsistence allowance to mica miners suffering from T.B. and undergoing treatment at the Funds Clinic or at the Sanatorium. A Rehabilitation-cum-Convalescent Home has been started for providing training to disabled workers and discharged T.B. patients after cure.

*Andhra Pradesh :* The percentage share of cess is 18·5. The income and expenditure of the Mica Mines Labour Welfare Fund in Andhra Pradesh in 1964-65 was Rs. 5,97,693 and Rs. 5,87,191 respectively.

*Facilities provided by the Fund :* A 14 bedded hospital at Kalichedu, four allopathic dispensaries at Sydapuram, Utukur, Talupur and Mobile dispensary with headquarters at Kalichedu are run by this Organisation. Four Maternity Centres are also run by this Organisation. An in-patient ward of 10 beds at Talupur is under construction (May 1965).

There are 11 beds reserved for the exclusive use of the Mica Mine labourers who suffer from T.B. in the T.B. Hospital at Nellore. A T.B. ward of 16 beds at Kalichedu at an estimated cost of Rs. 1,36,000 is under construction. (May 1965). There are two Ayurvedic Dispensaries, one at Kalichedu and the other at Marupur. Subsistence allowance at the rate of Rs. 50 per month for six months is being sanctioned to Mica Mine T.B. Patients undergoing treatment in the T.B. Hospital, Nellore in case there happens to be no earning members in the family of the patient and possesses no property.

Under the Fatal Accident Benefit Scheme, the dependents of the deceased mica miners who die or become totally or permanently incapacitated due to mica accident, will get Rs. 100 in lump sum and Rs. 10 per month for a period of 3 years and a monthly scholarship of Rs. 5 for each school going son or daughter till the child attains the age of 15 or in the case of a daughter till she is married whichever is earlier.

*Educational and Recreational Facilities :* One full-fledged High School, at Kalichedu, one Middle School, at Talupur and six elementary Schools at the Mining areas are run by this Organisation for the benefit of the children of the Mica Mine labourers and the general public as well. One Night School is also functioning. Besides the service of midday meals, there are two Boarding Homes, at Kalichedu and Sydapuram run by this Organisation for the children of the Mica Mine labourers who come from a distance of more than two miles. Free supply of books and slates was made to the children of the Mica Mine labourers. Supply of free clothes, grant of scholarships etc., are also awarded for the benefit of the children of labourers studying in the schools. Free dresses were provided to all the labour children studying in elementary and secondary schools.

There are three Community Centres, one Carpentry Centre at Kalichedu, two Sewing Centres at Kalichedu and Utukur (for men and women separately) run by this Organisation.

There are 12 recreation clubs, 6 Bhajana Mandalies and 19 radio sets working under this Organisation. Proposals for installation of radio sets at 9 other places have been finalised. There is one cine projector under the Fund to exhibit film shows on family planning and safety in Mines etc.

*Wells :* The five wells sunk entirely at the cost of the Fund and 8 wells sunk on subsidy basis are being used by the Mica Mine labourers.

*Accommodation :* Two schemes, one costing about Rs. 4,23,430 and the other costing about Rs. 4,76,260 have been submitted to the Government of India for approval, with a view to providing residential accommodation to the medical staff and 80 per cent of the non-medical staff under the Fund.

*Cooperative Stores :* Four consumers cooperative stores have been started under the Fund. There is a proposal to start a Central cooperative stores soon after some more primary stores are started under the Fund.

## AGRICULTURAL LABOUR

Two All-India Enquiries have been conducted by the Government of India in regard to agricultural labour. The First Enquiry was conducted in 1950-51 and the Second in 1956-57. The reports on both the Enquiries have been published.

As the Report states, one of the main objects of the Second Enquiry was broadly to assess the impact of developmental schemes undertaken under the First Plan on the conditions of agricultural labourers as between 1950-51 and 1956-57.

The results thrown up by the Second Enquiry as compared to those of the First Enquiry are briefly given in the 1962-63 Directory. The findings of the first enquiry are given in the 1960-61 Directory.

During the Third Plan period, it was originally decided to conduct a comprehensive survey of the socio-economic conditions of rural labourers in the country. In view of the National Emergency, it was, however, later decided to curtail the scope of the proposed enquiry and restrict it to the collection of data only on Income and Consumer Expenditure of rural households including agricultural labour households.

The enquiry was conducted in about 8,472 villages comprising 15 States and four Union Territories selected on the principle of stratified random sampling and staggered evenly over a period of 12 months. In all, about 8,472 rural labour households were expected to be covered. This enquiry was integrated with the 18th round of the National Sample Survey which commenced in Feb., 1963 and was completed in the middle of Feb., 1964.

The Ministry of Labour and Employment has decided to collect data on employment, unemployment, earnings and indebtedness of rural households including agricultural labour households. The 19th round of the N.S.S. was launched in July, 1964 and was expected to be completed by July, 1965.

### MINIMUM WAGES

One of the protective measures to improve incomes of agricultural labourers is the Minimum Wages Act, 1948, which *inter alia* applies to employments in agriculture. The Act envisages the fixation of wage minima before Dec. 31, 1959. Section 3 of the Act has been amended in 1961 by which this time limit has been removed. In so far as agricultural employments are concerned section 3(1)(*d*) of the Act lays down that the appropriate Government may, instead

of fixing minimum rates of wages for the whole State, fix such rates for a part of the State or for any specified class or classes of such employment in the whole State or part thereof.

Minimum wages for agricultural workers have been fixed for the whole State in Andhra Pradesh, Kerala, Orissa, Punjab, Rajasthan, Bihar, Madhya Pradesh, Madras, Uttar Pradesh, Mysore, West Bengal, Himachal Pradesh, Delhi and Tripura and for part of the State, *i.e.* for specified areas in Assam, Maharashtra and Gujarat. Wages have also been fixed by the Central Govt. in certain agricultural farms/research institutes under the Ministry of Food and Agriculture, military farms and depots under the Ministry of Defence and archaeological gardens at Delhi, Agra, Lucknow, Deeg and Khajuraho.

The Minimum Wages Act also envisages that minimum rates of wages fixed or revised under the Act in respect of scheduled employments may consist of a basic rate of wages and special allowance to be adjusted periodically according to variation in the cost of living index to the practicable extent; it may be a basic rate of wages with or without the cost of living allowance and the cash value of concessions allowed; or it may be an all-inclusive rate allowing for the basic rate, the cost of living allowance and cash value of concessions, if any.

Consumer Price Index numbers for agricultural Labour on base 1960-61 (July-June) = 100 onwards are being published by the Labour Bureau, Govt. of India for 13 States, together with all India figures, regularly every month in *the Indian Labour Journal* with effect from Nov. 1964 issue. The weighting diagram thrown up by the Second Agricultural Labour Enquiry, 1956-57, is being used for these series which have replaced the interim series of the Agricultural Labour Consumer Price Index Numbers published earlier with base 1950-51=100.

## WORKERS' EDUCATION

The Government of India in co-operation with the Ford Foundation appointed an International Team to suggest steps to be taken for (*a*) education of trade union representatives in the techniques of trade union organisation, management and financing, (*b*) education of union members for intelligent participation in union affairs and (*c*) education of union representatives in responsible and effective participation in management.

The Team submitted its report in June 1957.

The main recommendations of the Team are given in the 1960-61 edition of the *Directory*.

A sum of Rs. 2 crores has been provided for expanding the workers' education scheme during the Third Five Year Plan. The Central Board for Workers' Education has opened 27 Regional and 38 sub-regional Workers' Education Centres in different parts of the country. Five top level instructor courses for its education officers have been conducted. About 150 education officers are now available. The sixth training course of education officers for employment under the Central Board for Workers' Education was expected to start in May, 1965. In the education officer courses 87 trade union nominees have also been trained for helping trade unions to organize their own Workers' Education Programmes. Upto the end of March, 1965, 5,686 worker-teachers have been trained. More than 2,56,880 workers were trained upto the end of Sept. 1965. as against the Third Plan target of 2,50,000 fixed under the scheme.

Other training schemes are:—

(1) Craftsmen Training Scheme; (2) Evening Classes for Industrial Workers; (3) Training of craft Instructors; (4) Refresher Course for Supervisory Staff; (5) Mill-wright & Surveyor Courses; (6) Training of Principals & Inspecting Officers; (7) National Council for Training in Vocational Trades; and (8) Apprenticeship Training.

### Training-cum-Orientation Course

The scheme "Work and Orientation Centres" aimed at assisting the educated unemployed persons to equip themselves for employment in vocations other than white-collared jobs, has since been revised and a new scheme called "Training-cum-Orientation Course" at the "Industrial Training Institute" has been introduced. Under the revised scheme, special instructions in business management are given to the selected trainees during the last 9 months of the 18th months' institutional training under the Craftsmen Training Scheme. So far (May 1965), these revised courses have been sanctioned in Assam, Gujarat, Kerala, Madhya Pradesh, Madras, Mysore and Punjab.

**Small Scale Industries:** Two production centres were sanctioned by the Ministry of Commerce and Industry (now Ministry of Industry) to be established in Kerala and the Ministry of Labour and Employment arranged for training for about 344 persons.

Of the 344 candidates whose training was arranged, 48 did not turn up for in-plant training. Twelve of those who had their in plant training either resigned or died. Of the rest, only 273 accepted offers of appointment and they have all been employed in the Small Scale Industries Organisation.

**Goods Transport Co-operatives:** A pilot scheme for the establishment of five Goods Transport Co-operatives one each in West Bengal, Bombay,* Madras, Kerala and Delhi was prepared by the Ministry of Transport and circulated to States. The Governments of Madras, West Bengal and Kerala have already agreed to implement the scheme. Proposals from the Government of Orissa and Tripura Administration for allotment of one unit each to them have been received. These requests are under consideration by the Ministry of Transport.

**Trade Union Methods:** Over 2,13,000 Industrial workers have received training in trade union methods—and philosophy under the three-tier country-wide scheme of workers' education. Nearly 34,865 workers are undergoing training at various centres (March, 1965).

## CODE OF DISCIPLINE

The Code of Discipline adopted by the Indian Labour Conference in May 1958 came into force from June 1, 1958. It lays down certain do's and don'ts both for managements and unions with a view to ensuring better discipline in industry. Managements have undertaken not to increase work-loads unless agreed upon, not to support or encourage unfair labour practices, to take prompt action for the settlement of grievances and to recognise the unions which fulfil certain agreed conditions. Unions on the other hand have undertaken not to engage in physical duress, non-peaceful and rowdy demonstrations, to discourage unfair labour practices. Both the managements and unions have also agreed not to take any unilateral action in an industrial matter but to settle disputes at appropriate levels, not to resort to strike or lock-out without notice or to coercion, intimidation, victimisation or go-slow and to establish a mutually agreed grievance procedure for the speedy settlement of disputes and to take prompt action to implement awards, agreements and settlements. The Code applies to both the public and the private sectors.

The implementation of the Code is entrusted to the Evaluation and Implementation Division at the Centre. An Implementation Committee comprising 4 representatives each from the Central Employers' and Workers' organisations and one representative of the Public sector has been set up under the chairmanship of the Union Labour Minister. The main functions of the E. & I. Division include implementation of the Code of Discipline, Code of Conduct, labour enactments, awards, agreements, preventive action to avert strikes, lock-outs, etc., out-of-court settlement of disputes pending in High Courts and the Supreme Court, evaluation of major strikes, lock-outs and disputes to fix responsibility for them and of the working of important labour enactments, awards, policy etc. and to assess the results achieved by them.

For similar purposes, the State Governments have also set up Implementation Units in their Labour Departments and Tripartite Implementation Committees. The Central Implementation & Evaluation Division co-ordinates the activities of the State Implementation Machinery to ensure uniform action.

All public undertakings working as Companies, and Corporations are already covered by the Code. The State Bank of India, the L.I.C. and the Central Insurance Companies and their employees' organisations have also accepted the Code with some clarifications. The Port Trusts, the private banks and their employees' organisations have accepted the Code with clarifications except those on Criteria for Recognition of Unions. The Code will apply to these sectors after an agreement is reached on the criteria.

During 1964 the Central Implementation and Evaluation Division received 1,710 complaints about breaches of the Code of Discipline in the Central sphere. Of these, 168 did not require action as these were reported to other organisations and referred to the Division only for information or pertained to cases which were sub-judice. Of the remaining cases, 9 per cent were not substantiated on enquiry, in 37 per cent breaches were either set right or the parties advised to avoid them in future and the rest of the cases have been taken up with the parties concerned for rectification.

One of the positive steps under the Code of Discipline to reduce litigation has been the setting up of Screening Committees by the Central Organisations of employers and workers to screen cases of industrial disputes before appeals are filed in higher courts.

Similarly, a procedure for screening of appeals by public sector undertakings against awards of Tribunals etc. was evolved during 1964.

*Industrial Truce Resolution:* In view of the National Emergency created by the Chinese invasion a meeting of the Central organisations of employers and workers was convened on Nov. 3, 1962 under the chairmanship of the Union Labour Minister wherein the resolution on Industrial Truce was adopted. The Truce aims at total elimination of work stoppages, improvement in production and productivity, reduction of costs to the maximum possible extent, ensuring price stability through organisation of Consumers' Cooperatives for industrial workers, increasing savings etc.

In pursuance of the decision of the Indian Labour Conference in July 1963, a high level Standing Committee on Industrial Truce Resolution comprising the representatives of all Central Employers' and Workers' Organisations was set up under the chairmanship of the Union Minister for Labour and Employment to review the implementation of the industrial Truce Resolution in all its aspects. The Committee considered a number of important issues such as industrial relations in the country and the opening of fair price shops and consumers' co-operative stores. This committee has since been amalgamated with the Central Implementation & Evaluation Committee.

*Voluntary Arbitration:* Voluntary arbitration which the Code of Discipline advocates as a means of settling disputes has been further stressed in the Industrial Truce Resolution. In particular the Truce Resolution enjoins on management to settle all complaints pertaining to dismissals, discharges, victimisation and retrenchment of individual workmen through arbitration if they are not settled mutually. Of the 651 cases in the Central sphere, in which conciliation failed during 1964, voluntary arbitration was agreed to in 185 cases.

## WORKERS' PARTICIPATION IN MANAGEMENT

The scheme of Workers' Participation in Management, being a voluntary one and having the promise of yielding results both in terms of

* Billingual.

better relations and higher productivity, the Third Five Year Plan reiterated the Government policy in this regard as follows: "For the successful and peaceful evolution of the economic system into a socialistic frame of work, it is essential that workers' participation in management should be accepted as a fundamental principle and an urgent need, so that progressively, in the course of a few years, it may become a normal feature of the industrial system".

The scheme of establishing Joint Management Councils envisages joint consultation through councils in which workers and employers are equally represented and have a free forum for discussion and exchange of ideas on subjects of mutual interest. Consultation, administration and sharing of information on specified items are the basic ingredients of an effective working of the Joint Management Council. The scheme in its present form does not encroach upon the executive authorities constituting the management structure nor does it usurp the position of a forum for collective bargaining are outside the scope of Joint Management Councils.

The Government of India took various steps in the shape of seminars, conferences, meetings, a special cell both at the Centre and State level and a Tripartite Committee at the Centre, public talk, issue of handouts and pamphlets, circulation of assessment reports, personal contact and on the spot discussion etc., to ensure sound and solid industrial relations.

The scheme of workers' participation in management is at present (May 1965) functioning in 97 industrial establishments. Besides these, the State Bank of India has also constituted a Central Consultative Committee at each of its local head office.

## TRIPARTITE LABOUR MACHINERY

The Tripartite Labour Machinery at the Centre consists of (*a*) Indian Labour Conference, (*b*) Standing Labour Committee and (*c*) Industrial and other Committees. There is also the Labour Ministers' Conference, which though not tripartite in character, is closely associated with the tripartite labour machinery.

The Indian Labour Conference was set up in 1942 with the following main aims and objects:—(*i*) Promotion of uniformity in labour legislation; (*ii*) Laying down of a procedure for the settlement of industrial disputes; and (*iii*) The discussion of matters of all-India importance arising between employers and employees.

The Conference advises the Government of India on all labour matters referred to it and is at present composed of 54 members — 36 members representing the Central and State Governments and 9 members each representing the employers and workers nominated by the Government of India in consultation with the all-India organisations of employers and workers.

The Standing Labour Committee, though originally intended to be a Standing Committee of the Indian Labour Conference and was to examine such questions as might be referred to it by the Conference or the Government, now functions as an independent body. The only difference between the Conference and the Committee is that the Committee is a smaller body composed at present (March 1965) of 28 members 18 representing the Government and 5 each of the employers and workers.

There are also the following Industrial Committees set up to consider the problems peculiar to individual industries and make suitable recommendations:—(*i*) Industrial Committee on Plantations; (*ii*) Industrial Committee on Coal Mining; (*iii*) Industrial Committee on Cement; (*iv*) Industrial Committee on Tanneries and Leather Goods Manufactories; (*v*) Industrial Committee on Cotton Textiles; (*vi*) Industrial Committee on Jute; (*vii*) Industrial Committee on Building and Construction Industry; (*viii*) Industrial Committee on Mines other than Coal Mines; and (*ix*) Industrial Committee on Iron and Steel.

Of these, committees like Coal Mining, Plantations, Cement, Jute and Mines other than Coal have been found effective and useful and frequent meetings of these Committees are being held. Others would meet as and when considered necessary. There is also a Standing Three-man Tripartite Committee on Conventions which reviews the ILO Conventions and recommendations from time to time and explores the possibilities of ratifying the Conventions and implementing the recommendations.

## LABOUR ADMINISTRATION

Apart from the main Secretariat of the Ministry of Labour it has several attached and subordinate offices. The activities of some of these have been described in the relevant sections, such as Miners' Welfare Fund, and notes on some others are briefly given below.

**Labour Bureau.**—To meet the ever growing needs of Government, industry and labour for accurate and reliable information relating to labour conditions, labour legislation, etc., the Central Government established on 1st October 1946, a Labour Bureau.

Among other things the Bureau edits the *Indian Labour Journal* and the *Year Book.*

**Chief Labour Commissioner.**—The Central Government, in the Ministry of Labour and Employment, have also appointed a Chief Labour Commissioner who is responsible for prevention and settlement of industrial disputes, enforcement of labour laws, promotion of labour welfare and maintenance of healthy relations in the undertakings falling in the Central sphere and verification of membership of trade unions affiliated to four All India Central Trade Unions. A Central Institute for Training in Industrial Relations has also been set up under him for imparting in service training of the industrial relations machinery at the Centre and in the States. There are two Deputy Chief Labour Commissioners and nine Regional Labour Commissioners working under him.

**Chief Adviser, Factories.**—The organisation functions in an advisory capacity to co-ordinate and ensure uniformity in the administration of the Factories Act and the rules framed thereunder relating to safety, health and welfare of workers in factories. It is also responsible for the administration of the Indian Dock Labourers Act 1934, the Indian Dock Labourers' Regulations Act 1948 framed thereunder and also the Dock Workers (safety, health and welfare) Scheme 1961. The organisation has under its control the Central Labour Institute at Bombay and the three Regional Labour Institutes at Calcutta, Madras and Kanpur which provide a comprehensive service to industry in the country as a whole on labour and allied problems relating to the human factor.

The organisation has been entrusted with the work of implementation of the Schemes for Shram-Vir National Awards and National Safety Awards and preparation of a scheme for the setting up of a National Safety Council to ensure the fullest participation of all the parties concerned in creating safety consciousness in industry.

## EMPLOYMENT FOR HANDICAPPED

Special Employment offices for the physically handicapped are at present functioning at Bombay, Delhi, Madras, Hyderabad, Calcutta, Kanpur, Bangalore, Ahmedabad and Chandigarh.

The Govt. of India has set up one additional employment office for the physically handicapped during 1964-65 bringing the total number to 9.

It is proposed to open three more such offices during 1965-66.

## CENTRAL LABOUR INSTITUTE

As a step towards meeting the need for an agency designed to afford facilities for the scientific study of the various aspects of industrial development as relating to the human factor, the Planning Commission, as part of the First Five Year Plan, recommended the establishment of a National Museum of Industrial Safety, Health and Welfare to serve as a nucleus of an Insitute for conducting specialised courses of training and education in labour and allied problems. Later on it was felt desirable to consider the problem of training, education and research in matters concerning the well-being of industry and labour as a comprehensive whole and it was therefore recommended as part of the Second Five-Year Plan to set up a composite institute to be named as "Central Labour Institute".

The Institute comprises the following sections: (1) Industrial Safety, Health and Welfare Centre, (2) Industrial Hygiene Laboratory, (3) Productivity Centre, (4) Training-Within-Industry Centre, (5) Industrial Physiology Section, (6) Industrial Psychology Section, (7) Library-cum-Information Centre, (8) Training Centre, and (9) Industrial Medicine Section.

The Government of Maharashtra has made available free of cost an 18-acre plot of land near Sion in Bombay and the building for housing the Institute has been constructed at a cost of about Rs. 30 lakhs.

The following paragraphs briefly describe the functions of the various sections which comprise the Central Labour Institute:—

*Industrial Safety, Health and Welfare Centre:* This Centre has been planned on the lines of Industrial Health & Safety Centre of the Ministry of Labour and National Service U.K., located at Horseferry Road, London. The Centre has a good collection of exhibits on safety, health and welfare which explain and illustrate the dangers to life and limb and health incidental to industrial processes and educates employers, supervisors, foremen and workers in the application of the techniques of industrial safety and health and promoting welfare. During 1964 a number of groups of workers and management personnel from industry and training centres run by the Central Board of Workers' Education and other institutions visited the Centre. The parties were explained by demonstration and otherwise safety devices and other exhibits displayed. The Council of Industrial Safety, Bombay, has been conducting regular training courses on industrial safety at the Centre.

*Industrial Hygiene Laboratory (including Industrial Medicine):* This laboratory has been planned more or less on the lines of the Industrial Hygiene Laboratories in U.S.A. which function under the State Departments of Health or Labour for providing service to industry in promoting industrial health. The laboratory has already carried out a number of investigations on health and environmental problems. It has made available considerable amount of basic information on hazards associated with variety of industries and occupations. A number of technical reports have been published based on the studies and investigations carried out by the Laboratory.

*Productivity Centre:* The Centre was set up in Bombay in 1955 with the technical assistance from the I.L.O. with the object of creating among the general public, employers and workers attitude receptive to higher productivity and to further the application of modern industrial engineering techniques for raising productivity and workers' earnings and improving conditions of work. During the 10 years of its existence the Centre has conducted a number of productivity projects, advanced work study and other training courses and field investigations pertaining to specific problems in industry concerning layout and material handling, methods improvements, work load studies, wage administration, Operational Research etc. In the recent years, the emphasis has been mainly on conducting organisation training in which participants are selected for training because of the role they play in improving the productivity of the enterprise from various angles.

*Training-Within-Industry Centre:* The Centre was set up in Bombay in 1955 with the technical assistance from the I.L.O. It carries out training programmes for trainees in T.W.I. comprising

Job Instruction, Job Relations and Job Methods on a project basis. A large number of training officers have been trained in these projects. The Centre has also developed other types of training programmes for supervisory development including Discussion Leading, Programme Development, Union Job Relations, Human Problems at Work. The Centre also issues a quarterly T.W.I. "*Newsletter*".

*Industrial Physiology Section:* This section seeks to improve human comfort and efficiency by studying the influence of environmental factors such as climate, noise and illumination, and by design of tools, plant and equipment to suit human requirements and physiological limitations. A number of studies have been undertaken by this section since it was set up in 1961 and reports on some of them have also been issued.

*Industrial Psychology Section:* This section aims at discovering the best possible human conditions in occupational work whether they relate to the best choice of vocation, the selection of the most suitable workers, the most effective means of avoiding fatigue and boredom, the study and provision of most valuable incentives to work, the causes and remedies for irritation, discontent and unrest or the best methods of work and training. The section started functioning since 1962 and has to its credit a number of psychological studies including the Attitude Surveys in some large public and private enterprises.

*Library-cum-Information Centre:* The Centre provides facilities for study and research and at the same time supplies up-to-date and authentic information on problems concerning efficiency and well-being of industry and labour.

*Training Centre:* Besides the training programmes that are being conducted by the various sections of the Institute in their own field of specialisation, an important function of the Training Centre is to organise courses with the help of experts of outstanding merit drawn from outside.

*Regional Labour Institutes:* As part of a co-ordinated plan for education, research and training in problems concerning efficiency and well-being of industry and labour, and to meet the specific needs of the various regions which cannot be effectively served from one single centre, three Regional Labour Institutes have been set up at Calcutta, Mardas and Kanpur. (Regional Labour Institute, Lake Town, Calcutta-28; Regional Labour Institute, Guindy Road, Madras-20; Regional Labour Institute, Sarvodayanagar, Kanpur-2). These projects formed part of the Second Five-Year Plan and have been extended to the Third Five-Year Plan.

The Institutes are modelled on the pattern of the Central Labour Institute although on a smaller scale and consist of only the following four sections:

(1) Industrial Safety, Health and Welfare Centre; (2) Industrial Hygiene Laboratory; (3) Library-cum-Information Centre; (4) Training Centre.

The Training Centre is in fact the base of operation for all the training activities where the Institutes conduct training programmes with the assistance provided by the specialist staff of the Central Labour Institute.

## INDIA AND THE I.L.O.

India joined this organisation at the very start and since 1922 has been one of the ten countries of chief industrial importance and as such has been allotted a permanent seat on the Governing Body of the Organization. India also contributes liberally towards the finances of the Organisation. For 1965 India's contribution amounts to U.S. $5,43,715 which is 2·91 per cent of the total contribution of all member States, as against U.S. $ 4,85,108 for 1964 which is 2·96 per cent. of the total contribution of all member States. India's share in the appointments of the office is, however, somewhat inadequate.

At the headquarters in Geneva the number of Indian nationals employed in 1963 as Pl and above is 17. The entire staff of the Indian Branch in New Delhi is Indian.

India has been the venue of two Asian Regional Conferences, the first in 1947 and the fourth in 1957. Both these were presided over by India's Labour Ministers.

India has been receiving technical assistance from the I.L.O. in the spheres of manpower, vocational training, rural employment promotion, Productivity, and so on and experts from India have been recruited by the I.L.O. for assignments in other underdeveloped countries in such subjects as cooperation, cottage industries and employment information.

Whether in following international standards, or participating in the work of the International Labour Conference, Industrial Committees and Regional Conferences, and so on, India has been one of the keenest members of the I.L.O. Out of 122 Conventions adopted by the International Labour Conference, India has so far ratified 30 Conventions. She has in addition incorporated into her national legislation the essential features of many other Conventions.

The following is a list of Conventions ratified by India together with the dates of ratification within brackets:—

*1. No. 1 Hours of Work (Industry), 1919 (14-7-1921).
†2. No. 2 Unemployment, 1919 (14-7-1921).
3. No. 4 Night Work (Women), 1919 (14-7-1921).
4. No. 5 Minimum Age (Industry), 1919 (9-9-1955).
5. No. 6 Night Work of Young Persons (Industry), 1919 (14-7-1921).
6. No. 11 Right of Association (Agriculture). 1921 (11-5-1923).
7. No. 14 Weekly Rest (Industry), 1921 (11-5-1923).
8. No. 15 Minimim Age (Trimmers & Stokers), 1929 (10-12-1922).
9. No. 16 Medical Examination of Young Persons (Sea), 1921 (20-11-1922).
10. No. 18 Workmen's Compensation (Occupational Diseases), 1925 (30-9-1927).
11. No. 19 Equality of Treatment (Accident Compensation), 1925 (30-9-1927).
12. No. 21 Inspection of Emigrants, 1926 (14-1-1928).
13. No. 22 Seamen's Articles of Agreement, 1928 (31-10-1932).
14. No. 26 Minimum Wage-Fixing Machinery, 1928 (10-1-1955).
15. No. 27 Marking of Weight (Packages Transported by Vessels), 1929 (7-9-1931).
16. No. 29 Forced Labour, 1930 (30-11-1954).
17. No. 32 Protection Against Accidents (Dockers) (Revised), 1932 (10-2-1947).
†18. No. 41 Night work (Women) (Revised), 1934 (21-11-1935).

30. No. 118 Equality of Treatment (Social Security).

## BONUS COMMISSION

The Commission was appointed on Dec. 6, 1961. It comprised Mr. M. R. Meher (Chairman), Mr. S. R. Vasavada, Dr. B. N. Ganguli, Mr. N. Dandekar, Mr. M. Govinda Reddy, Mr. D. Sandilya, Mr. S. A. Dange and Mr. K. R. Wazkar (Secretary).

The Commission submitted its report to the Government in January 1964. According to the report, every worker should be guaranteed a minimum bonus of four per cent of his consolidated wage whether his employer makes a profit or not, or Rs. 40 whichever is higher, and a maximum limit of bonus at 20 per cent of the total annual earnings (basic and dearness allowance).

On March 3, 1964, the Labour Minister presented the report of the Commission to the Parliament.

### Modification

The Govt. of India has accepted the Bonus Commission's recommendations, subject to certain modifications relating to prior charges on gross profits before amounts available for distribution are computed. Such prior charges include direct taxes and fixed percentages of return on capital as well as provision for reserves.

The commission's formula is applicable also to public undertakings which compete with the private sector.

Existing agreements between managements and their employees providing for a larger amount of bonus will not be disturbed, but whenever a dispute arises, the commission's formula will prevail.

The modifications introduced by the Government are:

(1) In computing the "available surplus," all direct taxes for the time being in force will be deducted as prior charges. Tax concessions given to the industry to provide resources for development will also be accepted as prior charges. Steps are to be taken to ensure by law that the amounts involved in such concessions are used for the purposes for which they are given.

(2) The rate of return on capital to be allowed as a prior charge deductible before calculating available surpluses should be: (A) The actual rate payable on preference share capital, (B) eight per cent., taxable, on paid-up equity capital, and in the case of banks 7·5 per cent; and (C) six per cent. on reserves, in the case of banks five per cent.

(3) The Government considered it desirable that beyond a certain limit, bonus should be paid in the form of securities or investment, instead of in cash. This matter is to be discussed and decided by negotiations with the parties concerned, including labour organisations, and, if necessary, by tripartite discussions.

The President issued an ordinance embodying the Government's decision on the recommendations of the Bonus Commission on May 31, 1965.

The Bill was passed in the Lok Sabha and Rajya Sabha on Sept. 9, 1965 and Sept. 22, 1965 respectively.

The Payment of Bonus Act received the assent of the President on Sept. 25, 1965.

Subject to the maximum of 20 per cent which an employee is entitled by way of bonus, the Act protects the benefits which the employees got in the previous accounting year, as given in Section 34 of the Act. The Section reads as follows:

If in respect of any accounting year the total bonus payable to all the employees in any establishment under this Act is less than the total bonus paid or payable to all the employees in that establishment in respect of the base year under any award, agreement, settlement or contract of service, then, the employees in the establishment shall be paid bonus in respect of that accounting year as if the allocable surplus for that accounting year were an amount which bears the same ratio to the gross profits of the said accounting year as the total bonus paid or payable in respect of the base year bears to the gross profits of the base year.

* Conventions containing special provisions applicable to India.

† Ratification denounced.

# STATE BUDGETS (1965-66)

*Note :* Figures given here would differ from those in the budget papers as certain adjustments have been made to ensure uniformity in presentation.

*The classification of development and non-development expenditure has been done on the basis of broad budget heads.

(*a*) Includes expenditure on scientific and miscellaneous departments, labour and employment, aviation ports and pilotage and expenditure on road and water transport (excluding working expenses).

(*b*) Include appropriation for reduction and avoidance of debt.

(*c*) Comprises general administration, administration of justice, jails and convict settlements, police, etc.

(*d*) Covers expenditure on displaced persons, grants and other contributions to local bodies and private parties irrecoverable loans and advances, advanced for technical training, scholarships, etc.

(*e*) Includes pension, stationery and printing, extraordinary charges, expenditure connected with national emergency, etc.

# REFUGEES AND REHABILITATION

MIGRATION to India of members of the minority community in Pakistan which began in 1946 continued unabated till 1956.

In May 1956, a Ministers' conference between India and Pakistan was held in Dacca to discuss the problem of exodus of the minorities. As a result of this conference the influx of the migrants has been regulated. The steps taken by both the Governments (India & Pakistan) proved effective, by which the exodus of the refugees was brought down to manageable dimensions.

In November 1957, another conference of State Ministers of Rehabilitation was held under the chairmanship of the Union Minister for Rehabilitation. The recommendations of the conference were accepted by the Government of India and the implementation of the recommendations had the effect of further reducing the number of migrants from Pakistan to India after 1958. According to the decision the eligibility for relief and rehabilitation was suspended to those migrated after April 1, 1958.

Consequent upon the communal disturbances in East Pakistan in Jan. 1964, the Govt. of India has decided on humanitarian ground to ease the existing regulations and started giving relief and rehabilitation benefits to those migrated from East Pakistan, after Jan. 1, 1964.

The total number of migrants who came to India from East Pakistan from January 1964 to January 1965 was 8,94,137. Out of 6,09,999 migrants who came to West Bengal 2,04,382 had applied for rehabilitation benefits. They have been admitted in the camps. 1,20,000 migrants who came to Assam were also given admission in the camps.

Out of the new influx 2,61,899 came with migration certificates, 1,76,602 with Pakistani passports and Indian visas, while 4,55,636 persons came without any travel documents.

Displaced persons from West Pakistan 47·40 lakhs; from East Pakistan 50·11 lakhs; (including the latest migration of 1964-65); total 97·51 lakhs.

The table below shows particulars of the expenditure incurred till the end of 1964-65 on displaced personnel :—

(in crores of rupees)

| | Displaced persons from | |
|---|---|---|
| | West Pakistan | East Pakistan |
| Grants .. .. .. | 96·46 | 101·02 |
| Dandakaranya Scheme | .. | 29·62 |
| Loans .. .. .. | 26·49 | 44·78 |
| Housing .. .. | 64·65 | 45·15 |
| Establishment .. .. | 3·52 | 0·86 |
| Loans paid by Rehabilitation Finance Administration upto 31st December 1960 .. | 7·28 | 3·94 |
| Miscellaneous .. .. | 0·01 | 0·57 |
| TOTAL .. | 198·41 | 225·94 |

The total expenditure to the end of the financial year 1964-65 is expected to be Rs. 424·35 crores. This does not include expenditure on payment of compensation out of the compensation pool to displaced persons from West Pakistan nor the ex-gratia payments to migrants from the Pakistan held area of Jammu and Kashmir.

## DISPLACED PERSONS FROM E. PAKISTAN

As the problem of migration of the minority community in East Pakistan is assuming gigantic proportions, the Governments of Madhya Pradesh, Orissa, Maharashtra, Andhra Pradesh, Mysore, Bihar, Uttar Pradesh, Gujarat and Madras have been approached to accept a quota of migrants for resettlement in their States. In response to this request, the Governments of Maharashtra, Madhya Pradesh, Orissa, Andhra Pradesh, Bihar and Madras have already agreed to take 69,000 families as indicated below :—

Maharashtra 10,000 families; Madhya Pradesh 25,000 families; Orissa 30,000 families; Andhra Pradesh 2,000 families; Bihar 1,000 families; Madras 1,000 families.

The Governments of Uttar Pradesh, Mysore and Gujarat were also expected to co-operate in the matter of the rehabilitation of the new migrants.

### Relief Arrangements

To provide accommodation to the migrant families a number of transit/relief camps have been set up. In Feb. 1965, 85 such camps were functioning. Eight of these camps having a population of 80,390 persons (18,500 families) are run by the Central Govt. and the balance 77 camps with a population of 1,88,732 (44,628 families) are under the control of the State Governments concerned.

In West Bengal, reception centres/interception centres have been set up near the border at Banpur, Petrapole and Hasnabad. The migrants are received in the above centres. Those who seek relief and rehabilitation assistance from Government and who are willing to go outside West Bengal for settlement are given Relief Elegibility Certificates. Those who prefer to stay in West Bengal are not eligible for assistance from the centre. At the reception centres they are provided with meals and medical facilities and are taken by special trains to transit camps in other States. Each migrant is given a dry meal in addition to cash to meet the expenses for food and other purchases, before the commencement of the journey.

For those migrants who enter into Assam reception camps have been maintained at Dalu in the Garo Hills, Demagiri in Mizo, Karimgunj in Cachar, Dhubri and two camps at Sela and Balat (Khasi Hill District). From the reception camps migrants are taken to the main camps in various districts.

In Tripura the migrants are taken to the camps where they are provided cash doles and clothing etc. It was decided in the case of Tripura to take the migrants to the camps outside Tripura as there is little scope of rehabilitating new migrants there.

Scales of relief assistance admissible to the migrants in West Bengal prior to their movement to transit camps are given below.—Daily allowance : 50 paise per head in cash or kind ; clothing : a pair of dothi or sari to every adult man or woman, one pair shirt and shorts or pants and frock to every boy or girl, subject to a ceiling of Rs. 16 per adult and Rs. 8 per child, and a blanket (woollen) to an adult subject to a maximum of three per family. Utensils to each family : mug 1, mats 2, karai 1, plate 1, bucket 1, and glass 1.

*Cash doles :* The migrants are also provided with cash doles in advance before their departure to the camps with a view to saving them from hardship immediately on their arrival at their destination. The rate of cash dole for a month is as follows :—

Family with one member Rs. 30 ; family with two members Rs. 40 ; family with three Rs. 50 ; family with four Rs. 57; family with five Rs. 65 ; family with more than five members Rs. 70.

*Marriage Grant :* A marriage grant of Rs. 200 is given subject to certain terms and conditions.

### Rehabilitation

About 6,58,000 displaced families from East Pakistan have been given rehabilitation benefits in one form or another, excluding families settled down in Dandakaranya. The total amount so far sanctioned for relief and rehabilitation comes to over Rs. 202 crores for the displaced persons from East Pakistan. The residuary problem relating to rehabilitation of the old migrants from East Pakistan has been practically completed in all States except West Bengal. The estimated expenditure for the residuary work in West Bengal comes to about Rs. 22 crores, out of which schemes to the extent of Rs. 9·8 crores have been sanctioned.

Towards the end of 1963, the position regarding loans granted in the past to the displaced persons from East Pakistan was reviewed and orders were issued in May 1964, authorising remission of loans as follows :—

(1) Loans advanced to displaced persons from East Pakistan for their rehabilitation will be remitted upto the extent of Rs. 1,000 in each case ; (2) If after remission, there is any balance left, the amount in excess of Rs. 2,000 only will be remitted; (3) No interest will be charged on the amount remitted.

The above rules are not applicable to contributory house building loans, professional loans granted by the State Governments of Assam, Bihar, Orissa and West Bengal, Tripura Administration loans advanced on the recommendation of the Refugee Businessmen's Rehabilitation Board in West Bengal, loans advanced by the Rehabilitation Finance Administration, loans granted to displaced families in Dandakaranya, loans granted to displaced persons from East Pakistan after March 31, 1964, and loans given to persons migrated from East Pakistan after Dec. 31, 1963. Out of the outstanding loans of Rs. 80 crores, it is estimated, about Rs. 50 crores would have to be remitted under the above orders.

*Resettlement on land :*—Upto Jan. 31, 1965 offers of land have been received from the State Governments to the extent of 1,86,000 acres (exclusive of land offered for Dandakaranya by the Govt. of Madhya Pradesh and Orissa) for resettlement of the new migrants from East Pakistan. Statewise acreage of land offered is as follows :—

A. N. Islands 4,000 ; Andhra Pradesh 23,500 ; Assam 12,000 ; Madhya Pradesh 45,000 ; Maharashtra 75,000 ; NEFA 3,000 ; Uttar Pradesh 9,700 ; Bihar 12,400 ; Manipur 700 ; Tripura 350.

*Rehabilitation Reclamation Organisation :*—As large areas of land have to be reclaimed in Dandakaranya area as well as in various States for rehabilitation of new migrants, the Reclamation Organisation of the Dandakaranya Development Authority has been constituted into a separate office, known as Rehabilitation Reclamation Organisation under the Ministry of Rehabilitation with effect from Nov. 1, 1964. The organisation has at present (March 1965) under its control 12 fully mechanised units of tractors, each unit consisting of about 15 tractors and other ancillary equipment.

Two units are engaged in reclamation operations in Chanda District in Maharashtra State, two in Betul in Madhya Pradesh, one in Adilabad in Andhra Pradesh and six units are in Dandakaranya. In Chanda District 33,000 acres for settlement of about 5,500 families and in Betul (M.P.) about 20,000 acres for the settlement of 3,000 families, respectively are proposed to be reclaimed.

It is expected that during the year 1965 the total acreage of land reclaimed would be about 25,000 acres.

Total area of land available for resettlement of displaced persons in agriculture is 1,10,000 acres.

*Industries :*—Fourteen schemes of small-scale industries have been sanctioned upto 31st Jan. 1965, at a total estimated cost of Rs. 17·19 lakhs.

The details of these schemes are given below :—

| Name of Scheme | No. of families covered | Amount sanctioned |
|---|---|---|
| *Assam :* | | Rs. |
| Weaving schemes in camps .. .. .. .. .. | 540 | 3,26,000 |
| Jack Board Factory at Tinsukia .. .. .. .. | 50 | 15,000 |
| *Andhra :* | | |
| Training-cum-production centre in cotton weaving in Nagarjunasagar .. .. .. .. .. .. .. | 50 | 1,43,000 |
| *Orissa :* | | |
| Carpentry unit, saw mill and wood seasoning plant .. .. | 125 | 6,45,250 |
| Light Engineering Unit .. .. .. .. .. .. | 22 | 95,500 |
| Tile factory .. .. .. .. .. .. | 32 | 1,17,500 |
| Manufacture of wooden electrical accessories .. .. | 26 | 61,300 |
| Bidi Manufacturing Unit .. .. .. .. .. | 143 | 64,300 |
| Brick Kiln .. .. .. .. .. .. .. | 80 | 38,500 |
| Manufacture of Buckets .. .. .. .. .. .. | 38 | 1,00,500 |
| *Uttar Pradesh :* | | |
| Rehabilitation of Fisherman families .. .. .. .. | 40 | 1,11,460 |
| Total .. .. .. .. .. .. .. .. | 1,146 | 17,18,860 |

In addition to the schemes given above various other schemes for the setting up of small scale and agro industries are under consideration. These include a fishing scheme in Chanda District for 100 migrant families, a fishery scheme at Govind Sagar (Bhakra Dam) for 50 families, a fishery scheme in U.P. for 160 families and some small-scale industries in Orissa.

The Khadi and Village Industries Commission has agreed to set up village industries in M.P., Maharashtra and Assam, in the refugee camps and colonies. The village industries which the Commission proposes to set up at Mana near Raipur are soap making, fibre rope making, leather works etc. Schemes for setting up village and small industries in Chanda Dist. in Maharashtra are also under the consideration of the Commission.

In Nov. 1964, a team of officers visited Kandla-Gandhidam area and reported that there is scope for settlement of 2,500 migrants in non-agricultural occupations like small-scale and medium industries, dairy farming, poultry etc.

In the Dandakaranya area, an extensive programme of industrial development is under comtemplation.

**Rehabilitation Industries Corporation, Calcutta**

The Rehabilitation Industries Corporation was set up in April 1959, by the Ministry of Rehabilitation with the object of creating employment opportunities through industries for the displaced persons from East Pakistan.

Authorised Capital: Rs. 5,00,00,000; Paid-up Capital: Rs. 1,50,00,000. Govt. loan: Rs. 111 lakhs (on Jan. 31, 1965); Loan sanctioned to the industrialists: 1,06,07,000.

The Corporation has provided employment to 6,000 displaced persons from East Pakistan. It runs 23 industrial units, most of them in West Bengal and 2 industrial estates in Calcutta. A spinning mill consisting of 25,000 spindles in Dandakaranya at a cost of Rs. 2 crores is proposed to be established to provide employment to 1,000 migrants.

**Claims (upto March 1964)**

*Movable properties :* Work under the Indo-Pakistan Movable Property Agreement for restoration of personal and household effects, jewellery, firearms and buried treasure has been almost completed. Certain matters pertaining to payment of compensation for the properties of non-evacuee joint stock companies, transfer of lockers and safe deposits, and of jewellery in gold loan accounts are still pending settlement with the Government of Pakistan. The present position of pending items is as follows :—

In the matter of non-evacuee joint stock companies, there has been no further progress in payment of compensation for movable and immovable properties left in Pakistan by 17 such companies. The Government of Pakistan has also to pay compensation for the movable assets of 159 joint stock companies which have been treated by them as evacuee concerns. At the last meeting of the Implementation Committee in March 1963, Pakistan agreed that payment of compensation would be expedited but the matter has made no further headway.

Jewellery pertaining to 6 Gold Loan Accounts has not yet been released by Pakistan nor has the amount of Rs. 1·30 lakhs representing proceeds of jewellery sold in Pakistan been paid to India so far.

**Claims of Displaced Government servants :** So far the Government of Pakistan have settled 14,071 claims involving an amount of Rs. 62·80 lakhs (non-recurring) and Rs. 19·82 lakhs (recurring) per annum, leaving a balance of 10,328 claims still to be verified by them. Because of the slow pace of verification of these claims by the Government of Pakistan, the decision was taken in 1957 to give *ad hoc* relief to claimants on the basis of documentary or collateral evidence in their possession. A committee was appointed for this purpose which received 3,780 cases, of which 3,774 cases have been disposed off. Payment to the extent of Rs. 5·22 lakhs (non-recurring) and Rs. 1·44 lakhs (recurring) per annum have been made under the *ad hoc* payment scheme.

**Claims of contractors and other evacuee dues :** Up to December, 1964, the Government of Pakistan disposed of 7,710 claims of contractors involving an amount of Rs. 4·89 crores. The remaining 4,473 claims, involving a sum of Rs. 3·58 crores, have still to be verified by them.

The total number of claims by Indian nationals in these two categories was about 37,200. Of this, the Government of Pakistan have settled only about 22,000 claims.

**Central Claims Organisation :** The Central Claims Organisation registered 3,335 cases out of which 3,011 have been decided. The last date fixed for entertaining claims of this nature was Sept. 30, 1964.

**Transfer of Insurance Policies :** 524 claims in respect of insurance policies of displaced Government servants which were financed from Provident Funds were sent to the Government of Pakistan. 431 policies duly reassigned in favour of the insured persons have been received and delivered to the claimants, leaving 93 claims still pending with the Government of Pakistan.

**Court Deposits :** Under the Transfer of Evacuee Deposits Act, 1954, India has referred 1,973 claims of the value of Rs. 160·80 lakhs to the Govt. of Pakistan, out of which 669 claims of the value of Rs. 37·63 lakhs (claimed value Rs. 76·35 lakhs) have been admitted by Pakistan Government. They have rejected 795 claims of the value of Rs. 52·78 lakhs. 509 claims of the value of Rs. 31·67 lakhs are still pending with them.

So far 616 deposits of the value of Rs. 22·32 lakhs have been received from Pakistan, out of which 315 deposits of the value of Rs. 20·50 lakhs have been claimed. Out of the claimed deposits, 235 deposits of the value of Rs. 18·96 lakhs have been disposed off.

Apart from the above, there are 3,132 cash deposits of the value of Rs. 20·71 lakhs of displaced persons lying in Punjab (Pak) courts, and in courts in centrally administered areas of Pakistan for which actual deposits are not to be transferred by Pakistan, but adjustments are to be affected in interprovincial and central balance sheets. Of these, 564 deposits of the value of Rs. 14·14 lakhs have been claimed, and claims in respect of 282 deposits of the value of Rs. 5·94 lakhs have been disposed off.

To mitigate hardship caused to the displaced persons whose deposits had been verified, but not actually transferred from Pakistan, a scheme of *ad hoc* payment upto 25 per cent of the verified amount has been sanctioned. Under this scheme, payment to the extent of Rs. 3·85 lakhs to 155 claimants has been made.

## DANDAKARANYA SCHEME

**The Dandakaranya scheme, which was started in 1958 with the object of resettling displaced persons from East Pakistan and simultaneously developing the area, made good progress.** At the beginning of 1964, there were 7,603 families in the project area of which 733 families were in the transit camps. At the end of Dec. 1964 the number of families rose upto 10,452.

Nearly 40,000 persons were rehabilitated in Dandakaranya during the last working season, according to the latest project report (Sept. 1965). During this season, nearly 11,000 persons were moved to rehabilitation sites. 35 new villages were opened mainly in the Malkangiri and Paralkote zones. The total number of villages opened from the inception of the project is 180.

*Water Supply, Medical and Educational Facilities for Settlers :* To provide drinking water supply 629 tube wells, 125 masonry wells and 99 tanks have been dug. Nine primary health centres, three dispensaries, five mobile medical units and four hospitals have been established for giving medical aid to the settlers and also to the local tribal people. Malaria has been eradicated from the settlement. So far (March 1965), the number of patients treated by the above medical units and hospitals is 23,17,283 (10,705 indoor patients and 23,06,578 outdoor patients).

**One pre-primary school, 190 primary schools,** 5 middle schools and one high school have been opened. They have in all about 13,118 students. 39 primary schools, two middle schools and a high school were under construction at the end of Aug. 1965.

*Agricultural and Allied Activities :* The total number of agriculturist families settled in Dandakaranya area is 9,864.

Names of the zones and the area cultivated in acres respectively are: Umerkote (Mixed farm) 712·50; Umerkote Villages 14,917; Paralkote (Mixed farm) 560; Paralkote Villages 14,024; Malkangiri 11,489; Kondagaon 793.

Certain crop patterns were suggested to the agriculturists by the Project Administration. As a result of that they have brought out encouraging result by their shift from paddy cultivation to other hybrid maize, mesta and ragi cultivations. Among other schemes introduced in agriculture, substantial progress has been made in bunding, terracing and sinking homestead wells. So far 6,000 acres have been bunded and 1,000 wells have been dug. A loan of Rs. 150 per family is given for the homestead well. The quantum of loan for seeds and fertilizers has

been increased. The major irrigation schemes with commandable area and estimated cost respectively are :—Umerkote Dam 13,750 acres, Rs. 1 crore ; Malkangiri Dam 37,500 acres, Rs. 2·02 crores ; Paralkote Dam 39,000 acres, Rs. 1·78 crores ; Pakhanjore Dam 1,300 acres, Rs. 0·8 crore.

The work on the Umerkote Dam was expected to be completed by June 1965. The work relating to Malkangiri Dam is in progress. About Paralkote Dam, though the scheme has been technically approved by the Central Water & Power Commission, the question of giving administrative approval and financial sanction is under consideration. In the case of Pakhanjore Dam, the work has been completed and the canals are under construction.

### Tribal Schemes

The position of the tribal schemes being implemented by the State Governments of Orissa and Madhya Pradesh respectively with the assistance of the authority for Dandakaranya Scheme upto Dec. 31, 1964 is given below :—Land released after reclamation by the authority (acres) 13,248 — 5,066 ; Extent of land distributed (acres) 8,443 — 4,966 ; Number of families resettled 1,350 — 495 ; and number of houses constructed 926 — 343 ; Pairs of bullocks supplied 1,149 — 257.

*Expenditure :* The expenditure incurred by the Dandakaranya Development Authority since inception upto 31st Dec. 1964 is as follows :—Gross expenditure : Capital Outlay Rs. 26,65,16,468 ; 'P' Loans and advances Rs. 91,57,453 ; Less receipts and recoveries Rs. 3,73,80,281 ; Net expenditure Rs. 23,82,93,640.

### Payment of Compensation

Out of a total number of 5·05 lakh compensation and rehabilitation grant applications filed by displaced persons, 4·91 lakh applications have been disposed off, involving a payment of Rs. 184·93 crores upto Dec. 31, 1964. In addition statements of account issued in respect of 13,039 cases involving a further liability of about Rs. 1·51 crores await finalization by the claimants as on Dec. 31, 1964. Out of 4·28 lakh urban evacuee and Government-built properties in the Compensation Pool, only 9,000 remained to be disposed off at the end of 1964–65.

### Migrants from J. & K.

Of about 31,790 applications for rehabilitation assistance from migrants from the Pakistan occupied area of Jammu and Kashmir, payments including adjustment of public dues were made in about 12,962 cases upto Dec. 31, 1964 involving a sum of Rs. 2·79 crores.

### Rural Rehabilitation

4,77,000 displaced families were allotted evacuee agricultural land under the quasi-permanent scheme in the Punjab. The figure included 1,14,824 displaced mortgagees who were given possession of the land allotted in the name of the displaced mortgagees. Out of 3·62 lakh allottees, permanent rights have been conferred on 2·80 lakh allottees over an area of 20,08,646 std. acres upto Dec. 31, 1964. The number of houses transferred on permanent ownership to the allottees was 1,97,122.

58,000 displaced agriculturist families were settled outside the Punjab on 5·63 lakh acres of evacuee and Government owned lands. They were advanced loan totalling Rs. 4·64 crores for purchase of agricultural equipment, bullocks and seeds.

### Summary of Budget Allocation

A statement showing the budget estimate and revised estimate for 1964-65 and the budget estimate for 1965-66 is given below :—

(In thousands of Rs.)

| Heads | B.E. 1964–65 | R.E. 1964–65 | B.E. 1965–66 |
|---|---|---|---|
| Establishment (Secretariat and Pay & Account Offices) | 19,90 | 29,83 | 38,64 |
| Expenditure on Displaced Persons .. .. .. | 846,01 | 1,386,90 | 1,117,85 |
| Grants to States and Union Territories .. .. .. | 207,43 | 799,22 | 575,06 |
| Loans and Advances† .. .. .. .. .. | 269,00 | 283,90 | 475,43 |
| Dandakaranya Development Scheme .. .. .. | 505,00 | 475,00 | 571,86 |
| Rehabilitation Reclamation Scheme .. .. .. | .. | 30,00 | 256,18 |
| Special Areas Development Programme .. .. | .. | .. | 10,00 |
| Investment in Rehabilitation Corporation .. .. | .. | .. | 50,00 |
| Public Works‡ .. .. .. .. .. .. | 34,79 | 130,60 | 28,70 |
| Payment of Compensation & Rehabilitation Grants to D.P.S. from W. Pakistan .. .. .. .. | 150,30 | 155,30 | 125,20 |
| Payment to Migrants from Pakistan held areas of Jammu & Kashmir .. .. .. .. .. | 90,00 | 78,00 | 90,00 |
| Total .. .. .. .. .. .. .. | 2,122,54 | 3,368,75 | 3,338,92 |

† Provision made in the Demands for Grants of the Ministry of Finance.

‡ Provision made in the Demands for Grants of the Ministry of Works and Housing.

### Industrial Training Institute

*Industrial Centres :* Nine industrial centres have been set up for giving training to displaced persons and providing with off season employment to the agriculturists. These centres are now being remodelled with a view to specialisation in particular products and more centres are being opened to provide full-time employment to displaced persons. The centres are : Boregaon Industrial Centre, Jagdalpur Industrial Centre, Ambaguda Industrial Centre, Umarkote Industrial Centre, Murthama Weaving Centre, Govindpatn Industrial Centre, Malkangiri Industrial Centre, Paralkote Industrial Centre and Weaving Centre, Boregaon.

# BULLION

The following table gives details about the trend of silver production from 1959 to 1963 :—

(In millions of ounces)

| Countries | 1959 | 1960 | 1961 | 1962 | 1963 |
|---|---|---|---|---|---|
| United States of America .. .. .. .. .. .. .. .. .. | 23·0 | 36·8 | 34·9 | 36·3 | 37·0 |

| Total Consumption .. | 299·0 | 319·3 | 376·6 | 384·2 | 419·2 |

*Note :* The consumption estimates are by Handy and Harman.

During 1963, the price of silver reached a new ceiling beyond which it is not expected to go for a long time. The United States treasury holds a large stock of approximately 1,500,000,000 ounces of silver as backing for silver certificates, and the cost of silver obtained by redeeming these certificates is 129·3 cents an ounce for New York delivery. This establishes the basic maximum cost of silver to commercial uses.

The price of silver in New York during 1963 fluctuated within a range of 8·3 cents an ounce. This compared with a spread of over 20 cents an ounce in 1962 and about 13 cents an ounce in 1961.

## SILVER IN INTERNATIONAL MARKETS

According to the estimates made by Handy & Harman, consumption of silver outside the United States during 1963 amounted to about 197,500,000 ounces, virtually unchanged from the previous year. Silver used for industrial purposes declined slightly, but this decline was offset by an increase in consumption for coinage.

**London :**

Prices for prompt silver in London ranged from a low of 103⅞d on January 2 to a high of 111⅛d on October 21. These prices are equivalent to 121·343 cents and 130·3 cents respectively. Consumption of silver in the United Kingdom for industrial purposes remained at about 20,000,000 ounces unchanged since 1960. Total imports into the United Kingdom during the first eleven months of 1963 amounted to about 19,400,000 ounces. An estimated 13,800,000 ounces were received from Western Hemisphere countries and about 5,600,000 ounces from all other countries combined. Silver exported during the first eleven months of 1963 amounted to about 27,200,000 ounces. France was the largest overseas buyer taking 7,800,000 ounces. About 6,800,000 ounces were shipped to Italy ; 3,300,000 ounces to Switzerland ; and 3,000,000 ounces to West Germany. A total of 4,900,000 ounces went to other West European countries, and 1,400,000 ounces to miscellaneous countries of the world. Sales by the Bank of England during 1963 amounted to about 2,900,000 ounces, and approximately 2,300,000 ounces were recovered from demonetised British coin. Silver coinage executed by the Royal Mint for foreign governments is estimated to have required only about 100,000 ounces.

**West Germany :**

Silver consumption in West Germany for industrial purposes amounted to about 40,500,000 ounces a slight decline from the previous year. Domestic mine production of silver in Germany is small, and therefore nearly all of its requirements must be imported. Imports amounted to about 39,400,000 ounces, of which 17,000,000 ounces originated from Mexico ; 4,700,000 ounces from Peru ; 4,200,000 ounces from Belgium ; and 13,500,000 ounces from all other countries combined. West German silver exports in 1963 amounted to approximately 19,600,000 ounces, most of which was delivered to Italy, Belgium, Austria, Switzerland, and France. The West German Government bought approximately 1,600,000 ounces of silver for use in minting 5 Deutsche Mark coins.

**France :**

The French coinage programme, which began in 1959, continues to be important. The French Mint purchased an estimated 13,800,000 ounces of silver during 1963. It used 12,000,000 ounces for French coinage and 1,500,000 ounces for coinage orders received from foreign governments. Stocks on hand at the end of 1963 amounted to about 6,600,000 ounces, virtually unchanged from the end of 1962. It is estimated that the Mint will use about 10,000,000 ounces in 1964.

Industrial consumption in France was slightly higher in 1963 than in 1962 and is estimated at about 13,900,000 ounces. Imports totalled about 26,400,000 ounces, of which 8,700,000 ounces were received from the United Kingdom ; 7,600,000 ounces from the United States ; 2,300,000 ounces from West Germany ; and 7,800,000 ounces from various other countries; Exports to various destinations totalled about 2,900,000 ounces.

**Italy :**

The Italian coinage programmes for the minting of 500 Lire silver coins authorised in 1958 and 1961 declined in significance. According to our information only a small amount of silver was used for this purpose in 1963, probably not exceeding 500,000 ounces, and further silver coinage appears to be suspended for the time being. Handy and Harman have estimated that Italy used about 15,000,000 to 20,000,000 ounces for industrial purposes. Complete information on imports is lacking, but we understand that about 6,800,000 ounces were shipped from the United Kingdom ; 3,000,000 ounces from the United States, and various amounts from France, West Germany and other countries.

**Canada :**

We estimate that silver used for industrial purposes in Canada during 1963 amounted to about 4,400,000 ounces, which was a small decline from the previous year. The Royal Canadian Mint used about 13,400,000 ounces of silver for coinage in 1963, an increase of 23 per cent. over 1962, and purchased approximately 12,000,000 ounces. Presumably the difference came from stocks already on hand.

Canadian production again declined slightly and is estimated at 30,000,000 ounces, for 1963. A total of 18,400,000 ounces were exported to the United States, about 24 per cent. less than the previous year, and imports are estimated at 8,100,000 ounces, all of which came from the United States.

**Mexico :**

Production of silver in Mexico during 1963 amounted to about 43,000,000 ounces, an increase of about 1,700,000 ounces over 1962. Consumption for industrial uses declined slightly to approximately 3,200,000 ounces, and about 1,400,000 ounces were used in the minting of one-peso 10 per cent silver alloy coins. Exports for the year amounted to about 44,000,000 ounces, most of which was shipped to European countries. Demonetised coins withdrawn from circulation and purchased by the government produced about 2,700,000 ounces. If our estimates are correct, about 65,000,000 to 70,000,000 ounces of silver in such coins are still in the hands of the public.

**Japan :**

Consumption of silver for industrial uses in Japan is estimated at about 20,000,000 ounces, an increase of about 400,000 ounces over 1962. Japanese coinage consumed about 5,000,000 ounces, substantially more than the 1,400,000 ounces used in the previous year. Silver for coinage purposes came from government stocks which at the end of 1963 totalled about 32,000,000 ounces. Silver production is estimated at 14,900,000 ounces, a slight increase over 1962. Based on the information available to us it appears that imports into Japan in 1963 may have been somewhat lower than the 3,500,000 ounces received in 1962.

**India :**

The silver market in India continues to be an internal one, and it has virtually no influence on other world centres. In view of the shortage of foreign exchange it seems unlikely that import and export restrictions will be relaxed in the foreseeable future. Of interest was the fact that by government order all forward dealings in silver were suspended on January 9, 1963. This has further restricted the operations of the Bombay market.

Consumption of silver was higher and is estimated at about 2,500,000 ounces, an increase of about 1,000,000 ounces over 1962. With the recent ban on dealings in gold, silver appears to have provided a substitute for investors, and this may have accounted in part for the increased demand for manufactured silver articles. With a rapidly growing demand and depleted supplies, the price for prompt delivery increased from Rs. 210 per kilo on January 11, to Rs. 250·50, an all time high, at the close of the year. These prices are equivalent to about $1·37 an ounce and $1·64 an ounce respectively. A further rise in consumption in the coming year is expected, and even higher prices could result.

—(Reproduced from The Silver Market in 1963 by Handy and Harman).

The following table gives the average silver quotations in New York and London from 1955 to 1963 :

| | New York Average* | London Spot |
|---|---|---|
| | Cents | Pence |
| 1955 .. .. | 89·10 | 77·51 |
| 1956 .. .. | 90·83 | 79·13 |
| 1957 .. .. | 90·82 | 78·93 |
| 1958 .. .. | 89·04 | 76·21 |
| 1959 .. .. | 91·20 | 78·82 |
| 1960 .. .. | 91·38 | 79·38 |
| 1961 .. .. | 92·45 | 80·23 |
| 1962 .. .. | 108·52 | 91·51 |
| 1963 .. .. | 127·91 | 110·13 |

* The prices for and before 1961 are for silver in unrefined form.

## GOLD AND SILVER

The domestic output of gold, which had declined by 775 kgs. to 4,305 kgs. in 1963, increased to 4,603 kgs.* in 1964. Silver production also increased from 3,991 kgs. in 1963 to 4,734 kgs.* in 1964.

Trading in the Bombay bullion market was confined to spot as the ban on forward trading in both gold and silver continued during 1964-65. As the Central Government received reports that some persons were conducting forward trading in silver coins on a party-to-party basis, forward dealings in silver coins, which were no longer legal tender, were also banned from March 12, 1965 under Section 17 of the Forward Contracts (Regulation) Act 1952. Simultaneously, forward trading in non-transferable specific delivery contracts in silver coins was also banned.

But gold and silver ruled firm during the greater part of the year, silver in particular scaling an all time peak. The firmness in gold was attributed to the continued rise in the general price level, boom in commodity markets and persistent demand from goldsmiths and industrial users. Reports of seizures of sizeable quantity of contraband gold by the Customs authorities also imparted strength to the market. As a result, the price of gold moved up consistently upto end-August. There was a reaction during September, which was attributed to the steps taken by Government to unearth unaccounted money and also to reports of increased arrivals of the smuggled gold, with the close of monsoon. The price tended to move up again particularly since early December. The passage of the Gold Control Bill in the Lok Sabha towards the close of December, did not have any perceptible impact on the market. Reports of gold purchases for the purpose of conversion of unaccounted money into the new Gold Bonds issued in March 1965 further aided the sentiment.

The price of 14-carat gold, which ruled at Rs. 63·25 (per 10 grammes) at end-March 1964, moved up by stages to reach Rs. 72·75 by August 27, 1964. But subsequently, following the raids by the Enforcement Directorate in September prices slumped to a low of Rs. 64·50. The uptrend reasserted itself thereafter and the price of gold moved up further to Rs. 72 by February 15, 1965 reflecting a broadening of seasonal demand with the progress of marriage season. On March 31, 1965, it was quoted at Rs. 71·75, showing a net gain of Rs. 8·50 over the year.

Silver prices ruled buoyant for the greater part of the year and reached an all-time peak of Rs. 281·50. During the first two months and a half, silver was more or less easy, mainly on selling pressure in the face of larger arrivals, the price moving down from Rs. 260 (per kg.) at end-March 1964 to Rs. 244 on June 9. However, persistent demand for silver and the bullish trend on international silver markets tended to push up the price thereafter ; the price reached Rs. 261 by the first week of August. For the next two months, silver remained subdued on up-country offerings but since Diwali with the progress of the marriage season the trend was again upward and silver soared to an all time high of Rs. 281·50 by March 25, 1965. At end-March the price was quoted at Rs. 280·50 representing a sizeable rise of Rs. 20·50 over the year.

The average price of silver in India in 1964-65 was higher by Rs. 20·85 over 1963-64. The gap between the internal and external price of silver, which was around Rs. 70 (per kg.) at end-January 1964 when the last year's peak was touched, widened further. On March 25, 1965, when silver scaled a new peak of Rs. 281·50, the Indian price was higher by about Rs. 81 over the international price.

(a) Relates to the price of 14 carat gold.

*Note :* For a note on Gold Control, see 1964-65 Directory.

# FOREIGN EXCHANGE CONTROLS

The par value is Indian Rupees 4·76190=US$1. All transactions in foreign exchange must be conducted through authorized dealers, whose dealings with the general public must be effected as follows: in sterling, at rates fixed by the Foreign Exchange Dealers' Association; in other currencies, at rates based on the fixed rates for sterling and the London market rates for sterling against the other currency concerned. Authorised dealers are permitted to cover their requirements of foreign currencies in the London market, and to cover their permitted transactions in certain currencies against sterling, rupees, or any one of these currencies, either spot or forward for periods not exceeding six months, with authorised banks in any country outside the Bilateral Account group.

## ADMINISTRATION OF CONTROL

Exchange control is administered by the Reserve Bank of India, in accordance with the general policy laid down by the Indian Government in consultation with the Reserve Bank. Much of the routine work of exchange control is delegated to certain commercial banks, which act as authorised dealers permitted to buy and sell foreign exchange for specified purposes under regulations laid down by the Reserve Bank.

## PRESCRIPTION OF CURRENCY

India is a member of the Sterling Area, and has an exchange control system similar to that of the United Kingdom but adapted to suit local requirements. For prescription of currency purposes, countries are divided into three groups: Sterling Area countries, Bilateral Account countries, and the Convertible Account group (all other countries).

Payments to and from Sterling Area countries may be made in sterling or any Sterling Area currency, except Indian rupees, through the account of a resident of any Sterling Area country except India, or in Indian rupees through the account of a bank in any Sterling Area country except India. Payments to and from Bilateral Account countries must be settled in Indian rupees through the appropriate clearing account. Payments to countries in the Convertible Account group may be made in rupees or sterling to the credit of the account of a resident of any country in this group or in any listed currency. The currencies listed for this purpose are those of Austria, Belgian Monetary Area, Canada, Denmark and the Faroe Islands, Federal Republic of Germany, French Franc Area, French Somali Coast, Iraq, Italy, Japan, Netherlands Monetary Area, Norway, Panama, Philippines, Portuguese Monetary Area, Sweden, Switzerland and Liechtenstein, United Arab Republic, and United States and territories under U.S. sovereignty. Receipts from the Convertible Account group may be obtained in any listed currency, in rupees from the account of a bank in any country in this group, or in sterling from an External Account in the United Kingdom.

## NON-RESIDENT ACCOUNTS

The accounts of residents of Bhutan and Nepal are treated as resident accounts. Accounts related to all other foreign countries are treated as non-resident accounts. The treatment of these accounts distinguishes between those of banks and of others.

The accounts of banks are classified in three groups corresponding to the division of countries for prescription of currency purposes, *i.e.*, Sterling Area Accounts, Bilateral Accounts, and Convertible Accounts. These accounts may be credited with payments for imports, interest and dividends, and other authorised payments, with authorised transfers from the non-resident accounts of private firms or persons in the same country as the account holder, with proceeds of sales of the currency of the country or monetary area of the account holder, and with proceeds of sales of sterling from the appropriate non-resident sterling account in the United Kingdom. They may be debited for payments for exports, and for other payments not exceeding Rs. 20,000, to residents of India. These accounts may also be debited for remittances exceeding Rs. 20,000 made by Indian nationals resident in the Sterling Area for credit to their accounts in India or for payment to Indian nationals resident in India. Transfers may be made from Convertible Accounts to other Convertible Accounts or to Sterling Area Accounts, and between Sterling Area Accounts. All other entries on Sterling Area Accounts, Bilateral Accounts, and Convertible Accounts require the prior approval of the Reserve Bank.

Non-resident accounts of private individuals or firms may be credited, without prior approval, for payment of dividends and interest on securities and proceeds of small cheques up to certain limits. They may be debited for such items as payments for insurance premiums, income taxes, and remittances to relatives, subject to a limit of Rs. 1,000 for each transaction. All other credits and debits require the prior approval of the Reserve Bank. Transfers normally are not permitted from non-resident accounts of individuals or firms to non-resident accounts of banks belonging to the same country or monetary area, unless the amounts originally credited to such accounts could have been transferred abroad.

There are also blocked accounts, to which are credited capital proceeds that are due to non-residents and may not be remitted abroad. Balances on blocked accounts may be placed on fixed deposit or invested in approved Indian rupee securities; the income derived from such investments may normally be remitted to the owner's country, with the approval of the Reserve Bank.

Practically all imports require individual licences. Individual licences may be issued *ad hoc*, or on the basis of quotas allocated to established importers in accordance with their imports in a base period and to actual users on the basis of their current requirements. Licences may be used to import from any country except South Africa. At the beginning of each financial year an announcement on import control policy is made in the form of a Red Book, which gives in detail the policy for established importers and actual users. Licensing is in most cases on an annual basis, subject to the condition that only the first half of the annual licence can be used in the first six months of the licensing year and the second half of the licence will, subject to such change as may be decided upon, be endorsed for use in the second six months. In other cases, licences are issued for the first six months and a supplementary licence is issued later for the second six months. There are special procedures applicable to imports of capital goods, of heavy electrical plant, and of goods imported to fulfill government contracts and for irrigation projects. In licensing imports of a capital nature, their essentiality, their potential for earning or saving foreign exchange, and the availability of medium-term or long-term credits for financing such imports are taken into account.

Where a valid import licence is held, the required exchange is released by an authorised bank on presentation of the exchange control copy of the licence. Licence holders may make payments by opening letters of credit or by remitting against sight drafts. Advance remittances before shipping documents can be submitted are not normally allowed; but in special cases, *e.g.*, imports of machinery and capital goods, where deposits have to be made with overseas manufacturers, the Reserve Bank grants special authorisation for advance payment for a part of the value of the import.

## PAYMENTS FOR INVISIBLES

In general, payments abroad for invisibles require approval. Except for travel, insurance, and a few other items, foreign exchange is granted freely for such payments, especially for expenses incidental to trade transactions and transfers of recurring contractual obligations.

Premiums on insurance policies issued in foreign currency to residents may be paid in rupees or in the currency in which the policy is issued; but Indian residents are prohibited from taking out life insurance policies in foreign currencies.

There are no restrictions on the remittance of profits, dividends, and interest to non-resident beneficiaries, provided that all current tax and other liabilities in India have been cleared.

## EXPORTS AND EXPORT PROCEEDS

Export licensing is now not necessary in respect of most items. For items subject to export licence, the procedure varies according to the type of exporter, of which there are three categories: established shippers, newcomers, and producers (*e.g.*, manufacturers, mine owners, and growers). All applicants for export licences must submit income tax verification certificates. There are three open general licences, which permit exports of certain commodities without the need for an individual export licence. Exports of some commodities are subject to quota limitations and those of a few items are not normally permitted. Exports to South Africa are prohibited.

Exchange control is exercised over the proceeds of exports to countries other than Bhutan and Nepal. An exporter must declare that the full export proceeds will be received and dealt with in accordance with the prescription of currency regulations.

Foreign exchange holdings, including the proceeds of exports, in most currencies must be offered for sale against rupees to an authorised dealer, unless the holder has been authorised by the Reserve Bank to retain them, or in the case of sterling, he held a sterling account prior to July 8, 1947, or he is not domiciled in India and the funds do not represent the proceeds of an export.

## CAPITAL

The inward movement of capital is practically free, except when it is to form part of an investment requiring the prior approval of the Indian Government. Foreign investments once admitted are eligible for the same treatment as Indian enterprises receive. Repatriation of capital owned by persons residing in Sterling Area countries other than Pakistan, and by residents of Denmark, Norway, or Sweden, is authorised freely. Capital invested in approved projects after January 1, 1950 by residents of other countries, including capital appreciation on the original investment, may be repatriated at any time. The proceeds from liquidated foreign investments not eligible for repatriation are blocked (see section on Non-resident Accounts, above).

## TRAVEL & STUDIES

A comprehensive statement issued recently by the Exchange Control Department of the Reserve Bank of India prescribed the current policy for release of foreign exchange or issue of permits as under :

Applications for release of exchange for the following types of travel only are considered by the Bank.

1. Business travel specially for promotion of exports, if a personal visit is shown to be necessary.

2. Medical treatment, if a certificate in the prescribed form from the Surgeon-General or the Chief Administrative Medical Officer of the State in which the applicant is residing is produced to the Bank ;

3. Travelling salesmen when their visit is calculated to increase exports ;

4. Business/Technical/Scientific/Medical Conferences — Exchange for a small number of delegates is released for conferences, participation in which is approved.

5. Studies/Training in approved subjects.

(*a*) *Technical Courses :* Exchange is released for (*i*) Degree courses in technical subjects ; (*ii*) Diploma courses in technical subjects provided the student is a graduate or has secured not less than 50 per cent. marks in Matriculation, Higher Secondary, Intermediate or equivalent examination.

(*b*) *Non-Technical Courses :* Exchange is released for post-graduate degree courses in a limited number of subjects such as Economics, Political Science, Statistics, Industrial Management, Philosophy, Psychology, etc. at foreign universities as may be selected from time to time having regard to their international repute in respective fields, provided the student has secured either 60 per cent. marks in Bachelor's degree or 50 per cent. marks in Master's degree examinations.

(*c*) *Apprenticeship Training :* Exchange facilities for apprenticeship training in technical subjects will be granted subject to the following conditions :

(*i*) Provided the trainee has secured 50 per cent. marks in the Matriculation, Higher Secondary, Intermediate or equivalent examination.

(*ii*) The requirement of the minimum marks as in (*i*) above may be waived provided (1) the trainee is a graduate ; (2) he has secured a stipend from the institution/firm training him, in which case exchange up to 50 per cent. of the trainee's scale may be released ; (3) the trainee is sent abroad for training by his employers who are foreign controlled companies or the training is on the basis of any approved collaboration agreement between the employer and a foreign company.

Except in the following cases all passages for destinations outside India require the prior approval of the Reserve Bank :

(*i*) Where the traveller has been granted exchange by the Reserve Bank to undertake the journey.

(*ii*) Where the traveller is a foreign national temporarily resident in India.

(*iii*) Where a transit passenger or a foreign national temporarily resident in India holds open dated tickets (including return tickets).

(*iv*) Where persons are travelling as deck passengers from/to India to/from Burma, Ceylon, Malaysia, Singapore, Pakistan, Persian Gulf Ports, or East Africa.

(*v*) Where a traveller between India and Pakistan holds a restricted travel document issued by the High Commissioner for Pakistan in India or holds an India-Pakistan passport.

(*vi*) Where a person is travelling between Madras/Tiruchirapalli and Colombo (but not for travel from/to any other place in India/Ceylon).

In the following cases the Reserve Bank would consider approving application for booking of passages on a "no-exchange" basis :

(*i*) Where a person wishes to go abroad to meet his/her parents/children who are engaged in a gainful occupation abroad (not on a course of training) and are earning sufficient income to act as hosts to the invitees.

(*ii*) Where a person wishes to go abroad on invitation by other near relations, *viz.* father-in-law, mother-in-law, brother and sisters (including their children), uncles and aunts living abroad and evidence is produced to show that the host is engaged in a gainful occupation abroad (not on a course of training) and is financially in a position to meet all the expenses and has invited him/her to visit the foreign country ; PROVIDED either of the following two conditions is satisfied :

(*a*) The persons have not met each other for four years or (*b*) The relative living abroad is seriously ill and evidence to that effect is produced.

(*iii*) Where the applicant wishes to join her/his husband/wife or fiance/fiancee abroad — (*a*) is not on a short course of training, (*b*) is earning sufficient income abroad for the maintenance of both and (*c*) is not receiving any remittances from India.

(*iv*) Where a person has an invitation from a foreign Government and the entire expense of the stay abroad of the invitee will be thus met.

(*v*) Persons with Indian passports returning to their places of business after a visit to India on production of entry permits or other documentary evidence to show that they are employed or are in business in that country.

(*vi*) Persons proceeding abroad for taking up a definitely secured employment. In their cases limited exchange is released to defray the first month's expense subject to the condition that the amount is repatriated to India within one year.

(*vii*) *Emigration* : Exchange facilities are not granted to Indian nationals (including persons domiciled in India) wishing to emigrate except in the following cases to a limited extent :

(*a*) Persons who can establish that they had intended to emigrate and settle overseas and for this purpose they have either resigned their jobs in India or disposed of their property, house, etc. before the 1st of June 1962.

(*b*) Other members of the family such as husband/wife/sons/unmarried daughters/parents have preceded the emigrant before 1st June 1962 and the applicant had always intended to join them after his retirement.

As regards other emigrants, whose immigration has been permitted by a foreign country and evidence to that effect is produced, exchange will be released to the extent of any amount required by the regulation of the country of immigration for purposes of entry subject to its repatriation to India within one year.

## DEVELOPMENTS IN EXCHANGE CONTROL

The measures taken in the previous years for conserving foreign exchange were continued during the year and there were no major developments in the sphere of exchange control. However, a few changes, comprising mostly of modifications of existing arrangements, introduced during the year are referred to below :

All bank accounts in India of Chinese nationals who had left the country, irrespective of their whereabouts, were blocked with effect from May 15, 1964 and no operations on these accounts are now permitted without the prior approval of the Reserve Bank.

The policy followed for release of foreign exchange for travel abroad and for approval of passage clearance was reviewed by the Government on May 21, 1964 and a few changes were introduced. Under the revised policy (i) the scales for release of exchange for business travel, study tours and for attending conferences abroad were enhanced so as to meet the increased cost of living in most of the foreign countries and (ii) the limited exchange facilities for meeting incidental expenses were extended to persons going abroad against invitations with offer of full hospitality. The categories of persons eligible for passage clearance were revised to include (i) directors/executives of branches of foreign companies/wholly owned subsidiaries of foreign companies proceeding abroad for attending Board meetings against invitations from the companies concerned with offer of full hospitality, (ii) persons proceeding abroad for taking up definitely secured employment (initially for a period of three months) and (iii) students with scholarships from universities or recognised international institutions covering maintenance and fees. Students sponsored by their close relatives abroad (*i.e.* brother, sister or uncle) who have adequate and independent income to meet the needs of the beneficiary were also made eligible for passage clearance with effect from March 8, 1965. Except for meeting parents, sons and daughters, passage clearance is not granted against offer of private hospitality.

The ban on certain non-technical arts and science courses imposed earlier was lifted on July 13, 1964 and the condition regarding minimum qualifications prescribed for non-technical courses was relaxed and exchange was released to students for taking up Honours degree courses at certain universities/institutions in certain approved subjects provided they satisfied certain prescribed conditions.

Beginning with July 17, 1964, debits to private non-resident accounts with banks in India, without prior approval of the Reserve Bank, were restricted to Rs. 1,000 per week. Debits by way of payment of premia on life insurance policies of the account holder or his dependents as well as his income tax dues, however, were exempted from this ceiling.

The list of approved securities for investing funds in blocked accounts was amended to include from September 10, 1964, units issued by the Unit Trust of India, provided the units were held in safe custody with the authorised dealer and not disposed of without the prior approval of the Reserve Bank.

With a view to removing the inconvenience of restrictive endorsements regarding negotiability of travellers' cheques, the authorised dealers were advised on September 30, 1964 that travellers' cheques and travellers' letters of credit issued by them (with the exception of those issued for travel to countries with which India had entered into bilateral payment arrangements) should be made valid and negotiable all over the world.

Short-term borrowings, comprising loans and overdrafts, by authorised dealers from their branches and correspondents, which were hitherto made freely, were restricted upto a limit of Rs. 20 lakhs irrespective of whether the branches and correspondents were in or outside the sterling area. Similarly, a ceiling of Rs. 20 lakhs was placed on outstanding amounts in respect of short-term loans and overdrafts extended by the authorised dealers to these branches and correspondents in or outside the sterling area. Borrowings/lendings in excess of the ceiling limits were not to be made without the prior approval of the Reserve Bank. These measures were introduced on October 8, 1964 but were enforced from December 1, 1964.

With effect from October 21, 1964, exports of units of the Unit Trust of India and shares of rupee companies purchased by Indian nationals or persons of Indian origin permanently resident abroad out of their earnings from abroad were permitted freely in order to encourage investment by such persons.

The restrictions imposed in March 1964 (referred to in the last Report) on remittances by Iranian nationals to Iran were removed on November 2, 1964 and they were permitted to make private remittances on the same basis as in the case of other non-sterling area nationals.

With the termination of the special rupee payments arrangement between India and North Korea, the latter ceased to be a bilateral account country from December 18, 1964.

The special booklets introduced in April 1963 for use by foreign tourists for declaring their foreign currency notes and travellers' cheques were abolished and from January 1, 1965 they were required to declare in the currency declaration from the foreign currency notes (including special rupee notes issued for use in the Persian Gulf area) brought by them.

The follow-up arrangements in respect of realisation of exports were tightened on January 14, 1965 and it was decided that extensions beyond the prescribed period of six months would be granted for a period not exceeding three months at a time for a total period of six months. However, exports of capital goods and engineering goods as well as those under deferred credit arrangements still continued to have the benefit of reasonable extension beyond the usual period of six months. All authorised dealers were also advised on February 18, 1965 to vigorously pursue cases of outstanding export bills and to report to the Reserve Bank cases where satisfactory response was not forthcoming from the exporters concerned so that, where necessary, action could be taken against them under the Foreign Exchange Regulation Act.

Emigration facilities which were hitherto being granted on the basis of pre-June 1962 intentions were discontinued from March 4, 1965 and limited exchange facilities were granted to Anglo-Indians wishing to emigrate to the U.K. or any country irrespective of whether they held British or Indian passport. It was decided that British and other foreign nationals, who were treated as Indian domiciled, would be eligible for retirement facilities as foreign nationals temporarily resident in India when they desired to retire provided they were purely of foreign parentage and the entire family was leaving for permanent settlement abroad.

With a view to strengthening the enforcement machinery and plugging certain loopholes in the Foreign Exchange Regulation Act, the Act was amended and the new Act known as the Foreign Exchange Regulation (Amendment) Act, 1964 came into force with effect from April 1, 1965. The amending Act requires, among other things (1) obtaining a licence from the Reserve Bank by steamer and air line companies operating through India, and travel agents, for conducting the business of booking passages for travel abroad and (2) prior approval of the Union Government/the Reserve Bank of India (*a*) for appointment of foreign controlled companies and firms operating in India as agent/technical adviser/-management adviser of any persons/firms/company in India, (*b*) for issue of guarantee by a resident in favour of a non-resident and (*c*) for settlement of property in favour of a non-resident. The Act provides for delegation of powers of the Director of Enforcement to any officers of the Enforcement Directorate and to such officers of the Customs, Central Excise, Police and other departments as the Central Government may authorise. Officers of the Enforcement Directorate are empowered to arrest/search/summon and examine/interrogate persons and to search premises/conveyances. Lastly, Government is also empowered to publish the names of persons convicted under the Act.

# NATIONAL INCOME

ACCORDING to preliminary estimates, national income of India (at 1948-49 prices) for the year 1963-64 showed a rise of 4·5 per cent over the previous year. At constant (1948-49) prices, the preliminary estimate of national income, that is, net national output at factor cost, for 1963-64 is placed at Rs. 13,910 crores, compared with Rs. 13,310 crores (revised) for 1962-63. In 1961-62, national income had risen by 2·6 per cent as compared to a rise of 7·3 per cent in 1960-61. At constant prices, the national income rose by about 57 per cent between 1950-51 and 1963-64.

The *per capita* national income (at constant prices) recorded a rise of 2·2 per cent from Rs. 293·4 in 1962-63 to Rs. 299·8 in 1963-64.

At current prices, the national income rose from Rs. 15,400 crores in 1962-63 to Rs. 17,200 in 1963-64, a rise of Rs. 1,800 crores. This increase was brought about largely by the agricultural sector, accounting for Rs. 1,100 crores. In the non-agricultural sector, mining, manufacturing and small enterprises showed a rise of Rs. 310 crores; other services (comprising professions, Government services, domestic services and house property) of Rs. 260 crores, and commerce, transport and communication of Rs. 140 crores —an aggregate rise of Rs. 710 crores.

*Per capita* income at current prices rose from Rs. 339·4 in 1962-63 to Rs. 370·7 in 1963-64 the rise being due almost entirely to the rise in price.

The Table below indicates the trend of national income at 1948-49 prices, since 1950-51:

| Year | National Income at 1948-49 prices | | *Per capita* National Income at 1948-49 prices | |
|---|---|---|---|---|
| | (Rs. abja)* | Percentage rise over previous year | (Rs.) | Percentage rise over previous year |
| 1950-51 | 88·5 | 0·3 | 247·5 | — 1·2 |
| *First Plan* | | | | |
| 1951-52 | 91·0 | 2·8 | 250·3 | 1·1 |
| 1952-53 | 94·6 | 4·0 | 255·7 | 2·2 |
| 1953-54 | 100·3 | 6·0 | 266·2 | 4·1 |
| 1954-55 | 102·8 | 2·5 | 267·8 | 0·6 |
| 1955-56 | 104·8 | 1·9 | 267·8 | Nil |
| *Second Plan* | | | | |
| 1956-57 | 110·0 | 5·0 | 275·6 | 2·9 |
| 1957-58 | 108·9 | — 1·0 | 267·3 | — 3·0 |
| 1958-59 | 116·5 | 7·0 | 280·1 | 4·8 |
| 1959-60 | 118·6 | 1·8 | 279·2 | — 0·3 |
| 1960-61 | 127·3 | 7·3 | 293·2 | 5·0 |
| *Third Plan* | | | | |
| 1961-62 | 130·6 | 2·6 | 294·3 | 0·4 |
| 1962-63 | 133·1 | 1·9 | 293·4 | — 0·3 |
| 1963-64 | 139·1 | 4·5 | 299·8 | 2·2 |

* abja = 100 crores = $10^9$

During the First Plan period, in real terms the national income rose by 18·4 per cent as against the original Plan target of 11 per cent. The corresponding rise in the *per capita* income was 8·2 per cent. During the Second Plan period in real terms, the national income increased by 21·5 per cent as against the original Plan target of 25 per cent. The corresponding rise in *per capita* income was 9·5 per cent. During the Third Plan, the increase in national income in real terms was 2·6 per cent in 1961-62, 1·9 per cent in 1962-63 and 4·5 per cent in 1963-64 as against the average annual target of 5 to 6 per cent.

## STRUCTURE OF NATIONAL INCOME

The following Table indicates the structure of national income by industrial origin during the years 1950-51 and 1963-64:

| | 1963-64 | | 1950-51 | |
|---|---|---|---|---|
| | Rs. Abja | Percentage to total | Rs. Abja | Percentage to total |
| | (1) | (2) | (3) | (4) |
| AGRICULTURE | | | | |
| 1. Agriculture, animal husbandry & ancillary activities | 78·7 | 45·8 | 47·8 | 50·2 |
| 2. Forestry | 1·4 | 0·8 | 0·7 | 0·7 |
| 3. Fishery | 0·9 | 0·5 | 0·4 | 0·4 |
| 4. *Total of agriculture* | 81·0 | 47·1 | 48·9 | 51·3 |
| MINING, MANUFACTURING AND SMALL ENTERPRISES | | | | |
| 5. Mining | 2·2 | 1·3 | 0·7 | 0·7 |
| 6. Factory establishments | 19·1 | 11·1 | 5·5 | 5·8 |
| 7. Small enterprises | 12·6 | 7·3 | 9·1 | 9·6 |
| 8. *Total mining, manufacturing and small enterprises* | 33·9 | 19·7 | 15·3 | 16·1 |
| COMMERCE, TRANSPORT & COMMUNICATIONS | | | | |
| 9. Communications (post, telegraph and telephone) | 0·9 | 0·5 | 0·4 | 0·4 |
| 10. Railways | 4·9 | 2·9 | 1·8 | 1·9 |
| 11. Organised banking and insurance | 2·3 | 1·3 | 0·7 | 0·7 |
| 12. Other commerce and transport | 19·8 | 11·5 | 14·0 | 14·7 |
| 13. *Total of commerce, transport and communications* | 27·9 | 16·2 | 16·9 | 17·7 |
| OTHER SERVICES | | | | |
| 14. Professions and liberal arts | 9·0 | 5·2 | 4·7 | 4·9 |
| 15. Government services (administration) | 13·0 | 7·6 | 4·3 | 4·5 |
| 16. Domestic service | 2·4 | 1·4 | 1·3 | 1·4 |
| 17. House property | 5·7 | 3·3 | 4·1 | 4·3 |
| 18. *Total of other services* | 30·1 | 17·5 | 14·4 | 15·1 |
| 19. *Net domestic product at factor cost* | 172·9 | 100·5 | 95·5 | 100·2 |
| 20 *Net earned income from abroad* | — 0·9 | — 0·5 | — 0·2 | — 0·2 |
| 21. *NET NATIONAL OUTPUT AT FACTOR COST = NATIONAL INCOME* | 172·0 | 100·0 | 95·3 | 100·0 |

According to the quick estimates of national income for 1964-65 recently released by the Central Statistical Organisation, the national income in India in real terms is estimated to have recorded a rise of 7·3 per cent as against 4·5 per cent in 1963-64.

The C.S.O. quick estimates are based on partial data. Of the overall rise, about 3·7 per cent is contributed by the agriculture sector of the economy.

The growth of the economy during 1964-65 is the highest in the first four years of the Third Plan and is almost the same as that of 1960-61, which was the highest since 1948-49.

On the basis of the C.S.O. estimate, the average annual increase in national income during the first four years of the Plan was 4·1 per cent and during this period the average annual increase was 2·3 per cent in agriculture 7·4 per cent in mining and factory establishments, 4·5 per cent in transport and communications, and at 6 per cent in the remaining sectors.

The growth of per capita income in real terms is estimated in the C.S.O. study at 4·9 per cent for 1964-65. The average annual increase during the first four years of the Third Plan is of the order of 1·8 per cent, according to the C.S.O. estimates.

The contributions of individual sectors to overall percentage change in real income during 1964-65 is shown in the Table below:

| Sector | Percentage contribution to total national income in 1963-64 | Percentage 1964-65 over 1963-64 | Contribution to the overall percentage change in 1964-65 over 1963-64 |
|---|---|---|---|
| Agriculture (proper) | 35·9 | 10·2 | 3·7 |
| Mining and factory establishments | 10·5 | 5·9 | 0·6 |
| Communications | 0·6 | 13·0 | 0·1 |
| Railways | 2·7 | 2·9 | 0·1 |
| Organised banking and insurance | 1·2 | 7·4 | 0·1 |
| Other commerce and transport | 15·4 | 5·9 | 0·9 |
| Others | 33·7 | 5·6 | 1·9 |
| All sectors | 100·0 | 7·3 | 7·3 |

## INDEX NUMBERS

The index numbers of national and *per capita* incomes, both at current and constant prices, are given below (Base: 1948-49 = 100):

| | Net national output | | Per capita net output | |
|---|---|---|---|---|
| | At current prices | At 1948-49 prices | At current prices | At 1948-49 prices |
| 1950-51 | 110·2 | 102·3 | 106·8 | 99·2 |
| *First Plan* | | | | |
| 1951-52 | 115·3 | 105·2 | 109·9 | 100·3 |
| 1952-53 | 113·5 | 109·4 | 106·3 | 102·4 |
| 1953-54 | 121·2 | 116·0 | 111·4 | 106·7 |
| 1954-55 | 111·1 | 118·8 | 100·3 | 107·3 |
| 1955-56 | 115·4 | 121·2 | 102·2 | 107·3 |
| *Second Plan* | | | | |
| 1956-57 | 130·8 | 127·2 | 113·5 | 110·4 |
| 1957-58 | 131·7 | 125·9 | 112·3 | 107·1 |
| 1958-59 | 145·7 | 134·7 | 121·4 | 112·2 |
| 1959-60 | 149·7 | 137·1 | 122·1 | 111·9 |
| 1960-61 | 163·5 | 147·2 | 130·5 | 117·5 |
| *Third Plan* | | | | |
| 1961-62 | 171·1 | 151·0 | 133·7 | 117·9 |
| 1962-63 | 178·0 | 153·9 | 136·0 | 117·6 |
| 1963-64 (Preliminary) | 198·8 | 160·8 | 148·5 | 120·1 |

## CHANGES SINCE 1950-51

Changes in the contributions of various sectors and sub-sectors of the economy to the total national income (at current prices) are depicted in the table below :

(Rs. Abjas)

| | 1950-51 | 1955-56 | 1960-61 | 1961-62 | 1962-63 | 1963-64 (Provisional) |
|---|---|---|---|---|---|---|
| AGRICULTURE | | | | | | |
| 1. Agriculture, animal husbandry and ancillary activities | 47·8 | 43·9 | 66·8 | 67·7 | 67·9 | 78·7 |
| 2. Forestry | 0·7 | 0·7 | 1·1 | 1·2 | 1·3 | 1·4 |
| 3. Fishery | 0·4 | 0·6 | 1·0 | 0·7 | 0·8 | 0·9 |
| 4. *Total of agriculture* | 48·9 | 45·2 | 68·9 | 69·6 | 70·0 | 81·0 |
| MINING, MANUFACTURING AND SMALL ENTERPRISES | | | | | | |
| 5. Mining | 0·7 | 1·0 | 1·6 | 1·7 | 1·9 | 2·2 |
| 6. Factory establishments | 5·5 | 7·8 | 13·2 | 15·4 | 16·8 | 19·1 |
| 7. Small enterprises | 9·1 | 9·7 | 11·2 | 11·7 | 12·1 | 12·6 |
| 8. *Total of mining, manufacturing and small enterprises* | 15·3 | 18 5 | 26·0 | 28·8 | 30·8 | 33·9 |
| COMMERCE, TRANSPORT & COMMUNICATIONS | | | | | | |
| 9. Communications (post, telegraph and telephone) | 0·4 | 0·5 | 0·6 | 0·7 | 0·8 | 0·9 |
| 10. Railways | 1·8 | 2·5 | 3·6 | 3·8 | 4·6 | 4·9 |
| 11. Organised banking and insurance | 0·7 | 0·9 | 1·6 | 1·9 | 2·1 | 2·3 |
| 12. Other commerce and transport | 14·0 | 14·9 | 17·6 | 18·4 | 19·0 | 19·8 |
| 13. *Total of commerce, transport and communications* | 16·9 | 18·8 | 23·4 | 24·8 | 26·5 | 27·9 |

| 18. *Total of other services* | 14·4 | 17·3 | 23·6 | 25·5 | 27·5 | 30·1 |
| 19. *Net domestic product* | 95·5 | 99·8 | 141·9 | 148·7 | 154·8 | 172·9 |
| 20. Net earned income from abroad | − 0·2 | 0·0 | − 0·5 | − 0·7 | − 0·8 | − 0·9 |
| 21. *NET NATIONAL OUTPUT AT FACTOR COST = NATIONAL INCOME* | 95·3 | 99·8 | 141·4 | 148·0 | 154·0 | 172·0 |

## ROLE OF THE GOVERNMENT

The share of the public authorities (Central, State and local authorities) in the income and expenditure in the economy has been rising in recent years. Nevertheless, its share in both is comparatively small, when compared to either the advanced countries or some of the under-developed countries.

| | 1955-56 | | 1960-61 | | 1961-62 | | 1962-63 | |
|---|---|---|---|---|---|---|---|---|
| | Rs. Abjas | Per cent | Rs. Abjas | Per cent | Rs. Abjas | Per cent | Rs. Abjas | Per cent |

## INCOME DISTRIBUTION COMMITTEE

The Planning Commission has constituted a Committee on Income Distribution and Levels of Living. The Committee's terms of reference are : To review changes in levels of living during the First and Second Five Year Plans ; To study recent trends in the distribution of income and wealth and in particular, to ascertain the extent to which the operation of the economic system has resulted in concentration of wealth and means of production.

The Committee consists of :

Professor P. C. Mahalanobis (Honorary Statistical Adviser to the Government of India), Dr. V. K. R. V. Rao (Director, Institute of Economic Growth, Delhi), Dr. P. S. Lokanathan (Director-General, National Council of Applied Economic Research), Dr B. N. Ganguli (Director, Delhi School of Economics), Vishnu Sahay (Member, Planning Commission), D. L. Mazumdar (Secretary, Department of Company Law Administration), Dr B. K. Madan (Dy. Governer, Reserve Bank of India) and B. N. Datar (Adviser, Ministry of Labour and Employment), P. C. Mathew (Member-Secretary, Fourth Finance Commission) and Dr. K. R. Nair (Director, Central Statistical Organisation) (Member-Secretary).

The Committee's enquiry is being conducted at the expert level, its primary object being to ascertain such statistical and economic data as may be gathered at present, to identify the gaps in the existing information and to suggest steps for removing these deficiencies in the future. Part I of the Committee's report has already been published and Part II is expected to be published shortly.

# BANKING

## SEASONAL BANKING TRENDS*

In the 1964 slack season, covering broadly the first half of the year, scheduled bank credit contracted by Rs. 139 crores, or by 37 per cent of the record expansion of Rs. 376 crores in the preceding busy season. In comparison, the contraction of Rs. 121 crores in 1963 slack season worked out at 60 per cent of the 1962-63 busy season expansion. Seasonal advances declined in May-October 1964 by Rs. 194 crores, nearly the amount of expansion in the 1963-64 busy season. Advances against almost all the major commodity groups in respect of which the busy seasonal expansion was significant recorded declines. Non-seasonal advances, however, expanded very sharply by Rs. 54 crores, or by six times the expansion in the 1963 slack season. Manufactures and minerals (excluding sugar and gur) rose by Rs. 46 crores as compared to Rs. 26 crores in the 1963 slack season and Rs. 78 crores in the 1963-64 busy season. Unsecured advances increased by Rs. 12 crores as compared to Rs. 31 crores in the 1963 slack season and Rs. 23 crores in the 1963–64 busy season. The smaller increase in unsecured advances may be attributed to the Governor's request to banks in March 1964 to review their portfolios of such advances and bring down their level.

While the credit contraction in the 1964 slack season was smaller in relation to the preceding busy season expansion, the growth in deposits at Rs. 211 crores was substantial; during the 1963 slack season, the accretion to deposits had amounted to Rs. 148 crores. The large deposit accretion enabled banks to reduce their credit-deposits ratio from 79·5 per cent at the end of April 1964 to 67·4 per cent at the end of October, 1964 as compared to the fall from 76·1 per cent to 65·7 per cent in the 1963 slack season. The corollary to the sizeable growth in deposits and the credit contraction was a rise in investment portfolio of banks. The raising of the minimum liquidity ratio under the Banking Companies Act, 1949 from 20 to 28 per cent with effect from September 16, 1964 also obliged some of the larger banks to add to their investments in Government and other approved securities. As a result the investments — deposits ratio rose from 26·5 per cent to 34·5 per cent over the 1964 slack season. The banks also reduced their borrowings from the Reserve Bank by Rs. 43·3 crores to Rs. 1·7 crores at the end of October, 1964.

Reflecting the comfortable resources position of the banking system, the money market ruled generally easy. The inter-bank call rate slipped to 1 per cent in Bombay and 1·7 per cent in Calcutta at the end of the slack season, as compared to 1·9 per cent and 1·5 per cent respectively, at the end of the 1963 slack season.

On the eve of the 1964-65 busy season, there was a further tightening of the credit policy on September 25, 1964. The Bank Rate was raised by ½ per cent to 5 per cent and the quota-cum-slab rate system of the Reserve Bank accommodation to scheduled banks was replaced by a system of lending under which the rate charged by the Reserve Bank was related to the borrowing bank's net liquidity position. On February 17, 1965, the Bank Rate was further raised by a full one per cent to 6 per cent and the cost of borrowing from the Reserve Bank was put up still further. Yet the seasonal credit expansion in the 1964-65 busy season, at Rs. 407 crores, was Rs. 31 crores higher than the expansion in the 1963-64 busy season. It may, however, be added that the pace of expansion was slower till the end of March, 1965, when the seasonal rise amounted to Rs. 329 crores, as compared to that of Rs. 348 crores in the corresponding period of the 1963-64 busy season. The expansion in seasonal advances in the 1964–65 busy season at Rs. 235 crores was larger by Rs. 34 crores than that in the 1963-64 busy season. In terms of percentages, seasonal advances accounted for 64 per cent of the overall expansion as against 57 per cent during the previous busy season. The commodities, advances against the security of which accounted for the major part of the increased expansion, were sugar (Rs. 26 crores), raw cotton (Rs. 3 crores) and other oilseeds (Rs. 4 crores). Non-seasonal advances expanded by Rs. 17 crores less than in the 1963–64 busy season. The rise in advances against cotton textiles and iron and steel was higher than the expansion in the previous busy season by Rs. 8 crores and Rs. 7 crores, respectively; but this was more than offset by a much smaller expansion in advances against the security of other non-seasonal commodities. Unsecured advances also showed a smaller expansion than in the previous busy season.

The growth in scheduled banks' deposits during the 1964–65 busy season amounted to Rs. 107 crores or Rs. 22 crores more than in the 1963–64. busy season. But along with extending larger credit, banks also added to their cash balances to the tune of Rs. 13 crores. They, therefore, had to liquidate their investments in Government securities by Rs. 154 crores, and borrow substantially larger amounts from the Reserve Bank, the outstanding touching the peak of Rs. 163 crores on April 2, 1965 (as on May 7, 1965 the outstanding level was still higher at Rs. 164 crores) as against that of Rs. 107 crores recorded on March 6, 1964. Money market turned tight gradually over the season. The inter-bank call rate which stood at 1 per cent and 1·7 per cent in Bombay and Calcutta, respectively, at the end of the 1964 slack season, firmed up to 8·5 per cent during the week ended April 9, 1965; the rate was 6·5 per cent in Bombay and 6·6 per cent in Calcutta during the first week of April 1964.

## OVERALL BANKING TRENDS

On a financial year basis, the expansion in bank credit was lower in 1964–65 than in 1963–64, while the growth in deposits was somewhat larger, whereas both bank deposits and credit rose by larger amounts in 1963–64 than in 1962–63. Bank credit expanded by Rs. 218·2 crores or 12·0 per cent in 1964–65, the comparable figures for 1963-64 being Rs. 228·5 crores or 14·4 per cent. Aggregate deposits of scheduled banks increased by Rs. 298 crores or by 13·0 per cent during 1964–65 as against Rs. 243 crores or by 11·9 per cent during 1963–64. The growth in demand deposits was lower at Rs. 168 crores as compared to Rs. 204 crores in 1963–64, while the growth in time deposits was substantially higher at Rs. 130 crores as compared to Rs. 39 crores. On the other hand, banks added to their investments to a substantially larger extent mainly to fulfil the higher liquidity requirements under Section 24 of the Banking Companies Act, which came into force on September 16, 1964. Banks increased their holdings of Government securities by Rs. 79 crores as compared to Rs. 47 crores in 1963–64. Other investments and miscellaneous assets also recorded a significant rise. In the result, the banks resorted to the Reserve Bank accommodation to a much larger extent; borrowings from the Bank increased by more than five times the increase in 1963–64.

* Figures based on returns submitted under section 42 of the Reserve Bank of India Act and the Fortnightly Survey of Advances.

## CREDIT POLICY

Against the background of renewed inflationary pressures and a marked deterioration in the foreign exchange position, a major revision in the Reserve Bank's credit policy was effected during the year under review. Along with the intensification of selective credit controls, greater emphasis was laid on the regulation of cost of Reserve Bank accommodation to scheduled banks. Increasing use was also made of the mechanism of interest rates so as to promote savings in the economy and to induce a more economic turnover of funds by the banking system.

Following the inadequate contraction of credit and the continuance of the upward trend in prices, it appeared by the middle of September 1964 that the ensuing busy season would experience a significant expansion in bank credit. On September 25, 1964 therefore, the Reserve Bank raised the Bank rate from 4·5 per cent to 5 per cent and changed the system of interest rates in substitution of the quota-cum-slab rate system. Under the new system, the rate charged on the borrowings of a scheduled bank varied with its net liquidity position defined as a ratio of net liquid assets to aggregate demand and time liabilities (Net liquid assets were defined on September 25, 1964 as the total of a bank's cash balances with the Reserve Bank balances in curreet account with other banks and investments in Government securities LESS its total borrowings from the Reserve Bank and the State Bank. This definition was amended on December 4 thus: total of cash and balances with the Reserve Bank, current account balances with other banks and investments in Government and other approved securities LESS the borrowings from the Reserve Bank, the State Bank and the Industrial Development Bank of India). Borrowings by a bank with a net liquidity ratio equal to or more than 28 per cent were charged at the Bank rate and for every percentage point decline in the net liquidity ratio below 28 per cent the rate on the ENTIRE amount of borrowings rose by ½ per cent. Two additional measures were adopted to reinforce the new policy. One was the placing of a ceiling of 9 per cent which foreign banks and larger Indian banks with aggregate demand and time liabilities of Rs. 50 crores and above could charge on their advances/overdrafts/discounts, so that these banks did not expand credit by borrowing from the Bank even at progressively higher rates. The other was the regulation of the inflow of banking funds from abroad which added to the borrowing bank's liquid resources offsetting the Reserve Bank's restrictive credit policy. A limit of Rs. 20 lakhs was placed on the amount a banking company could borrow from abroad without prior approval from the Reserve Bank. Borrowings in excess of this limit could be secured only with the prior approval of the Bank to be given on the merits of each case but generally only when the borrowing was for a period of not less than 30 days. At the same time, with a view to widening the spread between very short-term and longer-term deposits, the Bank imposed ceilings of 2·5 per cent and 1·25 per cent on interest rates payable on deposits for 46 to 90 and 15 to 45 days, respectively. The maximum rate payable on deposits for periods upto 14 days was pegged at the rate payable on current account. Banks were also advised to pay a minimum of 4 per cent per annum on deposits of 91 days with adequate spread for deposits of longer periods, with a view to encouraging further deposits mobilisation.

Even while these measures were having a restrictive influence on the level of credit expansion in the 1964–65 slack season, the price situation continued to be difficult and the foreign exchange situation remained critical. A further tightening of the restrictive measures was, therefore, indicated and on February 17, 1965 the Bank rate was raised by a full one per cent. to 6 per cent and the system of progressively rising interest rates on accommodation to scheduled banks was amended to stiffen the cost of Reserve Bank accommodation still further. Accommodation at the Bank rate was made available to a scheduled bank with a net liquidity ratio equal to or above 30 per cent. instead of 28 per cent previously; and for every fall of 1 per cent or a fraction thereof in the net liquidity ratio, the rate of interest on the ENTIRE amount borrowed by the bank went up by half a per cent. Simultaneously, the ceiling of 9 per cent imposed in September, 1964 on the rate for advances/overdrafts/discounts of larger Indian and foreign banks was raised to 10 per cent. At the same time, to adjust deposit rates suitably to the other changes, maximum interest payable on deposits for 15 to 45 days and 46 to 90 days were raised by a quarter per cent and half per cent respectively, and minimum rates were prescribed for deposits for 91 days, six months and one year and for savings bank deposits at 5, 5½, 6 and 4 per cent respectively.

Selective credit controls continued to be administered during the year to dampen the rising tendency of prices of certain individual commodities of common use. With the inadequate contraction in bank credit in the 1964 slack season on the wake of shortages in the supply of food grains and edible oils, the minimum margins required to be maintained in respect of bank advances against oilseeds other than groundnuts and cotton seeds were raised in July 1964 from 40 to 50 per cent which was almost prescribed for advances against vegetable oils including vanaspati, the minimum margin for advances against groundnuts having earlier been raised to that level in March, 1964. In August, 1964, the minimum margin on advances against all food grains was raised from 35 per cent to 50 per cent and the ceiling limits on advances against food grains other than rice and wheat were reduced from 100 to 90 per cent of the level reached in 1962, ceiling limits on advances against rice and wheat having been already prescribed in February and April, respectively. The only relaxation effected during the year was in respect of advances against stocks held by vanaspati manufactures of soya bean oil imported under the P.L. 480 agreement. It was notified on December 31, 1964, that no margin applied to such advances since soya bean oil imports were undertaken to reduce the demand pressure on domestic vegetable oil supplies.

## MONEY RATES

In 1964–65, while the money market was easy during the slack season, the busy season witnessed a hardening of the rates, reflecting the sustained pressure on funds. During the first week of April, 1964 the call rate among selected major scheduled banks reached the peak levels for the 1963–64 busy season, 6·53 per cent in Bombay and 6.62 per cent in Calcutta, which were higher than the peaks reached during the 1962–63 busy season. The rates eased to the slack season low of 0.50 per cent in Bombay and 1.23 per cent in Calcutta in July to close the 1964 slack season at 1 per cent and 1.7 per cent respectively. The high demand for funds during the busy season of 1964–65, the increase in bank rate by one per cent in February 1965 on top of a half per cent rise in September, 1964, and the directives of the Bank regarding minimum and maximum rates to be paid and charged by banks which brought about an upward adjustment of the interest rate structure — all these factors resulted in a tightening of the inter-bank call money market, the rate reaching 8.48 per cent in Bombay during the first week of April 1965 and closing for the month at 7.28 per cent. In Calcutta, the rate rose to 8.31 per cent during the second week of April and closed for the month at 7.04 per cent. The average discount rate on Treasury bills, which was 2.75 per cent by end-March, 1964, declined to 2.36 per cent by end-November, but in keeping with the general upward movement referred to earlier, moved up to 3.50 per cent in March, 1965.

Pursuant to the Reserve Bank's interest rate directives and the increases in the Bank rate, the deposit rates of the State Bank of India, and other scheduled banks (which are members of the All-India Inter-Bank Agreement on Maximum Rates on Deposits) underwent upward revisions twice — first in September, 1964 and again in February, 1965. The State Bank of India put up its advances rate from 6 per cent to 6½ per cent on October 1, 1964 and further to 7 per cent on February 18, 1965. The minimum advances rate under the All-India Inter-Bank Agreement was raised from 6½ per cent to 7 per cent on September 26, 1964 and then to 8 per cent on February 17, 1965. The hundi rate of the State Bank of India was put up thrice during the year, from 7½ per cent to 7¾ per cent on October 1, 1964 to 8¼ per cent on January 1, 1965 and to 9¼ per cent on February 18, 1965.

## CREDIT CONTROLS

The revisions effected in the Reserve Bank's general credit controls on September 25, 1964 and February 17, 1965 have been referred to earlier.

Selective credit controls, as already stated are aimed at restraining the rising tendency of prices of particular commodities. Early in the year, in view of the decline in the wheat crop and the rise in prices the Bank issued a directive on April 21, 1964 reimposing in respect of advances against wheat the margin and ceiling restrictions which had been withdrawn in May, 1961. The banks were directed to maintain a minimum margin of 35 per cent on advances against wheat. The ceiling limits for each two-month period commencing from May–June, 1964 (excluding all exempted categories) were fixed separately, (1) in the State of Punjab and (2) in all the other States taken together, at levels equivalent to 80 per cent of such levels maintained in the corresponding two-month period in 1962. Advances against warehouse receipts issued by warehouses established by the Central and State Warehousing Corporations were exempted from the ceiling limits and were subject to a lower minimum margin requirement of 25 per cent while advances to roller-flour mills and those given to co-operative marketing and/or processing societies were exempted from the ceiling limits as well as the margin requirements.

The Bank imposed on July 7, 1964 a minimum margin of 50 per cent on advances by scheduled banks against the security of vegetable oils including vanaspati, as prices of vegetable oils and oilseeds showed a markedly rising tendency and also because scheduled bank advances against these commodities recorded a considerable expansion. Simultaneously, the minimum margin required to be maintained on bank advances against 'other oilseeds' (i.e. oilseeds

other than groundnut and cottonseeds) was raised from 40 per cent to 50 per cent. At the end of 1964, however, an exemption from those restrictions was granted in respect of bank advances to vanaspati manufacturers against stocks of soya bean oil imported under the P.L. 480 agreement in view of the fact that these imports were bunched together in relation to their expected utilisation by the manufacturers.

The sharp rise in the prices of food grains during the 1964 slack season months led the Bank in the middle of August 1964 to tighten up the existing controls on advances by banks against all food grains, with a view to checking possible speculative hoarding of stocks of food grains with the help of bank advances. The minimum margin required to be maintained by banks on advances against all food grains was raised from 35 per cent to 50 per cent and those against warehouse receipts covering food grains from 25 per cent to 40 per cent. Also, the ceiling limits required to be maintained with regard to bank advances against 'other food grains' commencing from September–October, 1964 were reduced from 100 per cent to 90 per cent of the levels of such advances maintained in the corresponding period in 1962, thus bringing the position in respect of these on par with that of advances against paddy and rice.

### BANKING LEGISLATION

Consequent upon the establishment of the Industrial Development Bank of India on July 1, 1964 the Reserve Bank of India Act, 1934 was amended to empower the Reserve Bank to make loans and advances to the Industrial Development Bank and purchase its bonds and debentures, and also to provide for the establishment of National Industrial Credit (Long Term Operations) Fund and to lay down the objects for which the Fund would be utilised.

In order that balances maintained by banking companies with the subsidiaries of the State Bank of India may be treated as eligible assets for the purpose of liquidity requirements under the Banking Companies Act, the Government of India notified the subsidiaries to that effect.

In terms of the notification issued by Government on October 12, 1964, borrowings of scheduled banks from the Industrial Development Bank of India (which took over the Refinance Corporation for Industry Ltd.) are to be treated as those from a notified bank, with the result that they are not to be included for purposes of their liquidity requirements.

Following the closure of the London Office of the Reserve Bank of India in September 1963, banking companies incorporated outside India but having offices in India were permitted to deposit sterling securities with the London Office of the State Bank of India in fulfilment of the obligations under Section 11 (2) of the Banking Companies Act, 1949. This facility was withdrawn by the notification issued by the Government on May 20, 1964, bringing into force the relative amendment to Rules 6, 8 and 10 of the Banking Companies Rules 1949 effective May 30, 1964.

On August 17, 1964, the Government of India notified certain draft amendments to the Rules governing Form IV (Statement of unsecured loans and advances) to be submitted under Section 20 and Form XII (return on unclaimed deposits) to be submitted under Section 26 of the Banking Companies Act. This notification also seeks to amend certain other rules and forms with a view to simplifying the returns required to be submitted by banking companies. These amendments were brought into force by a Government notification dated July 3, 1965.

In the last Report, mention was made of the legislation passed on December 30, 1963, viz. the Banking Laws (Miscellaneous Provisions) Act, 1963, which provides for control over companies or institutions which though they are not treated as banks, accept deposits from the general public or carry on other business allied to banking. In exercise of the powers thus conferred on the Reserve Bank by Sections 45 K and 45 L of the above mentioned Act, the Reserve Bank issued three Orders on May 14, 1964, requiring non-banking companies and financial institutions to furnish, in prescribed forms, information relating to or connecting with receipt of deposits from the public and other business allied to banking. The returns from the affected companies covering each of the first five half years ending March, 1964 have been analysed and a study is being made with a view to framing an appropriate policy to regulate the activities of these institutions so as to ensure adequate protection to depositors.

The three Orders dated May 14, 1964 have since been revised and three fresh Orders have been issued on May 7, 1965, mainly with a view to removing doubts as to whether companies accepting deposits from their share-holders only and from none else are covered by the Orders. The fresh Orders make it clear that companies should file the returns, whether the deposits have been received from their shareholders or from any other person or party; the effect of this is that companies accepting deposits from shareholders only, shall also now submit returns.

# CIVIL AVIATION

ALLOTMENT: Second Five-Year Plan, Rs. 2,444·30 lakhs including special allotment of Rs. 663 lakhs. The actual expenditure incurred during the Second Plan was Rs. 17·96 crores. Third Plan: Rs. 25·5 crores (Provisional).

The budget estimates for 1963-64 for the Civil Aviation Department were: Revenue Expenditure: Rs. 5·51 crores (gross); Capital Expenditure: Rs. 3·66 crores including charged expenditure and meteorological equipment; Revenue from landing, etc. at civil aerodromes: Rs. 1·17 crores.

The internal air services and services to neighbouring countries are managed by a corporation called Indian Airlines Corporation, and the external services by another Corporation called Air India. According to the Air Corporations Act, 1953, the number of members of a Corporation cannot be less than five and not more than nine. Each of the Corporations has a general manager.

The Central Government has authority to give the Corporations directions about opening a new transport service, closing an existing service, or other changes in schedule. At the end of a financial year the Corporations must present a report to the Central Government which will be laid before Parliament.

Private agencies can use aircraft for purposes of instruction, rescue or relief, air survey, fire-fighting, crop dusting, locust control or for providing joy rides.

A Labour Relations Committee for each Corporation consisting of representatives of the Corporation and of employees has been functioning since 1956. This Committee will give advice to the Corporation on matters of labour.

In addition to the two Corporations, there were 16 flying clubs and nine transport companies holding permits for non-scheduled services on 31st December, 1964.

Approximately 1,345,000 passengers and about 69,312,000 kilograms of cargo and mail were carried by scheduled and non-scheduled air transport services in 1964.

The scheduled air transport services flew approximately 47,392,000 km. in 1964. The number of passengers carried increased from 1,176,330 in 1963 to 1,345,000 in 1964. The quantity of freight and mail carried during 1964 was 42,560,000 kgs. as against 46,846,763 kgs. in 1963.

During 1964, approximately 24,600 hours and 6,685,000 kilometres were flown on non-scheduled operations against the previous year's figures of 26,084 hours and 6,829,003 kilometres. The number of passengers and cargo carried were approximately 106,800 and 26,752,000 kgs. respectively as against the previous year's figures of 83,846 passengers and 31,346,288 kgs. of freight.

There are three Government gliding centres, four private gliding clubs and 18 subsidised flying clubs in India.

The Civil Aviation Training Centre, Allahabad continues to conduct courses for various ground jobs connected with aircraft.

### ACCIDENTS

During the period (April to Dec. 31, 1964) there were 19 major accidents in India involving 18 Indian registered aircraft and one glider. Four of these accidents were fatal resulting in the death of 6 persons (five members of crew and one passenger).

Three of the aircraft involved in major accidents were engaged on scheduled passenger services, one aircraft was engaged on non-scheduled passenger services and two aircraft were engaged on non-scheduled freighter services Of the remaining 12 aircraft involved in major accidents, 11 were engaged on instructional flights and one on private flight. The only glider involved in a major accident was engaged on instructional flight.

Thirteen accidents have already been investigated and the remaining ones are being investigated by the departmental inspectors.

A brief description of fatal accidents is given below :—

Chipmunk aircraft VT/CVL belonging to the Government of India and operated by the Bihar flying Club, crashed in the river Ganges near Patna on April 7, 1964. The aircraft was engaged on a local training flight and was being flown solo by a student pilot. The wreckage of the totally destroyed aircraft was salvaged. The body of the pilot was recovered on April 8, 1964.

Chipmunk aircraft VT-CXC operated by the Hind Provincial Flying Club and engaged on a training flight, crashed and caught fire when landing at Kanpur aerodrome on April 28, 1964. Both the occupants of the aircraft — the pilot instructor and the trainee—were seriously injured and later died in the hospital. The aircraft was destroyed.

Sentinel L-5 aircraft VT-DMG belonging to the Madhya Pradesh Flying Club and piloted solo on a local night training flight crashed in a playground near Bhopal aerodrome on July 15, 1964. The student pilot sustained fatal injuries and the aircraft was destroyed.

Pipe Club aircraft VT/DFU belonging to the Bombay Flying Club crashed and fell in the Sea at Maroli in Bulsar District on Sept. 25, 1964. The aircraft was engaged on a cross-country flight from Bombay to Ahmedabad. Both the occupants—the pilot and a passenger—were killed.

## INDIAN AIRLINES CORPORATION

(Airlines House, 113, Gurdwara Rakabganj Road, New Delhi).

INDIAN AIRLINES CORPORATION was formed on 1st August, 1953, as a State Corporation under the provisions of the Air Corporations Act, 1953.

The present fleet consists of 4 Caravelles; 10 Fokker Friendships; 12 Viscounts; 36 DC-3's and 3 DC-4's.

The operations of the Corporation have been divided into three Areas, namely, Delhi, Bombay and Calcutta. Each Area is under the charge of a Manager who is responsible to the General Manager for the proper administration and co-ordination between different departments in the area. The Headquarters Office of the Corporation has, besides the Chairman, Departmental Heads.

The total number of staff employed by the Corporation was 10,908 as on 1st Jan. 1965. The Corporation's services extend over the entire sub-continent, including Afghanistan, West Pakistan, Nepal, East Pakistan, Burma and Ceylon. The crew strength consists of 330 pilots.

*Members of the Board :*

V. Shankar (Chairman), J. R. D. Tata, J. S. Parikh, S. R. Vasavada, M. L. Khaitan, G. L. Mehta, M. A. Chidambaram, V. T. Dehejia, Air Marshal Arjan Singh.

*General Manager :* A. S. Bam.

*Area Managers :* Delhi, Capt. R. G. Patwardhan; Bombay, Capt. D. A. Samant; Calcutta, A. H. Mehta.

*Secretary :* D. R. Kohli.

Indian Airlines Corporation is now a full member of the International Air Transport Association. Indian Airlines Corporation has set up training establishments for its Flying, Engineering and Traffic personnel. Besides regular passenger and freight services, I.A.C. operates a Night Airmail Service linking Bombay, Delhi, Calcutta and Madras.

During July-December 1964, the Indian Airlines Corporation, on its scheduled services, flew approximately 16,480,282 kilometres, carrying 589,098 passengers, 11,900,213 kg. of cargo and 4,526,096 kg. of mail against 15,585,096 kilometres flown with 478,830 passengers, 15,381,024 kg. of cargo and 4,083,211 kg. of mail during the corresponding period of the previous year.

The capacity ton kilometres operated during the period under review were 71,282,414, against 64,422,872 during the corresponding period of 1963.

### BUDGET

The revised and budget estimates respectively for 1964–65 and 1965–66 are given below: (Rs. lakhs).

| | 1964–65 (Revised) | 1965–66 (Budget) |
|---|---|---|
| Total operating revenue | 2,254·00 | 2,527·00 |
| Non-operating revenue | 55·00 | 60·00 |
| Total revenue .. | 2,309·00 | 2,582·00 |
| Total operating expenditure .. .. | 2,132·35 | 2,403·35 |
| Non-operating expenditure .. .. | 62·55 | 61·25 |
| Total expenditure .. | 2,195·90 | 2,464·60 |
| Profit .. .. | 65·10 | 117·40 |

## AIR-INDIA

Third Floor, New India Assurance Building, Mahatma Gandhi Road, Bombay 1.

Air-India International Limited now known as Air India, inaugurated its first International service to London on June 8, 1948. The initial frequency of one flight a week was gradually stepped up to 7 Super Constellation services a week with alternative stops at Rome, Paris, Prague, Dusseldorf, Zurich, Geneva, Cairo, Beirut and Damascus.

Air-India International Corporation was formed on August 1, 1953, as a wholly Government-owned Corporation under the Air Corporations Act of 1953.

The scale of operations and the route system of Air-India have expanded continuously since 1953, when it took over the predecessor company's Bombay-London and the Bombay-Nairobi services. To these, the Corporation added services to Singapore in July 1954, to Hong Kong in August 1954, to Tokyo in May 1955, to Sydney in October 1956, to Moscow in August 1958, to Jakarta in Oct. 1958, to New York in May 1960, to Kuwait in October 1960 and to Nadi (Fiji) in Aug. 1964.

In April 1960, Air-India celebrated its entry into the jet age by starting Boeing 707 services to London and later in May to New York—thus becoming the first Asian carrier to operate over the Atlantic.

From a total of three stations serviced in June 1948, Air-India now serves 26 cities in 21 countries, covering 5 Continents.

### FLEET

Air-India's present fleet consists of eight Boeing 707s—six Boeing 707-420s and two Boeing 707-320Bs.

With a fleet of eight Boeing 707s, Air-India operates a daily service to New York, nine services a week to London—two of which are routed via Moscow—two services a week to Tokyo and Nairobi, and one flight a week to Jakarta and Nadi (Fiji) via Sydney.

During 1963-64 Air-India flew 16,065,000,000 revenue kilometres carrying 190,969 revenue passengers, 1,148 tonnes of mail and 6,574 tonnes of cargo. Comparable figures for 1962-63 were 13,894,000,000 revenue kilometres, 165,736 revenue passengers, 1,274 tonnes of mail and 5,118 tonnes of cargo.

The Tripartite pool of Air-India, BOAC and Qantas came into being on April 1, 1960. This arrangement makes Air-India a partner in a giant international airline system which is in a better position to meet the increasing competition on international routes.

Air-India operates in pool with the Soviet airline, Aeroflot, on the Delhi/Moscow sector with the Czechoslovak airlines, CAS, on the Bombay/Prague sector and with East-African Airways on Bombay/Nairobi sector.

*Executive Officers :* J. R. D. Tata, *Chairman;* B. R. Patel, *Vice-Chairman and General Manager;* S. K. Kooka, *Commercial Director;* N. J. Pavri, *Financial Controller;* K. K. Unni, *Asst. General Manager;* K. Vishvanath, *Director of Operations;* K. G. Appusamy, *Director of Engineering;* V. G. Gadgil, *Controller of Stores & Purchases;* A. S. Banavalikar, *Personnel Manager;* A. F. Dubash, *Director of Planning & International Relations* and R. N. Gundil, *Secretary.*

*Members of the Board :* J. R.D. Tata, *Chairman;* B. R. Patel, *Vice-Chairman;* V. Shankar; S. R. Vasavada; M. A. Chidambaram; and B. L. Jalan; V. T. Dehejia; A. S. Bam; Air Marshal Arjan Singh.

*Commercial Headquarters :* Fourth Floor, Bank of India Building, Mahatma Gandhi Road, Bombay.

Other Departments: Santa Cruz Airport, Bombay 29. Tel: 535491.

Information/Booking: New India Assurance Building, Mahatma Gandhi Road, Fort, Bombay 1. Tel: 259191.

*Geneva Office*—7, Rue de Chantepoulet; *London Office*—17/18 New Bond Street; *New York Office*—410 Park Avenue, New York 22; *Nairobi Office*—Lugard House, Government Road; *Tokyo Office*—Hibiya Mitsui Building; *Sydney Office*—P & O Bldg., 3 Elizabeth St.

Net profit for the year ending March 31, 1964: Rs. 3·04 crores.

Operating Revenue: Rs. 26·81 crores.

Operating expenses: Rs. 22·97 crores.

Total number of persons employed by Air-India: 6,239 (31-3-1964).

Unduplicated route kilometres: 49,321 (31-3-1964).

## AIRCRAFT

There were 554 aircraft holding current certificates of registration in India at the end of Oct. 1964 of which 212 held current Certificates of Airworthiness. From April, 1964 to Oct. 31, 1964, 29 new aircraft were registered and the registration of 12 aircraft was cancelled. During the same period 128 aircraft were inspected for issue or renewal of Certificates of airworthiness of which seven aircraft were of foreign nationality.

## AERODROMES

Eighty-two aerodromes were controlled and operated by the Civil Aviation Department at the end of Oct. 1964. Three of these, *viz.*, Bombay (Santa Cruz), Calcutta (Dum Dum), Delhi (Palam) are international airports. The aerodromes at Ahmedabad, Patna, Bombay (Santa Cruz), Calcutta (Dum Dum), Delhi (Palam), Delhi (Safdarjung), Madras (St. Thomas Mt.), Tiruchirapalli, Varanasi, Jodhpur, Bhuj and Amritsar have been declared customs aerodromes.

**Aerodromes by Categories:** *International Aerodromes* (3): Bombay (Santa Cruz); Calcutta (Dum Dum); Delhi (Palam).

*Major Aerodromes* (8): Agartala; Ahmedabad; Begumpet; Delhi (Safdarjung); Gauhati; Madras (St. Thomas Mount); Nagpur; Tiruchirapalli.

*Intermediate Aerodromes* (44): Amritsar; Aurangabad; Baghdogra; Balurghat; Baroda; Belgaum; Bhavnagar; Bhopal; Bhubaneswar (Cuttack); Bhuj; Bhuntar (Kulu); Bombay (Juhu); Coimbatore; Cooch-Behar; Gaya; Indore; Jaipur; Junagadh (Keshod); Kailashahar; Kamalpur; Kandla; Khowai; Kumbhirgram; Lucknow (Amausi); Madurai; Mangalore (Bajpe); Mohanbari; North Lakhimpur (Lilabari); Panna; Pashighat; Patna; Phoolbagh; Porbandar; Port Blair; Raipur; Rajkot; Ranchi; Rupsi; Trivandrum; Tulihal. Udaipur; Varanasi; Vijayawada; Visakhapatnam.

*Minor Aerodromes* (27): Akola; Behala; Bilaspur; Chakulia; Cuddappah; Donakonda; Jhansi; Jharsuguda; Jabalpur; Kanpur (Civil); Khandwa; Kolhapur; Kotah; Lalitpur; Malda; Muzaffarpur (Rewaghat); Mysore; Palanpur (Deesa); Panagarh; Rajahmundry; Ramnad; Satna; Shella; Sholapur; Tanjore; Vellore; Vijayawada; Warangal.

The new aerodromes at Raxaul (Bihar) was complete except the terminal building. Land was acquired for the construction of an aerodrome at Jogbani and the work was expected to commence (March 1965).

Work in progress includes extension of 14-32 runway at Bombay (Santa Cruz) airport; construction of new terminal building, construction of permanent hangar for inter-continental aircraft and extension of apron and strengthening of apron and taxi track at Calcutta (Dum Dum) airport; extension and strengthening of the main runway at Lucknow aerodrome; construction of a terminal building at Cochin aerodrome; carpeting, extension and widening of the runway at Udaipur aerodrome; extension and strengthening of the runway at Patna aerodrome, construction of a fair weather

aerodrome at Khajuraho ; additions and alterations to the existing terminal buildings at Delhi (Palam) and Bombay (Santacruz) airports ; strengthening the runway at Madurai aerodrome; strengthening of the runway at Ahmedabad aerodrome and strengthening and regarding of the main runway at Bhubaneswar aerodrome.

One 36" diametre aerodrome beacon flashing alternately green and white has been installed at Raipur aerodrome. Runway lighting has been installed at Rajkot aerodrome. Work in connection with the installation of runway lighting was in progress at Bhubaneswar, Kumbhirgram, Rupsi, Varanasi, Baroda and Kandla aerodromes.

## AIR TRAINING

At the end of December 1964, there were 18 subsidised flying Clubs in India with their headquarters at Delhi, Calcutta, Bombay, Madras, Patna, Nagpur, Jullundur Cantt., Jaipur, Lucknow (with Satellite centres at Allahabad, Kanpur and Varanasi : the Allahabad centre has since shifted to Kanpur), Indore (with a satellite centre at Bhopal), Bangalore, Bhubaneswar, Hyderabad, Coimbatore, Trivandrum, Baroda, Patiala and Amritsar. During 1963-64 an amount of Rs. 30,28,282 has been paid to the flying club as subsidies.

During the year 1964, 29 private pilots' licences and four commercial pilots' licences were issued to the trainees at the various flying clubs.

Flying training scheme for IAF Cadets training at the flying Clubs at Madras, Kanpur, Delhi, Nagpur and Patiala and scheme for creation of potential reserve through flying clubs for recruitment to the IAF were in progress. Since the introduction of the IAF cadet training scheme 1,003 cadets have already completed flying training and at the close of the year (1964) 241 cadets were receiving training at the clubs.

During the period July to December 1964, eleven officers of the Civil Aviation Department proceeded to U.S.A., U.K. and Australia for training.

### Civil Aviation Training Centre, Allahabad

The Civil Aviation Training Centre, Allahabad comprising Flying, Aerodrome, and Communication Schools, with an allied repair and overhaul organisation, continued to provide training facilities for various categories of aviation personnel.

During the period from 1st January to 31st October 1964, 43 candidates were trained in the Assistant Aerodrome Officers' *ab initio* courses and 39 candidates received training in the Aerodrome Operators' Advanced Refresher Course at the Aerodrome School. At the Communication School, 48 Radio Technicians received training in the Refresher Course, 48 Radio operators were trained for the Long Range Telephony for Radio Teletype and Refresher Courses and 14 Technical Assistants and Radio Technicians were trained for the specialist course. At the end of Dec. 1964 there were 43 trainees in the rolls of the Civil Aviation Training Centre, Allahabad undergoing training in different courses.

*Gliding Centres :* At the end of December 1964, there were three Government Gliding Centres at Poona, Lucknow and Bangalore and three subsidised Gliding Clubs at New Delhi, Deolali and Ahmedabad. Twenty-five Glider pilots received training from the above centres and clubs during the year 1964. In addition, a private Gliding club (Birla Gliding Club) was also functioning at Palam.

875 aircrew licences of various categories were issued during 1964.

## AERONAUTICAL COMMUNICATION SERVICE

During 1964-65, the fourth year of the Third Five Year Plan, the work of modernisation, improvement and reorganisation of the Aeronautical Telecommunication Service, begun during the first year of the Plan, was continued. Improvements of Radio Aids to Navigation, installation of very high frequency Omni-Directional Radio Ranges, commissioning of Reporting Beacons, provision of enroute RTF facilities at a number of stations, commissioning of extended range RHF, introduction of Radio Teletype circuits and provision of Automatic Speed Recorders were some of the important features. There are at present 87 Aeronautical Communication Stations providing 158 radio aids to navigation and 581 Aeronautical Communication channels.

The following are some of the more important activities of the Aeronautical Telecommunication Service during the year under review :—

(1) The ILS facility at Palam was shifted to the 10/28 runway.

(2) Installation of Very High Frequency Omni-Directional Radio Ranges was completed at Bhubaneswar and Palam.

(3) The Pilot to Controller, extended range VHF R/T Air/Ground communication facility on 118·5 Mc/S was commissioned at Delhi for providing air traffic advisory service on PDR4 in the Delhi FIR.

(4) The enroute RTF General purpose VHF frequency 126·9, 127·8, 127·1 and 124·1 Mc/S was introduced at Bombay, Calcutta, Delhi and Madras respectively, replacing the frequency 12·1 Mc/S.

(5) The VDF Approach frequency 119·7 Mc/S was replaced by 127·9 Mc/S at Bombay and Calcutta.

(6) The aerodrome control VHF R/T and Inter Tower R/T facilities were commissioned at Bakshi-ka-Talab (near Lucknow) and Bhita (near Patna) on a temporary basis to facilitate operations as the aerodromes at Lucknow and Patna are temporarily unusable due to the construction works in progress on the runways.

(7) The aerodrome control VHF R/T on 118·1 Mc/S was provided at Kulu (Bhuntar).

(8) A non-directional M/F Radio beacon—Reporting Beacon was commissioned at Katihar.

(9) The existing Non-Directional M/F Radio Beacons at Ahmedabad and Gauhati were replaced by high power 3-kw beacons.

(10) In accordance with the recommendation of the ICAO Ltd. South East Asia Regional Air Navigation Meeting, Bangkok (Sept. Oct. 1963) the MID Network I and MID Network II Enroute RTF frequencies were withdrawn from Calcutta and Madras respectively.

(11) The MWARA frequencies 3446 and 6627 Kc/S were withdrawn from Bangalore, Begumpet and Trivandrum and RDARA frequencies 2973 and 5514 Kc/S were introduced at Ahmedabad, Agartala, Baghdogra, Gauhati, Lucknow, Mohanbari, Nagpur, Patna and Varanasi replacing the MWARA frequencies 3404·5 and 5604 Kc/S.

(12) RDARA enroute RTF frequencies 2973 and 5514 Kc/S were introduced at Bombay, Calcutta, Delhi and Madras.

(13) The RDARA enroute RTF frequency 8939 Kc/S was introduced at Patna.

(14) The enroute RTF channels were bifurcated into two operating positions at Delhi and Bombay.

(15) On commissioning of the Bombay Beyrouth RTT circuit on a regular basis, the Bombay-Beyrouth MAS was closed down.

(16) The Volmet Radio Telephony broadcast on frequencies 2924, 6929·5 and 10048 Kc/S were introduced at Bombay.

(17) Operation of the aeronautical communication facilities at Pathankot was handed over to the Indian Air Force.

(18) For catering to the Indian Airlines Corporation the Delhi Phoolbagh schedule service, Aerodrome Control R/T, M/F Non-Directional Radio Beacon and Inter Tower R/T facilities were commissioned into service at Phoolbagh during the months of May to July and Sept.-Oct. 1964.

(19) For catering to the Indian Airlines Corporation Delhi-Chandigarh-Kulu schedule service, Aerodrome Control R/T and M/F Non-Directional Radio Beacon were commissioned at Kulu (Bhuntar) during the months of April to July and Oct.-Nov. 1964.

(20) Bombay and Karachi were inducted as correspondents on the existing inter-centre ATS speech circuit between Delhi and Lahore.

(21) A seven-channel Thermionic recorder was installed at Gauhati replacing a smaller recorder.

## RESEARCH

Research and development for civil aviation are undertaken by The Research and Development Organization of the Civil Aviation Department at the Technical Centre, New Delhi.

Since its inception, this organisation has made significant contribution to the development of Civil Aviation in India. This includes two types certification of indigenously developed HT-2 and Pushpak aircraft, Dakota batteries and safety harnesses for gliders; assisting the Ministry of Defence in Military acceptance of indigenously developed Krishak and Kanpur-I aircraft ; design and development of Ashvini and Rohini gliders ; development testing and drafting of standards for aircraft quality materials, tendering advice to the Government on selection of aircraft like Viscount, Fokker Friendship and Boeing 707 for the Indian Airlines and Air-India International Corporations, collection of gust data on the Indian air-routes for mapping of the Indian skies ; scientific investigation of accidents and other technical problems referred from time to time.

Design of the 'Bharani' sailplane was successfully completed and the first prototype made its maiden test flight in April 1962. The design of the Single-Seater High Performance Sailplane 'Kartik' was successfully test-flown on March 18, 1963. The third prototye 'Rohini' glider incorporating certain improvements and modifications was successfully completed and test-flown. Procedure of issue of type Certificate for Civil Aircraft' was prepared to serve as a guide to designers and manufacturers in the country. Work has been undertaken on the design and construction of lowspeed wind tunnel for testing of gliders and light aircraft models. Development tests on aircraft quality materials like steel, tubes, wood, plywood, glue, inclinometres, passenger seats etc. were undertaken to determine their suitability for aeronautical purposes. Work on the design and development of a two/three seater light aircraft intended for club and private uses is progressing satisfactorily. The construction work on the prototype aircraft is under way.

The first prototype Kartik, Mark I sail plane has been loaned to the Delhi Gliding club for intensive utilisation as an experimental glider. During the year 1964, a scond prototype Kartik-Mk I sail plane, with improvements and modifications was constructed and satisfactorily test flown. A third prototype of the Kartik sailplane, designated Mark II, incorporating further improvements is under design and development.

The third prototype winch model Arjun III, incorporating surveilling mechanism for cable lead-out unit has been completed. Field trials on their performance and serviceability are under way.

Work has been started on a comparative study of the influence of different methods for improving fatigue life of joints in principal aircraft structures, typically like the centre-outer wing joint in DC-3 aircraft.

Work on the collection and analysis of data on the frequencies and magnitudes of gusts encountered on certain selected track routes and on the regional routes in the Assam and Bengal regions by means of strain range recorders on Viscount aircraft and fatigue metres on Friendship aircraft have been continued.

*Technical Studies :* Problems involved in the use of selected aircraft for civil operations in the modern mountainous region under high altitude and difficult terrain conditions were studied. During the year 1964, considerable additional data on the strength properties of indigenous Himalayan spruce were obtained as a result of test made on consignments procured for construction of gliders and aircraft prototypes. Physical and chemical tests are regularly carried out on samples of aviation turbine fuel (also aviation gasoline) drawn from suppliers' storage tanks at various airfields in India as well as on selected samples collected from foreign stations on routes operated by Air India. During the year, a total of 331 such samples were tested. Quality control tests on a number of samples of aviation fuel were also carried out.

### AIR AGREEMENTS

**India is a member of the International Civil Aviation Organization and has been elected to its Council.**

**India has entered into bilateral air agreements with the following 19 countries on the dates shown against each :—**

**France, 16-7-1947 ; Sweden, 21-5-1948 ; Pakistan, 23-6-1948 ; Ceylon, 21-12-1948; Switzerland, 4-6-1949 ; Australia, 11-7-1949 ; The Philippines, 20-10-1949 ; Netherlands, 24-5-1951 ; U.K., 1-12-1951 ; Afghanistan, 26-1-1952 ; Egypt, 14-6-1952 ; Iraq, 27-7-1955 ; Japan, 26-11-1955 ; U.S.A., 3-2-1956 ; Thailand, 12-6-1956 ; Russia, 2-6-1958 ; Italy, 16-7-1959 ; Czechoslovakia, 19-9-1960; West Germany, 31-5-1963.**

Other agreements signed during 1964 :— India-Kuwait (Feb., 24, 1964) ; India-Nepal (Aug. 1, 1964) ; India-Lebanon (Sept. 19, 1964); India-U.K. (Sept. 28, 1964) and India-U.S.A. (Oct. 26, 1964).

**Airlines of the following countries operate air services to and/or across India under temporary authorisation granted by the Govt. of India :—**

**Norway, Denmark, Sweden (jointly under one authorisation), Iran, Lebanon, Kuwait, Nepal, Burma.**

Indian Airlines and Air India operate to and/or across the following countries under temporary authorisation :

Burma, Nepal, Lebanon, Italy, Indonesia, Kuwait.

# ALCOHOL INDUSTRY

INDUSTRIAL alcohol is a very valuable material in the manufacture of acetone, acetic acid, ether, chloroform, ethyl acetate, polyethylene, styrene, polystyrene, etc. It is also necessary as a solvent in the manufacture of fine chemicals, medical preparations, toilets, etc. Since the last war, its importance has increased. It is now essential in the manufacture of ammunition and of artificial rubber.

In 1964 there were as many as 62 distilleries capable of producing over 17·71 million gallons of rectified spirit alcohol. The trend of production has been as follows :

'000 gals*

| Year | Rectified spirit | Denatured spirit |
|---|---|---|
| 1956 .. .. .. | 4,209·6 | 3,382·8 |
| 1957 .. .. .. | 5,095·2 | 3,458·4 |
| 1958 .. .. .. | 6,152·4 | 3,932·4 |
| 1959 .. .. .. | 7,994·4 | 4,719·6 |
| 1960 .. .. .. | 41,176·8 | 29,391·6 |
| 1961 .. .. .. | 51,710·8 | 42,129·6 |
| 1962 .. .. .. | 61,615·2 | 49,206·0 |
| 1963 .. .. .. | 87,000·0 | 56,400·0 |
| 1964 .. .. .. | 152,400·0 | — |

* Figures from 1960 onwards are in thousand litres. One litre is equal to 0·22 gallon.

The undivided Government of India's Panel on Fine Chemicals, Drugs and Pharmaceuticals estimated that the medical requirements of the sub-continent were a million gallons annually and industrial requirements 10 millions, a target which they said ought to be reached in 15 years time.

Consumption of industrial alcohol is estimated to have gone up from 3·4 million gallons in 1950 to 5·2 million gallons by 1955. In addition about a million gallons of alcohol are at present used in the manufacture of acetate rayon and are met from the production of power alcohol grade spirits.

Consumption of power alcohol in 1960 was assessed at 49·05 million litres and of industrial alcohol at 40·50 million litres. The actual production of alcohol was below the target fixed for the Second Plan.

### ALCOHOL INDUSTRY

The distillery attached to the Mysore Sugar Co. at Mandya took up the manufacture of power alcohol in 1939. Another unit came into existence in 1940, at Shakarnagar, Andhra Pradesh, with the help of the then Government of Hyderabad. In the following years several other units started producing power alcohol, with Uttar Pradesh leading the way in 1942. The scarcity of petrol during the last World War stimulated the use of alcohol as a motor fuel, even without admixture with petrol. The increased consumption of power alcohol during the War years provided an avenue for the utilisation of molasses. Several new distilleries acquired dehydration plants to produce 99·5 per cent alcohol. The rate of growth of the power alcohol industry, however, slowed down after the War.

At the beginning of the First Five Year Plan in 1951, there were 19 units engaged in the distillation of power alcohol and commercial spirit, and 25 other distilleries engaged in the production of potable and industrial alcohol in the different parts of the country. The annual rated production capacity of these units at the beginning of the First Plan was 12·87 million bulk gallons of power alcohol, 12·65 million bulk gallons of commercial spirit and 8·69 million bulk gallons of potable and industrial alcohol per annum.

Production of power alcohol was 5·67 million bulk gallons, rectified spirit 5·00 million bulk gallons and denatured spirit 1·63 million bulk gallons in 1951. The actual production was far below the installed capacity owing to the shortage of molasses in some areas, transport difficulties and low off-take of power alcohol. Consumption of power alcohol in the country in 1950–51 was 4·7 million gallons. Considering the anticipated increase in the consumption of alcohol in different industries, the targets of annual production capacity and actual production of power alcohol by 1955–56 were fixed at 21·12 million gallons and 18·00 million gallons, respectively.

At the beginning of Second Five Year Plan, it was expected that domestic requirements for power alcohol and industrial alcohol would rise to 81·0 million litres and 54·0 million litres respectively, per annum, by 1960–61. The Second Plan target of combined annual capacity of the alcohol industry as a whole which stood at 180·5 million litres per annum at the end of the Second Plan, exceeded the target. The increase in the capacity during the Second Plan was achieved through the establishment of 11 new distilleries with an annual capacity of 30·2 million litres and expansion of 10 existing distilleries with an annual capacity of 30·2 million litres and expansion of 10 existing distilleries by 29·7 million litres per annum.

At the beginning of the Third Five Year Plan, the overall position of the industry in respect of the potential capacity, existing capacity, production and consumption of alcohol was assessed. In view of the sugar production target of 3·5 million tonnes by 1965–66, the corresponding output of alcohol was estimated at 263·25 million litres on the basis of 90 per cent utilisation of by-product molasses. Taking into account another 4·5 million litres of alcohol produced annually from *Mahua* the total annual production of alcohol by 1965-66 has been visualised at about 270 million litres. Potable spirits and denatured spirits are expected to account for 45 million litres leaving a balance of 225 million litres of alcohol for utilisation as raw material in the various alcohol-based industries. During the current Plan period, the manufacture of acetic acid, acetate rayon, butyl alcohol, acetone, acetic anhydride, cellulose acetate, styrene, polystyrene and polyethylene, and synthetic rubber is to be handled by 13 units (4 in Andhra Pradesh, 4 in Maharashtra, 3 in Uttar Pradesh, 1 in West Bengal and 1 in Mysore) some of which have already gone into production. To meet the entire requirements of the major consuming industries provision for alternative feedstocks from other resources such as petroleum resources may have to be made. The targets of annual production capacity and actual production of alcohol have been fixed at 324 million litres and 270 million litres, respectively, for the Third Plan. In order to bring about additional capacity, licences have been granted to 12 new units three each in Maharashtra and Uttar Pradesh, and one each in Andhra Pradesh, Bihar, Madras, Mysore, Madhya Pradesh and the Punjab, and for expansion of 12 existing units : in Uttar Pradesh (9), Gujarat (1), Maharashtra (1) and Bihar (1). Implementation of these schemes will increase the existing annual capacity by 108 million litres. In order to reach the target envisaged, further licensing of additional capacity may be necessary.

Imports of ethyl alcohol, including denatured, was negligible during 1964-65 while the other forms of alcohol were valued at Rs. 170 lakhs in 1964-65.

Exports of ethyl alcohol were valued at Rs. 2,55,000 in 1964-65.

The total capital invested in the alcohol industry in 1951 was estimated at Rs. 1·58 crores which rose to Rs. 2·47 crores in 1953. During the Second Plan period, additional investment of Rs. 2 crores was made on new units and expansion of existing units. It is estimated that during the Third Plan, Rs. 4·0 crores might be invested for attaining a capacity target of 324 million litres of alcohol by 1965-66. The imported component is likely to be about Rs. 40 lakhs.

The installed capacity and actual production in thousand bulk gallons of power alcohol are given below :

'000 gals.*

| Year | Installed capacity | Production |
|---|---|---|
| 1956 .. .. .. | 14,352·0 | 10,270·8 |
| 1957 .. .. .. | 13,800·0 | 10,137·6 |
| 1958 .. .. .. | 15,189·6 | 8,826·0 |
| 1959 .. .. .. | 16,447·2 | 8,073·6 |
| 1960 .. .. .. | 74,766·0 | 49,327·2 |
| 1961 .. .. .. | 74,766·0 | 53,667·6 |
| 1962 .. .. .. | 74,772·0 | 50,216·4 |
| 1963 .. .. .. | 75,972·0 | 25,320·0 |
| 1964 .. .. .. | ,, | 1,464 |
| 1965 Jan. to May .. | ,, | 4,38 |

* Figures from 1960 onwards are in thousand litres.

Imports of alcohol are banned, but small quantities are imported along with drugs and perfumed spirits or in the form of liquors. Exports of alcohol are confined to despatches of denatured spirit to Burma and Ceylon and small quantities of rum.

The possibility of importing some alcohol for industrial purposes is being considered to meet the shortage in the country. Efforts are also being made to import some quantities of polythelene to meet the needs of industries.

Difficulties in the supply of molasses and offtake and the unremunerative price of power alcohol have kept production at a low level compared to the installed capacity. With a view to overcoming these difficulties and ensuring a steady growth of the industry, a Committee was set up by the Ministry of Commerce and Industry in October 1955.

The Committee submitted its report in December 1956. Its main recommendations have been given in the 1959–60 edition of the Directory.

The report of the Committee, together with the Government of India's decisions, was released to the public in March 1958.

In April 1959, the Government of India announced their decisions on the remaining recommendations of the Committee.

(*See* 1960–61 *edition of the Directory*).

Three notable suggestions of the Committee have been accepted by the Government of India, first, the minimum annual capacity for a distillery (power alcohol or industrial alcohol) should be one million gallons, although units of smaller capacities can be permitted in certain circumstances. Secondly, an adequate number of tank wagons for transport of both alcohol and molasses must be made available. Thirdly, a standing advisory committee on denaturants should be constituted and entrusted with the task of enlarging or altering the list of special denaturants for alcohol intended for different industrial uses. On the question of freight rates on alcohol the Government have extended uniformly reduced freight only to ethyl alcohol meant for large-scale industrial uses. In its opinion, such a concession need not be given to pure forms of ethyl alcohol meant primarily for potable purposes.

The fuel requirements of the industry is estimated at 2,50,000 tons of coal per annum in the final year of the Plan.

The additional fixed investment is estimated at Rs. 4 crores, its foreign exchange component being about Rs. 40 lakhs.

The additional employment during the Third Plan is estimated at 5,000. During 1963, the production of power and industrial alcohol recorded a slight increase despite the shortage of coal.

Tentative 1970-71 Estimates of Demand Versus supply of Traditional raw materials. (Alcohol from Molasses).

| (1) *Alcohol* Demand | Alcohol requirement (tonnes per year) |

# HIDES, SKINS AND LEATHER

INDIA possesses abundant resources of raw hides and skins, fully adequate to meet the requirements of the domestic tanning industry leaving a sizable surplus which is exported abroad. On an average, India exports every year about Rs. 24–25 crores worth of raw skins, tanned or dressed hides and skins, and unwrought leather. It is estimated that normally it produces 16·2 million cow hides, 5·5 million buffalo hides, 23·2 million goat and 15·1 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent. is derived from animals that die a natural death.

The bulk of the production is carried on in small towns and villages.

The tanning industry comprises four sections, *viz.*, 1. organised tanneries producing finished vegetable tanned buffalo leather and chrome tanned upper leather ; 2. tanneries producing vegetable tanned leather known to the trade as E. I. kips and E. I. tanned skins ; 3. small-scale chrome tanneries producing chrome tanned upper leather ; and 4. village tanneries producing vegetable tanned cow and buffalo leather and vegetable tanned leather from goat and sheep skins.

There are altogether 50 units producing hides, skins and leather — chrome tanned hides (12), vegetable tanned buffalo and cow hides (32) and leather cloth (6).

The annual installed capacity and production of each of these items is as follows :

| Year | Chrome Tanned Hides | | Vegetable Tanned Buffalo and Cow Hides | | Leather Cloth | |
|---|---|---|---|---|---|---|
| | Capacity (Thousands) | Production (Thousands) | Capacity (Thousands) | Production (Thousands) | Capacity (Thousand yards) | Production (Thousand yards) |
| 1957 .. .. .. | 1,644·0 | 630·0 | 3,180·0 | 1,791·6 | 8,700·0 | 3,656·4 |

| 1964 May to 1965 May .. | 1,317·0 | 955·4 | 3,900·0 | 3,693·9 | 6,885·0* | 10,036·6* |

* Metres.

According to the Annual Survey of Industries 1962, the total productive capital in tanneries and leather finishing plants was about Rs. 4 crores and total employment came to 8,148. The gross ex-factory value of output was Rs. 14·12 crores.

The trend of the value of imports and exports of hides and skins, furskins dressed and undressed and leather since 1959 is given below :

(Rs. lakhs)

| | Hides and skins (except furskins) undressed | | Furskins undressed | | Furs dressed or dressed and dyed | | Leather | | Manufactures of leather | |
|---|---|---|---|---|---|---|---|---|---|---|
| | Imports | Exports | Imports | Exports | Imports | Exports | Imports | Exports | Imports | Exports |
| 1959 .. .. | 173·4 | 1,070·2 | 0·8 | 30·3 | — | — | 5·0 | 2,857·2 | 36·2 | 14·9 |
| 1960 .. .. | 255·8 | 1,013·3 | 2·4 | 52·4 | — | — | 3·7 | 2,563·4 | 26·2 | 13·3 |
| 1961 .. .. | 218·7 | 808·5 | 0·2 | 48·3 | — | — | 8·4 | 2,597·1 | 19·7 | 11·9 |
| 1962 .. .. | 248·3 | 1,003·2 | 0·8 | 35·9 | — | — | 4·1 | 2,259·7 | 2·6 | 15·3 |
| 1962–63 .. | 276·3 | 1,084·4 | 0·7 | 16·8 | — | — | 5·4 | 2,257·8 | 5·1 | 17·4 |
| 1963–64 (April to Dec.). | 250·8 | 744·3 | 0·7 | 35·8 | — | — | 2·4 | 1,947·8 | 0·8 | 13·8 |
| 1964-65 .. | 312·2 | 907·2 | 1·3 | 6·4 | — | — | 5·4 | 2,723·9 | 1·8 | 18·9 |

The main problems about raw material relate to the supply of hides and skins and wattle bark. Supplies of hides have to be arranged from Pakistan. The indigenously available *Karada* bark is stated to be a potential substitute for wattle bark.

For the development of indigenous tanning industry and for increasing exports of tanned skins, the Government of India decided from June 15, 1959, to regulate export of raw goat skins on quota basis through established shippers.

India imports about 15,000 tons of wattle extract and bark per year. By the end of the Second Plan the total area under wattle cultivation had reached about 27,000 acres. During the Third Plan period there are programmes to extend the area under wattle plantations in the States of Madras, Kerala and Assam.

The additional requirements of tanned hides and skins in the country in the final year of the Third Plan have been estimated at 2·5 million pieces and 1·9 million pieces respectively, the demand in 1965-66 estimated at about 22 million hides and 30 million skins. To achieve this the industry will require following quantities of principal raw materials.

Raw hides 22 million pieces
Raw skins 30 „ „
Lime 30,000—35,000 tons
Wattle bark and—
Wattle extract 35,000 tons
Other barks 35,000 „
Myrobalans 30,000 — 35,000 tons.

A number of schemes had been launched by the Centre and States for the development of the tanning and leather industries during the Second Five-Year Plan and in the Third Five-Year Plan it is proposed to set up one large and 14 small hide flaying, curing and carcass utilisation centres. Some of these provided for setting up production-cum-training centres, re-tanning and finishing centres, organization of co-operative societies of tanners and leather workers. A beginning has been made by the Co-operative Mutual Insurance Company, Bombay, to insure milch animals and draught cattle in the States of Maharashtra and Gujarat. A Development Council for Leather, Leather Goods and Pickers industries was constituted in January 1960.

## FOOTWEAR INDUSTRY

The larger units manufacturing leather and leather goods employ about 10,000 persons and the total investment is more than Rs. 10 crores. The small-scale industry employs about 7,63,000 persons.

The principal use of leather is for the production of footwear. The leading towns manufacturing footwear are Agra, Kanpur, Bombay and Calcutta.

At the end of the Second Five Year Plan period, there were 12 units with an annual capacity of seven million pairs of Western type of footwear.

The Statewise distribution of these units and their annual installed capacity is indicated below :

| State | Number of units | Annual capacity ('000 pairs) |
|---|---|---|
| Uttar Pradesh .. .. | 5 | 2,127 |
| West Bengal .. .. | 1 | 4,524 |
| Bihar .. .. .. | 1 | * |
| Maharashtra .. .. | 1 | 300 |
| Madhya Pradesh .. | 1 | 36 |
| Madras .. .. .. | 1 | 15 |
| Punjab .. .. .. | 1 | 8·4 |
| Mysore .. .. .. | 1 | 1·2 |
| TOTAL .. .. | 12 | 7,011·6 |

The capacity for the Indian type of footwear which are hand-made fluctuates with demand and data are not available for Statewise figures.

The output by the large-scale factories of all types of footwear made of leather since 1957 is shown as follows :

| | Western type (Million pairs) | Indian type (Million pairs) |
|---|---|---|
| 1957 .. .. .. | 4·37 | 3·04 |
| 1958 .. .. .. | 4·28 | 3·29 |
| 1959 .. .. .. | 4·14 | 4·10 |
| 1960 .. .. .. | 5·42 | 3·78 |
| 1961 .. .. .. | 6·22 | 4·41 |
| 1962 .. .. .. | 6·51 | 5·28 |
| 1963 (Jan. to Dec.) .. | 6·50 | 4·13 |

Reliable production statistics for small and cottage units which are responsible for manufacturing over 90 per cent of the total output are not available.

The Development Council for Leather and Leather Goods Industries has estimated the total requirements of leather footwear in 1965-66 at 140 million pairs.

Our import of leather footwear is insignificant. Our exports on the other hand are sizable as is shown below :

| | Quantity ('000 pairs) | Value (Rs. lakhs) |
|---|---|---|
| 1958 .. .. .. | 1,613 | 151 |
| 1959 .. .. .. | 1,807 | 210 |
| 1960 .. .. .. | 1,447 | 217 |
| 1961 .. .. .. | 1,090 | 150 |
| 1962 .. .. .. | 1,738 | 168 |
| 1963-64 .. .. .. | 3,935 | 264 |
| 1964-65 .. .. .. | 1,780 | 205 |

In 1964-65 India exported leather footwear valued at Rs. 2·1 crores. The total export including all kinds *i.e.* rubber, leather and of textile material amounted to Rs. 4·3 crores.

The budget of 1965-66 has removed an excise duty of 10 per cent *ad valorem* which was imposed since March 1, 1954.

### ESTIMATED REQUIREMENTS

The Development Council for Leather and Leather Goods Industries has estimated the requirements of leather footwear in 1965–66 at 140 million pairs, of which 4 to 5 million pairs are expected to be exported. These estimates have been adopted subject to a review some time in 1963.

In view of the fact that the leather footwear industry can be organised on a labour intensive basis and a substantial expansion in employment opportunities is one of the principal aims of the Third Plan, no expansion of capacity in the large-scale sector of the industry is envisaged during the five-year period. The additional demand for footwear is expected to be met by a fuller utilisation of the existing capacity in the large-scale sector and by developments in the cottage and small-scale sectors.

According to the estimates of the Development Wing, the leather footwear industry will require the following quantities of the principal raw materials for achieving a production of 140 million pairs in 1965–66 :

*Leather*—14·5 million tanned hides and 6·5 million tanned skins ; *Thread*—7·5 million reels for uppers and 495 tons for bottom stitching ; *Eyelets*—390 million pieces.

The table below summarises the development programme for the tanning and footwear industry in the Third Plan :

| | Production 1960–61 | Production 1965–66 |
|---|---|---|
| Tanned hides and skins (million pieces) .. | 47·6 | 52·0 |
| Leather footwear (million pairs) .. .. | 102·0 | 140·0 |

*Although equipped to manufacture Western type footwear, this factory is at present manufacturing Indian type only.

# TEA INDUSTRY

TEA ranks as the largest item in India's export trade. The present export amounts to 220,000 tonnes, accounting for two-thirds of the production, and the foreign exchange earned totals Rs. 130 crores.

The State Governments also derive considerable revenue from the agricultural income-tax on tea grown within their jurisdiction as well as from the sales tax, carriage tax, octroi, etc. on the commodity.

The industry as a whole gives employment to a labour force of almost one million. The daily average number of persons actually employed in 1958 was 980,237.

Unlike China, which consumes all its tea, India exports a substantial portion of tea produced in the country. Out of the total production of 716·4 million lbs. in 1960, as many as 430·1 million lbs. were sold abroad. India meets nearly 45 per cent of the world demand for tea.

In 1963, India produced 763 million lbs. of tea. India exported 487 million lbs. and earned Rs. 132.4 crores. This was the highest export performance in the last five years. In 1964-65 India exported 217·8 mill. kgs. valued at Rs. 128.2 cores.

There are about 8,934 registered gardens with a total area of nearly 818,132·28 acres under tea. Of these, 605,269 acres are in Assam and West Bengal, while Madras, Mysore and Kerala account for nearly 183,598 acres, and the rest are in Bihar, U.P., Tripura, Punjab and Himachal Pradesh.

There are over 700 joint stock companies engaged in the tea industry. The total paid-up capital in the industry as a whole is about Rs. 74 crores. The number of Indian companies is about 540 with a paid-up capital of about Rs. 25 crores. (Latest available.)

The peak of the boom in tea was reached in 1954, but prices began to decline from 1955 and touched their lowest level in May-June 1955. Thereafter, prices slowly recovered and reached more satisfactory levels, though they never touched the 1954 peak. As a matter of fact, the decline in prices continued by a slow and gradual process, owing to the excess of world total supply of tea over actual requirements. Tea prices during the years 1956, 1957 and 1958 were more or less steady, despite several ups and downs, because of seasonal and other influences operating from time to time. Prices obtained at Calcutta auctions during 1960 were generally higher than in 1959 whereas prices at Cochin auctions were slightly lower during 1960 than the previous year. On the whole, however, prices were very satisfactory at all auction centres.

Revised targets of production and export of tea for the Third Plan were additional 376·5 million kg. and 240·4 million kg. respectively. The Fourth Plan targets are additional 453·6 million kg. and 294·8 to 303·9 million kg. respectively. These targets had been fixed by the working group of the Planning Commission, which revised the original Third Plan targets of 408·2 million and 276·7 million kg. for production and export considering that it was difficult to achieve these in the light of actual performance so far.

The total quantity of leaf and dust teas sold at Calcutta auctions during 1964/65 season were 108·8 million kg. and 56·3 million kg. respectively against 95·7 million kg. and 49·0 million kg. in the previous year. The average auction price of leaf teas here in the season was lower by 21 paise per kg. while that for dust teas was lower by 5 paise compared with prices fetched during 1963/64 season.

## EXPORTS

The following table shows the quantity and the value of tea exported from India from 1956 to 1964-65 :

| | Quantity of Tea exported (millions lb.) | Value of Tea exported (Rs. lakhs) |
|---|---|---|
| 1956 .. .. | 511 | 142,82 |
| 1957 .. .. | 439 | 123,39 |
| 1958 .. .. | 503 | 136,54 |
| 1959 .. .. | 469 | 126,01 |
| 1960 .. .. | 425 | 119,99 |
| 1961 .. .. | 452 | 124,25 |
| 1962 .. .. | 461 | 124,92 |
| 1963 .. .. | 487 | 132,37 |
| 1964 .. .. | 463 | 124,90 |
| 1964-65 .. | 217.8* | 128,20 |

* Million Kgs.

From March 1955, export duty on tea was levied on a slab system according to which the duty was announced at the beginning of every month on the basis of the weighted average prices obtained by Indian teas at the London auctions during the previous month. This system was abolished and the Government decided, in September 1958, that the export duty on tea should be reduced to 26 P. per lb. and further reduced to 24 P. per lb. with effect from March 1959 and again reduced to 20 P. per lb. (44 P. per Kg.) from 1st March 1961. In 1963–64, the export duty was completely abolished.

Excise duty on tea is now levied at different rates for different zones. There are four zones at Present—Zone I, II and Zone III A and Zone III B. These zones have been demarcated on the basis of the average price which teas from those areas fetch at the internal and export auctions in Calcutta and Cochin.

As an export promotion step, the excise duty was enhanced from 10–35 P. range to 15-45 P. range per Kg. and 15 P. rebate on export quantity per Kg.

In 1963–64 the rebate of excise duty on the exported quantity was discontinued and a 20 per cent surcharge on the excise duty was imposed on tea. The export duty was completely abolished in 1963–64 budget. In 1964–65 budget no change has been effected.

An export promotion drive for tea has been launched by the Indian Tea Board through the establishment of Tea Councils and frequent participation in trade exhibitions. At present Tea Councils, set up in collaboration with local tea interests, are functioning in U.S.A., Canada, West Germany, Eire and Netherlands. During 1957-58, the Tea Board participated in as many as eight major international trade exhibitions.

The Tea Board has already opened Tea Promotion Councils at Cairo, Sydney, New York and London and has appointed Tea Advisers there. There is also a proposal to open two similar units at Frankfurt and Baghdad.

To ensure quality control over exported tea, the Government of India promulgated the Tea (Distribution and Export) Control Order vesting the Tea Board with powers to take appropriate action in such cases. The provisions of the Order have been brought into force with effect from the 1st of April, 1958.

The following table shows the growth of the industry from 1947 to 1963 :—

| Year | Area under tea in thousands of acres (*a*) | Production in millions of lbs. (*b*) |

# VEGETABLE OIL INDUSTRY

INDIA is one of the most important producers of oilseeds in the world and is consequently a large producer of vegetable oils as well as an exporter of oils and oilseeds.

The following figures show the average production of different varieties of oilseeds in recent years along with their share in world production :—

| — | Average Indian Production (lakh tons) | As percentage of world Production |
|---|---|---|
| Groundnut | 43·54 | 34 |
| Castor seed | 0·98 | 15 |
| Linseed | 4·10 | 13 |
| Sesamum | 2·88 | 34 |
| Rape and mustard | 13·80 | 12 |

The following table gives the actual production —in thousand metric tons—of oilseeds during the seasons 1960-61, 1961-62, 1962-63 and 1963-64.

| | 1960-61 | 1961-62 | 1962-63 | 1963-64 |
|---|---|---|---|---|
| Groundnut | 4,462 | 4,685 | 4,821 | 5,291 |
| Castorseed | 90 | 101 | 101 | 101 |
| Linseed | 395 | 456 | 433 | 385 |
| Sesamum | 321 | 379 | 464 | 410 |
| Rapeseed and Mustard | 1,356 | 1,337 | 1,294 | 909 |
| Total | 6,624 | 6,958 | 7,113 | 7,096 |

The groundnut crop of 1964-65 is reported to have surpassed the record level of 53 lakh tonnes reached in 1963-64 by as much as 14 per cent and production is estimated to reach a level of 60 lakh tonnes.

The All-India Second Estimate of Groundnut for 1964-65 has put the area under the groundnut crop for 1964-65 at 15,958,000 acres.

According to the Directorate of Economics and Statistics, Union Ministry of Food and Agriculture, this shows an increase of 704,000 acres or 4.6 per cent as compared with the corresponding adjusted estimate of 15,254,000 acres for the year 1963-64.

The increase in the area under groundnut during the current year has been mainly in Gujarat, Uttar Pradesh, Rajasthan and Punjab and is attributed to favourable climatic conditions at the sowing time. This increase in area has, however, been offset to some extent by a a small decline reported from Mysore and Madhya Pradesh.

The yield per acre during 1963-64 worked out to 694 lbs., an increase of 10·7 per cent over the yield of 627 lbs. per acre in 1962-63.

The All-India final estimate of sesamum, 1964-65 puts the year's area and production at 2,501,100 hectares (6,185,000 acres) and 466,200 tonnes respectively. These estimates show an increase of 107,900 hectares or 4.5 per cent in area and 26,900 tonnes or 6.1 per cent in production.

The All-India first estimate of linseed for 1964-65 has put the area under linseed crop at 3,231,000 acres showing an increase of 205,000 acres or 6.8 per cent as compared with the corresponding adjusted estimate of 3,026,000 acres for 1963-64.

The All-India first estimate of rape-seed and mustard for 1964-65 has put the year's area at 3,362,000 acres. This shows an increase of 192,000 acres or 6.1 per cent as compared with the corresponding adjusted estimate of 3,170,000 acres for the year 1963-64.

**The actual production of oil from the five major oilseeds has been estimated as follows:**

('000 Tons).

| | Groundnut | Castor | Sesamum | Rape and Mustard | Linseed | Total |
|---|---|---|---|---|---|---|
| 1956-57 .. | 954 | 39 | 138 | 293 | 123 | 1,547 |
| 1957-58 .. | 1,007 | 28 | 111 | 264 | 79 | 1,489 |
| 1958-59 .. | 1,092 | 36 | 160 | 293 | 142 | 1,723 |
| 1959-60 .. | 895 | 35 | 112 | 299 | 136 | 1,477 |
| 1960-61 .. | 989 | 32 | 128 | 394 | 129 | 1,672 |

**In March 1956, there were 2,097 oil mills registered under the Factories Act. The total crushing capacity of the mills in the country was estimated at 56 lakh tons per annum in terms of oilseeds.**

**There were, besides, about four lakh village *ghanis* in the country with an annual crushing capacity of about seven lakh tons of oilseeds. Thus the total crushing capacity was estimated at 63 lakh tons in terms of oilseeds. The total output of oilseeds in recent years has been of the order of 65 to 70 lakh tons.**

**The capital invested in the organised industry is estimated at Rs. 24·4 crores and the number of workers at 43,580. The most important oilseeds consumed in large quantities for the production of oils are groundnut, linseed, rape and mustard, castor seed and sesamum seed. Small quantities of cottonseed mohwa, and copra are also crushed.**

**The Third Plan envisages a target for oilseeds output in 1965-66 of 9·8 million tons, as against the Second Plan target of 7·5 millon tons and the actual output of 6·53 million tons in 1960-61.**

## IMPORTS AND EXPORTS

**The following table shows the total value imports and exports of oil of some varieties:**

(Rs. lakhs).

| | 1961-62 | 1962-63 | 1963-64 | 1964-65 |
|---|---|---|---|---|
| IMPORTS | | | | |
| Palm Oil .. .. .. .. | 451 | 290 | 385 | 344 |
| Coconut Oil .. .. .. .. | Nil | 60 | 21 | 3 |
| Other Sorts .. .. .. .. | 78 | 44 | 13 | 13 |
| EXPORTS | | | | |
| Groundnut Oil .. .. .. .. | 103 | 783 | 1,345 | 116 |
| Liuseed Oil .. .. .. .. | 8 | 13 | 9 | 10 |
| Castor Oil .. .. .. .. | 400 | 429 | 480 | 348 |

**On the basis of the minimum *per capita* consumption of fats in this country, the total consumption of fats of the entire population would work out at 7 million tons, as against the present estimated consumption of 1·2 million tons.**

**In 1954-55, about 1·14 million tons of vegetable oils (including coconut oil) and about 255,000 tons of vanaspati were estimated to have been consumed for edible purposes in the country. This means a *per capita* consumption of 8·2 lb. (6·7 lb. of edible oils and 1·5 lb. of vanaspati). It was said to have gone up during the Second Plan. Assuming the higher consumption at 8·8 lb. the total requirements of vegetable oils and vanaspati for 400 million people had touched about 1·62 million tons by 1960-61.**

**The development of soap, paints and varnish industries has stimulated the consumption of non-edible oils. Castor oil consumption as a lubricant has also registered considerable expansion. During the decade following the outbreak of the war, consumption of vegetable oils by the soap industry has doubled from 30,000 tons to 63,000 tons, and that of paints and varnish industry and lubricant has risen from 15,000 tons each to 30,000 tons and 25,000 tons respectively. By 1960-61, the total requirements of vegetable oils for all the industrial and miscellaneous purposes were estimated at 278,000 tons. Thus internal consumption requirements were of the order of only 1·9 million tons.**

***Pine Oil:*** **The first pine oil factory in the country has been started at Hoshiarpur in the Punjab. It produces pine oil, dipentine and pine tar. The factory was inaugurated by the Union Industries Minister on July 16, 1960. This factory is claimed to have resulted in the saving of foreign exchange to the tune of Rs. 30 to 40 lakhs annually.**

***Palmarosa Oil :*** **India ranks first among nations producing Palmarosa oil, and is the chief supplier of this important raw material for perfumery manufacture, earning foreign exchange worth Rs. 25 lakhs annually by way of its export alone.**

**To ensure quality control, Government have established a special laboratory at Bombay for AGMARK grading and have banned the export of ungraded Palmarosa oil.**

## COTTONSEED

**Special efforts are being made to develop the cotton seed oil industry on modern lines. From eight units equipped with delinting and dehulling machines in 1955, the number has grown to 20 units in 1965 with an annual installed capacity of 3 lakhs metric tons in terms of seeds. The production in 1964 was 25,000 metric tons in terms of extracted oil. Among the steps taken to increase the consumption of cotton seed oil by vanaspati factories is a reduction of excise duty. Export of cotton seed oil as well as decorticated cotton seed oil cake was licensed freely. The policy of not licensing new mills or expansion of existing oil mills has been continued. The services of a T. C. M. expert were made available to the crushing industry to advise the crushers on the production and grading of cotton seed linters. A rebate on the excise duty payable on vegetable product has been announced for the use of cotton seed oil at 5 per cent and 10 per cent for the manufacture of vegetable product.**

**In regard to solvent extraction of oilcakes, there are at present 32 units, with an annual capacity of 547,500 tons in terms of oil cakes.**

**Production of oil by solvent extraction of oil-cakes during 1960 was 23,440 tons. The rise in output was due to the commencement of operations by three more units. Considerable foreign exchange is already being earned by this industry by export of deoiled meal to U.K. and other countries. Three more units were expected to go into production by the end of 1961-62. During the year 1960-61, licences for 100 units of a capacity of 20 lakh tons per annum in terms of oil cakes, had been issued.**

**The development programme for the vegetable oil industry in the Third Plan is indicated in the following table:**

('000 Tons)

| | 1950-51 Production | 1955-56 Production | 1960-61 Estimated Capacity | 1960-61 Estimated Production | Targets for 1965-66 Capacity | Targets for 1965-66 Production |
|---|---|---|---|---|---|---|
| *Vegetable oils :* | | | | | | |
| *a*) Solvent extraction of oil cakes .. .. | — | — | 550 (Cake) | 25 (Oil) | 2,000 (Cake) | 169 (Oil) |
| *b*) Cotton seed oil .. | — | — | 180 (Seed) | 15 (Oil) | 850 (Seed) | 100 (Oil) |

### VANASPATI

The Vanaspati Industry though a minor branch of the Vegetable Oil Industry is one of the most highly organised and efficient industries. Its history is interesting. It started on a small scale in 1930.

In March 1956, there were 51 vanaspati factories with a rated capacity of about 412,100 tons. In 1959, there were 58 factories with an annual production capacity of about 446,220 tons. Out of these, one is the Government Hydrogenation Factory at Kozhikode having an installed capacity of 3,000 tons per annum. Besides, there are seven factories with an annual rated capacity of 33,000 tons. It is the Government's policy not to permit any further expansion of the industry as the present capacity is adequate to meet all the requirements of 4 lakh tons.

The aggregate installed capacity of the industry was stepped up from 521 thousand tons in 1960 to 557 thousand tons in 1962. Production during these years rose from 337 thousand tons to 363 thousand tons and consumption from 337 thousand tons to 363 thousand tons.

**Installed Capacity, Production and Consumption**

('000 tonnes)

| | Capacity | Production | Consumption |
|---|---|---|---|
| 1960 .. | 521 | 337 | 337 |
| 1961 .. | 560 | 340 | 337 |
| 1962 .. | 557 | 370 | 363 |
| 1963 .. | 467 | 320 | — |
| 1964 .. | 576 | 360 | — |

**Exports of Hydrogenated Oil**

| | Quantity (Tonnes) | Value (Rs. lakhs) |
|---|---|---|
| 1960-61 .. .. | 66 | 103 |
| 1961-62 .. .. | 33 | 56 |
| 1962-63 .. .. | 30 | 45 |
| 1963-64 .. .. | 41 | 62 |
| 1964-65 .. .. | — | 19 |

The net capital invested in the industry is about Rs. 22 crores. Besides 10,000 workers directly employed, the industry provides indirect employment for nearly 60,000 workers.

Edible oils constitute the chief raw material of the industry.

The table below summarises the programme of development in the Second and Third Plans:

(Tons)

| | 1955–56 | 1960–61 | 1960-61 Estimated | 1965-66 Target |
|---|---|---|---|---|
| Installed Capacity .. .. .. .. .. .. | 445,000 | 445,000 | 434,000 | 550,000 |
| Production .. .. .. .. .. .. | 276,000 | 330,000 | 350,000 | 500,000 |
| Internal Consumption .. .. .. .. .. | 255,000 | 375,000 to 380,000 | —— | —— |
| Exports .. .. .. .. .. .. .. | 15,000 | 20,000 to 25,000 | —— | —— |

A total of Rs. 30 lakhs may be available for vegetable oil research during the Third Plan.

Exports of vegetable oils had made considerable headway recently. Shipments increased from Rs. 540 lakhs to Rs. 1,093 lakhs during the eleven months of 1962-63. From April 1962 to Feb. 1963 exports of oil cakes and meal went up by more than Rs. 13 crores—from Rs. 15·4 crores to Rs. 28·4 crores.

**Lemongrass Oil:** Lemongrass is chiefly grown in Kerala. India exports about Rs. 2 crores worth of lemongrass oil annually to countries like the U.K., West Germany, U.S.A., Switzerland, Japan and Italy. Lemongrass oil is mainly used for the manufacture of synthetic vitamin 'A' and as a base for some perfumes for the soap-making industry.

# MISCELLANEOUS INDUSTRIES

**Agricultural Implements:** There were 60 factories engaged in the manufacture of Agricultural Implements at the end of the Second Five Year Plan with an assessed annual capacity of 30,900 tons in terms of steel. The Tata (Agrico), Jamshedpur is the largest unit with an annual capacity of 14,400 tons. They also include two units in the public sector, *viz.*, the Nahan Foundry and the Mysore Implements Factory. Altogether more than 60 units are working in the organised sector at present.

Actual production by the organised sector of the industry, in terms of steel, has been as follows:—

| Year | Production (tons) |
|---|---|
| 1956 .. .. .. .. | 16,815 |
| 1957 .. .. .. .. | 15,224 |
| 1958 .. .. .. .. | 14,000 |
| 1959 .. .. .. .. | 16,108 |
| 1960 .. .. .. .. | 17,400 |
| 1961 .. .. .. .. | 22,895 |

The value of imports of agricultural implements in 1960 was Rs. 38·99 lakhs and that of exports Rs. 0.73 lakh. In 1961–62, agricultural implements worth Rs. 10.7 lakhs were imported. In 1960, the Government of India appointed a committee to assess the Plan needs of agricultural implements.

The steel requirements for the production of agricultural implements during the Third Plan period is estimated to be about 3 million tons, the requirement for 1965-66 being about 0·8 million tons.

**Agricultural Machinery:** In 1964 there were 26 units manufacturing power-driven pumps worth Rs. 226·68 lakhs per annum. At the end of the Second Plan there were 48 units engaged in the manufacture with a licensed capacity of 127,846 pumps per annum. This is inclusive of 5 units manufacturing deep well turbine pumps with a capacity of 2,000 pumps per annum.

The number of power driven pumps produced increased from 85,000 in 1959-60 to 105,000 in 1960–61. During the calendar years 1961 and 1962 the production was 127,200 and 124,800 respectively. During 1963, 150,000 pumps were produced and in 1964 162,000 pumps were produced.

The imports and exports of centrifugal pumps including turbine pumps since 1957 are given below:—

| Year | Imports | | Exports | |
|---|---|---|---|---|
| | No. | Value (Rs. lakhs) | No. | Value (Rs. lakhs) |
| 1957 | 6,173 | 123·84 | 289 | 1·09 |
| 1958 | 3,044 | 94·13 | 695 | 2·17 |
| 1959 | 3,200 | 102·40 | 1,173 | 2·87 |
| 1960 | 2,732 | 126·38 | 1,036 | 5·06 |

During the years 1960–61, 1961–62 and 1962–63, pumps and their parts together valued at Rs. 189.2 lakhs, Rs. 195.2 lakhs and Rs. 175 lakhs were imported. Imports of these items during the period April 1963 to Jan. 1964 were valued at Rs. 165.4 lakhs.

The export of these items during the last three financial years did not improve much and during April 1963 to Jan. 1964 the total export of these items and their parts amounted only to Rs. 9 lakhs.

Total demand in 1955-56 was about 40,000 pumps, and it was expected to rise from 85,000 to 86,000 pumps by 1960-61. To meet this increased demand, some schemes had been recommended under the Second Five-Year Plan. With their implementation, the capacity was expected to increase to 74,700 pumps per annum. During the 3rd Plan period it is proposed to increase production of the power driven pumps to 150,000 and the capacity to 184,000.

All the raw materials, both ferrous and non-ferrous, required are available from indigenous sources. Certain components like ball bearings, bolts with nuts, strainers, packing gland etc. are also required. But it is hoped that the country will be self-sufficient shortly in these things also which are partly imported at present. The number of persons employed in the manufacture of centrifugal pumps is about 9,000 to 10,000 at the end of Second Plan.

**Diesel Engines:** At the beginning of the First Plan there were five units engaged in the manufacture of diesel engines with a combined annual rated capacity of 6,320 engines. By the end of the Plan, the number increased to 16 with a capacity of 19,769 engines per annum. This number rose to 17 at the end of 1956 with a total annual installed capacity of 22,169 engines. Actual production during 1957 aggregated 19,997 engines. In addition, three more firms with a capacity of 10,000 engines for the manufacture of road vehicular type of diesel engines were established to meet the automobile requirements.

At the end of the Second Plan there were 23 units in production with a licensed capacity of 47,680 numbers per annum of which 9 units are in Maharashtra. The production of 43,215 stationary type of diesel engines during 1960-61 was more than double the target for the year.

The position of diesel engines manufacturing industry in 1962 and 1963 was as follows :—

| Unit | 1962 | | 1963 | |
|---|---|---|---|---|
| | Installed capacity | Production | Installed capacity | Production |
| Diesel Engines (vehicular types) .. .. .. No. | 9,000 | 8,364 | 9,000 | 8,832 |
| Diesel Engines (stationary type) .. .. .. No. | 41,292 | 42,648 | 43,692 | 55,692 |

The total demand by 1960-61 was estimated at between 20,000 and 21,000 engines upto 50 H.P. capacity and production targets envisaged in the Second Five-Year Plan were 220,000 H.P. and 205,000 H.P. respectively. During the 3rd Plan, the capacity is expected to reach 72,000 while the production will touch 66,000 numbers.

The value of imports of stationary type of diesel engines in 1961–62 was about Rs. 1.5 crores and the import of parts of the stationary diesel engines amounted to Rs. 2.5 crores. The total import of all kinds of diesel engines and their parts in 1961–62 was valued at about Rs. 13 crores. During the ten months ended Jan. 1963–64, the total import of diesel engines and their parts was valued at Rs. 6.01 crores. During the ten months ended Jan. 1963–64 export amounted to Rs. 71 lakhs (both complete engines and their parts). There is a potential demand for Indian manufactured diesel engines in Middle East and Far East countries.

The following data about export figures show that exports have been steadily rising.

| Year | Value (Rs. lakhs) |
|---|---|
| 1958 .. .. .. .. | 8·0 |
| 1959 .. .. .. .. | 13·0 |
| 1960 .. .. .. .. | 23·0 |
| 1961 .. .. .. .. | 30·0 |
| 1962 .. .. .. .. | 44·0 |
| 1963 .. .. .. .. | 53·0 |

The production of diesel engines to drive agricultural pumps rose to 27,165 in 1958, substantially higher than the target of 20,500 engines per year scheduled to be achieved by the end of the Second Plan. The value of the production in 1958 was about Rs. 5·43 crores.

The progress and plan of the industry can be summarised as follows :—

| | No. of stationary type of diesel engines (in '000) |
|---|---|
| 1950–51 production .. | 5·5 |
| 1955–56 production .. | 10·0 |
| 1960–61 capacity .. .. | 47·7 |
| 1960–61 production .. | 43·2 |
| 1965–66 (installed capacity) .. | 72·0 |
| (targets) production .. | 66·0 |

The quantities of principal raw materials required for the production of 66,000 diesel engines are approximately as follows :

Pig iron 42,000 tons, steel 45,000 tons and bronze 1,600 tons.

The total licensed capacity at the end of 1961 was 69,985 numbers per year.

**Agricultural Tractors :** At the beginning of the Second Plan, there was no regular tractor manufacturing plant. The requirements were met by imports.

The import of tractors was as follows :—

| | Quantity No. | Value (Rs. lakhs) |
|---|---|---|
| 1959 .. .. | 2,652 | 143·44 |
| 1960 .. .. | 3,843 | 333·11 |
| 1960–61 .. .. | 7,114 | 578·00 |
| 1961–62 .. .. | 8,292 | 492·00 |
| 1962–63 .. .. | 6,797 | 462·00 |

The import during 1963–64 (April to Jan.) was valued at Rs. 3.354 crores.

Indigenous manufacture of tractors doubled in 1964 from 1,600 to 3,000.

The average number of tractors added annually by way of imports was about 3,900. The shortfall is due to the import policy during the Second Plan. At the end of the Second Plan about 35,000 tractors were in use against 20,000 at the beginning. About Rs. 20 lakhs were invested during the Second Plan in this industry.

Under the 3rd Plan the capacity of the tractor industry is to be raised from 1,050 in 1960-61 to 12,000 and the production from 600 to 10,000. With the execution of the schemes so far licensed, a total annual capacity of 14,500 numbers of tractors on single shift basis will eventually be installed. During the 4th Plan, about 3 to 4 lakh tillers will be needed.

**Machine Tools :** At present Sept. 1965 there are 90 organised units manufacturing machine tools in India, of which six are large ones. The capital investment (private) is about Rs. 90 lakhs and the total number of persons employed exceeds 2,000.

The position in respect of actual production for 1961, 1962 & 1963 is given below :

| Article | 1961 | | 1962 | | 1963 | |
|---|---|---|---|---|---|---|
| | No. | Value Rs. | No. | Value Rs. | No. | Value Rs. |
| Complete tools .. | 732 | 7,32,70,800 | N.A. | 10,40,08,000 | N.A. | 16,20,00,000 |
| Accessories .. | 24,692 | 28,72,800 | N.A. | 33,28,000 | N.A. | 42,00,000 |

N.A. = Not available.

The production of lathes at the Jalahalli Works of Hindustan Machine Tools was worth Rs. 1.5 crores in 1960–61. The production in the private sector is currently worth about Rs. 75 lakhs per annum.

It was proposed to reorganise the Praga Tools Corporation as mainly a machine tool manufacturing unit under the expansion programme. With the technical collaboration of the following three British firms, its present production figure of Rs. 19 lakhs worth of machine tools per annum is planned to be increased by about Rs. 50 lakhs :

(*i*) Messrs. Kearney & Treaker—CVA Ltd. of Hore Sussex, for the manufacture of drill chucks.

(*ii*) Messrs. A. A. Jones & Shipman Ltd. of Leicester, for the manufacture of cutters & tool grinders.

(*iii*) Messrs. F. Pratt & Co. of Halifax, for the manufacture of lathe chucks.

The capacity of the machine tool industry in terms of value was Rs. 4·78 crores in 1960 as against Rs. 4·36 crores in 1959 and Rs. 4·02 crores in 1958. Production of machine tools which was expected to be about Rs. 10 crores in 1960 is to be stepped up to over Rs. 38 crores by 1965 —Rs. 23 crores for machine tools and Rs. 15 crores for small tools.

Scottish Indian Machine Tool Ltd. and Pricimax Ltd. in Gujarat are the two new entities in this field. Anjani Kumar Pvt. Ltd. has been given a licence to manufacture hand tools.

At the present rate of progress the annual production at the end of the Third Plan will be only Rs. 25 crores worth of machine tools against the Third Plan target of Rs. 30 crores.

The Govt. has decided to set up two new large machine tool factories during the Fourth Plan with technical & financial assistance from Czechoslovakia. This will be apart from the Fourth Plan expansion programmes. It is estimated that requirements of machine tools under the Fourth Plan would be around Rs. 449 crores. The production target to be achieved at the end of 1970-71 is placed at Rs. 131 crores.

**Cotton Textile Machinery :** The principal items are carding engines, spinning ring frames and looms. The target capacity and production in the First Plan for carding engines was 600 and in the Second Plan 1,692.

The following table gives the production data :

| Year | Looms | | Complete Ring Spinning Frames | | Carding Engines | |
|---|---|---|---|---|---|---|
| | Capacity | Production | Capacity | Production | Capacity | Production |
| 1956 .. | 4,980 | 2,868 | 1,596 | 1,116 | 792 | 732 |
| 1957 .. | 4,980 | 2,868 | 1,896 | 1,368 | 1,692 | 1,020 |
| 1958 .. | 5,700 | 3,192 | 2,784 | 876 | 3,000 | 1,152 |
| 1959 .. | 5,700 | 4,224 | 2,784 | 1,080 | 3,000 | 768 |
| 1960 .. | 10,560 | 5,565 | 2,040 | 1,128 | 2,640 | 1,080 |
| 1961 .. | 10,560 | 7,596 | 2,040 | 1,404 | 2,640 | 1,320 |
| 1962 .. | 10,560 | 5,856 | 2,040 | 1,572 | 2,400 | 1,500 |
| 1963 .. | 10,560 | 4,372 | 2,040 | 1,980 | 2,400 | 1,596 |
| 1964 .. | 13,224 | 4,272 | 3,756 | 2,136 | 3,756 | 1,944 |
| 1965 .. (4 month) | 4,964 | 605 | 1,252 | 632 | 852 | 484 |

The total value of the textile machinery produced in 1961-62 was Rs. 12·5 crores. The estimate by 1965-66 based on schemes already approved is expected to be about Rs. 20 crores. The total average annual requirement by value of cotton textile machinery during the 3rd Plan period has been estimated at Rs. 25 to 30 crores. The licensed capacity at present (May 1965)

covered by the major textile machinery manufacturers is about Rs. 47 crores in terms of value.

Protection to the industry has been extended upto the end of 1966 at the protective duty of 10 per cent *ad valorem* for complete ring frames.

Cotton textiles machinery worth Rs. 429·7 lakhs was imported during the year ended March 1965.

**Ball Bearings :** There is one unit with an annual rated capacity of 900,000 ball bearings on a single shift basis.

The range of sizes produced during the year 1960, was 159 in ball bearings and 27 in roller bearings.

The trend in output of ball bearings is evident below:

| Year | Installed capacity (000's) | Production (000's) |
|---|---|---|
| 1956 .. .. | 600 | 1,040 |
| 1957 .. .. | 600 | 1,577 |
| 1958 .. .. | 600 | 2,126 |
| 1959 .. .. | 900 | 1,699 |
| 1960 .. .. | 900 | 2,698 |
| 1961 .. .. | 912 | 3,216 |
| 1962 .. .. | 3,136 | 3,906 |
| 1963 .. .. | 5,706 | 4,954 |

The demand for ball bearings is now estimated at 20 million by 1966 (including roller bearings) and 36 million by 1972.

The number of units in the small-scale sector is 14 in the Punjab and one in Maharashtra.

Protection had been extended upto the end of 1965, at the protective duty of 95 per cent *ad valorem*.

The 'Associated Bearing' and the 'P.S. Ball Bearing' are the two major projects which have been licensed with authorized capital of Rs. 7.5 crores and Rs. 2 crores respectively.

It is hoped that self-sufficiency in the manufacture of ball bearings will be achieved during the Fourth Plan.

**Bicycles :** In April 1962 there were 20 units manufacturing complete bicycles. The aggregate annual capacity was 1,065,500 in 1960 and 1,117,500 on April 1961. The actual production in the calendar year 1960 was 1,050,096. Production in 1961 was slightly lower at 1,046,832. 1,184,000 complete cycles were manufactured during 1962. In 1963 production rose to 1,418,580 cycles. A target of 2·5 million bicyles has been set at the end of 1965-66.

At present (1965) the production is 1·25 million bicycles per annum.

The table below gives the data for production.

| Year | Complete Cycles | |
|---|---|---|
| | Installed capacity | Production |
| 1956 .. .. | 6,27,600 | 6,63,972 |
| 1957 .. .. | 7,47,492 | 7,90,524 |
| 1958 .. .. | 9,25,500 | 9,12,050 |
| 1959 .. .. | 10,50,504 | 9,90,744 |
| 1960 .. .. | 10,65,504 | 10,50,096 |
| 1961 .. .. | 12,17,496 | 10,48,944 |
| 1962 .. .. | 14,43,996 | 11,14,916 |
| 1963 .. .. | 14,43,996 | 11,84,364 |

The production of bicycles in the small sector which started only towards the end of March 1956, was about 109,000 bicycles in 1957 as against about 22,000 in 1956. In 1960-61 the production reached the record figure of 250,000. Production has since gone down considerably.

There are 78 units in the small sector; of these 22 are in the Punjab, 14 in Delhi, 10 in West Bengal, nine in Uttar Pradesh, eight in Bombay,* four in Madhya Pradesh and two in Madras. Five units in Rajasthan, two in Mysore and one each in Andhra Pradesh and Orissa are to go into production soon.

The internal demand for bicycles has been estimated to rise from 1.3 million at the end of the Second Plan to 2.3 million at the end of the Third Plan and the export target is put at Rs. 2 lakhs.

The target for the production of bicycle tyres and tubes under the Second Plan was twenty million per year.

The industry can practically meet all internal requirements. It is one industry where cent per cent of components are indigenously produced and no imports are permitted.

Indian capital invested in the bicycle industry in India was Rs. 3.75 crores in the Second Plan.

A Standing Liaison Committee has been formed by the Development Council for the bicycle industry to assist the Export Promotion Council.

Provision has been made to enable manufacturers of bicycles to obtain a 133 per cent replacement quota of iron and steel used in producing the bicycles exported.

Indian cycles have been successfully introduced, on a commercial scale, in six foreign countries.

The value of bicycles exported in 1963-64 was Rs. 51·2 lakhs, against Rs.1 0·2 lakhs in 1962-63.

The importing countries were Pakistan, Burma, Ceylon, Malaysia, Afghanistan, Mozambique and Nigeria.

Apart from bicycles, an overseas market on a small scale for Indian tricycles has also been built up.

In the bicycle industry cent per cent of components is being produced indigenously and no imports are being permitted.

An "Export Pool Scheme" has been introduced to facilitate sales abroad at a price lower than the domestic price. The scheme is being operated by the Cycle Manufacturers' Association of India.

With about 40 countries importing Indian bicycles, the figure of Indian exports has registered a five-fold rise during 1963-64 over the previous year.

Constituting a little over one third of the value of total exports of transport equipment, the total Indian bicycle exports, in the last financial year, amounted to Rs. 5·1 million compared with Rs. 1 million in the preceding year.

Protection granted to the industry has been withdrawn with effect from January 1, 1964.

**Sewing Machines :** At the end of the First Plan there were three organised units engaged in the manufacture of complete domestic sewing machines with a total capacity of 46,500 machines per annum. This has since gone up to seven units with a total annual capacity of 81,200 machines. During 1959 the installed capacity was 91,700 per annum and in 1960 it stood at 133,704. Actual production in 1958 was 210,900 as against 167,478 in 1957 and 130,388 in 1956. It was estimated that the demand for the domestic and industrial types of machines of 130,000 to 160,000 machines per year might go up to 300,000 by 1960-61. At the end of 1964, the installed capacity rose to 4,44,996 and production to 2,55,324. This can be met by the production from the small-scale sector as well as from the organised sector with its expanded capacity.

There are 35 manufacturers of sewing machines in the small-scale sector besides seven firms in the large-scale sector. Of the 35 small units, 14 are in the Punjab, nine in Delhi, four in Rajasthan, three in Uttar Pradesh, two in Jammu and Kashmir and one each in Bombay,* Madhya Pradesh and Andhra Pradesh. Of the seven big manufacturing firms, West Bengal and Punjab have three each and the seventh is in Delhi.

Special steps are being taken by Government to increase the output, particularly in the small-scale sector.

Moreover, about 150,000 sewing machines are expected to be produced in the small sector during the Third Plan period. It is envisaged that the rate of increase of demand during the Second Plan period will be maintained during the Third Plan as well. On this basis, it can be projected that the demand for domestic and industrial sewing machines will increase from 322,000 numbers in 1960-61 to 725,000 numbers by the end of the Third Plan.

The following table gives a bird's-eye view of the progress and programme of development during the 'Plans'.

(In '000 Nos.)

| 1950-51 Production | 1955-56 Production | 1960-61 | | 1965-66 | |
|---|---|---|---|---|---|
| | | Capacity | Production | Capacity | Production |
| 33 | 111 | 268 | 297 | 700 | 700 |

Imported components account for only Rs. 8 to 10 per machine.

In 1960-61 the export of sewing machines (all kinds) and the parts together amounted to Rs. 52 lakhs. The corresponding figures for 1961-62 and 1962-63 were Rs. 43·5 lakhs and Rs. 47.6 lakhs respectively. During the 10 months ended Jan. 1964, the export was Rs. 27·8 lakhs. During the year ended March 1965, exports amounted to Rs. 45·1 lakhs.

During 1959 the number of sewing machines exported was 22,702. During 1960-61 the number stood at 22,118 and during April-Oct. 1961 the number was 19,591. During March-December 1962, 37,756 sewing machines (both industrial and household) worth Rs. 27·73 lakhs were exported. This number is expected to increase to 125,000 by the end of the IIIrd Plan.

The countries to which Indian sewing machines are exported include British Guiana, Afghanistan, Thailand, Ceylon, Malaysia, Singapore, the U.S., Kenya, Jordan, Madagascar, Tanganyika, the Sudan, Pakistan, Uganda, Iraq, Sierra Leone, Rhodesia, Saudi Arabia, Zanzibar, Mauritius, Burma, Nepal and Viet Nam.

The protection granted to the industry has been withdrawn since January 1, 1955.

**Hurricane Lanterns :** There are 11 units with a capacity of 4,596,036 lanterns a year. The Second Plan target was 6 million.

In 1960, 5,088,380 lanterns, in 1961, 5,520,000 lanterns, in 1962, 6,216,000 lanterns and in 1963 6,564,000 lanterns were produced and in 1964 52,92,000 were produced.

During the last three years actual exports (including hurricane lanterns and their parts) were valued at only Rs. one lakh per year.

Protection has been withdrawn since January 1, 1955.

**Grinding Wheels :** There are seven units with a rated capacity of 3,180,000 Kgs. Production—1950-51 : 231 tons ; 1951-52 : 352 tons ; 1952-53: 390 tons ; 1953-54 : 395 tons ; 1954-55 : 525 tons; calendar year 1955 : 681 tons ; 1956 : 1,112 tons: 1957 : 1,452 tons; 1958 : 1,186 tons; 1959: 1,198 tons ; 1960 : 1,853,040 Kgs. In 1962 the production of grinding wheels in terms of weight was 2,556 metric tons. In 1963 it was 2,791,413 Kgs and in 1964 it was 3,035,276 Kgs.

Protection has been discontinued with effect from 1st January 1960.

**Dry Batteries :** There are five units with a capacity for producing 296·5 million dry cells

* Bilingual.

a year. The Second Plan target was 225 million. The targets of Capacity and Production at the end of the Third Five Year Plan are 400 and 350 million dry batteries respectively. About 198·24 million cells were produced in 1960, as against 187·28 million cells in 1959, 168·18 million cells in 1958, and 166·54 million cells in 1957. During the financial year 1960-61, 214·2 million cells were produced. In 1962, the production of dry batteries rose to 240 millions. The production during the year 1963 was 306 millions and in 1964 was 307 millions.

The export of dry cell batteries was valued at Rs.7.2 lakhs in 1960–61, Rs.16.7 lakhs in 1961-62 and Rs. 16·0 lakhs in 1962-63. During 1965 (April–July) exports amounted to Rs. 19·8 lakhs.

Attempts are being made to manufacture the raw material in this country—manganese dioxide, sealing compound, carbon electrodes.

During the Third Plan the capacity of the dry batteries will be raised from 224·50 million to 400 million and production will be stepped up from 200 million to 350 million numbers.

There has been no protection since January 1954.

**Storage Batteries:** There are 12 units with an annual rated capacity of 660,300. The anticipated demand in 1960-61 was 420,000. Production—1951-52: 212,836; 1952-53: 136,000; 1953-54: 179,000; 1954-55: 210,100; 1955-56: 258,086; Calendar year 1956: 314,199; 1957: 324,513; 1958: 343,400; 1959: 442,236; 1960: 509,000; 1961: 528,000; 1962: 564,000; 1963: 684,000; 1964: 768,000.

There is progress in the diversification of products and a greater degree of self-sufficiency about raw materials. Among the different products are aircraft batteries and railway requirements. Schemes for the manufacture of dry-charged batteries, iron-clad batteries, heavy duty and traction batteries have been approved. Raw material manufacture includes refined lead and microporous rubber separators.

At the end of Third Plan the capacity of storage batteries is expected to touch 900,000 and production 800,000 numbers.

Protection to the industry has been withdrawn since January 1, 1956.

**Electric Cables and Wires:** Actual production of 1. bare copper conductors, 2. winding wires, 3. rubber and plastic insulated cables and flexibles, 4. A.C.S.R. cables is as follows:

| | in tons (1) | in tons (2) | in mil. metres (3) | in tons (4) |
|---|---|---|---|---|
| 1959 | 6,732 | 2,880 | 152·4 | 14,352 |
| 1960 | 9,948 | 4,212 | 208·8 | 23,028 |
| 1961 | 7,632 | 5,664 | 210·0 | 22,392 |
| 1962 | 4,944 | 6,804 | 276·0 | 28,656 |
| 1963 | 4,392 | 7,932 | 314.4 | 32,412 |
| 1964 | 5,736 | 8,940 | 333.6 | 45,456 |

The major schemes of the First Plan were the Hindustan Cable Factory in the public sector for producing different kinds of cables, (this started regular production on Sept. 1, 1954), the expansion of the Indian Cable Company at an estimated cost of Rs. 2·8 crores, the expansion of capacity for A.C.S.R. cables from 2,500 tons to 5,000 tons per annum, the creation of producing facilities for 500 tons of insulated aluminium conductors per annum.

Rs. 32·7 lakhs worth of goods were exported in 1964-65 and Rs. 11,72 lakhs goods were imported.

**Electric Fans:** There are 24 units with an installed capacity of 871,750 fans per year.

Under the Third Plan it has been envisaged to increase the capacity from 1·8 million numbers to 2·8 million and the production from 0·98 million to 2·5 million numbers.

**Growth of Fan Industry**

| Year | Installed capacity ('000) | Production ('000) |
|---|---|---|
| 1954 .. .. | 303·6 | 238·4 |
| 1956 .. .. | 402·0 | 338·4 |
| 1958 .. .. | 765·6 | 636·0 |
| 1960 .. .. | 866·4 | 1,012·8 |
| 1962 .. .. | 1,048·8 | 1,133·5 |
| 1963 .. .. | 1,479·6 | 1,143·6 |

**Exports of electric fans were expected to reach** about 40,000 per year by 1960-61. The exports were 1958: 21,379 valued at Rs. 22·31 lakhs; 1959: 39,446 valued at Rs. 39·70 lakhs; 1960-61: 89,438 valued at Rs. 81·03 lakhs; 1961-62: Rs. 68·05 lakhs: 1962-63; Rs. 92 lakhs April–July 1965: Rs. 33 lakhs.

The export target fixed has been as below:—

| Year | Export target Rs. lakhs. |
|---|---|
| 1961–62 .. .. .. | 110 |
| 1962–63 .. .. .. | 140 |
| 1963–64 .. .. .. | 180 |
| 1964–65 .. .. .. | 230 |
| 1965–66 .. .. .. | 300 |

The physical target of export has been fixed at 2,50,000 fans by 1965-66.

The industry employs annually 8,000 persons. Investment during the Second Plan: Rs. 75 lakhs. Additional investment of Rs. 375 lakhs to be made in Third Plan.

**Thirty different countries bought Indian fans, the main buyers being Ceylon, Burma, Malaya, Singapore, Kuwait and Thailand.**

**Electric Lamps:** There are 13 units manufacturing general lighting service lamps with an installed capacity of 65·30 million lamps per year. The target was 50 million by 1960-61. The Third Plan target of production is 6·0 million fluorescent tubes and 68·0 million G.L.S. and other lamps.

Production was, 1956: 29.9 million; 1957: 32.13 million; 1958: 29.50 million; 1959: 33.73 million; 1960: 38.05 million; 1961: 46.89 million; 1962: 58.54 million; 1963: 66.51 million; 1964: 70-00 million.

There are two units with an installed capacity of 1,200,000 units to produce fluorescent lamps. Production in 1956 was 880,891; in 1957: 1.018,964; in 1958: 1,010,000; in 1959: 1,114,991; 1960: 1.460,000; 1961: 1.894,800; 1962: 5.536,680; 1963 (Jan. to Nov.): 6,049,810. 1964: 70,00,000; 1965: 74,00,000.

**Electric Motors:** There are at present 66 units in the large-scale sector with a total annual capacity of 732,520 H.P. of these, only 41 had installed their capacities so far. In addition, there are several small units which are not registered but which assemble electric motors and manufacture parts. There are 130 units in Small Scale Sector with a production capacity of 0·416 millions H.P.

Eleven out of the fifteen large units have schemes for expanding their capacities and 16 new units have also been licensed.

This will raise the total capacity in the large sector to 1,134,290 H.P.

Actual production was, 1953-54: 161,000 H.P.; 1954-55: 201,000 H.P.; 1955-56: 272,000 H.P.; 1956-57: 388,000 H.P.; 1957-58: 507,000 H.P.; 1958-59: 636,000 H.P.; 1959-60: 575,000 H.P.; 1960-61: 734.000 H.P.; 1962: 984,000 H.P.; 1963: 11,83,901 H.P.; 1964: 13,18,200 H.P.

The total production by the large units in 1959 was 581,512 H.P. (91,752 motors). In 1960 the production was 691,300 H.P. (129,150 motors). The production is confined mainly to the manufacture of electric motors of one to 30 H.P. ratings. A few units also manufacture motors of large ratings.

Under the Third Plan, the production of electric motors is expected to be 2·5 million H.P.

A.C. 3 phase induction motors upto 225 H.P. and motors of the slip-ring type of up to 125 H.P. are now being produced in the country.

In 1963-64 the value of exports amounted to Rs. 2·4 lakhs. In the next year it went up to Rs. 6·75 lakhs, where the target for 1960-61 is fined at Rs. 10 lakhs and for 1970-71 at Rs. 100 lakhs.

The Government had accepted the Tariff Commission's recommendations that the existing protective duties of 15 per cent *ad valorem* on electric motors and 20 per cent *ad valorem* on component parts of electric motors, excluding control gear, should be continued for a further period of three years ending December 31, 1961. Protection was first granted to the electric motor industry in 1948.

**Electric Transformers:** There are 19 units with an annual rated capacity of 1,404,000 KVA. against the Second Plan target of 1.5 million KVA by 1960–61. During 1964, the estimated capacity was 20,77,000 KVA, while production was 31,26,000 KVA. By the end of the Third Plan the capasity is expected to be of the rate of 4·0 million KVA with production target of 3·5 million KVA. The industry has been enjoying protection since last 12 years.

In 1959 the production was 1,052,629 KVA, in 1960 it was 1,103.470 KVA in 1961 it was 1,774,800; 1962: 2,356,800 KVA; 1963: 26,29,010 KVA.

Imports were valued at Rs. 157.35 lakhs in 1958; Rs. 280.53 lakhs in 1959; Rs. 404.46 lakhs in 1960–61; Rs. 790 lakhs in 1961–62; Rs. 390 lakhs in 1962–63. During the ten months in 1963–64 India imported Rs. 267 lakhs worth of transformers and their parts.

**Soap:** The organised sector contains some 59 units with an installed capacity of 229,042 tons per annum, though not all of these are actually in production, while the cottage sector contains over 3,000 units, scattered throughout the length and breadth of India. Naturally there is a concentration of these small factories in those areas where oil-seeds are most plentiful. For example, the Punjab, U.P., and Gujarat each has an annual production of over 40,000 tons of soap, while Andhra, another large State, produces just 8,000 to 10,000 tons per year. The production in 1959: organised sector only: 130,000 tons. In 1960: 136,400 tons, in 1961: 147,240 metric tonnes; 1962: 150,276 tonnes. In 1963, the production was 1·64 lakh tonnes and in 1964 it was 1·68 lakh tonnes.

With total soap production in 1958 at about 390,000 tons, the amount of oil consumed was about 190,000 tons. The oils are of various kinds, of which groundnut oil, coconut oil and palm oil are the most important. All the groundnut oil is produced in India, but it is necessary to import the palm oil and some of the coconut oil (which is, of course, used for many other products besides soap). It is estimated that the tonnage of oil required for soap alone will grow by 40 per cent every five years and that, twenty years from now, the total annual requirement of oils and fats for all products will have increased from about 1·8 million tons to 6·3 million tons.

The total demand for soap is likely to be 629,000 tons in 1966, 870,000 tons in 1971 and 1,220,000 tons in 1976.

The capacity of the industry is expected to be raised to 254,000 tons and production to 500,000 tons during the Third Plan period.

Exports were 1959: 498 tons valued at Rs. 16.29 lakhs and April to Sept. 1960: 227 tons valued at Rs. 5.98 lakhs; 1960–61: Rs. 17.3 lakhs; 1961–62: Rs. 15 lakhs; 1962–63: Rs. 18.6 lakhs; 1963–64 (April to Jan. end): Rs. 16 lakhs. During April–July 1965 exports amounted to Rs. 11·5 lakhs.

**Matches:** There are 439 units with a rated capacity of 45.3 million gross boxes. The Second Plan target was 35·3 million gross boxes.

Actual production in millions of gross boxes, was: 1955-56: 34·1; 1956-57: 35·9; 1957-58: 32.2; 1958-59: 34.9; 1959-60: 37.3; 1960-61: 37.5; 1962: 28.5; 1963 (Jan.-Sept.): 21.7. In 1963, production was 4,128 million boxes. During 1964 production amounted to 4,088 million boxes of 50 sticks.

The demand is envisaged to be about 42 million gross boxes by 1965-66.

**Plywood:** The number of units on the approved list of DWCI is 72 with an annual installed capacity of over 13·40 million sq. meter on single shift. Besides, there are a large number of unapproved factories with an estimated capacity of about nine million sq. ft. Actual production of tea-chest plywood in million sq. ft. was 1959-60: 98.8; 1960-61: 98.2. In 1962 the total installed capacity of the plywood industry was 130 million sq. metres and production 143.5 million sq. metres. In 1963 (Jan.-Aug.) production reached 128.7 million sq. metres. In 1964, the production touched 197·8 million sq. meters and during 1965 (Jan.–June) it reached 112·0 million sq. meters.

Plywood sheets and chests valued at Rs. 2.67 crores were exported, the highest in the past few years. Import was negligible.

During the year 1963–64 there was a spurt in production and the commercial varieties of plywood increased by 30 million sq. feet over the previous year. Now the industry meets the entire demand of the country.

Protection has been withdrawn from 1st January 1961.

**Razor Blades:** At present there are seven organised units in this industry. The acutal production of razor blades in 1959 was 433 million. In 1960 it was 568 million. in 1961 it was 768 million and in 1962, 671 million. 1963: 840 million and 1964: 892 million. This has exceeded th Third Plan target of 600 million blades.

The production or razor blades in the large-scale sector in 1963 amounted to 822.2 million. Apart from meeting internal requirements, a sizable quantity of razor blades is being exported to Asian, African countries. The industry exported razor blades worth Rs. 3,24,269 and Rs. 5,97,061 during 1961–62 and 1962–63 respectively. The exports during the six-month period ended June 1964 amounted to Rs. 6·2 lakhs.

**Thermos Flasks:** The production of thermos flasks in India, which was just a little over 6,900 dozens in 1951, increased to 53,368 dozens in 1957, 65,000 dozens in 1958, 1,24,093 dozens in 1959, 1,21,320 dozens in 1960 1,23,600 dozens in 1961 and in 1962: 1,512,000; 1963 19,44,000 pieces; 1964: 19,44,000 pieces.

There are now six units in the country manufacturing thermos flasks with a total installed capacity of 37,80,000 a year.

Three units are engaged in the manufacture of ampules by automatic machines. The total capacity of these three units is over 35 lakh ampules per month. Besides these there are a number of small-scale units manufacturing ampules by the table-blowing process.

**Printing Machines:** As against an annual production of Rs. 5 lakhs in the country the 3rd Plan target is Rs. 3.5 crores. Domestic demand during the 3rd Plan is estimated to be Rs. 5 crores.

Nine new schemes, with a production capacity of about Rs. 5.9 crores per year, have been approved for the manufacture of printing machinery. This is in addition to the existing installed capacity, in terms of value for about Rs. 84 lakhs a year.

The Government has decided to set up a standing panel for the industry, with representatives of industry, Government and technical experts, on it, to foster rapid development of the industry.

**Typewriters:** Production figures are as below: 1960: 23,556; 1961: 31,104; 1962: 36,324; 1963: 42,396; 1964: 44,064.

During 1964-65, typewriters worth Rs. 3·98 lakhs were exported. Typewriters are in seven languages: English, Hindi, Bengali, Marathi, Gujarati, Assamese, Tamil. The demand for typewriters during the Fourth Plan is likely to rise by over a lakh units. The gap between requirement and production, will come to about 42,000 units at the end of 1965-66.

**Watches:** A number of new schemes has been sanctioned and is under implementation for the production of time-pieces, clocks and watches. Two units are already producing electric clocks. Two schemes for manufacture of lever clocks are now under implementation. For time-pieces, two schemes with a total capacity of 1·8 lakhs have already been sanctioned and more proposals are under consideration. As regards watches, a scheme in the private sector in collaboration with a group of French firms has been put through. The collaborators are the consortium of watch manufacturers known as S.E.D.I.M. The venture is known as Indo-French Pione Industries Private Ltd. and is situated at Goregaon, a suburb of Bombay. It has an initial capacity to produce 90,000 watches annually, on a single shift basis. This capacity will progressively be stepped up to 310,000 by the fifth year of production. The price range of the watches is given as Rs. 50 to Rs. 100. The unit went into production by the end of 1961. A second scheme for setting up a factory in the public sector with the assistance of a Japanese firm has also materialised. The public sector factory is situated in the vicinity of Hindustan Machine Tools at Bangalore. The foundation stone was laid on Jan. 28, 1961. This factory, which is in collaboration with Messrs. Citizen Watch Co., Ltd., Japan, will produce 240,000 watches on a single shift basis. It went into production in 1962. It has a licened capacity of 3·5 lakhs annually. (See 'Hindustan Machine Tools Ltd.' under "Government Industrial Undertakings" for more details.) The capacity of these two schemes would be seven lakh watches every year.

A new enterprise the Hindustan Equipment Suppliers Ltd. has been set up at Jogeshwari in Bombay in the private sector by the firm of Patel Engineering Co. Ltd. in collaboration with Chronotechna of Czechoslovakia. The factory, which went into production in July 1963, produces three models of alarm timepieces.

A correct assessment of the demand for clocks, timepieces and watches is difficult as in the case of other similar durable consumer goods. A panel set up in 1959 made a broad assessment of the present and future requirements as follows:—

Estimate of Effective Demand.

| | Present requirements (Nos.) | Requirements by 1965-66. |
|---|---|---|
| Clocks .. | 100,000 | 200,000 |
| Timepieces .. | 600,000 | 1,200,000 |
| Watches .. | 1,000,000 | 1,200,000 |

Under the Third Plan the capacity of the public sector watch factories is placed at 360,000 watches per annum while the production is expected to reach 240,000 watches at the end of the Plan.

In 1962 the total production of clocks was 65,700 pieces and at the end of 1964, the production was 1,51,000 pieces.

**New Lines of Production:** Production of a number of new items like sewing machine needles, hand-sewing needles, hypodermic needles, heaving industrial sewing machines, hand-model addressing machines, staples and pressure cookers has already started in the country. Schemes have also been sanctioned to manufacture, for the first time in the country, items like self-lubricating porous borings, electric addressing machines, bicycle tube walls and metallic safety razors, besides timepieces and watches. Exports of engineering goods in general during 1964-65 amounted to Rs. 13·33 crores against Rs. 9·09 crores in 1963-64.

**Refractories:** There are 54 refractory factories with a total capacity of about 9·6 lakh tons per annum. About 20 of these have expansion programmes involving a total additional capacity of 3·44 lakhs tons annually. Twenty-two new factories with a total capacity of 11·93 lakh tons per annum have also been licensed. The target fixed under Second Plan for refractories was Rs. 12·5 lakh tons as compared with a demand of 10 lakh tons. Production during the years 1960 to 1964 is given below.

| Year | Production (000 tons) |
|---|---|
| 1960 .. .. .. .. | 550·8* |
| 1961 .. .. .. .. | 597·6* |
| 1962 .. .. .. .. | 650·4* |
| 1963 .. .. .. .. | 653·2* |
| 1964 .. .. .. .. | 693·3* |

* 1,000 metric tons. The latest figures relate to 54 units.

A large factory of 66,000 tons annual capacity came into production in Orissa with W. German collaboration during 1964. This plant is expected to cater to the needs of the steel industry. It is also proposed to take up, for the first time in India, manufacture of chemically bonded refractories in collaboration with an American firm and production of this is expected to be taken up at three factories. Plans for the world's largest aglomeration and. refractory materials shop at the Bokaro Iron & Steel mill were completed by Leningrad specialists. This will supply Indian metallurgists annually with 6 million tons of crushed ore.

The development programme for refractories during the Plan periods is given below.

(In million tons)

| 1955-56 Production | 1960-61 Estimated | | Targets for 1965-66 | |
|---|---|---|---|---|
| | Capacity | Production | Capacity | Production |
| 0·29 | 0·82 | 0·55 | 2·0 | 1·5 |

**Clinical Thermometers:** The chief production centre will be the National Instruments Factory (see separate note in 'Government Industrial Undertakings') which in collaboration with Japan was expected to produce 6,00,000 thermometers in 1962–63. There are 3 units in this industry. As at the end of 1964, the installed capacity was 19,08,000 while the production was 13,31,640.

**Fountain Pens:** The number of pens manufactured during 1959 was 11 to 12 million in the large-scale sector. The small-scale sector, it is estimated, manufactured over 10 million pieces.

**Paper Making Machinery:** As many as 15 schemes have been approved by the Government. It is expected that within the next three years or so, nearly Rs. 10 crores worth of paper making machinery both of large scale type or small-scale

type, would be manufactured. Since the per capita consumption of paper is only 3 lbs in India, against 233 lb in U.K., 453 lb in U.S.A. and 36 lb in U.S.S.R. several of world's major paper machinery manufacturers, have established workshops in India and have supplied a fairly wide range of equipment to the existing paper plants.

**Tea Machinery :** The country is almost self-sufficient. The proposed annual capacity by 1965 is Rs. 1·75 crores. In 1962 the total production amounted to Rs. 142-64 lakhs. In 1958 there were only 2 units, which increased to 7 in 1960. India's tea processing machinery has also found a good market in Ceylon, Kenya, Iran, Pakistan and Mauritius. The export of tea machinery stood at Rs. 21·1 lakhs in 1963.

**Jute Mill Machinery :** The production target for the Third Five Year Plan is Rs. 2·5 crores per annum.

The growth of the industry has been as under :

| Year | Production (Rs. lakhs) |
|---|---|
| 1956-57 .. .. .. | 37·83 |
| 1957-58.. .. .. .. | 70·81 |
| 1958-59 .. .. .. | 90·21 |
| 1959-60 .. .. .. | 178·43 |
| 1960-61 .. .. .. | 174·04 |
| 1961-62 .. .. .. | 211·54 |
| 1962-63 .. .. .. | 308·70 |
| 1963-64 .. .. .. | 375·00 |

**Woodworking Machines :** Woodworking is one of the major old industries in our country. So far, we have been importing woodworking machines into this country and recently about four manufacturing units have been licensed for production of woodworking machines to meet the requirements in the country. At the end of 1964, there were 3 units engaged in this work.

Festo Elgi Private Limited has a programme of manufacturing woodworking machines in Coimbatore with the collaboration of Festo Maschinenfabrik, Esslingen—West Germany. The factory of Festo Elgi Private Limited, was expected to commence production by the middle of 1964.

Festo Elgi Private Limited has a programme of manufacturing 1,700 machines per annum and they have a further programme of expansion during the next year.

# PROHIBITION

THE real impetus to the prohibition movement was given by the Indian National Congress which considered prohibition as one of the items of their programme. At the Karachi session when the Bill of Rights was passed, it laid down that even when the Congress would be called upon to frame the Constitution it would include total prohibition in the whole country except for medical purposes as one of the articles of the Constitution.

Madras was the first State to introduce prohibition though only in certain districts.

In the early days in 1937 and 1938, partial prohibition was introduced. Of course, it was an amendment of the Excise Act.

A Prohibition Enquiry Committee was appointed by the Planning Commission on December 16, 1954. The Committee recommended total prohibition in India from 1958.

In the middle of 1963, a study team on prohibition was appointed by the Planning Commission with Mr. Tek Chand as chairman. The report was placed in Parliament on May 6, 1964. It outlines a four-phased programme to accomplish complete prohibition by 1975-76 and recommends strict social, legal and penal measures to curb the drink evil.

The measures suggested to curb drinking appear fairly harsh. These include summary trial of those charged with prohibition offences which should also be declared non-bailable, a jail sentence for habitual offenders, shifting of the onus of proof to the accused, institution of collective fines, externment, forfeiture of property and disqualification from elections and government service.

The law of evidence is sought to be suitably amended as also the provisions relating to civil damage.

As far as enforcement is concerned, the committee has stressed that the present system of entrusting it to the police should continue unchanged. Two main modifications are suggested : the strength of the area police force should be marginally increased and the personnel, especially those entrusted with the prohibition drive, should be carefully chosen for their faith in the programme.

The measures suggested by the committee are aimed at containing and eliminating illicit distillers and other law-breakers and slashing their profit margins.

### 7-Point Suggestion

The committee has made a seven-point suggestion for more successfully resisting the "onslaught" of illicit distillers and smugglers.

The suggestions are : legal solution ; containment of medical and toilet preparations ; control of molasses and other raw materials ; mass education and systematic publicity ; effective enforcement through improved administration ; economic containment of illicit distillation ; and use of modern scientific appliances for detection of inebriety.

The committee finds that, generally, between ten and 25 per cent of families report drinking in wet areas and about the same proportion of adult males are given to drink. Fewer factory workers than plantation and mine workers indulge in drinking.

The liquor expenses of working class drinking families average about ten per cent of their incomes. But the statewise averages vary between five and 22 per cent of expenses. In numerous cases, as much as one-fourth of the family expenditure is on liquor. A one per cent increase in income is generally found to be associated with a ·6 per cent increase in drinking.

Dealing with the financial aspect of prohibition, the committee has come to the conclusion that the loss to the fiscal authority will be more than offset by the gain to the community and the total welfare will have increased.

The team finds that the total drinking bill of the country may be about Rs. 146 crores, of which a sum of Rs. 52 crores is the value of illicit liquor — Rs. 43 crores spent in the dry areas and Rs. 9 crores in the wet areas.

The excise revenue loss in the dry areas has been estimated at Rs. 40·1 crores, while the expenditure arising out of the enforcement of prohibition may be Rs. 5·4 crores, making a total loss of slightly less than Rs. 46 crores.

This loss has been offset only to the extent of nearly Rs. 31 crores owing to a reduction in the drinking bill of the dry areas. Thus, the net loss incurred by the Government and the rest of the society together seems to be Rs. 15 crores.

If prohibition were enforced in the wet areas by 1975-76, the total revenue loss may be Rs. 80 crores. But the impact can be minimised through a phased programme and the loss can be easily made good through receipts from sales tax, Central excise duties, etc. which may be expected to grow by Rs. 382 crores over the existing base.

In order to contain illicit distillation and allied crimes, the team recommends the availability, under a permit system, of mild alcoholic beverages with less than five per cent alcohol in volume such as ciders, beers and other wines.

Mild liquor is to be made available only to persons above 30, so that the young, the impressionable and economically and socially vulnerable population is kept out of the purview of liquor. The maximum liquor permitted per month to an individual is three units, a unit having been defined as equivalent to 12 quart bottles of bear or five per cent alcohol in bulk.

The team recommends the sale of toddy under controlled conditions for meeting the challenge of illicit distillation.

### CONDITIONS SPECIFIED

Some of these conditions are : A ceiling of five per cent. alcohol in bulk ; production and sale under Government control ; bottling and refrigeration wherever possible ; the drink to be consumed only at the place of sale ; the quantity of toddy served to an individual to be limited ; drinking hours to be regulated ; and toddy not to be served for those below 21.

The liberalisation of toddy, however, is not recommended for Gujarat and Madras, where prohibition has by and large been found to be successful.

A reduction in the tax rates and liquor prices has been called for to shift illicit drinkers to the licit market. Reduced prices, the Committee believes, will not increase the aggregate drinking so much as shift drinkers to licit varieties and hamper the business of illicit distillers. It has recommended the abolition of the binding system and its substitution by a system of tenders and if need be, by the public sector taking over the responsibility for production and distribution of liquor.

### DISAGREEMENT

The team has examined the new liquor policy announced in Maharashtra. While appreciating the broad strategy, it finds itself in disagreement on some points. The issue of permits for hard liquor to age groups below 40 years will cause fresh addiction and habituation to drink. The issue of permits on medical grounds, according to the team, is illogical as the medical profession does not attach curative properties to alcohol, the only grounds for permits being addiction and habituation. But as this requires a long history of drinking, there is no reason for issuing permits to persons below 40 years.

While the liberalisation of mild alcoholic drink is seen to be necessary, the team finds an uncontrolled liberalisation fraught with evil consequences. The age group 21 to 30 includes students and a large proportion of the industrial and other workers. These persons are either not earning for themselves or are earning rather little and not yet settled firmly in life. This is particularly true of the age group 21 to 25.

The team feels that permission to consume alcoholic beverages irrespective of age and economic and social circumstances can be calamitous. In the absence of education, publicity and persuasive measures, the team refused to accept the alleged magnitude of illicit activity in Maharashtra at its face value and finds a certain amount of defeatism in the new Maharashtra policy. The issue of permit on the basis of a certificate by any medical practitioner is shown to be full of hazards.

The team has noted the widespread prevalence of illicit activities in dry areas and has recommended various measures which will restrict the

availability of both modern medicinal and Ayurvedic products that go into illicit liquor. It has suggested that production of items of higher alcoholic content should be in the hands of the public sector.

## PERMIT SYSTEM

The Committee's scheme of permit system is based on grounds of addiction and habituation together with some other considerations such as the number of dependents and family circumstances.

The minimum income which would qualify for a permit to a person with an average family of 5 including himself ought to be Rs. 500 per mensem and this should be raised by Rs. 100 with each addition to the number of dependents.

Above the minimum qualifying income levels, the quantity of liquor permitted may be raised from 1 to 4 units and could go upto 6 units only in exceptional circumstances. A unit is to be defined as one quart bottle of spirit or 4 quart bottles of wine or 12 quart bottles of fermented liquor. The board which issues permits should consist of a nominee of the executive authority, a social worker and a representative of the medical department. Not every registered medical practitioner should be allowed to issue a certificate.

## PROHIBITION IN STATES

Some facts and figures about prohibition in some of the States for which details are available are given below. Figures within brackets indicate the date of introduction of prohibition.

**Andhra :** Prohibition has been introduced in the Andhra region comprising eleven districts namely Chittoor (1938), Cuddapah (1938), Kurnool (1946), Guntur (1947), Nellore (1947), Srikakulam (1948), Visakhapatnam (1948), East Godavari (1948), West Godavari (1948), Krishna (1948) and Banganapalli of Kurnool District (1948).

Prohibition is not being enforced in the Telangana area of the State.

**Assam :** The policy of the Assam Government has been to extend "dry laws" all over the State, in a phased manner.

Prohibition was first introduced in Barpeta subdivision, Kamrup District, on March 1, 1953, and extended to the northern portion of Gauhati subdivision from October 2, 1954. The entire Kamrup District was declared dry from January 26, 1956.

The entire Nowgong District was declared dry from April 1, 1960 and the entire Goalpara District from April 1, 1962.

Four more districts in the Plains region and all the four autonomous hill districts are yet to be covered by prohibition.

The budget allotment for enforcing prohibition was Rs. 2,56,750 during the year 1964–65 and Rs. 2,47,945 for the year 1965–66.

**Bihar :** There is no prohibition at present in the State.

**Delhi :** Is committed to introduce prohibition gradually and with this aim and view, the following steps have been taken from time to time towards prohibition :—

1) Reduction in country liquor shops from 7 to 2 and decrease in the alcoholic strength of country liquor from 80 degrees under proof to 50 degrees under proof ; 2) Increase in the number of dry days to 134. On these days liquor and bhang shops are closed for sale and service of liquor and bhang ; 3) Increase in the rates of duty and assessment fee ; 4) Prohibition of import of country liquor in any quantity within the radius of five miles inside Delhi border ; 5) Enhancement of the punishment under the penal provisions of Excise Act and also prescribing a minimum sentence of imprisonment for the offence of illicit distillation ; 6) Regulating the sale and possession of spirituous preparations by a licence and prescription ; 7) Increase in the strength of preventive staff and re-organization thereof on zonal basis.

The budget allotment for the enforcement of above prohibitory measures and also for other expenses is Rs. 2,56,000 for the year 1965–66.

**Gujarat :** There is total prohibition throughout the State. Prohibition was first introduced in the industrial area of Ahmedabad city, Bardoli taluka of Surat District and two talukas of Broach District, in 1938. In 1939, it was extended to Dascroi taluka, Valod Mahal and whole of Broach District. Excluding Kutch, total prohibition was introduced in Gujarat in 1950. In Kutch it was introduced on Jan. 7, 1956.

The implementation of the prohibition policy of the State through various agencies is looked after by the Directorate of Prohibition and Excise and the enforcement part of it has been entrusted to the Police Department in the State.

Neera and palmgur centres with their allied industries have been started in several parts of the State so as to popularise neera as a nutritious drink and utilize the trees and the former tappers for productive and constructive purposes.

As a future programme, it has been decided to launch intensive prohibition drive in selected areas of the State.

With the introduction of Panchayat Raj in the State from April 1, 1963, prohibition propaganda work in the areas covered by panchayats has been handed over to the panchayats to eradicate the evils of drinks and drugs.

The prohibition study team appointed by the Government of India under the chairmanship of Mr. Justice Tekchand has appreciated the relative success of prohibition in Gujarat.

Tourist permits for consumption of foreign liquor are issued on presentation of tourist card. Liquor shops operate for such permit holders in selected cities like Ahmedabad, Surat and Rajkot.

**Kerala :** At present prohibition is in force in Kozhikode (1947), Cannanore (1947), Palghat (1947), and Trivandrum Districts (1948 & 1949), Talappilly (1949), and part of Cranganore Taluks (1950) of Trichur District, Kottarakkara (1955) and Pathanapuram taluks of Quilon District, (1950), Fort Cochin area of Ernakulam District (1947) and some enclaves of Alleppey District (1947). Area under prohibition is 8,779·05 sq. miles.

Budget allotment for 1965-66 : Rs. 5,27,000.

**Madhya Pradesh :** At present prohibition is in force in ten districts. Names of districts showing within brackets area under prohibition and date of enforcement respectively : Khandwa (whole district ; 1946) ; Saugor (whole ; 1938) ; Bamoh (whole ; 1938); Narsingpur (whole ; 1938); Hoshangabad (whole ; 1942 & 1946) ; Vidisha (whole excluding Sironj Sub-Divn. ; 1948) ; Sironj (Sub-Divn. ; 1957) ; Durg (Durg Tehsil ; 1946) ; Bilaspur (Tehsil Janjgar ; 1946) ; Raipur (Tehsil Raipur ; Dhamtari area ; Baloda Bazar area ; Mahasamud area and Gariaband area ; all 1940) ; Jabalpur (Katni town ; 1946 ; Rest of Katni & Murwara Tehsil ; 1953).

**Madras** was the first State to introduce prohibition in the whole country.

Salem District went dry on 1st October 1937. But the scheme had been scrapped with effect from January 1, 1944, on the ground that excise offences had gone on increasing and as it was considered by the then Government that public enthusiasm which greeted the enactment the Prohibition Act had waned.

Prohibition in the composite State of Madras was introduced area-wise in three stages. Eight districts were made dry with effect from 1st October 1946, eight more in 1947 and in the last stage, prohibition was extended to the remaining nine districts from 2nd October 1948.

Prohibition continues to be in force throughout the State. The Inspector-General of Police is in charge of the enforcement of prohibition throughout the State. Since no separate head has been allotted for implementation the expenditure has been covered by the allocation in the Police Budget.

**Maharashtra :** Total prohibition was introduced in 1950 in all districts of Western Maharashtra forming part of erstwhile Bombay State. In other regions of the State, namely Vidarbha and Marathwada, prohibition had to be introduced at different times since then.

There is no separate budget allotment for enforcing prohibition.

Changes in the 14-year old prohibition policy of Maharashtra was announced by the Chief Minister on the 31st of December 1963. All the changes except the removal of the ban on the manufacture and sale of beverages with an alcoholic content up to 3·5 per cent and toddy of equal strength took effect from April 1, 1964. A liberalisation in the procedure for liquor permits has been introduced. Persons above the age of 40 are eligible for permits on straightforward declaration that they need alcoholic drinks for maintaining their health. A certificate to this effect from the applicant's medical adviser would suffice for this purpose. The rest will have to get permits under the existing system. While the maximum quota for persons above the age of 40 has been fixed at four units, it is three in the case of those between 30 and 40 years of age, and two units for those below 30. One unit would fetch either four bottles of wine or 18 bottles of beer. The permit availability period will be two years in the case of those above 40 and one year for the rest.

During 1964-65, 56,994 health permits were issued. Of these 50,793 were to those above the age of 40.

**Mysore :** Prohibition made a beginning in Old Mysore in 1938, when it was introduced in Rural Welfare and Health Centres in the talukas of Ramanagaram and Channapatna in Bangalore District on an experimental basis.

Further, as a measure of co-operation with the Madras Government, Molakalmuru taluka of Chitradurga District and Pavagada taluka of Tumkur District were declared dry in January 1947. In the middle of the same year, Ramanagaram and Channapatna in Bangalore District were declared completely dry.

Prohibition was formally introduced in five districts, out of the total of nine districts of Old Mysore, in 1948.

There was an enlargement of the dry zone in the State with the merger in 1956 of Bellary District. After the reorganisation of the State in 1956, there was again a big addition to the dry area. Bijapur, Belgaum, North Kanara and Dharwar Districts of Bombay, South Kanara and Kollegal of Madras, and Coorg, which were already dry, were integrated to form the new State of Mysore.

Since 1956, prohibition has been extended only in a small way.

At present (1965), with the exception of Bangalore City and certain talukas of Bangalore District, Gulburga and Raichur Districts, the entire State is dry. The prohibition zone covers about 81 per cent of the area and 75 per cent of the population of the State.

There is no special provision in the Budget for enforcing prohibition since implementation of this policy forms part of the functions of the Police, who are required to attend to the detection of prohibition offences in addition to other duties.

The State adopted a uniform prohibition law in 1962, replacing divergent laws in force in various areas till then. The new law also makes provision for deterrent punishment.

The Tek Chand Committee report is under the consideration of the Government (May 1965).

The Mysore Government has decided in Nov. 1965, to liberalise the prohibition laws on the pattern followed more or less by the Maharashtra Government.

Permits on the basis of medical certificates will be issued to all persons over the age of 30 years. The fee fixed for getting permits would be Rs. 20 per year against the present fee of Rs. 100.

Another phase of liberalisation was likely to be announced in Jan. 1966.

**Orissa:** Prohibition was first introduced in the districts of Puri, Cuttack, Balasore, Ganjam and Koraput with effect from 1st April 1956. Since status quo is maintained in prohibition policy of the State, prohibition is now in force only in the above districts excluding Kashipur P.S. area which was previously a part of Kalahandi district. Prohibition is enforced under the provisions of the Bihar and Orissa Excise Act, 1915 but not under Orissa Prohibition Act, 1956 as the latter has not yet come into force. No specific budget allotment is made by the Excise Department for enforcement of prohibition as no separate staff exist for the purpose.

Future programme will be settled after receipt of Government of India's decision on the recommendations of Prohibition Study Team set up by the Planning Commission, Government of India. Recommendations of the Team have been received by the Government of India and will be discussed in a conference of Chief Ministers of States and then a final decision is expected to be given by the Government of India for implementation of prohibition on an all-India basis.

**Rajasthan:** From 1956, drinks in hotels, restaurants, clubs, cinemas, bars, messes have been stopped. A few specified hotels serving foreign visitors and tourists have been allowed to serve foreign liquor to such persons in special rooms.

Following days are observed as dry days in the year: Republic Day; Harijan Day; Independence Day; Mahavir Jayanti; Budh Purnima; Guru Nanak birthday; Birthday of Prophet Mohmmad; Krishna Janmasthmi; Mahatma Gandhi's birthday.

Liquor shops are closed once in a week as they are exempted from the operation of section 11(1) and 12(1) of the Rajasthan Shops and Commercial Establishment Act, 1958.

The former Abu area in Bombay which was integrated in Rajasthan in 1956, has been kept dry.

### STATE-WISE FIGURES

(*Latest available*)

Comparative statewise statistics of consumption and revenue for 1961-62 with 1957-58 figures in brackets: Andhra Pradesh (447,893) 1,480,759 gallons and (Rs. 1,44,68,580) Rs. 2,28,45,869; Assam (678,524) 838,649 gallons and (Rs. 1,91,08,397) Rs. 1,94,95,656; Bihar (1,880,000) 2,275,000 gallons and (Rs. 3,99,39,000) Rs. 5,01,08,000; Gujarat (4,103) 8,885 gallons and (Rs. 1,44,230) Rs. 2,39,844; Jammu and Kashmir (99,190) 214,375 gallons and (Rs. 25,30,801) Rs. 48,35,184; Kerala (1,176,961) 1,204,920 gallons and (Rs. 1,93,61,748) Rs. 2,88,60,335; Madhya Pradesh (1,161,735) 1,190,909 gallons and (Rs. 3,92,00,345) Rs. 4,84,95,619; Madras (86,317) 124,908 gallons and (Rs. 12,31,577) Rs. 7,41,361; Maharashtra (1,196,779) 647,316 gallons and (Rs. 93,91,432) Rs. 40,52,154; Mysore (10,346,329) 6,028,677 gallons and (Rs. 2,66,11,622) Rs. 2,74,65,174; Punjab (810,593) 864,115 gallons and (Rs. 4,17,44,193) Rs. 5,35,54,660; Rajasthan (891,059) 953,675 gallons and (Rs. 2,34,13,325) Rs. 3,53,39,950; Uttar Pradesh (1,134,679) 1,648,329 gallons and (Rs. 4,33,08,797) Rs. 6,95,34,709; West Bengal (1,143,215) 1,599,940 gallons and (Rs. 4,43,00,000) Rs. 5,88,78,813; Delhi (353,904) 481,288 gallons and (Rs. 94,30,540) Rs. 1,11,17,804; Himachal Pradesh (29,112) 38,293 gallons and (Rs. 25,72,925) Rs. 21,58,933; Manipur (2,734) 781 gallons and (Rs. 16,752) Rs. 25,250; and Tripura (7,128) 24,971 gallons and (Rs. 62,268) Rs. 78,409.

# SPORTS

The sports come within the purview of the Ministry of Education.

An advisory body, called the All India Council of Sports, composed of 20 persons eminent in the field of sports and games advises the Ministry in all matters relating to development of Sports in the country.

The All India Council of Sports has been reconstituted for a period of 2 years with effect from 16-7-1965 with Gen. K. M. Cariappa as President and B. P. Bagchi, Jt. Secretary, Ministry of Education, as Secretary.

The Government of India have set up a National Institute of Sports at Patiala to provide adequate facilities for the training of coaches of the highest calibre in various games and sports.

The total budget provision for sports and games in the Third Five Year Plan is Rs. 1·35 crores.

### TOURNAMENTS

Below we give the results of the national tournaments and principal sporting events of the year 1964-65:

#### Athletics

*Men's Events*

100 metres: K. L. Powell (Mysore); 200 metres: K. L. Powell (Mysore); 400 metres: Y. Muniyellappa (Mysore); 800 metres: Dayal Singh (Punjab); 1,500 metres: Edward Sequeira (Maharashtra); 3,000 metres Steeplechase: Chuni Lal (Punjab); 5,000 metres: Nawab Singh (Punjab); 10,000 metres: Mangheram (Delhi); 110 metres hurdles: Gurbachan Singh (Delhi); 400 metres hurdles: B. S. Barua (Andhra); Long Jump: B. V. Satyanarayana (Bihar); High Jump: Ajit Singh (Andhra); Hop, Step and Jump: Lab Singh (Punjab); Pole Vault: Ajaib Singh (Delhi); Javelin Throw: A. P. S. Oberoi (Delhi); Shot Put: Joginder Singh (Andhra); Hammer Throw: Ajmer Singh (Punjab); 4 × 100 metres relay: Bihar; 4 × 400 metres relay: Punjab; Decathlon: Amarjit Singh (Rajasthan); 20 kilometre walk: Padam Singh (Rajasthan); 50 kilometre walk: Ram Narain (Rajasthan); Marathon: Dhanna Singh; Discus Throw: Baldev Singh (Punjab).

*Women's Events*

100 metres: Sandesh Sodhi (Delhi); 200 metres: Sandesh Sodhi (Delhi); 400 metres: Chitra Palit (U.P.); 800 metres: Deenna Syme (Mysore); 80 metres hurdles: Violet Peters (Maharashtra); Long Jump: Sheila Paul (Mysore); High Jump: Christine Forage (Maharashtra); Shot Put: Kamlesh Chatwal (Delhi); Discus Throw: Kamlesh Chatwal (Delhi); 4 × 100 metres relay: Delhi; Javelin Throw: Kamlesh Chatwal (Delhi); Pentathlon: Christine Forage (Maharashtra).

#### Aquatics

Men: 100 metres freestyle: Abdul Mutlib (Railways); 100 metres backstroke: Ranjit Bannerjee (Railways); 100 metres butterfly: Arun Shaw (Railways); 100 metres breaststroke: Babu Bhai Rana (Gujarat); 200 metres freestyle: Nimai Das (Bengal); 200 metres breaststroke: B. B. Rana (Gujarat); 200 metres butterfly: M. Saha (Railways); 4 × 100 metres relay: Railways; 4 × 200 metres relay: Railways; Spring Board Diving: Danti Datta (Railways); Water Polo: Railways; Team Championship: Railways.

Women: 100 metres freestyle: Antica Milos (Bombay); 100 metres breaststroke: Dorothy Solanki (Bombay); 100 metres backstroke: Rima Dutta (Rajasthan); 200 metres freestyle: Margaret Turnbull (Delhi); 400 metres freestyle: Margaret Turnbull (Delhi); 4 × 100 metres relay: Bombay; Team Championship: Bombay.

#### Badminton

Men's Singles: Suresh Goel (Railways); Men's Doubles: C. Deoras and M. N. Natekar (Maharashtra); Women's Singles: Meena Shah (Railways); Women's Doubles: Meena Shah and Sunila Apte (Railways); Mixed Doubles: C. Deoras and Meena Shah (Railways); Junior Boys' Singles: G. K. Thakkar (Maharashtra); Junior Girls' Singles: Miss J. Philips (Kerala); Team Championship: Railways.

#### Basketball

Men: Services.
Women: West Bengal.

#### Billiards

Billiards: Wilson Jones.
Snooker: Shyam Sbroff (Bombay).

#### Boxing

Light-flyweight: J. Thomas (Railways); Flyweight: L/Nk. P. Jadhav (Services); Bantam: R/Nk. N. More (Services); Feather: L/Hav. D. Saradana Singh (Services); Light-weight: J/K. G. Rajan (Services); Welter: A. Sequeira (Railways); Middle: Jem. S. N. Sarkar (Services); Light-middle: B. D'Souza (Services); Light-heavy: Hav. Sardara Singh (Services); Heavy: Hav. Hawa Singh (Services); Team Championship: Services.

#### Bridge

Team-of-four duplicate: Calcutta Bridge Club; Master's Pairs: B. J. Shivdasani and G. Hemnahi (Bombay); Progressive Duplicate: J. P. Mehta's Team, Bombay.

#### Cricket

The series between India and the touring Australian team resulted in a draw; each side winning one Test and third resulted in a draw.

First Test at Madras, second at Bombay and the third at Calcutta.

India beat Ceylon by two "Tests" to one in the unofficial series during the year.

India won one Test to win the series against New Zealand. Three other Tests were drawn.

First Test at Madras, second at Calcutta, third at Bombay and the fourth at New Delhi.

Ranji Trophy: Bombay.
Duleep Trophy: West Zone.
Rohintan Baria Trophy (Collegiate): Bombay.
Cooch-Behar Trophy (Schools): North Zone.

#### Cycling

Men: 1,000 metres time trial: Dalbir Singh (Punjab); 1,000 metres sprint: Sucha Singh (Services); 4,000 metres team pursuit: Punjab.

Women: 2,000 metres lap race: Miss Shirin Malcolm (Maharashtra); Team Trial Road Race: Punjab; Team Championship: Punjab.

#### Football

National Championship: Bengal; Rover's Cup: B. N. Railway; I.F.A. Shield: East Bengal; Durand Cup: Mohun Bagan.

#### Golf

Men: R. Panday.
Women: Mrs. Duncan.

#### Hockey

National: Punjab; Bombay Gold Cup: B. N. Railway; Aga Khan: Punjab Police; Beighton: Customs Athletic Club and Mohan Bagan shared the trophy after a drawn final.

### Kabbaddi

Men : Maharashtra.
Women : Maharashtra.

### Kho Kho

Men : Bombay.
Women : Baroda.

### National Chess

Tournament not held.

### National Wrestling

Mosquito weight : Maruti Adkar (Maharashtra); Flyweight : Shamrao Sable (Maharashtra); Bantam : Roshan Lal (Punjab); Feather : Randhwa (Punjab); Lightweight : Bharat Singh (Services); Welter : Hukum Singh (Punjab); Middle : Jit Singh (Services); Light-heavy : Harbans Singh (Services); Heavyweight : Bishwanath Singh (Services).

### Weight-lifting

Flyweight : Burman (Railways); Feather : A. K. Das (Railways); Middle : N. A. Rao (Railways); Light-heavy : A. N. Ghosh (Railways); Middle-heavy : Manuel Selveria (Maharashtra); Light : L. K. Das (Railways); Heavy : Balbir Singh (Delhi); Team Championship : Railways ; Mr. India : Omkar Banerjee (West Bengal).

### Table Tennis

Men's Singles : Gautam Divan (Maharashtra); Men's Doubles : P. P. Haldankar and A. Rangoonwalla (Railways); Mixed Doubles : G. R. Divan and Sunanda Karandikar (Maharashtra).

Women's Singles : Usha Sunderraj (Mysore); Women's Doubles : Shirin Panveliwala and Sulabha Karnik (Maharashtra).

Boys' Singles : Shaukat Hayat Khan (Andhra); Boys' Doubles : U. S. Gurjar and V. R. Mantri (Maharashtra); Team Championship : Men — Maharashtra "A" (Bombay); Women — Maharashtra "B" (Poona); Juniors — Andhra.

### Tennis

Asian Tennis : Men's Singles : R. Krishnan ; Men's Doubles : B. Hewitt and M. Mulligan (Australia); Mixed Doubles : Mrs. Hewitt and Hewitt (Australia); Women's Singles : Miss Nirupa Vasant; Women's Doubles : Rita Suraya and Mrs. Schlamberger.

National Tennis : R. Krishnan ; Men's Doubles : R. Krishnan and M. Sangster (Australia); Mixed Doubles : R. Venkatesh and Lakshmi Mahadevan ; Women's Singles : Mrs. Marion (Australia); Women's Doubles : Mrs. Marion and Begum Khan.

### Volleyball

Men : Hyderabad.
Women : Punjab.

### Races

*Bombay Races*

1,000 Guineas : Maharaja of Gwalior's "Rose Royal" ; 2,000 Guineas : T. G. Gaokar's "Sun Deep" ; Indian St. Leger : M. D. Mehta's "Blue Heaven".

Oaks : Maharaja of Gwalior's "Rose Royal."
Derby : Maharaja of Gwalior's "Rose Royal."

*Poona Races*

Trial Stakes: Mrs. Talib, Choria and Chaubal's "Chief Ruler."

*Calcutta Races*

Calcutta Derby : S. Hill's "Robert Bruce."
Gold Vase : B. K. Sinha's "Golden Sceptre."

*Madras Races*

South India Derby : V. G. Saravana's "Om Shakthi."
Indian Turf Invitation Cup : A. V. Thomas' "Esquire."

### Rugby

Tournament not held.

# MILITARY ASSISTANCE TO INDIA

It was the Chinese aggression against India, which made India approach friendly countries for military assistance to defend the country. Countries like Australia, Canada and Yugoslavia had readily come to India's help at the time of the Chinese aggression. The United States and the United Kingdom helped India in a sizeable manner.

## AID FROM THE U.S.

The first review at Nassau by the U.S. and Great Britain of the military aid to India revealed $120 million worth of military aid to India, the burden being equally shared by the U.S. and Britain. The second review to meet the requirements of the year 1963-64 took place when the late President Kennedy visited London. The total amount of aid remained almost the same except that there was some change in the way of sharing. The third review at Washington between the British Prime Minister and President Johnson in February, 1964 was to place military assistance to India on a more permanent and planned basis. The U.S. Defence Secretary, Mr. McNamara, told the House Foreign Affairs Committee in March that for 1964-65, $745 million were earmarked for aid to 11 countries including India, that made up the "forward defence of the free world."

The Defence Minister, Mr. Y. B. Chavan had talks with the U.S. Government in May 1964 on long-term military aid for India's defence effort. The important aid which India asked for was three squadrons of F-104 supersonic helicopters. On May 22, Mr. Chavan submitted to the U.S. Government a $550 million list of defence requirements for the next five years. The list involved $60 million in grants and $50 million in credits a year for air, ground and navy needs and equipment to help India produce its own military hardware. The American estimates contemplated $50 to 60 million annually thus leaving a gap of $50 million.

A general agreement was reached during Mr. Chavan's visit to Washington as to the military grant which the United States plans to provide with respect to the fiscal year 1965 subject to Congressional approval. The assistance during the fiscal year 1965—from July 1 to June 30, 1965—would be at about the same level as that during the fiscal year 1964. The assistance given during 1963-64 period was more or less equal to the $60 million Nassau aid given after the Chinese attack in October 1962.

The aid during 1965 would include such items as continued support for Indian division, air defence communications equipment, transport aircraft support and road building equipment for India's border roads.

The U.S. Government had also agreed to make available in credit before the end of June 1964 the unutilised portion of the fiscal year 1964 grants to enable India to purchase vehicles and communications equipment and machinery for the modernisation of the Indian ordnance factories. The U.S. has assured that necessary assistance would be provided for the remaining three years of India's five year defence plan on an year to year basis. The U.S. has also offered assistance in the development of HF-24 to help India build her own supersonic aircraft. The final draft of the communique was approved at a meeting between Mr. Chavan and Mr. Chester Bowles on June 6, 1964.

The Defence Minister Mr. Chavan said in a written answer in the Parliament on Nov. 29, 1965 that out of the military aid of Rs. 76 crores promised so far by the U.S.A. from October 1962, approximately 45 per cent had been received by September 1965 when the U.S. Government suspended further aid shipments. The American aid had been utilised for providing limited support for a number of mountain divisions of the army, transport aircraft, signal equipment and spares for IAF and earthmoving equipment for the border roads organisation. In addition, one ammunition plant had been received as also equipment for static radars from the U.S.

## AID FROM GREAT BRITAIN

Britain is to give India special defence credit of £4·7 million for building three "Leander" class frigates. At the Nassau review, it was revealed that Great Britain had given military aid to the tune of $60 million and at the second review at London, the U.K. was found to have given aid worth £7,327,000 for requirements during 1963-64. With a view to seeking British help for India's five year defence plan, Mr. Chavan, Defence Minister had talks with British Government officials from November 12 1964. The plan covers the period April 1964 to March 1969 and envisages the creation of a well-equipped army with a strength of 825,000 men, a 45-squadron Air Force with latest radar and communications facilities, a phased programme of modernisation of the Navy, an adequate network of border roads and supply lines and the establishment of a proper defence production base in the country eventually to meet most of the requirements of the armed forces.

India's defence plan now envisages a total foreign expenditure of nearly Rs. 650 crores. The U.S. and the Soviet Union, it is learnt, have so far committed Rs. 250 crores and Rs. 140 crores respectively towards the plan over the next three years.

India's requirements from Britain for the period are estimated at Rs. 65 crores.

## AID FROM THE SOVIET UNION

The Defence Minister, Mr. Chavan, went to Moscow in September 1964 and had discussions with the Soviet Government for military assistance. India and the Soviet Union signed an agreement on Sept. 11 for the supply of Soviet Defence equipment for India. The Soviet Government has agreed to provide part of the plant and machinery for the M.I.G. complex, sell a certain number of MIG-21s to help India raise about three supersonic squadrons and supply some light tanks as well as 24 helicopters. The payment would be made in rupees with which the Soviet Union could buy Indian goods and articles under the existing trade agreements between the two countries.

It is understood that the total of Soviet aid given and promised can be priced around $400 million (Rs. 190 crores) against the U.S. aid given and promised of about $670 million. The break-up of the Soviet aid is understood to be as follows : $125 million for a complex of three MIG factories; $140 million for 50 ready-to-fly MIGs to be supplied before the factories come up ; $80 million for ground-to-air missiles

$30 million for transport aircraft; $16 million for overhaul programmes of transport planes and nine million dollars for light tanks. There is no way of vouching for the accuracy of these figures except that the Soviet assistance is sizable.

The Soviet authorities have assured the Government of India that the delivery of MIGs will commence in 1965. Russia has informed India that MIG complex will be set up by the end of 1965 and that the delivery schedule of light tanks accelerated. The Soviet Union has also agreed to give 70 light tanks to India.

The Soviet Union had been keeping up its arms supply to India throughout the recent fighting with Pakistan. India has signed a contract for the purchase of submarines and other naval aircraft from the Soviet Union.

MIG-21 aircraft, of which the Soviet Union had agreed to supply three squadrons to equip the Indian Air Force, started arriving in a dismantled form from June 1965. They will be assembled at Nasik by Soviet technicians to give Indian engineers the requisite experience in their manufacturing programme. Before the end of 1965, all the three squadrons were expected to be assembled at Nasik.

The production programme of MIGs by Hindustan Aeronautics Ltd. is said to be well under way. The first airframe made at Nasik is expected to come out of the factory by the middle of 1966.

The Soviet Union has supplied military equipment to India on suitable credit terms both before and after 1962.

### ASSISTANCE FROM THE UNITED ARAB REPUBLIC

India and the U.A.R. signed an agreement on September 28, 1964 for mutual collaboration in producing supersonic Mach-2 combat aircraft. In pursuance of this, the two countries would exchange technical missions at an early date for further study and consultations.

### AID FROM VARIOUS COUNTRIES

Of the military aid promised in the form of grant by various countries since the Chinese aggression in 1962 and the amount received so far (end Nov. 1965), the Defence Minister gave the following details in the parliament: The U.S. promised Rs. 76 crores, received so far Rs. 35·13 crores; the United Kingdom promised Rs. 36 crores, received Rs. 22·41 crores; Australia promised Rs. 2·12 crores, received Rs. 1·98 crores; Canada promised Rs. 2 crores, received Rs. 1·97 crores. From France Rs. 2 crores worth spares for Toofani aircraft, received so far; Italy Rs. 40,000 worth woollen blankets received, New Zealand Rs. 1 lakh worth butter, fat and woollen blankets; West Germany Rs. 40 lakh worth winter clothing items.

# EDUCATIONAL STATISTICS (1962-63) †

## 1. INSTITUTIONS, ENROLMENT, EXPENDITURE

| States/Territories | Number of Institutions for | | Enrolment in Institutions for | | Expenditure (in Rs.) on Institutions for | | Teachers | |

# ANDAMAN AND NICOBAR ISLANDS

Capital: Port Blair.

Area: 3,215 sq. miles (8,327 sq. km.). Pop. 63,548 (1961). Density: 20. Literacy: 33·6%.

The Andamans are a group of islands of various sizes, large and small, lying between the 6th and 14th Parallels in the Bay of Bengal. The northernmost 'Landfall Island' is 560 miles from the mouth of Hooghly River. The headquarters Port Blair is about 780 and 740 miles from Calcutta and Madras respectively. The main part of the group is composed of five large islands, *viz.* North Andaman, Middle Andaman, South Andaman, Baratang and Rutland Islands generally known as the Great Andaman. To the south of the Great Andaman is the island of Little Andaman. These Islands consist mostly of a mass of hills covered with dense tropical forests and separated by three straits and several creeks. These Islands have several very good harbours—Port Blair, Port Cornwallis, Mayabander and Port Elphinstone.

The Nicobar Islands from Car Nicobar in the north to Great Nicobar in the south intervene between Little Andaman and Sumatra. The southern island of Great Nicobar is about 100 miles from Pulo Brasse off Achin Head in Sumatra and the northern island of Car Nicobar 75 miles from Little Andaman. These islands are partly hilly and partly flat. The most important harbour in the area is Nancowry reputed to be the finest harbour in the east.

The climate of the islands can be generally described as tropical; warm but tempered by pleasant sea breezes. The islands are exposed to both monsoons with north-easterly gale from November to January and south-westerly gale from May to October. The weather is smooth only from January to April and to some extent in October. The average rainfall is 123 inches. The temperature varies between 23·9°c to 30·5°c throughout the year. The scenery of the islands is everywhere strikingly beautiful.

## POPULATION

63,548 (1961 census).

(*a*) *Aboriginals:* The aboriginals of the Andaman are supposed to be the earliest people to inhabit South East Asia. Essentially there are two main species *Erimtaga*, that is the forest dwellers who comprise the Jarawas and Sentenelese, and *Aryoto* the coast dwellers to which the Onge and the Andamanese belong. The Andamanese were originally the most numerous of all the tribes but their decadence has been the worst. They now number 23 in all. The Onge number 130 according to the 1961 Census. The information regarding the Jarawas and Sentenelese is wholly scanty as the tribes are hostile and avoid all contact with civilisation.

(*b*) *Andaman Indians:* From 1858 to October 1945, the Andaman Islands were a Penal Settlement, and except for the aboriginals, almost the entire population consisted of convicts and of people who were in these Islands in connection with these convicts—administrative personnel, merchants catering to them etc. After the issue of the Proclamation abolishing the Penal Settlement, declaration of amnesty and repatriation of convicts at Government expense, the population sunk to a little under 14,000 in 1947. This population has been recorded as "Andaman Indians" during the 1951 census.

(*c*) *Neo Settlers:* When the need for more manpower was felt, several families of displaced agriculturists from East Bengal were brought to South Andaman during 1949 for settlement under the Pilot Scheme of Rehabilitation. From 1949 to 1961, 3,281 families had been settled in these areas.

(*d*) *Nicobarese:* The Nicobarese belong to a completely different race group from the aboriginals of the Andamans. Their number according to the 1961 census is approximately 14,500 spread all over the Nicobar group of Islands.

## FORESTS

Forests cover an area of 2,500 sq. miles in the Andamans and the Nicobars. Out of this 72 per cent is under evergreen and deciduous forests.

The forests are rich in commercial timber and are suppliers of timber to the plywood and matchwood industries.

The species of timber found in the forest region are mainly padauk, Andaman redwood, Gurjan—a plywood species and Papita—a matchwood species. Annually the Forest department exports approximately 30,000 tons of timber to the mainland worth about Rs. 1 crore.

Since 1954 teak plantations are being raised in Andaman Islands with great success. Large areas have been brought under matchwood and cane plantations under the Five Year Plan schemes.

A Wild Life Sanctuary is being established at Ross Island which is at a distance of about one mile from Aberdeen Jetty (Port Blair).

## AGRICULTURE

The total revenue area is in the vicinity of 24,000 acres. The principal crops are rice, coconut and arecanut. The estimated area under paddy cultivation is about 17,000 acres. The average yield of paddy in 1963–64 was 20 maunds per acre. Commercial prospects of cultivation of rubber, coffee, and lac in these islands are considered to be bright by the experts.

**Animal Husbandry:** There are at present 5 veterinary dispensaries and 11 veterinary outposts functioning in the various parts of these islands. A poultry farm and a goat breeding farm have also been established at Port Blair.

## COLONISATION

Displaced persons including agriculturists from East Pakistan were readily available for settlement and the idea of colonisation of the Islands caught on. Sporadic efforts were made from time to time between 1949 and 1951 to rehabilitate the East Bengal refugees. In 1952-53 a long term plan for colonisation was put into operation. As a Grow More Food measure and with a view to achieving self-sufficiency in the matter of food it became imperative to import

manpower into these Islands. It envisaged settlement of 4,000 agriculturist families over 20,000 acres of flat land at the rate of 5 acres of cleared paddy land and 5 acres of uncleared land for homestead and horticultural operations, per family. Each family receives an ex-gratia grant of Rs. 1,050 and a recoverable loan of Rs. 1,730 for house-building, plough, animal, utensils, seed etc. By the close of the year 1955-56 about 1,406 families had been settled on land and the rest of the programme was incorporated under the Second Five Year Plan for achieving the target. From the commencement of the process in 1949 to March 1962, 3,281 families had been settled, who have come from West Bengal, Kerala, Bihar and Madras.

The Ministry of Rehabilitation, Govt. of India, has been made responsible for the development of Special Areas which includes Andaman and Nicobar Islands.

Under Rehabilitation Ministry's Programme, 182 Sahkaris and their families totalling 465 persons, in addition to some of the staff of the Rashtriya Vikas Dal, arrived in Betapur, Middle Andamans, in March, 1965.

Ancillary services like schools, hospitals and dispensaries have been provided in the colonisation area.

## INDUSTRY

Saw milling is the main important industrial activity in the Territory and provides employment to 1,209 workers corresponding to 56 per cent of total industrial employment. The other industries include Government Dockyard, transport workshop, a printing press at Port Blair, tractor repair shop and boat building yards at Long Island. Besides, a number of training-cum-production centres have been started by the Government.

**Power :** Port Blair had a 450 kW power station established in 1950. An additional generating set of 300 kW has been installed (1963). The Third Plan envisages installation of a new power house in replacement of the old one at Car Nicobar with distribution system and electrification of Diglipur, Mayabunder, Rangat and Nancowrie.

## ROADS

Construction of Great Andaman Trunk Road is in progress (Nov. 1965). At present the Territory has a total length of 287 km. of black top road as against 172 km. in 1960-61.

**Transport :** Port Blair has a city and rural Transport Service comprising 13 passenger buses.

**Minor Ports :** Under a central plan scheme jetties for inter island communications are being constructed. Installation of navigational aids in Andaman and Nicobar waters has been entrusted to the Director-General of Lighthouses and Lightships. Construction of a 1,100 ft. deep water wharf at Port Blair at a cost of about Rs. 1·20 crores has also been subsequently included in this scheme (Nov. 1965).

**Shipping :** The Administration runs its own passenger-cum-cargo service between the island and the mainland with two motor vessels M.V. "Andamans" and M.V. "Nicobar". The former is an 8,000 ton class ship and was built by the Hindustan Shipyard. Between these two vessels, 36 round trips are made to the mainland giving an average of one round voyage every tenth day.

The Administration also possesses two ships s.s. "Cholunga" and T.S.S. "Merewa" for inter-island coastal communication.

There is a weekly air service between Calcutta and Port Blair (Fridays) between Oct. and May. An amount of about Rs. 18 lakhs has been sanctioned for carrying out extension and strengthening of the existing runway (first phase).

## EDUCATION

This is an educationally backward territory and education up to higher secondary stage is free. There are 109 primary/junior basic schools, 8 middle/senior basic schools, 2 higher secondary schools—one for boys and girls at Car Nicobar and the other for girls at Port Blair, one higher secondary M.P. school and one junior basic teachers training school. There is at present (1965), no College in this Territory. However, students belonging to these Islands are granted scholarships for prosecution of studies on the mainland.

**Tourism :** The scenery of Andaman and Nicobar Islands is everywhere strikingly beautiful and as such these Islands offer very attractive prospects of being developed as a popular tourist resort.

As a first step towards development of tourism in these islands, one tourists' home at Corbyns Cove and the other at Port Blair have been constructed.

**Medical :** All treatment, medical or surgical including the ambulance transport is completely free. For specialised treatment patients are sent to the mainland at Government cost.

A new General Hospital (Gobind Ballabh Pant Hospital) has been constructed at Port Blair. There is also a 20-bedded T.B. Hospital at Port Blair. Besides, there are hospitals at Car Nicobar, Nancowrie, Bamboo Flat, Mayabunder, Long Island, Rangat and Diglipur. The total strength of the beds is 481 including the bed strength of the T.B. Hospital. There are 36 dispensaries all over the Islands.

A Malaria and Filaria Survey Control Unit under the National Health Scheme operates in the central group of Nicobar Islands.

A V.D. Unit has been set up in Car Nicobar. The incidence of diseases in these islands is remarkably low compared to that of the mainland.

## COMMUNITY DEVELOPMENT

Five C.D. Blocks have been established covering the entire Territory of Andaman and Nicobar Islands.

**Panchayats :** Thirty-two Gram Panchayats and 32 Nyaya Panchayats have been established in the Andaman group of Islands. In the Nicobar group, the traditional Panchayats continue.

## CO-OPERATION

The number of co-operative societies in the Andaman and Nicobar Islands has increased from 85 in 1960–61 to 143 in 1964–65.

The membership increased from about 6,600 in 1960–61 to about 9,458 in 1964–65. Share capital of the societies rose from about Rs. 3·9 lakhs to Rs. 8·69 lakhs during the same period. Working capital of the societies in 1964–65 was about Rs. 25 lakhs as against Rs. 15·6 lakhs in 1960–61. A co-operative farming society and several co-operatve plantation societies have started functioning.

## BANKS

A branch of the State Bank of India was opened at Port Blair in 1957 which also conducts Government Treasury business. It has four sub-treasuries, one each at Mayabunder, Car Nicobar, Diglipur and Nancowrie.

## FIVE-YEAR PLANS

There was no integrated First Year Plan in this Territory. Only two schemes were taken up, *viz.* the Colonisation Scheme and the Road Scheme. Under the Colonisation Scheme 1,006 families were settled up to the end of the First Five Year Plan. Under the Road Scheme, 49 miles were surveyed and work was in progress on 2½ miles of road.

The Third Five Year Plan of these islands entails an outlay of Rs. 979·320 lakhs. The main items of expenditure are, Agricultural-programmes Rs. 253·79 lakhs ; Community Development and Co-operation Rs. 31·98 lakhs; Power Rs. 14·35 lakhs ; Industries Rs. 14·76 lakhs ; Transport and Communications Rs. 514·00 lakhs ; Social services Rs. 132·89 lakhs and Miscellaneous Rs. 17·55 lakhs. In addition, the Ministry of Transport have provided Rs. 42 lakhs in the Central Plan for the development of Minor Ports in these islands.

The Agricultural development schemes include multiplication and distribution of improved seeds, intensive cultivation of agricultural crops, development and extension of plantation crops like coconut and arecanut, establishment of progeny orchards-cum-nurseries, intensive cultivation of horticultural crops, development of cashewnut and pineapple plantations and rubber plantations and exploratory trials on coffee and lac cultivation. The land development schemes include soil conservation and reclamation of saline affected areas for cultivation. The programmes under the animal husbandry include extension and improvement of veterinary services, extension of poultry farm and development of poultry in these islands. The programme under fisheries envisages exploitation of the fisheries resources of these islands for meeting the local requirement of fish. Forestry schemes include raising of industrial plantation of matchwood and teak, and cultural operations in the hitherto untapped areas. The transport and communications schemes relate to construction of Great Andaman Trunk Road, acquisition of additional passenger-cum-cargo ship and ferry vessels for both the mainland service and inter-island service. Social service schemes include universal free and compulsory education and promotion of female education. Welfare of backward classes also receives prominent consideration.

## ADMINISTRATION

The Islands are administered by the Central Government through a Chief Commissioner. With effect from 1961, an Advisory Committee has been constituted to be associated with the Minister of Home Affairs on policy matters relating to the administration of these Islands. The Advisory Committee consists of the Chief Commissioner, the Member of the Parliament representing this Territory, the Senior Vice-Chairman of the Port Blair Municipal Board and five other non-official members nominated by the Central Government. An Advisory Committee to be associated with the Chief Commissioner in matters relating to general questions of policy has also been constituted with effect from 1963. For purposes of revenue, the entire territory constitutes one District under the Deputy Commissioner. The Chief Commissioner is assisted in the administration of the Forests by a Chief Conservator of Forests who also functions as ex-officio Secretary to the Chief Commissioner and in the Public Works Department by the Principal Engineer. The Chief Commissioner is assisted by a Secretary and Financial Adviser and a Development Secretary, Secretary (Finance) and Secretary (Judicial). The budget estimates for 1965-66 are as follows :—

Revenue Rs. 2,19,95,000 ; Expenditure Rs. 3,74,90,000.

*Chief Commissioner*, B. L. Chak, I.A.S.

*Advisory Committee* :—Niranjanlal, M.P., Manoranjan Bhakta, K. R. Ganesh, A. C. Hawaldar, Durga Pershad, K. Aravindakshan, Rani Chauga of Katchal, Fred, Chief Headman of Car Nicobar.

*Chief Secretary :* Sardar Gurbachan Singh ; *Development Commissioner-cum-Development Secretary :* P. B. Mathur, I.A.S. ; *Chief Conservator of Forests :* J. C. Varmah ; *Secretary (Finance)* : Prem Lal ; *Secretary (Judicial)* : S. Chakravarty.

# ANDHRA PRADESH

Capital: Hyderabad.

Area: 1,06,286 sq. miles; Population: 3,59,83,447 (Males 1,81,61,671; females 1,78,21,776 (1961 census).

Sex ratio 98·1 females for every 100 males. Highest sex ratio in Srikakulam—104 females for 100 males. Lowest in Anantapur—94·6 females for 100 males.

No. of Districts: 20. No. of Towns: 212.

Density 339 per sq. mile. Literacy 21·2 per cent.

No. of talukas: 189.

The number of Municipal Corporations: 1. The number of Town Municipalities in Telangana: 79; Number of Municipalities in Andhra: 47; Number of Panchayats in the State: 14,552; Number of Panchayat Samities: 271; Zilla Parishads: 20; Number of inhabited villages in the State: 27,084.

The State income stood at Rs. 1,323·20 crores and the per capita income at Rs. 354·31 during 1963-64.

Strength of Legislative Assembly: 301.

The strength of the Legislative Council: 90.

No. of members from Andhra Pradesh to the Rajya Sabha: 18.

No. of members from Andhra Pradesh to the Lok Sabha: 43.

*Regional Committee:* A Regional Committee for the Telangana area called the Andhra Pradesh Regional Committee was constituted at Hyderabad on March 31, 1958 in accordance with the provisions in the States Reorganization Act by an order of the President of the Indian Union in February 1958. All the 105 members elected from the Telangana region to the State Legislative Assembly are members of the Regional Committee.

The Committee advises the State Government on all matters pertaining to the Telangana region. The Government is normally expected to undertake measures or introduce reforms and other legislative measures in consultation with this committee. The Telangana region comprises nine districts of the former Hyderabad State, namely Adilabad, Nizamabad, Karimnagar, Medak, Warangal, Hyderabad, Nalgonda, Khammam and Mahbubnagar.

## DISTRICTS

Districts with District headquarters in brackets:

Anantapur (Anantapur), Chittoor (Chittoor), Cuddappah (Cuddappah), East Godavari (Kakinada), Guntur (Guntur), Krishna (Masulipatnam), Kurnool (Kurnool), Nellore (Nellore), Srikakulam (Srikakulam), Vishakapatnam (Vishakapatnam), West Godavari (Eluru), Hyderabad (Hyderabad), Mahboobnagar (Mahboobnagar), Waranga! (Warangal), Khammam (Khammam), Karimnagar (Karimnagar), Adilabad (Adilabad), Nizamabad (Nizamabad), Medak (Sangareddy), Nalgonda (Nalgonda).

## POPULATION

For area and population of districts according to 1961 Census see under "Population".

## GEOGRAPHY

The shape of Andhra Pradesh is rather curious. A short neck with protruding belly would be an apt description. It has a chain of mountains, the Eastern Ghats, running over its entire length on the eastern and northern borders.

In the far north too the country is hilly.

There are huge forest areas in Srikakulam, Visakhapatnam, Godavari, Kurnool, Warangal and Adilabad Districts.

The landscape is varied and rich.

The climate is warm and humid or hot and humid according to the season.

The average annual rainfall is highest in the north varying between 45 inches and 50 inches. It gradually decreases to the south and south-west down to about 20 inches.

Two-thirds of the rain is from the south-west monsoon.

Srikakulam, Visakhapatnam, parts of Godavari and Nellore suffer from periodic floods and droughts, while the others are more liable to suffer from droughts.

There are hills and table-lands scattered throughout the State. Some of the hills are high and are covered with useful forest, some carry scrub jungle, while many are quite bare.

The soil in the area covered by the former Andhra State consists of the alluvi of the deltas and littoral tracts, red, black and brown soils.

The average yield of rice per acre in Andhra region is 1,321 lbs. while in Telangana area it is 917 lbs. The State average is 1,143 lbs. (The all-India average is 729 lbs.).

There are two major rivers in the area of the former Andhra State, the Godavari and the Krishna, three medium rivers with a large number of tributaries, and twenty-nine minor and small rivers. It is estimated that together they carry annually 150 million acre ft. of water into the Bay of Bengal.

The Godavari flows for the major part through the State before it falls into the Bay of Bengal. Its main tributaries are the Manjira, the Pranhita, the Indravati, and the Sabari, some of which flow partly in the Telangana area.

The main tributaries of the Krishna are Tungabhadra, Yerla, Warna and Dudhganga.

The medium rivers are the Pennar, the Nagavalli, the Vamsadhara.

The river system of Telangana consists of two great basins, that of the Godavary and the Krishna. The former with a length of more than 600 miles in the area has a number of tributaries, the chief of which are the Painganga, the Wardha and the Pranhita from the north, and the Manjira and the Maner from the south. Among its tributaries the most important are the Bhima, the Musi on which the capital stands, and the Tungabhadra, which forms the southern boundary of the Raichur-Mudgal Doab. The Telangana region, abounds in tanks and artificial lakes constructed mainly for the purpose of irrigation.

Telangana is the land of rice and jowar. The rivers dry up in hot weather necessitating the storage of water in tanks and artificial lakes for purposes of irrigation.

## AGRICULTURE

The total geographical area of the State is 67,451,693 acres (1960-61).

Net area sown was 11,290,000 hectares (1961-62).

Barren and uncultivable land: 2,353,000 hectares (1961-62).

Land put to non-agricultural uses: 1,769,000 hectares (1961-62).

Cultivable waste: 1,570,000 hectares (1961-62).

Permanent pastures and other grazing lands: 1,191,000 hectares (1961-62).

Land under miscellaneous crops, trees and groves not included in the net area sown: 290,000 hectares (1961-62).

Current fallows: 2,178,000 hectares (1961-62).

Other fallow lands: 880,000 hectares (1961-62).

Forests: 5,954,000 hectares (1961-62).

Total cropped area: 1,422,000 hectares (1961-62).

## LAND REFORMS

The State Government in consultation with the Government of India enacted the Andhra Pradesh Ceiling on Agricultural Holdings Act, 1960 which prescribed the minimum extent of land that a person may hold. The Bill was passed by the Assembly on July 9, 1960.

The Act fixes ceilings on existing holdings as well as on future acquisition of agricultural lands. Under the Act, the ceiling area in respect of every person or every family consisting of not more than five members has been prescribed to be an extent of land equal to four and a half times the family holding, and an additional extent of one family holding is allowed for every member in excess of five. The extent of land which constitutes a family holding for the category of wet lands bearing settlement Tarams or Annawari classification ranges from 6 to 24 acres depending on the classification of the land and for dry lands the extent of family holding ranges from 36 to 72 acres.

As regards future acquisition the Act provides that no person on or after the notified date should purchase or take on usufructuary mortgage or otherwise voluntarily acquire any land, if in consequence of such purchase, mortgage or acquisition, the total land held by him would exceed three family holdings. When a person comes to hold land in excess of the ceiling area in any manner, he should furnish a declaration to the Revenue Divisional Officer.

The ceiling will not apply to the Central or State Government, religious, charitable and educational institutions, cooperative farming societies, cattle breeding, dairying, wool raising, sugarcane farms operated by sugar factories and efficiently managed farms consisting of compact blocks.

## LIVESTOCK (1961)

The quinquennial livestock census in 1961 placed the total cattle in 1961 at 1,23,45,460 showing an increase of 9 per cent in five years.

Cattle, 1,23,45,460.

Buffaloes, 69,48,952.

Sheep, 83,63,148.

Goats, 42,46,717.

Horses and ponies, 62,689.

Others, 6,76,021.

Total livestock, 3,26,42,987.

Total poultry 1,02,48,132.

## INDUSTRY

The revised total 3rd Plan provision for the entire industrial sector is Rs. 1,672 lakhs, of which large and medium industries claim Rs. 728 lakhs.

| Head of Development | Total provision for 3rd Plan 1961-66 (Rs. in lakhs) |
|---|---|
| Large and Medium Industries .. .. .. | 728·00 |
| Small-scale Industries .. | 572·87 |
| Mineral Development .. | 40·10 |
| Handlooms .. .. | 331·21 |
| Total .. | 1,672·18 |

"Industries and Mining" claimed Rs. 10·15 crores or 5·4 per cent of the total Second Plan expenditure of Rs. 188·60 crores while in the Third Plan, it stood at Rs. 15·62 crores.

In the first instance ground was prepared to hold out more attractive incentives to entrepreneurs with the constitution of the Andhra Pradesh Industrial Development Corporation, the Small Scale Industries Development Corporation and the Andhra Pradesh State Financial Corporation. The Industrial Development Corporation, was constituted to offer financial aid to industries and also to take up worthwhile ones for direct promotion with financial collaboration from the private sector wherever necessary.

The Corporation has on hand the following five ambitious ventures at the moment for direct promotion: (1) Rs. 1 crore High Tension and Low Tension Insulators Project, (2) Rs. 3 crore Integrated Glass Project, (3) Rs. 4·5 crore Ball Bearings Project. (4) Rs. 7 crore Pig Iron Project and (5) Rs. 1 crore Power Cables Project.

In respect of the High Tension and Low Tension Insulators Project, the Government of India have granted licence for the establishment of a company for the manufacture of 2,400 tons H.T. and L.T. Insulators per annum. The unit is expected to cost a crore of rupees. The Government Porcelain Factory Bangalore will render technical assistance through their Japanese collaborators and, simultaneously, the Corporation is negotiating with Messrs. Kamani Engineering Corporation for promoting the project as a joint venture.

Regarding Integrated Glass Project, the Government of India have granted an industrial licence for the manufacture of various kinds of glass products. The project is expected to cost Rs. 3 crores, out of which Corporation would invest Rs. 50 lakhs towards equity capital, while private participation would be to a similar extent. The balance of the share capital would be raised through public issue. The Andhra Pradesh Industrial Development Corporation has concluded a technical collaboration agreement with Messrs. Komplex of Hungary for establishing the factory.

In respect of the Ball Bearings Project, the Government of India have granted a licence for the manufacture of ball, roller, tapered and journal bearings with a capacity of 3·72 million numbers per annum. The project is expected to cost Rs. 4·50 crores out of which the share capital would be Rs. 2·7 crores. The Andhra Pradesh Industrial Development Corporation has concluded a technical collaboration agreement with Japan for setting up the project and a public limited company in the name of Indo-Nippon Precision Bearings Ltd. has been registered.

For the manufacture of one lakh tons of pig iron per annum the Government of India have issued a letter of intent. The total cost of the project is estimated to be Rs. 7 crores while the share capital part of it would be Rs. 4·2 crores.

The Government of India have issued a letter of intent for the manufacture of 600 miles of PILC paper insulated power cables per annum. The project is expected to cost Rs. 1 crore.

The Andhra Pradesh Small Scale Industrial Development Corporation was established for promoting the rapid industrialisation of the State in the small scale sector by assisting, financing and promoting the growth of small scale industries.

The Third Plan outlay and the proposed provision for the Fourth Plan for large and medium industries respectively are Rs. 6·13 crores and 21·65 crores.

## INDUSTRIAL ESTATES

Several steps have been taken by the State and Union Governments to assist in the development of small-scale industries, such as the setting up of production-cum-training centres, research units, model industrial units, giving loans under the State Aid Act — the establishment of Small Industries Service Institutes, supplying machinery on hire purchase basis and provision of marketing facilities. Another step of far-reaching importance taken by the Government is to set up industrial estates to locate small-scale industrial units.

A large variety of products such as cycles and cycle accessories, steel furniture, scientific instruments, wire nails, radios, tape recorders, electric measuring instruments, cycle dynamo lights, automobile springs, air-conditioners, safety razor blades, PVC cables, transformers, switch-gear, electric accessories, plastic goods, builders' hardware, storage batteries, stainless steel vessels, agriculture implements etc., are being manufactured on these Estates.

During the Second Five-Year Plan period, 6 Industrial Estates one each at Sanatnagar (Hyderabad), Visakhapatnam, Vijayawada, Warangal, Samalkot and Nandyal were set up. Two more Estates one at Cuddapah and another at Chandulal Baradari (Hyderabad) were nearing completion at the end of the Second Plan period. A sum of Rs. 138·34 lakhs was spent on the Industrial Estates during the Second Five-Year Plan and 150 factory buildings were completed and 18 were nearing completion.

During the Third Five-Year Plan period, an amount of Rs. 220 lakhs had been provided for Industrial Estates and it is proposed to establish 14 Assisted Private Industrial Estates, 10 conventional type estates, 5 Rural Industrial Estates and one Cooperative Industrial Estate in addition to the expansion of the existing four Industrial Estates at Sanatnagar, Visakhapatnam, Vijayawada and Warangal.

## INDUSTRIAL COOPERATIVE SOCIETIES

Village and small scale industries—now mostly covered by industrial cooperatives—have made a significant contribution in the First and the Second Five-Year Plans.

### Board for Andhra Pradesh

A notable development during the Second Plan was the establishment of a statutory Khadi and Village Industries Commission with more extensive executive powers than those enjoyed by the Khadi and Village Industries Board which, however, continued as an advisory body closely associated with the Commission.

Industrial cooperative societies deal with a large variety of trades such as handlooms, palm jaggery and neera manufacture, leather works, carpentry, scientific engineering works etc., covering a wide field in the village and small scale industrial sector. There are as many as 1,970 industrial cooperative societies other than handloom neera and palm jaggery cooperatives in Andhra Pradesh as in Oct 1964 Of these 990 societies are in Telangana region and 977 in Andhra region. Hyderabad district has the largest number of them with 246 societies or 12·5 per cent of the total number of societies in the State. Chittoor district comes next with 125 societies or 6·3 per cent and Guntur ranks third with 120 or 6·1 per cent. There are also 1,016 palm jaggery manufacturing cooperatives and neera cooperatives having about 0·9 lakh members with a paid up share capital of about Rs. 3·3 lakhs. This category of societies endeavour to provide employment to ex-tappers in the eleven "dry" districts of the State.

Number of Industrial Cooperatives other than Handloom, Neera, Palm Jaggery Cooperative Societies in Andhra Pradesh as in March 1964:

*Andhra Region:* Srikakulam 61; Visakhapatnam 84; East Godavari 117; West Godavari 66; Krishna 85; Guntur 120; Nellore 77; Cuddapah 107; Anantapur 47; Chittoor 125; Kurnool 88; Total 977.

*Telangana Region:* Hyderabad 246; Nizamabad 68; Warangal 108; Medak 111; Khammam 52; Adilabad 73; Karimnagar 106; Mahbubnagar 111; Nalgonda 115; Total 990.

The amount spent and allocated for the development of industrial cooperative societies during the Second and Third Plan periods respectively are Rs. 7·02 lakhs and Rs. 10 lakhs.

## MINERALS

The chief minerals produced in the State are coal, iron ore, limestone, manganese and asbestos. The coal industry is situated at Kothagudem, Tandur, Yellandu and Sasti in Telangana region. Other minerals are widely distributed. According to the Geological Survey of India, two large deposits of iron ore containing an estimated reserve of nearly 389 million tons of ore have been located in Guntur and Nellore districts.

Production figures for 1961–62 are as follows:—Iron Ore 2,17,000 tonnes; Limestone 12,11,000 tonnes; Asbestos 121 tonnes; Graphite 344 tonnes; Ochre 4,234 tonnes (1960); Barytes 36,000 tonnes; China Clay 5,000 tonnes; Fire Clay 5,000 tonnes; Slate 7,000 tonnes; Quartz 5,000 tonnes.

Figures for 1962-63: Coal 3·2 million tonnes; Manganese ore 35,000 tonnes; Mica 8,334 tonnes; Steatite and talc 8,610 tonnes.

District-wise annual mineral out-put in tonnes under each category for the year 1961-62 is given below: *Adilabad:* Coal 11,99,656·5; Fire Clay 4,494·0; Limestone 3,18,240·0; *Anantpur:* Barytes 12,663·4; Calcite 4,224·7; China Clay 5,080·0; Iron Ore 5,614·4; Limestone 5,588·0; Steatite 5,029·2; *Chittoor:* China Clay 305·0; Iron Ore 10,803·1, Steatite 6,059·4; *Cuddapah:* Asbestos 124·9; Barytes 21,848·0; Iron ore 17,883·6; White Clay 3,341·6; *Godavari* (East): Graphite 20·3; *Godavari* (West): Nil; *Guntur:* Limestone 7,20,153·0; *Hyderabad:* Fireclay 340·0; Limestone 1,14,783·1; Quartz 5,050·0; *Karimnagar:* Coal 32,117·5; *Khammam:* Barytes 367·8; Chromite 648·7, Coal 16,18,667·8, Graphite 249·9; Iron Ore 20,797·7; Mica 3·1; *Krishna.* Iron Ore 70,651·1; *Kurnool:* Barytes 1,014·0; Iron Ore 86,729·0; Limestone 52,062·0, Slate N.A.; Steatite 3,735·8, White Clay 2,953·5; *Mahbubnagar:* Steatite 214·3; *Medak:* Fire Clay 30·51, Ochre (red) 42·1; Ochre (yellow) Nil; *Nellore:* Barytes 546·6; China Clay nil; Gypsum 152·4; Iron Ore 4,168·6; Lime-shell 531·3; Mica 6,043·1; Vermienlite 617·7; Slate 6,905·8; *Srikakulam:* Manganese Ore 56,674·5; *Visakhapatnam:* Apatite 590·2; Graphite 74·1; Manganese Ore 988·6.

The Andhra Pradesh Mining Corporation has investigated occurrences of barytes in Cuddapah District, clays in East Godavari District and asbestos in Cuddapah District. It is proposed to investigate during 1964-65, iron ore in Krishna District and graphite and manganese in Srikakulam District. The Corporation has taken up the work of iron ore reserves in Gandrayi area in Krishna District and a total quantity of 2,88,613 tonnes has been exported so far. The Corporation is also engaged in raising iron ore in Kurnool District besides barytes and limestone. A pilot mining project for asbestos and China clay, quartz mining and lime calcination projects are

also proposed to be implemented by the Corporation. In collaboration with the private secor, the Corporation proposes to establish a cement factory near Bonakallu and a company has been formed for that purpose.

Total mineral revenue (in rupees) for 1961-62: 35,21,124·48.

## COTTAGE INDUSTRIES

The most important industry is that of handloom. There are about 4 lakh handlooms in the State ; besides, there are 14,000 looms for woollen fabrics. The State has thus the largest number of looms in India and this industry provides employment for about 323,000 persons and livelihood for 1,615,000 persons. Assuming that the overall production per month per weaver is 100 yards, the annual output of handloom cloth per annum works out to about 39 crore yards of cloth.

Other important cottage industries are Kambli-weaving which employs about 39,000 persons, coir making employing about 12,000 persons and basket making which employs about 40,000 persons.

Certain handicrafts of Andhra Pradesh are world famous. Notable among these are the silver filigree articles of Karimnagar, the exquisite toys of Nirmal, Kondapalli, Nakkapalli and Tirupathi, the carpets of Warangal and Eluru and the lace goods of Narsapur.

## TRANSPORT

The total railway route kilometrage open for traffic in Andhra Pradesh as on March 31, 1961 was 4,544·1 out of which 2,648·1 were Broad Gauge, 1,858·77 Metre Gauge and 36·93 Narrow Gauge. The total road mileage including National Highways and State Highways 13,053.

The City of Secunderabad is the headquarters of the Secunderabad Division of the Central Railway and is the junction of the Broad Gauge and Metre Gauge systems. From here lines radiate east, south, west and north. The total mileage open for traffic which now constitutes the Secunderabad Division of the Central Railway is 1,461.

The Andhra Pradesh Road Transport Corporation as in March 1964: No. of routes 366 ; route mileage 7,101 ; mileage covered by vehicles (Lakhs) 617·00 ; expedition on passenger amenities Rs. 8,36.991·81 . expenditure on operative improvements Rs. 87,132·46 ; Gross earnings Rs. 964·95 lakhs.

*Other particulars as in Feb.* 1965 : Fleet strength 2,076 buses , No. of depots 36 ; effective mileage per day (in miles) 1,78,206 ; passengers carried per day (in lakhs) 6·01 ; Number of staff 13,480.

The number of registered goods vehicles in the State as on March 31. 1962 was as follows : State carriages 4,465 ; goods vehicles 8,458 ; cars 16,101 ; motor cycles 5,379 ; taxis 505 ; others 1,870.

There is a well-developed airport at Begumpet in Hyderabad city ; there are landing grounds near Vijayawada and Visakhapatnam.

Hyderabad City is connected by air with Bombay, Nagpur, Madras, Visakhapatnam and Bangalore. Hyderabad City is served by Begumpet aerodrome. Hyderabad is also linked by air to Delhi and Calcutta.

*Posts & Telegraphs :* The number of Post Offices in the State is 10,369 ; Telegraph Offices 531 ; Telephones 17,127 ; Telephone Exchanges 153.

## POWER PROJECTS

The aggregate power demand in Andhra Pradesh which was 180 M.W. at the beginning of the Third Plan is expected to rise to about 500 M.W. by the end of the Third Plan period. The installed capacity, however, is only 213 M.W. of which the firm and dependable capacity is 140·2 M.W. To fill this huge gap between supply and demand, the power generation programme has been stepped up, and additional funds have been made available to this sector. An outlay of Rs. 64·94 crores which was originally provided for power has since been enhanced to Rs. 87·47 crores. The following are the power schemes in Andhra Pradesh.

### Machkund Hydro-Electric Scheme (Stage I and Stage II)

The Machkund Hydro-Electric Scheme is a joint venture of the States of Andhra Pradesh and Orissa. The two States share the capital outlay and power benefits in the ratio of 70 : 30 respectively. An ultimate installed capacity of 1,14,750 kW of which 70 per cent is Andhra Pradesh's share is available under this scheme.

It was proposed to instal five generating units three of 17,000 kW each, and two of 21,250 K.W. each in the first stage. The installation of two generating units of 17,000 kW was completed during the First Five Year Plan period. During the Second Plan period, the balance works namely installation of the third unit of 17,000 kW and two units of 21,250 kW as also the second stage works involving installation of the third 21,250 kW unit were taken up and completed. All the six units under this scheme are generating power now (June 1965). By the end of 1960-61, the total installed capacity of 1,14,750 kW envisaged was achieved. A sum of Rs. 813·59 lakhs was spent on this scheme during the Second Plan period as against the revised provision of Rs. 617·25 lakhs.

Certain balance civil works such as main spillway works of the main reservoir and appurtenant works are, however, to be executed and they are in progress. The contour channel has been recently commissioned, thereby increasing the generating capacity of the project by about 15 M.W.

### Tungabhadra Hydro-Electric Scheme

The scheme is a joint venture of Andhra Pradesh and Mysore State, the capital cost and benefits being shared by the two Governments in the ratio of 80 : 20 respectively. The scheme provided for the development of power from waters let out into the irrigation canals at two places, one at the foot of the Tungabhadra dam and another at Hampi ruins, 14 miles below the Tungabhadra dam, where a drop of 110 feet is available.

This scheme comprises the installation of 8 hydro-sets of 9 MW each—4 sets of the Tungabhadra Dam Power House and 4 sets at the canal power house. The installation of all these units is now complete.

### Tungabhadra Nellore Hydro-Thermal Scheme

The scheme envisages the installation of one 30-MW thermal set at Nellore. The plant has been commissioned already.

### Upper Sileru Hydro-Electric Scheme

The scheme envisages the installation of two sets of 60 MW each by utilising the tail race waters of Machkund power house. One unit of 60 MW is expected to be commissioned by March 1966 and the other by June 1966.

### Telangana Hydro-Thermal Scheme

The scheme envisages the integrated development of power generated at Hussainsagar, Ramagundam Thermal station and at Nizamsagar Hydel stations in Telangana region. The scheme is making good progress and the additional power generated will be of the order of 14 MW.

### Srisailam Hydro-Electric Scheme

The Srisailam Hydro-Electric Project in conjunction with Nagarjunasagar Hydro-Electric Station is a new power project proposed for execution in the Third Five Year Plan period for which the preliminary works were taken up in the Second Five Year Plan. It envisages an integrated development of power of 430 M.W. on lower Krishna Basin, with two power stations, one at Srisailam and the other at Nagarjunasagar with a net work of 220 kV and 132 kV transmission lines and connected sub-stations. The Power Station at Srisailam is designed to accommodate a total of 7 units of 110 M.W. each but initially 4 units alone will be installed.

The project is estimated to cost Rs. 45·75 crores. The dam and power house are programmed to be completed by 1970-71 and one unit of 110 MW is expected to be commissioned before the end of the Fourth Plan. The remaining units will be commissioned in 1971-72. The expenditure incurred on the project is about Rs. 4 crores.

### Balimela Dam

This is a joint scheme of Andhra Pradesh and Orissa Governments under execution by the Balimela Control Board. The total storage capacity of the Dam is 135 T.M. Cft., and 100·25 T.M. Cft. will be the live or effective capacity. There will be a power house erected at the toe of the Balimela Dam. The power generated here, *i.e.*, 40 M.W. will be exclusively for the use of Andhra Pradesh. Andhra's share of the cost of the project is about Rs. 12 crores.

### Kothagudem Thermal Scheme (Stage I)

This new scheme envisages the installation of 2 × 60 M.W. sets. The preliminary civil works have been completed.

### Ramagundam Thermal Extension Scheme (Stage I)

This new Scheme envisages the installation of one 60 M.W. set at Ramagundam. Equipment is being procured under bulk purchases by the Central Water and Power Commission.

It is expected to be commissioned by April 1967. The Ramagundam Thermal Extension Scheme II Stage comprises erection of three units of 66 MW each at Ramagundam under special terms offered by Dr. Jayanti Dharma Teja. An agreement has since been concluded and work will start in the near future.

### Gas Turbo Sets at Hyderabad

This scheme envisages the installation of 2 × 10 M.W. Gas Turbo sets at Erragedda to relieve to some extent the power shortage in the twin cities of Hyderabad and Secunderabad, particularly during the peak load hours. The sets have been installed and commissioned into service.

### Lower Sileru Hydro-Electric Scheme (I Stage)

This scheme envisages the installation of 3 × 100 M.W. Sets at Donkarai village on the river Sileru as the first stage of the project at an estimated cost of Rs. 25·34 crores. The preliminary works are programmed to be taken up during the Third Plan period. The power generated under this scheme will be exclusively for the benefit of Andhra Pradesh. Preliminary works have been taken up.

## IRRIGATION

In the First Five Year Plan, irrigation schemes claimed Rs. 21·18 crores or 21·9 per cent of the total outlay of Rs. 96·97 crores. In the Second Five Year Plan, they claimed about Rs. 57·43 crores or 30·9 per cent of the total expenditure of Rs. 188·60 crores, while in the Third Plan irrigation projects including flood control schemes accounted for Rs. 90·99 crores forming 26·4 per cent of the total revised outlay of Rs. 344·97 crores. In the draft Fourth Plan of the size of Rs. 700 crores, a provision of Rs. 75 crores is earmarked for major and medium irrigation schemes excluding Nagarjunasagar Project.

## IRRIGATION SCHEME

Against the irrigation potential of 8·73 lakh acres created in the first Three Plans, an additional irrigation potential of 25·13 lakh acres will be created in the Fourth Plan alone under all major and medium irrigation projects including Nagarjunasagar. The area expected to be brought under irrigation at the end of the Third and Fourth Plans are 8·23 lakh acres and 18·73 lakh acres respectively.

### Major Irrigation Schemes

*Prakasam Barrage:* The total ayacut under this scheme is 12·25 lakh acres and it is estimated to cost Rs. 2·84 crores; *Bhairavunitippa Project:* It commands an ayacut of 12,000 acres and is estimated to cost Rs. 144·75 lakhs; *Upper Pennar Project:* Proposed to feed an ayacut of 12,000 acres and is estimated to cost Rs. 158 lakhs; *Rallapadu Project:* Intended to irrigate 7,600 acres and is estimated to cost Rs. 104 lakhs; *Pomperu Drainage Scheme.* 8,196 acres are benefited and is estimated to cost Rs. 128·44 lakhs; *Tungabhadra Project Low Level Canal :* The Canal is designed to irrigate about 92,000 acres in Mysore State and about 1,57,000 acres in Andhra Pradesh. Total estimated cost of the scheme is Rs. 1,244 lakhs; *Tungabhadra Project High Level Conal :* Expected to irigate 1·19 lakh acres in Andhra Pradesh and 70,300 acres in Mysore State. Estimated to cost Rs. 1,180 lakhs. *Rajolibanda Diversion Scheme :* The canal irrigates an ayacut of about 5,900 acres in Mysore State and about 87,900 acres in Andhra. Estimated cost is Rs. 352 lakhs; *Kadam Project:* Total utilization of the ayacut will be 40,000 acres. Estimated cost is Rs. 601 lakhs; *Pochampad Reservoir Project :* Designed to irrigate 5·7 lakh acres and is estimated to cost Rs. 40·10 crores.

Nagarjunasagar Project, Tungabhadra Project High level canal, Pochampad Project, Vamsadhara Project, Rajolibanda Diversion Scheme and Kadam Project are the major projects in Andhra Pradesh that are, at the moment, at various stages of progress. In respect of Nagarjunasagar Project every effort is being made to complete all works necessary to create irrigation potential of 5·79 lakh acres and to let out water into canals by June 1966.

## CO-OPERATION

(See article on *Co-operative Movement*)

## COMMUNITY DEVELOPMENT

Andhra Pradesh was the first State in India to introduce Panchayati Raj. In July 1958, twenty *ad hoc* Panchayat Samitis one in each district were constituted. On Nov. 1, 1959, after the enactment of the Andhra Pradesh Panchayat Samitis and Zilla Parishads Act, the first batch of Statutory Panchayat Samitis was formed. There are now (April 1965) 321 Blocks in operation, covering the entire State with Community Development Programme.

## LABOUR

During 1964, 109 strikes were reported resulting in a loss of approximately 5,20,250 mandays. 85 disputes were referred to adjudication. 160 industrial disputes were settled in conciliation by the industrial relations machinery. 603 trade unions were operating in the beginning of the financial year 1964-65. 92 trade unions were registered between April 1964 and Jan. 1965. The total number of factories as on Jan. 1, 1965 was 5,773 in the State.

### Employment

During 1963-64 the employment exchanges in the State registered as many as 2,31,844 persons. The total number of vacancies received from various employers was 40.388. During April to Dec. 1964, 1,76.637 persons have been registered and 28,244 have been placed. There were 1,32.070 persons of various categories awaiting employment assistance on the live register of the exchanges as on March 1, 1964.

## PUBLIC HEALTH

During the Second Five-Year Plan, a total expenditure of Rs. 1,108·06 lakhs was incurred on medical services and public health schemes, including water supply and sanitation and this expenditure constituted 33·5 per cent of the total expenditure of Rs. 3,305·29 lakhs on social services.

In the Third Five-Year Plan Rs. 1,994 42 lakhs were provided for medical and public health schemes including water supply and sanitation and this constituted about 42·5 per cent to the total Plan provision of Rs. 4,666·94 lakhs under social services.

PRIMARY HEALTH CENTRES: A Primary Health Centre with three sub-centres was established in every C.D. Block. Basic health services provided at the Centres are: Medical relief; Maternity and child health care including family planning; School Health Services; Health Education; Environmental Sanitation; Control of communicable diseases and collection of vital statistics.

In Andhra Pradesh, at the end of 1963-64, there were 255 Primary Health Centres. It is proposed to open 44 additional Primary Health Centres during the remaining two years of the Third Plan at the rate of 22 a year.

There are also as many as 237 subsidised rural dispensaries functioning in Andhra Pradesh, besides the Primary Health Centres.

Preventive Health Service forms two major national programmes namely the National Malaria Eradication Programme and the National Smal-pox Eradication Programme. Other programmes include prevention of tuberculosis by a systematic campaign of BCG vaccination, expansion of school health, nutrition activities in coordination with other departments, and international agencies by way of implementing the expanded Nutrition Programme and school feeding programme. The National Malaria Eradication Programme and the National Smal-pox Eradication Programme are Centrally aided schemes.

By the end of the Second Plan, 390 malaria eradication units were in operation. The Third Five-Year Plan contemplated the continuance of the National Malaria Eradication Programme during the Plan period. The incidence of Malaria has been brought down to the minimum level in the State.

So far (upto March 1965), 40 per cent of the population has been vaccinated under the small-pox control programme.

*National Filaria Programme :* By the end of the First Plan, surveys were conducted in 41 panchayats and all the municipalities in the districts of East Godavari and West Godavari and control operations were in progress in the community project areas. During the Second Plan period, these schemes were continued and an expenditure of Rs. 4·47 lakhs was incurred on this scheme. The Government of India have also established a research-cum-training centre at Rajahmundry recently in order to evolve suitable technical procedures for the control of filariasis. As an interim palliative measure, Government is also assisting the Municipalities and the Panchayats by giving them one third of the expenditure as a grant for schemes implemented by them for the control of mosquito nuisance and filariasis. So far, 31 Municipalities and 24 Panchayats have taken advantage of the scheme in Andhra Pradesh.

*T. B. Control*. There are at present 12 T.B. Sanatoria in Andhra Pradesh. In addition to this, nine Tuberculosis Domiciliary Centres are functioning in the cities of Hyderabad and Secunderabad. The Centres are providing medical facilities and treatment at the residence of the patients. Besides, 32 T.B. Clinics are also functioning in the State to provide medical aid for T.B. patients.

There is an Institute for Diseases of Chest and T.B. at Irrumnuma in Hyderabad which imparts training in T.B. for doctors and other para-medical personnel.

## LEPROSY CONTROL

Andhra Pradesh is endemic with a high percentage of incidence of leprosy. In order to combat this, in the First Five Year Plan two Leprosy subsidiary centres, in the Second Plan eight leprosy sub-centres and four subsidiary centres were opened in the State. In the Third Plan three more leprosy subsidiary centres were opened. In all now (March 1965) 18 centres are functioning in the State, one in each district where the incidence of leprosy is about 3 per 1,000 of population.

The Leprosy Advisory Committee set up in 1958 made a number of recommendations for intensifying the leprosy control work through such aids as special allowance, free residential accommodation, improvement in service conditions and centralised training programmes for workers in the field.

Leprosy is sought to be brought under control by intensive and extensive mass scale treatment with modern drugs, specially the sulphones.

## FAMILY PLANNING

In Andhra area during the Second Plan period 33 Family Planning Clinics and 3 Family Planning Centres were established. Against the Plan provision of Rs. 1·90 lakhs, an amount of Rs. 2·87 lakhs was spent on this scheme. In Telangana area during the Second Plan period sixteen Family Planning Clinics were opened.

Towards the end of March 1964, there were 237 rural family planning clinics attached to the Primary Health Centres and 62 Urban Family Planning clinics attached to Government hospitals functioning. The scheme will be further extended to the new Primary Health Centres. To facilitate easy vasectomy operations in rural areas 5 mobile surgical units have been established with headquarters at Visakhapatnam, Guntur, Kurnool, Hyderabad and Warangal. For 1964-65, a sum of Rs. 12·44 lakhs had been provided for the programme with 100 per cent grant for the various other items of the programme for augmenting the family planning services.

### Hospitals, Beds, Staff etc. 1963-64.

*Allopathic :*

Hospitals 360; Hospitals for spl. treatment 32; Dispensaries 913; Beds 21,346; Doctors 2,741.

*Ayurvedic :*

Hospitals 2; Dispensaries 755; Doctors and Vaids 769.

*Unani :*

Hospitals 1; Dispensaries 74; Doctors and Hakims 100.

## EDUCATION

There are four Universities in the State: The Andhra University at Waltair, the Osmania University at Hyderabad, the Sri Venkateswara University at Tirupati and the Andhra Pradesh Agricultural University, Hyderabad.

Total no. of educational institutions in the State in 1963-64 was 57.632. No. of students in these institutions: 57,41,091.

The total number of annual admissions in the eight Medical Colleges is 1090. Due to the National Emergency, the number of admissions has been increased by 190. The College of Nursing, Hyderabad, was established in 1959 offering a four-year degree course of B.Sc. (Nursing).

All possible and necessary measures are being taken for encouraging and improving the Indian systems of medicine viz. Ayurveda, Unani, Homeopathy and Naturopathy on scientific lines.

There are six colleges for general education in the State in addition to two agricultural colleges, five engineering colleges, two law colleges, one college for physical education, two colleges for veterinary science and one college of commerce.

(For more statistical information see "Education Tables" under "Late Particulars").

## THE THIRD FIVE-YEAR PLAN

(See under Third Five Year Plan in "Late Particulars".)

## BUDGET FOR 1965-66

(See under "Late Particulars".)

## ANDHRA PRADESH AGRICULTURAL UNIVERSITY

Dilkusha, Hyderabad 4.

The Andhra Pradesh Agricultural University was constituted by an Act of Andhra Pradesh State Legislature, passed in 1963. It is patterned on the Land grant colleges system of the United States and came into existence from 12th June 1964. A common campus for all colleges and the establishment of the College of Basic Sciences and Humanities are significant features of this University. The course system, modelled on the U.S. Land grant colleges pattern has been adopted which, besides permitting specialisation, entails frequent examinations both during, and at the end of each course, thus ensuring regular work by the students, throughout the period of their stay at the University.

The University has six constituent Colleges, three in the faculty of Agriculture, two in the faculty of Veterinary Science and one in the faculty of Home Science. The three Agricultural Colleges are functioning at Rajendranagar (Hyderabad), Bapatla and Tirupati. The three colleges coach students for B.Sc. degree in Agriculture. The one at Rajendranagar has also instituted courses leading to the M.Sc. degree in nine different branches of Agricultural Science.

Of the two Veterinary Colleges, one is located at Hyderabad and the other is at Tirupati. The Home Science College is located at Hyderabad.

The total No. of seats available in each faculty is as follows : (1) Agriculture 320 ; (2) Veterinary Science 140 ; (3) Home Science 60.

The duration of the integrated courses is as follows :

(1) B.Sc. (Agri.) 4 years ; (2) B.V.Sc. 5 years ; (3) Home Science 3 years.

The medium of instruction and examination in the University is English.

*Chancellor :* The Governor of Andhra Pradesh.
*Vice-Chancellor :* O. Pulla Reddy, I.C.S. (Retd.).
*Registrar :* M. Sriramulu.

## ANDHRA UNIVERSITY

(Waltair)

*Chancellor :* Pattom A. Thanu Pillai, Governor of Andhra Pradesh.

*Pro-Chancellor :* Minister for Education, Govt. of Andhra Pradesh.

*Vice-Chancellor :* Dr. A. L. Narayana, M.A., D.Sc., F.I.P.

*Registrar:* P. V. V. Seshagiri, M.Sc., F.B.S.

*Deputy Registrar:* M. G. Reddi, M.A. (Hons.), B.L.

*The Professors are as follows :*

K. Rangadhama Rao, M.A., D.Sc. (Madras), D.Sc. (Lond.) (*Emeritus Professor*).

Dr. B. Ramachandra Rao, M.Sc., D.Sc. (*Professor and Head of the Department of Physics*).

S. Meenakshisundaram, M.A., D.Sc. (*Professor and Head of the Department of Mathematics*).

K. R. Srinivasa Iyengar, M.A., D.Litt. (*Professor and Head of the Department of English*).

K. V. Sivayya, M.B.A., Ph.D. (*Professor and Head of the Department of Commerce*).

T. Venkataravudu, M.A., Ph.D. (*Professor and Head of the Department of Mathematical Physics*).

B. Sundararama Rao, M.Sc. (Hons.), D.Sc., D.I.C. (Lond.), Ph.D. (Lond.) (*Professor and Head of the Department of Geo-Physics*).

V. Subba Rao, M.Sc., D.Sc. (*Professor and Head of the Department of Pharmacy*).

G. Gopala Rao, M.Sc., D.Sc. (*Professor and Head of the Department of Chemistry*).

K. V. R. Narasimham, M.A., Ph.D. (*Professor and Head of the Department of Telugu*).

O. Ramachandraiya, M.A., Ph.D. (*Professor and Head of the Department of History*).

B. S. Murthy, M.A., L.L.M., J.S.D. (*Professor and Head of the Department of Law*).

V. Subba Rao, M.A., Ph.D. (*Professor and Head of the Department of Sanskrit*).

R. Ramanatham, M.Sc., M.I.R.E., Ph.D. (Lond.), D.I.C. (Lond.) (*Professor of Meteorology and Oceanography*).

C. Venkata Rao, M.Sc. (Hons.), D.I.C. (Lond.), Ph.D. (Del.), M.I.I.Ch.E., M.Pi.MW. Eppstok (*Professor and Head of the Department of Technology*).

K. Nagabhushanam, M.A., Fil.Lic., D.Fil. (Stockholm) (*Professor and Head of the Department of Statistics*).

Dr. P. N. Ganapathy, M.A., M.Sc., D.Sc., F.A.S.C., F.Z.S.I. (*Professor and Head of the Department of Zoology*).

J. Venkateswarlu, M.Sc., D.Sc., Ph.D. (Cantab.), F.A.Sc., F.B.S. (*Professor and Head of the Department of Botany*).

B. Sarveswara Rao, M.A., Ph.D. (Lond.) (*Professor and Head of the Department of Economics*).

Dr. D. V. Ramana, B.A. (Hons.), Ph.D. (*Professor in Economics, Dept. of Rural Development & Co-operation*).

D. Seetapathi Rao, B.A., B.Sc. (Engg.), M.Sc. (Engg.) (Lond.), D.I.C. (Lond.) (*Professor and Head of the Department of Engineering*).

K. Krishnamacharyulu, B.E.C.E. (Hons.), M.Sc. (Lond.), D.I.C. (Lond.), A.M.I.C. (*Professor of Civil Engineering*).

P. V. B. Bhooshana Rao, B.E., M.M.E. (*Professor of Mechanical Engineering*).

K. Sachidanandamurty, B.A. (Hons.) (*Professor and Head of the Department of Philosophy*).

Dr. M. V. Moorthy, Ph.D. (*Professor and Head of the Dept. of Sociology and Social Work*).

A. Sriramdas, M.Sc., Ph.D. (*Professor and Head of the Dept. of Geology*).

### List of Colleges in the University Area (59)

#### University Colleges (5)

University College of Arts and Commerce, Waltair.
Jeypore Vikramadeo College of Science and Technology, Waltair.
Erskine College of Natural Sciences, Waltair.
University College of Law, Waltair.
University College of Engineering, Waltair.

#### Professional Colleges (7)

College of Engineering, Kakinada.
St. Joseph's Training College for Women, Guntur.
Medical College, Guntur
Rangaraya Medical College, Kakinada.
Government Training College, Rajahmundry.
Andhra Medical College, Visakhapatnam.
A. C. Training College, Guntur.

#### Affiliated Colleges (32)

S. K. B. Ramars College, Amalapuram, East Godavari Dist
A. M. A. L. College, Anakapalle.
Bapatla College of Arts & Science, Bapatla, Guntur Dist.
West Godavari Bhimavaram College, Bhimavaram, West Godavari Dist
Rajah R. S. R. K. Ranga Rao College, Bobbili.
V.R.S.E.Y.R.N. College, Chirala, Guntur Dist.
Sir C. Ramalinga Reddy College, Eluru.
Chintalapati Satyavati Devi St. Theresa's College for Women, Eluru
A.N.R. College, Gudivada, Krishna Dist.
Government College for Women, Guntur.
Andhra Christian College, Guntur.
Hindu College, Guntur.
Pithapuram Rajah's Govt. College, Kakinada.
Annavaram Satyavati Devi College for Women, Kakinada.
Andhra Jatheeya Kalasala, Masulipatam.
Hindu College, Masulipatam.
S.S.N. College, Narasaraopet, Guntur Dist.

M.R. College, Vizianagaram.
M. R. Women's College, Vizianagaram.
St. Joseph's College for Women, Waltair R.S.
Kakarapal Bhavanarayana College, Vijayawada.

#### Oriental Colleges (17)

Sri Markandeya Sanskrit College, Aukiripalli, Kistna Dist.
Oriental College, Bhimavaram.
Dr. K.V.K. Sanskrit College, Arundalpet, Guntur.
Sri Sarada Niketanam, Guntur.
S.V.J.V. Sanskrit College, Kovvur, West Godavari Dist.
Narasimha Sanskrit College, Chittigudur, Masulipatam.
Chalapalli Rajeswari Sanskrit College, Modekurru, Kothapet Taluk, E.G. Dist.
Sri Bhavanarayanaswami Sanskrit College, Ponur, Guntur Dist.
Andhra Women's Sanskrit College, Rajahmundry.
Sree Gouthami Vidya Peetham Oriental College, Rajahmundry.
Kota Lakshmiah Naidu Sanskrit College, Tenali, Guntur Dist.
Smt. Appana Venkatarathnamma Oriental College, Eluru.
Government College of Music, Vijayawada.
Oriental College, Vijayawada.
Maharajah's Sanskrit College, Vizianagaram.
Maharajah's Music College, Vizianagaram.

### 1963-64 Budget

| | | |
|---|---|---|
| Income | .. .. .. | Rs. 79,46,366 |
| Expenditure | .. .. .. | Rs. 78,80,202 |

Grants :

| | | |
|---|---|---|
| (*a*) | From State Govt. .. | Recurring Rs. 15,75,600 Non-recurring Rs. 4,90,000 |
| (*b*) | From University Grants Commission .. | Recurring Rs. 3,03,160 Non-recurring Rs. 3,64,994 |

Total No. of students at the University Colleges, in 1963-64 : 2,743.

This university is teaching as well as affiliating. English is the medium of instruction.

## OSMANIA UNIVERSITY

Hyderabad 7.

The Osmania University is a residential, teaching and affiliating university. It comprises eight Faculties, namely, Arts, Science, Commerce, Medicine, Engineering, Education, Law and Technology. There are five University Colleges, nine constituent Degree Colleges (including one exclusively Women's College and three Evening Colleges for Degree Courses for those in employment).

35 Affiliated Colleges including 3 Medical' 1 Physical Education, 1 Engineering, 2 Training Colleges, 1 Nursing, 23 Degree Colleges of Arts, Science & Commerce (including 3 meant exclusively for women) and 4 P.U.C. Colleges. Four Colleges, Vivek Vardhini College, Hyderabad, Agarwal Evening College, New Science College and Badruka College of Commerce and Arts, run evening sessions for P.U.C., B.A. and P.U.C. (Commerce), P.U.C. (Science), P.U.C. (Humanities) respectively, for those who are in employment. One evening college with Urdu medium was affiliated. (The Evening Sessions of all these colleges are treated as separate colleges and included in the figure 35 shown above).

In the Arts and Science Faculties, the medium of instruction is primarily English. But there is one Arts College which has Urdu as medium of instruction upto B.A. stage, one college with

Hindi as medium of instruction upto B.A. stage. In all professional courses English is the only medium of instruction. The courses of study in Oriental learning in Sanskrit for entrance test, Dip. O. L. and B. O. L., have been framed. Twenty private Oriental Institutions have been recognised to coach students for these courses.

*Courses of Study :—*

I. ARTS :

P.U.C. (Humanities), B.A., B.A. (Special), M.A., Ph.D., Dip in Lib. Science, Dip. in Phy. Edn., Dip. in French/German/Russian, Sr. Dip. in French/German/Russian, Entrance in Oriental Learning, Dip. O. L., B. O. L., Bachelor of Journalism, Dip. Pub. Adm., Dip. in Co-operation.

II. SCIENCE :

P.U.C. (Science), B.Sc., B.Sc. (Special), M.Sc., Ph.D., M.Sc. (Tech.) (Applied Geology), Dip. Course for Trained Teachers of Education Department.

III. COMMERCE :

B.Com., B.Com. (Special), M.Com., Master's Degree in Business Adm., Ph.D., Dip. Course in Business Management.

IV. EDUCATION :

Shortened B.Ed. Course, B.Ed., M.Ed., Ph.D.

V. ENGINEERING :

B.D. (Civil) (Electrical) (Mechanical) (Mining) (Tele. Com.) (Chemical Engg.), M.E. (Hydraulic) (Control Engg.) (Soil Mechanic) (Foundation & Heat Power Engg.), B.E. for B.Sc.'s, Part-time Degree Course in Engg. for Diploma holders.

VI. TECHNOLOGY :

B.Tech., M.Tech., Ph.D.

VII. MEDICINE :

M.B.B.S., B.Sc. (Nursing), B.D.S., B.Sc. (Pub. Health), M.D. (General Medicine) (Physiology) (Pharmacology) (Paediatrics) (Pathology) (Bacteriology) (Obstetrics & Gynaecology) (Forensic-Medicine) & (Anaesthesiology), M.S. (General Surgery) (Opthalmology) (ENT), M.Sc. (Anatomy) (Physiology) (Bio-Chemistry) (Nutrition).

Diplomas :—D.A., D.O., D.G.O., D.C.M., D.C.P., D.L.O., D.P.H., D.M.R., D.F.M., D.H.M., T.D.D.

VIII. LAW :

LL.B., LL.M.

New courses introduced in 1964-65 :—Ph.D in Psychology & Geo-Physics (Dip. course in Tuberculosis Diseases), T.D.D. (under Faculty of Medicine), M.D. in Anaesthesiology, Master's Degree in Business Admn., One Year Dip. Course in Pub. Admn., One Year Dip. Course in Cooperation, One Year Dip. Course for Trained Teachers of Education Dept., Matriculation.

The University is completely autonomous though it is wholly financed by the Government. The University Syndicate, consisting of 14 members is the governing body. The Vice-Chancellor is the chief administrative officer The other bodies of the University are the Finance Committee, Academic Council, Senate, Library Committee, Committee of Exams., Faculties and Boards of Studies and the Standing Committee.

Admission : The qualification necessary for entrance to the Pre-university Course is the Matriculation Examination or Higher Secondary Certificate or equivalent certificate.

Enrolment (1963-64) : 26,821 (Arts and Science: Boys 13,582 ; Girls 3,892 ; Professional : Boys 8,410 ; Girls 937).

During 1964-65, 4 Colleges were affiliated to the University, one with P.U.C. (Humanities and one with P.U.C. Humanities & Science. Also three colleges were disaffiliated. They are Univ. College of Vet. Sc. & A.H., with P.U.C. Science.

CHANCELLOR

Pattom A. Thanu Pillai, Governor.

PRO-CHANCELLOR

Prince Mukarram Jah Bahadur, M.A. (Cantab.).

VICE-CHANCELLOR

Dr. D. S. Reddi, M.A. (Oxon.).

REGISTRAR

L. B. Deshpande, B.Sc.

DEANS OF FACULTIES

*Arts*, Prof. M. Abdul Qadir.
*Science*, Dr. N. V. Subbarao.
*Commerce*, Dr. V. V. Ramnadhan.
*Law*, Prof. G. C. V. Subba Rao.
*Education*, Shrimati Syeda Zohra Begum.
*Engineering*, Prof. Abid Ali.
*Technology*, Abde Ali I/c.
*Medicine*, Dr. M. Y. Ansari.

Receipts: Rs. 1,32,59,018. Expenditure : Rs. 1,31,33,242.

Contribution by State Government : Rs. 82,83,605 ; Central Govt.: Rs. 1,44,708.

## SRI VENKATESWARA UNIVERSITY

Tirupati

A Residential, teaching and affiliating University having jurisdiction extending over the districts of Anantapur, Chittoor, Cuddappah, Kurnool and Nellore in Andhra Pradesh.

Instruction is being provided for Pass and Post-Graduate Degree courses of study in the teaching departments of English, Telugu, Sanskrit, Hindi, Arabic, Persian, Urdu, Philosophy, Psychology, Economics, History, Mathematics, Statistics, Physics, Chemistry, Botany, Zoology and Geology in the University College (Arts & Sciences). Research work leading to the Ph.D. Degree is also permissible in all these departments except in the Statistics Department. M.Sc. Degree course in Home Science has been started in the academic year 1963-64.

The University College of Engineering provides instruction for the Five Year Integrated Course in Engineering, Civil, Electrical and Mechanical branches.

Pre-University course of study came into operation in the academic year 1957-'58 and was followed by the Three Year Degree courses in the next academic year, 1958-'59. These two courses replaced the old two-year Intermediate and Degree courses of study respectively.

Consequent on the abolition of Three Year Honours courses, two year Masterate courses have been started in the University College with effect from the academic year 1959-'60. Provision has also been made for doing research leading to D.Sc. and D.Litt. degrees.

The medium of instruction and examination in the University is English excepting Modern Indian Languages and the languages for the Oriental Titles.

# ASSAM STATE

Area: 47,290 sq. miles (122,481 sq. km.) according to Assam Survey. Geographical area 30·1 million acres.

Population (1961 census): 11,872,772. Density 252 per sq. mile (97 per sq. km.). Literacy 27·4 per cent.

Capital: Shillong.

Nearly one half of the area of Assam State is covered by hills. Plains: 24,557·96 sq. miles; Hills 22,732·00 sq. miles. Besides, a total area of 32,914 sq. miles, mostly hilly, has been transferred to Assam State from N.E.F.A. The hill areas are sparsely populated and inhabited by the hill tribes.

## DISTRICTS

Names of Districts showing within brackets the headquarters of each District and the area in square miles of each District followed by the names and areas in sq. miles of the talukas in the particular District respectively are as follows:—

Cachar (Silchar; 2,680): Hailakandi 512; Karimganj 709; Silchar 1,459.

Darrang (Tezpur; 3,367): Mangaldai, 1,272; Tezpur 2,095; Garo Hills (Tura 3,149).

Goalpara (Dhubri; 3,979): Dhubri 1,054; Goalpara 1,098; Kokrajhar 1,827.

Kamrup (Gauhati; 3,844): Barpeta 1,254; Gauhati 1,617·318; Nalbari 972·682.

Lakhimpur (Dibrugarh; 5,012): Dibrugarh 3,667; North Lakhimpur 1,345.

Mizo District (Aijal; 8,089): Aijal 4,861; Lungleh 3,228.

Nowgong (Nowgong; 2,167).

Sibsagar (Jorhat; 3,476): Golaghat 1,363; Jorhat 1,094; Sibsagar 1,019.

United Khasi and Jaintia Hills (Shillong; 5,554): Jowai 1,515; Shillong 4,039.

United Mikir and North Cachar Hills (Diphu: 5,883); Mikir Hills, 3,995; North Cachar 1,888.

Three Administrative Units have recently been created, namely, (1) Nalbari with headquarters at Nalbari in Kamrup District, (2) Dhemaji with headquarters at Dhemaji in Lakhimpur District and (3) Pawi-Lakher with headquarters at Saiha in Mizo Dist. As regards area Lungleh Subdivision has been split almost equally for creation of Pawi-Lakher Administrative Unit.

The hill districts have been given, under the Constitution of India, a large measure of self-governing rights according to their respective tribal traditions and customs, exercised through Autonomous District Councils under the supervision of the Government of Assam.

For purposes of Autonomous District Councils, United North Cachar and Mikir Hills are two Districts: North Cachar Hills (Haflong); Mikir Hills (Diphu).

The administration of land vests in the District Councils. All the District Councils have framed their own laws for the purpose and are now levying and collecting Land Revenue, House tax etc.

Anchalik Panchayats at the anchal level and Gaon Panchayats at the Gaon level have been formed in the place of Mahkuma Parishads at the Subdivisional level, under the Assam Panchayat Act, 1959. Accordingly, there are now 16 Mahkuma Parishads, 120 Anchalik Panchayats and 2,570 Gaon Panchayats in the Plains Districts of the State. These Panchayats have covered 11,085 villages.

Number of Circles: In Assam Tahsils are termed as Circles: 67.

Number of Municipalities: 17.

Number of Town Committees: 29.

## GEOGRAPHY

Assam has three distinct natural divisions: Brahmaputra or Assam Valley, Surma or Barak Valley and the hills.

The river basins are naturally fertile and present in the main few difficulties to the cultivator. Rainfall being high the problem in general is to dispose of the surplus water and to control the action of floods rather than irrigation in the usual sense.

Rice is the staple food crop. Tea and jute are the most important crops grown for export. Besides, potatoes are also cultivated in Assam. A good deal of short staple cotton and fruits like oranges and pineapples are grown in the hills.

Rainfall is everywhere abundant, and ranges from 50 to 258 inches a year leaving aside the highest recorded rainfall in this part of India with the maximum reached at Cherrapunji in the Khasi Hills 32 miles south of Shillong (905 inches in 1861: record precipitation for one day is 41 inches). This is reputed to be the wettest place in the world. Temperatures are moderate.

Earthquakes of considerable severity have taken place. By far the worst in recent times was that which occurred on August 15, 1950, one of the world's five biggest recorded tremors. According to old records the Assam earthquake of 1897 is regarded as the severest in human history.

## COTTAGE INDUSTRIES

Main cottage industries: Sericulture and Weaving. Principal areas for Sericulture: Sibsagar, Nowgong, Goalpara, United Khasi-Jaintia Hills and United Mikir, North Cachar Hills Districts and Lakhimpur.

Handloom weaving is done in most of the families in Assam. There are professional weavers in Cachar District and Sualkuchi area in Kamrup District.

Number of fly and throw-shuttle looms in the State: 500,000 (approximately).

Value of total production: Rs. 8,88,00,000.

Value of production of individual industries: Weaving products (Rs. 8,00,00,000); Muga raw silk (Rs. 54,00,000); Mulberry raw silk (Rs. 9,30,000); Open Eri Cocoon (Rs. 15,00,000)

Production of individual industries: Cloth—54,000,000 yards; Mulberry raw silk—31,000 lb.; Muga raw silk—180,000 lb.; Open Eri Cocoon—500,000 lbs.

Total number of workers in Cottage industries: 12,50.000 (inclusive of part-time and whole time workers in sericulture and weaving). Average workers per establishment 2.

Number of workers in individual industries: Handloom Weaving (850,000); Sericulture (400,000).

## AGRICULTURE

*Latest available:*

Main food crops of the State: Rice, Rape, Mustard, Sugar-cane, Potato, Pulses, Maize and Oranges.

Main cash crops of the State: Tea, Jute, Cotton and Tobacco.

Production of food crops in '000 metric tons (figures are for 1963-64):

Autum Rice 331; Winter Rice 1,504; Spring Rice 13; Maize 10; Wheat 3; Gram 1; Tur 2; Rabi pulses 33; Sesamum 1; Rape and Mustard 54; Linseed 5; Castor 1; Other cereals and small millets 3; Cotton 0; Jute 1,027 (in '000 bales each bale weighing 400 lbs.); Mesta 28 (in '000 bales each bale weighing 400 lbs.); Sugarcane 1,117; Tobacco 5; Potato 114; Sweet Potato 29 and Chillies 3.

The cultivation of oranges, which is a principal crop is mainly confined to the Khasi-Jaintia Hills.

(The latest data are not available).

Veterinary: Total Number of Cattle; 64,88,487 (male—24,40,636; female—19,96,688; Young stocks—20,51,163); Buffaloes—5,83,002. Horses and Ponies—16,803; Sheep—53,683; Goats—18,85,346; Other livestock—4,51,978; Total poultry—99,07,052. Total livestock—94,79,299 (This information relates to 1961 census).

## PLANTATIONS

*Latest available data:*

Plantation in the State: Tea.

Area under Plantation: 1,66,429 hectares in 1964.

Number of Tea Plantations: 726 (covered under the Plantation Labour Act).

Production of Tea: 192,831, 000 kg. (1964).

Average daily number of workers: Engaged in plantation 492,793 (1963); Engaged in factories 57,516 (1964). (As covered under the Assam Factories Act, 1948.

Fisheries: *Variety of fish produced:* Rabs, Katla, Mrigal, Mali, etc.

Assam State has met the fish seed demands from their own resources. Culture of mirror carps, scale carps etc. has become popular in the Hill Districts of the State.

## FORESTS

Forests area: Approximately 17,264 Sq. miles including unclassed state forests.(1963-64).

Main types of forest with some species of trees of economic importance occurring in them:

Evergreen forests, mixed deciduous forests, deciduous and dry deciduous forests, riverain forests, Savannah forests, swamp forests, bamboos and temperate forests containing sal, teak, hollock, holong, bansam, amari, gamari, ajhar, sissoo, simul, cane, bamboos, reeds and various species of medicinal importance.

A large area under forests falls in the hill districts which are sparsely populated and covered with vegetation.

Assam possesses one of the richest fauna in Asia and it is claimed that outside Africa, there is no part in the world with so many varieties of animals, birds, reptiles and insects. Rhinoceroses, elephants, wild buffaloes, bisons and Mithuns, swamp deer, sambhar, spotted deer, barking deer, tiger, leopards, black panther, King Cobra, pink-headed duck and Giant Hornbill are some of the well-known specimens of wild life.

Five sanctuaries and two game reserves with a total area of about 580 sq. miles, are maintained by the Government Forest Department for the protection of the interesting and in some cases the numerically dwindling species. Kaziranga and Manas are the two most famous sanctuaries, both nearly the same size, 166 and 105 sq. miles respectively. Kaziranga, in the heart of Assam and situated on the South Trunk Road, is easily accessible and affords every facility to the visitor to see the famous one-horned rhinoceros from elephant back at close range. The sanctuary at Manas at the foot of Bhutan Hills is more attractive from the scenic point of view.

Main forest produce: Timber, firewood, bamboo, cane, lac, elephant tusks, thatch, stone, sand, drugs, incense and perfumes, fibres and flosses. Assam has probably the biggest bamboo and reed reserves, contributing 42 per cent of India's total output.

(For further particulars see under Forests.)

## LAND TENURE SYSTEM

There are two classes of land tenure system in the State—the permanently settled estates and the temporarily settled estates.

*Permanently settled estates :* These are found in Goalpara District and Karimganj Sub-division of the Cachar District. In Goalpara district the permanently settled estates held by the proprietors and the rights of most of the intermediaries under them have been acquired under the Assam State Acquisition of Zamindaris Act and the tenants holding lands under them have come into direct relationship with the Government. In Karimganj Sub-division of Cachar district there are permanently settled estates and the acquisition of estates in Karimganj Sub-division has since been completed leaving some pattani tenures proposed to be acquired by the ensuring agricultural year (1373 BS.). The tenants who hold either directly under the Zamindars or intermediaries pay rent in cash or kind. There are crop-shares too. There is also a small number of people in Karimganj who hold land under landlords on condition of rendering service. An amount of Rs. 86,49,553 has been paid both as ad-interim and final compensation upto Feb. 28, 1965, for acquisition of estates and tenures under the Assam State Acquisition Zamindaris Act.

*Temporary settlement system :* Also known as the Ryotwari system prevails in the other plains districts of the State and also in portions of Goalpara District and Karimganj which are not permanently settled. These lands are assessed to full revenue and are called Khiraj lands.

The peculiarity of this system is that generally the cultivators hold lands directly under the Government unlike the lands in permanently settled estates.

The Khiraj lands are again divided into two categories, periodic and annual. The periodic landowner has a heritable and transferable right whereas the annual landowner (technically called "settlement holder") has a right of user only and has no right of transfer or subletting. Subject to the payment of the land revenue the owners of annual lands get renewal of the lease from year to year. The owners of annual lease can get their lease converted into periodic after satisfying certain conditions on payment of a prescribed premium.

Besides these, there are some La-Khiraj (full revenue free) and nisf-Khiraj (half revenue free) grants in Assam and also a number of Fee Simple grants. These Fee Simple grants are for cultivation of tea. These grants are initially revenue-free, but subsequently they have been assessed at full rate of revenue under Assam Revenue Free Waste Land Grants Act, 1948. There are other Waste Lands Settlement Rules for special cultivation.

There are three tenancy Acts in Assam, *viz.* The Goalpara Tenancy Act, The Sylhet Tenancy Act and The Assam (Temporarily Settled Districts) Tenancy Act. The former two Acts apply to the Districts of Goalpara and Cachar (those portions of former Sylhet District which have remained in Assam after partition) respectively. The last Act applies to the plains districts of Assam. These Acts confer rights of occupancy, determine the rent payable by the tenants and regulate the relationship between the landlords and the tenants. The Assam Adhiars Protection and Regulation Act, 1948, governs the conditions regarding crop-rent payable by the crop-sharing tenants and prescribes the conditions on which the landlord can resume possession for personal cultivation. Government has also passed a law called the Assam Fixation of Ceiling on Land Holdings Act (1956), whereby the holding of agricultural lands has generally been limited to a maximum of 150 bighas (about 50 acres) per family.

**Hill Districts :** In the hill districts of Assam, land administration is carried on by the Autonomous District Regional Councils under the provisions of the Sixth Schedule to the Constitution of India. They have framed their own regulations relating to the levy and collection of taxes on lands by necessary adaptations to the Assam Land and Revenue Regulation, 1886. The Mizo District Council has, however, made its own self-contained regulation for the purpose.

## MINES, INDUSTRIES

The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. Petroleum output about 116,703,702 gallons (1961); coal output 774,834 tons (1962); limestone output 78,045 tons (1962); and sillimanite 8,095 tons (1962). The most extensive coal measures hitherto worked are in the Sibsagar District, Mikir Hills, Lakhimpur District and Khasi-Jaintia Hills. Important deposits also exist in the Garo Hills; but those are yet to be exploited. Limestone is quarried in the Khasi-Jaintia Hills. Petroleum is worked only in Lakhimpur and refined there. An oilfield has been found at Nahorkatiya.

An oil refinery has already been set up in the State at Gauhati and was commissioned on the first of January, 1962.

Silk is manufactured in the Assam valley; also cotton weaving prevails as a cottage industry, women playing a predominant part. In this valley there are no caste weavers. In the Surma Valley or Cachar weavers carry on a brisk manufacture on a commercial scale. These handloom products find a ready market on account of the great scarcity of mill made cloth. There is no textile mill in Assam and the entire requirement of mill-made cloth has to be imported from other States.

Tea is the main industry, but there is a large petroleum mining concern with Digboi in Upper Assam as the centre and also some coal-mines. There is a big match manufacturing concern at Dhubri. Boat-building, brass and metal and earthenware, limestone burning, cane and bamboo work, furniture making, sola hat, smithy, brick making, mustard oil pressing, rice and saw mills are other industries. But agriculture employs about 80 per cent of the population. Assam carries on a considerable trade with the adjoining hill tribes and countries.

## POWER

The Gauhati thermal project at Narangi, near Gauhati the first major power project in Assam, was inaugurated on December 17, 1964 by the Union Minister for Information and Broadcasting, Mrs. Indira Gandhi.

Costing Rs. 1·22 crores, the project will generate 12·5 mw power for defence and industrial uses in and around Gauhati. The project will utilise the surplus light diesel oil produced by the Gauhati refinery.

**Power Projects :** Planned power development made a beginning in the State with the commissioning of Umtru Hydel Project near Gauhati. The Umtru Hydel Project benefits Kamrup and K. and J. Hills. The power project based on natural gas from Nahorkatiya oil fields with an installed capacity of 69,000 kW has been commissioned. Another hydro-electric projecct at Umiam in Khasi-Jaintia Hills, expected to generate 36,000 kW in the first phase, has been completed. The second phase, with a further capacity of 2 × 7·5 M.W. is intended to be taken up and completed by the end of 1965.

The Kopili project, a large multi-purpose project is likely to be taken up in the near future.

In the field of major and medium industries the Second Plan period saw the establishment of a sugar factory in the co-operative sector, a cane and bamboo mill in the public sector and a re-rolling mill and various smaller units in the private sector. The Spun Silk Mill at Jagiroad (Public Sector) has gone into production. The Cement factory at Cherrapunji with a capacity of 250 tons daily, (State participation Scheme) was expected to go into production soon. A jute mill was proposed to be set up in the co-operative sector and was expected to be completed early in 1962. Licences have been issued for the establishment and expansion of a number of other industries such as four large paper and pulp industries, hard board, chip board, commercial plywood, timber seasoning units, steel fabrication and light engineering manufacture, galvanised wire, etc., flour mills, caffeine manufacture and the like, which are in various stages of implementation.

**Gas-based Industries :** The two projects which have been decided to be taken up as part of the first-phase natural gas utilisation programme are (1) a power project, with an installed capacity of about 50,000 kW near Nahorkatiya and (2) a fertiliser plant at Namrup near Nahorkatiya with production pattern of 50,000 tons of urea and 50,000 tons of ammonium sulphate annually. Both these projects would be in the public sector.

For manufacture of hard board a large unit has been licensed.

Two cotton spinning mills with a total spindlage of 50,000 have been licensed in the State.

**Sugar :** A mill has been set up in the co-operative sector with a capacity of 800 tons per day.

**Fruit Preservation :** There are a number of small fruit canning units in the State.

**Processing and Light Engineering Industries :** A re-rolling mill and a foundry have been set up together with a number of fabrication workshop and light engineering industries.

## HANDLOOM INDUSTRY

Handloom industry is an age-old cottage industry of Assam.

It is the largest and the most important cottage industry next to Agriculture, both in hills and plain districts. Most of the weavers of the State are women and they generally weave cloth for their domestic use in leisure time.

**Cess Fund :** In order to develop khadi and handloom industries and to promote the sale of khadi and other handloom cloth, the Government of India decided to levy additional excise duty on mill made cloth. Created out of the proceeds of the cess, the Act is known as Cess Fund. Since its creation, financial assistance by way of loans and grants for the development of the industry is forthcoming.

In Assam, the handloom development schemes had been implemented since 1953-54. At the end of 1961, the number of co-operative societies had increased from 317 to 1,340 and looms and weavers from 3,541 to 33,970 and from 8,322 to 38,364 respectively. Upto the end of 1963-64 share capital loans amounting to Rs. 6·15 lakhs (S/C) and working capital loans to the tune of Rs. 21·53 lakhs (W/C) have been given. Improved looms and other weaving accessories are supplied to the weavers' co-operative societies from the financial assistance received from the All India Handloom Board. In order to relieve the weavers of Assam from the high cost of transport, the Board also grants a subsidy at Rs. 20 per bale of yarn procured.

**Powerlooms :** So far 192 powerlooms have been purchased. Out of these looms, 30 have been installed at the Industrial Estate, Gauhati and the remaining 162 powerlooms have been allotted among powerloom co-operative societies of Golaghat, Nowgong, Gauhati and Nalbari. Steps have already been taken to install two preparatory and processing plants in the State, as operation of powerlooms will not be helpful without such plants. Attempts are also being made to install two calendering plants.

The Assam Apex Weavers' Co-operative Society started functioning from July, 1959 and now sells yarn to the primary weavers' societies at moderate prices.

Out of the total number of handlooms in Assam, only about 7 per cent are now in the co-operative fold.

## TRADE

Assam has to import almost every article of daily necessity. Unlike in previous years the State has now to supplement the local production of rice—the staple food—by imports from the rest of India. The State's requirement of wheat was also met by the Central Government with imported wheat.

Assam's trade for the most part, was with areas now included in East Pakistan, but after partition it has dried up to a great extent and the traffic is maintained only by exports of fruits and vegetables and imports of fish, eggs and poultry.

## TRANSPORT

Much of the trade of Assam is carried by river. Steamer companies maintain fleets of vessels which ply to and from Neamati, Tezpur, Gauhati, Goalpara, Dhubri, Karimganj, Silchar and many other smaller stations.

During the dry season the formation of *chars* and sandbanks restricts the volume of riverine traffic and after the 1950 earthquake, Upper Assam has been forced to rely more on road and rail transport.

From January 1958, the entire railway system in Assam has been made part of a new Zone of the Indian Railways—the North East Frontier Railway. Pandu (Maligaon) near Gauhati has been made the headquarters of N.E.F. Railway.

The railway system enters Assam by the north bank of the Brahmaputra and continues on the more important south bank after crossing the river by a ferry between Amingaon and Pandu. From Pandu the line stretches eastward to Tinsukia, 313 miles away. Short branch lines connect the important towns of Dibrugarh, Nowgong, Jorhat, Sibsagar and Tezpur to the main line.

The construction of a road-rail bridge to link the two banks of the Brahmaputra has been completed.

Because of the slender surface link between Assam and the rest of India, air services are of great value to the State. The first direct link by air between Calcutta and Gauhati was established in 1947. This air service was originally on a non-scheduled basis but very soon it became a daily service and now there is more than one service a day. Almost all the big towns—Tezpur, Jorhat, Dibrugarh, North Lakhimpur, Silchar, Dhubri and Gauhati are served by daily scheduled flights. Pasighat and Along in NEFA have also been placed on the airmap.

The total length of motorable roads as on March 31, 1962, stood at 8,681 miles including 741 miles of National Highway. Of these 6,921 miles were in the plains and 1,760 in the hills. Besides, there were on this date 921 miles of bridle roads.

Nationalisation of motor transport in the State was started in 1948, and till March 31, 1965, 1,624 miles were covered.

January 1, 1965 :

Number of vehicles operated by the Department: 645.

Number of passenger buses : 444.

Number of 1st Class service cars : 24.

Number of Goods Vehicles : 155.

Number of other vehicles (ambulance, staff car, etc.) : 26

Number of passengers carried in a day : 25,112.

Goods carried in a day : 10,323 maunds.

Service mileage daily operated by the Nationalised Transport: Nearly 26,000 (approximately).

The State Transport organisation provides employment to 4,000 persons. Capital invested till March 31, 1964 is Rs. 342·25 lakhs. Net profit derived upto March 31, 1964 is Rs. 285·76 lakhs. The State Transport is under the administrative management of a Board, with the Minister for Transport as Chairman.

Shillong is reached by a 63-mile nationalised motor route from Gauhati, the nearest railhead, steamer ghat and air station. Assam Government's State Transport carries both passengers and goods on a monopolistic basis on this National Highway.

The programme of road-making has its special significance in that it is designed to make Assam self-sufficient in ensuring quick transport of its exports to and imports from other parts of the Indian Republic without having to pass through Pakistan. At the same time communications within the State are being improved by provision of necessary feeder roads from and to the arterial road system of the State so that local surplus produce may find good markets.

## CIVIL SUPPLIES

*Latest figures :*

The approximate monthly import requirements in tons of food-stuffs and other essential commodities are as follows :—Wheat—5,000 ; Salt—7,600 ; Sugar—5,500 ; Gur—2,000 ; Mustard Oil—3,000 ; Pulses—6,000 ; Paper—150 ; Cloth—10,000 bales ; Yarn—2,500 bales ; Iron & Steel—4,500 ; Cement—10,000 ; Misc. goods—15,000 ; Rice—42,000.

## CO-OPERATION

For statistical information see the main article on Co-operation. Some specific types of co-operative societies and their number, not dealt with in the article on Co-operation, are given below.

Large sized Credit Societies (225) ; Small-sized Credit Societies (5,019) ; Consumers' and Trading Societies (683) ; Wholesale Stores (8) ; Weavers' Co-op. Societies (1,655) ; Urban and Salary Earners Societies (172); Farming Societies (269) ; Industrial Societies (353) ; Multipurpose Societies (205) ; Fishery Societies (231) ; Primary Marketing Societies (192) ; District Marketing Societies (3) ; Milk Unions (1) ; Primary Milk Societies (22) ; Co-operative Unions (16) ; Housing Societies (2) ; Cotton Ginning Mills (2) ; Jute Mill (1) ; Sugar Mill (1) ; Rice Mills (3) ; Other agricultural processing societies (427) ; Other types of societies (88) ; Apex Weavers (1) ; Apex Marketing (1) ; Apex Bank (1) (till 30th June, 1964).

Number of Co-operative Central Banks : 9.

Apex Banks : 1 with 16 branches.

Number of Co-operative Central Land Mortgage Bank : 1.

Number of Co-operative Primary Land Mortgage Banks : 14.

*Budget allotment for the Department for the year* 1965-66. *Co-operation :* General : Rs. 65,32,000 ; Sixth Schedule : Rs. 7,31,200. *Capital Outlay etc. :* General : Rs. 17,77,500 : Sixth Schedule : Rs. Nil. *Loans to Co-operative Societies :* General : Rs. 15,69,000 ; Sixth Schedule : Rs. 4,500.

## HEALTH SERVICES

*Latest figures available :*

Commonest diseases in State and mortality from each disease during 1963 : Malaria—78 ; Kala-Azar—216 ; Total of all fevers—14,428 ; Small-pox—100 ; Dysentery and Diarrhoea—2,586 ; Respiratory diseases—2,967 ; Injuries—871 ; Cholera—9 ; Enteric fever—288 ; Beriberi—12 ; Diptheria—71 ; other causes 7,868.

The general aim of health programme is to expand facilities for health services to cover as much population as possible and to promote a progressive improvement in the matter of health in the State. Achievements in figures till the end of 1964 are as follows : *Hospitals :* Government T.B. Hospitals 4 (387 beds) ; Private T.B. Hospitals 4 (256 beds) ; Government Mental Hospital 1 (886 beds) ; Leprosy Colonies 16 ; Leprosy Treatment Centres 227 ; Kala-Azar Hospitals 2 ; Kala-Azar Ward 10.

General Hospitals and dispensaries: (Allopathic and Ayurvedic) 716.

Total Number of pharmacists 4,127.

Total number of registered Doctors 3,937.

Total number of Government Doctors 803.

Total number of outdoor patients treated 46,01,917.

Total number of registered nurses 1,562 ; Total number of Auxiliary Nurse Midwives 872 ; Total number of registered Dentals 1,254.

Total number of Medical Colleges : Allopathic 2 ; Ayurvedic 1.

Total Number of Students : Allopathic N.A. ; Ayurbedic N.A.

Special medical Research Institutes: 2 (Pasteur Institute, Shillong and Malaria Institute, Shillong).

General Nursing Training: Training Schools : 14 (Govt. 4, Private—10) ; School for Auxiliary Nursing Midwives : 17 (Govt. 11, Private—6) ; Nurse Midwive's Schools : 14 (Govt. 4, Private—10).

Budget allotment (1962-63) : (A) for Public Health : General (Normal) Rs. 65,25,265 (for the sixth Scheduled Areas Rs. 8,39,914) ; Third Plan General Rs. 51,93,000 (for the sixth Scheduled Areas Rs. 20,87,000). (B) for Medical : General (Normal) Rs. 1,44,04,700 (for the 6th Scheduled Areas Rs. 23,34,700 ; Third Plan General Rs. 58,69,500 (for the 6th Scheduled Areas Rs. 5,12,500).

## EDUCATION

(For particulars about general education see under Educational Tables in 'Late Particulars'.)

*Social Educaton :* The scheme for social education was first launched in the State in the year 1949-50. Till 1963-64 a total number of 3,28,487 adults were made literate. The number of social education centres during 1963-64 was 649 and 22,469 students (males 16,995 and females 5,474) were admitted in these centres. There were 649 teachers (males 552 ; females 97). Number of persons educated during the year was 16,190. Five Social Education Worker's Training Camps were organised in 1963-64 where 215 workers were trained. In order to cater to the needs of the post—literacy courses 1,125 village libraries were given grants-in-aid besides free distribution of books. The above figures exclude the libraries sponsored by the development blocks

*Hindi in the Education System :*

Hindi has been introduced as a compulsory subject from class IV to class VIII in secondary schools, from class IV to X in higher secondary and multi-purpose schools and as optional in class XI.

There are five Training (Normal) schools in the State where Hindi is compulsory. In the special schools i.e in Madrassa it is a compulsory subject. The subject is being introduced in the Government and non-Government Colleges gradually both as mother tongue and as alternative language.

*Basic Education :*

With the introduction of the Basic Education Act of 1954 and establishment of State Advisory Board for Basic Education, a large number of Primary and the Middle Vernacular Schools were converted to Junior Basic Schools and Senior Basic Schools respectively to cope with the scheme of Educational Development in the new line of imparting education with the help of selected craft, i.e. learning by doing. The Basic Education Act of 1954 has, however, been repealed by the Assam Elementary Education Act of 1962.

There are 42 Senior Government Basic Schools and 347 Junior Government Basic Schools in the State. Besides, there are 656 Middle Vernacular and Senior Basic Schools and 17,947 Lower Primary and Junior Basic Schools under the State Elementary Education Board.

There are 28 Government Basic Training Centres in the State for giving training to junior teachers. There is also a Basic Training College for imparting training to senior teachers. Each training centre has the intake capacity of 130 to 200 students with a teaching staff of six per centre.

### LABOUR

Total number of registered population in tea industry 11,45,425; Total number of registered Trade unions 146; Total number of Trade Union Members 2,90,012; Total number of Industrial Disputes in 1963: 18; Total number of workers involved in it 10,416; Man-days lost 10,571; Total number of Community Labour Welfare Centres 12.

### COMMUNITY PROJECTS

(See under article, Community Development Projects.)

### HOUSING

Housing authority: Director of Housing, Shillong.

Finance available for housing: Schemes are entirely financed by loans and subsidies from the Government of India, Ministry of Works and Housing except that for slum clearance schemes a matching subsidy is given by the State Government. Allotment by Government of India for the Third Five-Year Plan period: Rs. 199 lakhs excluding staff expenses of the order of Rs. 15 lakhs.

The Schemes are: (1) Subsidised Industrial Housing for industrial workers—Rs. 45,00,000; (2) Plantation Labour Housing for tea estate workers—Rs. 30,00,000; (3) Low Income Group Housing—Rs. 60,00,000, under which two types of loans are granted: (*a*) for tenements for municipal sweepers at a ceiling loan of Rs. 2,800 per tenement, and for residential houses by private individuals, with a maximum loan of Rs. 10,000 per house; (4) Rural Housing for improving housing condition in villages—Rs. 20,00,000; (5) Slum Clearance—Rs. 16,00,000 and (6) Land Acquisition and Development Scheme—Rs. 28,00,000.

Types of houses built: Tenements for municipal sweepers at a ceiling cost of Rs. 2,800 per tenement, residential houses by private individuals at a ceiling cost of Rs. 10,000 and tenements for industrial workers at sponsored cost of Rs. 3,650 per house etc.

Another scheme called the Middle-Income Group Housing Scheme is in operation outside the Plan, under which loan upto Rs. 20,000 is sanctioned to individuals.

Progress of implementation of the schemes till March 31, 1965: (1) Construction of 303 tenements under Subsidised Industrial Housing Scheme—Rs. 9,90,000; (2) Implementation of Plantation Labour Housing Scheme—Rs. 1,17,600; (3) Sanctions to local bodies for construction of tenements for sweepers up to the amount of Rs. 7,89,320 and to private individuals for residential houses to the tune of Rs. 138,02,370; (4) Preliminaries undertaken for Rural Housing; (5) Construction of 272 tenements undertaken under the Slum Clearance Scheme at a cost of Rs. 11,94,564 and (6) Middle-Income Group Housing Scheme—Rs. 12,48,300.

**Retirement Age:** The Assam Government have decided to extend the retirement age of Government servants from 55 to 58. The extension of the term of service, however, depends on certain conditions.

## UNIVERSITY OF GAUHATI

Gauhati, Assam.

VICE-CHANCELLOR

Dr. M. N. Goswami.

REGISTRAR

C. Das, M.A., B.L.

**Teaching, Affiliating and Residential.**

**Subjects where provision exists for post-graduate and research:**

Assamese, Philosophy, Economics, History, Education, Mathematics, Statistics, Botany, Commerce, English, Physics, Chemistry, Geology, Anthropology, Agricultural Botany, Sanskrit, Political Science, Bengali, Geography, Zoology.

Number of colleges affiliated: 97 (Permanently affiliated 25; Temporarily or provisionally 72 including one constituent college).

Number of students: Affiliated Colleges: 41,553; University Departments: 1,734; Constituent College (Law College): 633.

Grant from State Government:

Annual recurring grant of Rs. 15,50,000 (1963-64).

Receipts: Rs. 76,23,100·75 (1963-64).

Expenditure: Rs. 87,19,C04·63 (1963-64).

Budget Estimates (1965-66): Income Rs. 44·63 lakhs; Expenditure Rs. 64·01 lakhs.

## NORTH-EAST FRONTIER AGENCY

Area : 31,438 sq. miles (81,425·9 sq. kilometres).

Headquarters : Shillong, Assam.

The population of NEFA after the separation of one of its former Frontier Divisions to the Naga Unit is 3,36,558.

The North-East Frontier Agency, geographically and constitutionally a part of Assam is situated on the borders of Bhutan, Tibet region and Sikiang province of China and Burma. The Agency's international border is about 800 miles.

A proposal to take over the administration of the Agency from the External Affairs Ministry, by the Union Home Ministry from August 1, 1965, with a view to bringing this area on par with the rest of the country from the point of view of administration, has not been finalised.

For some time the present set-up of the North-East Frontier tract with the Governor of Assam as its head will continue. Changes will be considered later.

The Agency Secretariat is situated in Shillong, capital of Assam.

Divisions in the Agency with headquarters in brackets: Kameng Frontier Division (Bomdila); Subansiri Frontier Division (Ziro); Siang Frontier Division (Along); Lohit Frontier Division (Tezu); Tirap Frontier Division (Khonsa).

Each Division is under the charge of a Political Officer. In addition, five territorial areas are entrusted to Additional Political Officers with headquarters at Tawang, Changlang, Dapo Rjio, Pasighat and Anini. Within these jurisdictions Sub-Divisions are in charge of Assistant Political Officers, and Circles, of Base or Area Superintendents. The system of administration has been organised on a single line. At the headquarters in Shillong the heads of various departments are integrated and function as ex-officio Secretaries of their Departments, while in the Divisions the Political Officers are assisted by technical advisers like District Medical and Agricultural Officers and Inspectors of Schools. Senior officers of the Agency are drawn from a newly created speci. l cadre—the Indian Frontier Administrative Service (I.F.A.S.).

### CHINESE AGGRESSION

In September 1962, the Chinese started their major incursions into the four northern Divisions of NEFA, reaching as far south as Bomdi La, Headquarters of the Kameng Frontier Division. Apart from Kameng Division, however, the Civil Administration continued to function in all but the extreme northern regions of the remaining Divisions of NEFA. The civil administration has now been functioning normally throughout the Agency.

### GEOGRAPHY

The North-East Frontier Agency is a wild mountainous country and presents a remarkable topographical variety. The northern regions bounded by the Himalayas are snowbound in the winter. On the east, the hill ranges bordering on Burma also present a formidable barrier. Near Assam State areas the Agency has some plains.

The entire area is intersected by rivers. The main river artery of Assam, the Brahmaputra, known during its course in Tibet as the Tsangpo enters the Siang Frontier Division of the North-East Frontier Agency cutting the main Himalayas southwards near Gelling. It is known by the Adis as the Siang and receives many tributaries the most important being the Syom before debouching into the plains at Pasighat.

Other major rivers are the Subansiri and the Kameng (Bhoreli), the first of which also breaks through the main Himalayan range and takes its source from the table lands of Tibet. Similarly the Lohit river enters the NEFA as one of the main tributaries of the Brahmaputra between Rima and Kibithoo and after flowing through Lohit Frontier Division joins the other main river of the Division, the Dibang and later the Siang at a major confluence above Dibrugarh.

### FORESTS

The reserve forests constitute 203 sq. miles and proposed reserve forest 3,300 sq. miles as per record available with the Government. In the year 1960-61, 20·34 lakh c. ft. timber was extracted and a total revenue of Rs. 25·45 lakhs earned. The revenue for 1962-63 was Rs. 36·65 lakhs and for 1963-64 it was Rs. 44·93 lakhs.

The fauna and flora of the Agency are rich. Wild elephants, buffaloes, tigers, various kinds of deer, leopards, bisons, mithuns, bears, pigs, wild goats, and many kinds of cats are found. To the people of the Agency the mithun is most important as it serves apart from its religious and sacrificial significance as a barter currency and medium of exchange.

The monsoon sets in from the month of May and continues till the end of September. The average annual rainfall at Bomdi La is 40·12″; Pasighat—229·05″; Tezu—160·03″ and Changlang—78·22″.

### TRIBES

The Agency is inhabited exclusively by Hill Tribes. A broad list of the main tribes division-wise is given below :—

*Kameng Frontier Division :*—Monpa, Sherdukpens Bangnis (Yanoo and Khrodeng), Aka or Hrusso, Khoa or Bugun, Miji or Dammao, Khamba, Sulung, Bangro.

*Subansiri Frontier Division :*—Tagin or Moya, Dafla or Nussu and Nishang, Apatani, Bangro Mikir, Hill Miri, Sulung.

*Siang Frontier Division :*—Adi (It has some 20 sub-tribes, some of them are almost treated as main Tribes), Khamba, Memba, Hill Miri, Idu.

*Lohit Frontier Division :*—Padam, Hill Miri, Mishmi L. C. Digaru or Taraon, Idu or Chulikata, Miji or Kaman, Singhs, Khampti.

*Tirap Frontier Division :*—Nocte, Singpho, Tangsa Wancho, Yobin.

Just as a large variety of tribes is found in the Agency, so also a large number of distinct languages and dialects are spoken. The number of languages is about 30 and the dialects about 42.

Very few of these languages have a script and it is one of the objectives of the Agency Administration in the sphere of education, to provide the people with the Devanagri script for writing in their languages.

### EDUCATION

Education in the Agency is of the Basic type with due emphasis on crafts and agriculture. 167 schools have already been converted to Basic pattern.

Upto the end of the primary stage, the mother tongue of the students is the medium of instruction in schools, and text books in various tribal languages have already been prepared upto Class I. Assamese will be the medium of instruction from Class IV onwards and it will also be introduced as a subject of study early in the primary stage. Hindi and English are also taught as compulsory languages from Classes III and IV respectively.

In 1947, when the Department of Education was set up, there were only two lower primary schools in the entire Agency. At the end of 1963-64 the situation was :—Number of Institutions : Lower Primary 175, Middle English 25, High English 5, Higher Secondary 2, Nursery 4, Technical Institutions 3, Total Institutions 214.

During 1964-65 there were 268 institutions distributed as follows : Higher Secondary 4 ; Higher English 4 ; Middle English 19 ; Lower Primary 233 ; Nursery 4 ; Technical Institutions 3 ; College 1.

The Buniadi Shiksha Bhawan (Teachers Training Basic and non-Basic) at Changlang (Tirap Frontier Division) runs re-orientation courses for the Teachers.

During 1963-64 there were 593 teachers (excluding techhical institutions) in 211 schools with a total enrolment of 10,773 students.

The most important aspect of the educational programme in NEFA has been the establishment and reorganisation of schools in the border areas.

### COTTAGE INDUSTRIES

The people of the Agency have a great tradition of artistic and cultural self-reliance. The Administration aims at assisting them to develop their capabilities and to improve their standard of living by adopting better technique without interference in the pattern of native art.

Regular Cottage Industries Training Centres have been opened at 11 places to impart training in weaving, spinning, tailoring, carpet-making, carpentry, wood-carving, cane and bamboo work, smithy painting, sawing, soap-making and pottery. Rearing of silk and *endi* is demonstrated at sericultural farms at Pasighat, Bordumsa and Namsang. There are also 12 irregular centres.

Up to 1963-64 a total number of 2,531 persons was trained in the various craft centres of the Agency. As on March 1965, the total number of persons trained was 2,650. Expenditure during 1963-64 was Rs. 10·66 lakhs.

### PUBLIC HEALTH

Figures for 1964-65 : Those within brackets are for the year 1962 : The number of patients treated throughout the Agency 236,000 (202,000) ; Number of hospitals, dispensaries health units 91 (84) ; Number of doctors 88 (85) ; Number of compounders 88 (99) ; Number of nurses 78 (29). There was one doctor for every 3,825 persons (3,959 persons), a nurse for every 4,315 persons (11,605 persons) ; one hospital dispensary for every 3,698 persons.

Thirty-five teams have been raised under the national small-pox eradication programme.

B.C.G. teams are touring the Agency area specially in Siang Frontier Division where the incidence of tuberculosis has given rise to concern. A 50-bedded T.B. hospital, the first of its kind, was opened at Margherita.

A Health Training and Research Centre has started to train Junior Nurses and Rural Health Workers drawn from the tribal people themselves.

## AGRICULTURE

Agriculture is the mainstay of the people of the Agency. Generally, the *jhum* system (shifting) of cultivation is followed as in the hills of Assam and the yield is not enough to meet the requirements. The year 1961-62 saw a record food production of 66,500.

The people of NEFA have since recognised the advantages of permanent cultivation and have already taken it up along with *jhum* cultivation.

State help towards agriculturists consists of:

(*i*) Subsidy towards land reclamation, minor irrigation, purchase of tools, purchase of seeds, purchase of plough bullock, agricultural education and training and purchase of improved cattle, pigs and poultry;

(*ii*) Technical advice and guidance along with free services with necessary equipment for plant protection, organisation of marketing facilities, organisation of exhibitions, organisation of study tours, organisation of crop competitions, organisation of demonstration of improved crops, veterinary aid and livestock upgrading.

There is no regular land settlement system in NEFA as in other settled areas and no cadastral survey has been conducted. The ownership of land in NEFA varies from tribe to tribe, though generally speaking, it can be considered under the three categories, (1) land owned by individuals, (2) land owned by the clan and (3) common village land. Government attitude to land in NEFA is formulated in the three Jhum Land Regulations which were promulgated in 1947-48. These regulations give the tribal population absolute rights over their Jhum Land which is defined as all lands which any member or members of a village or a community have a customary right to cultivate by means of shifting cultivation or to utilize by clearing jungle or grazing livestock provided, that such village or community is in permanent location. In actual practice, however, the local customs and traditions are respected, and take precedence over these regulations.

So far (March 1965), 36,000 acres of land have been reclaimed and developed for permanent cultivation, mostly for paddy and 18,000 acres of land have been brought under irrigation. The anticipated increase in food production is estimated at 13,000 tons. Tools and implements worth Rs. 4,72,000 have been distributed to the cultivators at subsidised rates. Nine agricultural and livestock farms have been established in various parts of NEFA for providing improved seeds, training farmers, and giving demonstration of improved methods of production.

Animal husbandry has been put on a scientific basis. There are at present (June 1965), 21 veterinary dispensaries and 42 veterinary aid centres. As on March 31, 1964, there were 12 cattle farms and 38 cattle up-grading centres in various parts of the Agency to help the farmer look after the cattle.

## CO-OPERATIVE MOVEMENT

Most of NEFA tribes have a very strong social sense, and every village is in its own way a Co-operative Society. The first Co-operative Society was started at Pasighat in December, 1955. There were on June 30, 1963, 60 Primary Co-operative Societies which included 43 Consumers' Co-operatives, 3 Multi-purpose Co-operatives, two Industrial Co-operative Societies, one Dairy Co-operative Farm, 6 School Co-operatives, two Labour Co-operatives and 4 Transport Co-operatives. There is a Central Co-operative Store and Union Limited, at Monanbari performing the functions of a supervising union with a working capital of Rs. 0·70 lakh. The NEFA Administration has been specially exempted by the working group constituted by the Reserve Bank of India, from the purview of the national policy, as co-operation is inherent in tribal life, land, culture and in spirit. Although the individual and tenure system is very strong, co-operative farming in NEFA has been in existence from time immemorial.

## COMMUNITY PROJECTS

Thirty-one Community Development and National Extension Blocks in the Agency cover 22,839 sq. miles with a total population of 2·86 lakhs. A special NEFA type block has been evolved by the Administration with the approval of the Government of India to meet the specific needs of the tribal people. The main emphasis is laid on self-sufficiency in food, better roads, water supply and sanitation.

## COMMUNICATIONS

In the Second Five-Year Plan in NEFA priority had been assigned to communications. Rapid progress has been made in the building of roads. A road now connects Bomdi La, the headquarters of Kameng Frontier Division at a height of 9,000 feet above sea level; Ziro, the headquarters of Subansiri Frontier Division; Along, the headquarters of Siang Frontier Division; Tezu, the headquarters of Lohit Frontier Division and Khonsa, the headquarters of Tirap Frontier Division, and Pasighat and Koing, the Sub-Divisional headquarters of Siang Frontier Division and the Lohit Frontier Division respectively.

Physical achievements from 1951 to 1963 consist of roads (jeepable) 713 miles, mule paths 399·50 miles, porter track 2,129·50 miles, bride paths 131 miles, improvement to roads 176·50 miles, improvement to porter tracks 391·75 miles. Total 3,941·25 miles.

For the development of the interior, carriage of mail and cash and the evacuation of casualties, the Administration depends greatly on Otter aircraft, while Dakotas are used for landing or dropping supplies all over the Agency.

A wireless network has been set up to provide quick connection among the various administrative centres and outposts.

## SUPPLY

Air supply in the interior areas of NEFA commenced in January 1951. The chartered companies fly regular sorties to land or air-drop supplies. The total tonnage air-lifted during 1962 was 14,344 tonnes.

Under a State Trading Scheme, ration and stores for the interior localities depend on air supply and are procured centrally at Jorhat, NEFA's air base and dropped or air-landed in the interior.

## SECOND PLAN

Plan outlay : Rs. 509·56 lakhs.

Actual expenditure : Rs. 356·64 lakhs.

Percentage of expenditure during the Plan : 69·99.

## THIRD PLAN

The Planning Commission has allotted a sum of Rs. 715 lakhs for the Third Plan period (1961-66). For the year 1961-62 a sum of Rs. 106·20 lakhs had been provided in the revised budget as against Rs. 114·87 lakhs earmarked by the Planning Commission for the period.

For the fiscal year 1962-63 the budget estimate for NEFA's development was Rs. 138·20 lakhs.

The Planning Commission approved the Plan provision for NEFA for 1963-64 with a capital outlay of Rs. 184·72 lakhs. There is special stress on communications, education, agricultural production and health in NEFA's development plans. The target for 1964-65 is of the order of Rs. 246·38 lakhs.

In the Third Five Year Plan, the largest amount—Rs. 2·65 crores—goes earmarked for transport and communications. Priority has been given to agriculture for which Rs. 63·48 lakhs have been spent including Rs. 20 lakhs for animal husbandry and Rs. 5 lakhs on fisheries.

During the first two Plans, 780 miles of roads, 654 miles of mule and bridle paths, and 3,389 miles of porter tracks were constructed in NEFA. With the Third Plan targets of 419 miles of roads, 153 miles of mule paths and 521 miles of porter tracks, it is expected that every village in the area will be linked with a road.

More airstrips are to be built; others improved; and the carry-overs from the Second Plan are to be completed — all during the Third Plan period.

Irrigation from hill streams will be extended to some 5,000 acres of land.

The main emphasis in the development progamme of NEFA in 1963-64 had been on the improvement of communications and agriculture. The administration proposes to encourage the formation of transport co-operatives to run passenger and cargo services in the region.

# BIHAR

(*See Late Particulars*)

# DELHI

**Area: 573 sq. miles; Pop. 2·66 million (1961 census).**

Under the Constitution of India, Delhi is a Union Territory.

Parliament administers the areas directly through the Union Home Minister. The chief executive official of the Territory is the Chief Commissioner.

Delhi has an Advisory Council which is associated with the Home Minister.

The Council comprises (1) all members of Parliament representing Delhi, (2) the Mayor, (3) the Vice-Chancellor of Delhi University, (4) the President of the New Delhi Municipal Committee, (5) the Inspector-General of Police, and (6) two Advisers (Chairman, Public Relations Committee and Chairman, Industrial Advisory Board, Delhi Administration).

The Council is consulted in regard to the (1) general question of policy relating to the administration of the Territory, (2) all legislative proposals concerning the Territory, including proposals to extend any State Acts, (3) general matters relating to the annual financial statement of the Union in so far as it concerns the Territory and such other financial questions as may be specified by the President and (4) any other matter about which it may be considered necessary or desirable by the Home Minister that the Committee should be consulted.

Subject to the discretion of the Home Minister, members of the Council have the right in regard to interpellations analogous to and under similar limitations as those of members of a State legislature.

The meetings of the Council are presided over by the Home Minister.

Besides, there are two Advisory Boards to advise the Chief Commissioner in regard to industrial matters and public relations. They are presided over by two paid Chairmen.

The highest Court of Appeal in Delhi is the Punjab High Court—a circuit bench sits in Delhi.

## NEW ADMINISTRATIVE SET-UP

The Union Government gave its final approval to the scheme of a new administrative set-up for Delhi on June 7, 1965. It will function soon after the necessary legislation is adopted by Parliament.

The scheme provides for a Lieut.-Governor who will be the Administrator of the Union Territory of Delhi. He will be assisted by an Executive Council consisting of not more than four councillors who will be appointed by the President from amongst the members of the proposed Metropolitan Council.

The council will consist of 40 elected and five nominated members. For the interim period up to the next general election in 1967, the 40 members will be chosen by indirect election by the electoral college consisting of the present municipal councillors, members of Parliament representing Delhi and ten members of the Cantonment Board.

### Law and Order

Members of the Metropolitan Executive Council will be in charge of various departments which may be allotted to them under the rules made by the President. The Lieut.-Governor will be the president of the council and will be directly responsible for certain subjects like law and order and Government property including lands and buildings.

The Metropolitan Council will have no legislative powers but can initiate legislation. It will also consider the annual financial statements of the Union Government relating to the Delhi Territory but cannot vote on them.

The entire Territory of Delhi, including New Delhi and the Cantonment, will have representation on the Metropolitan Council which will be a privileged body and consider the general question of policy relating to the administration of the Territory in the State field.

The Delhi Municipal Corporation will continue as at present, but its executive functions will vest in the Mayor-in-Council which will consist of the Mayor and not more than four councillors. The Mayor-in-Council will be collectively responsible to the Corporation.

The Standing Committee of the Corporation will be dissolved and the Commissioner will cease to be a statutory authority. He will act under the direction of the Mayor-in-Council.

There will be a provision for the constitution of zonal committees consisting of members of the Corporation elected from different zones which will be in charge of civic functions of a local nature.

Water supply and sewage disposal will continue with the Corporation as at present. There will be a separate general manager for this.

The rural areas in Delhi while continuing to be within the limits of the Corporation will have a panchayat raj system at the village and block levels. There will be a Rural Advisory Committee with the executive councillor in charge of the rural areas or his nominee as its chairman.

The Lieut.-Governor's actions can neither be questioned nor criticised in the Metropolitan Council, but questions can be raised on the subjects handled by him.

## GREATER DELHI

Delhi is really the size of a district. The majority of its population lives in the urban areas of Delhi.

Development work is being carried out by the panchayats under the supervision of the Development Department which is advised by a Rural Development Committee.

The Master Plan for Delhi drafted after requisite surveys and investigations, has been approved by the Government of India. The Plan makes proposals for Delhi's development upto 1981.

The main railway station is the junction at Old Delhi, from where radiate the railway lines to the Punjab, U.P., Bombay, Calcutta and Madras. The headquarters of the Northern Railway are located here.

### Average Quota of Monthly Essential Articles

The following are the estimated quantities of certain selected commodities imported into Delhi Territory (monthly average in tonnes) for the calendar year 1963:

Wheat 48,709; Gram 7,153; Rice 2,617; Pulses 583; Refined sugar 6,788; Tea 159; Ghee Cream and Butter 1,327; Dried fruits & nuts 4,381; Provisions 1,108; Spices 2,979; Steam Coal, Soft Coke & Hard Coke 50,425; Kerosene oil 16,418; Hides and skins 308; Agra stone 9,242; Cement 17,940; Chemicals 6,412; Face cream Powder and tooth paste 151; Hair oil and perfumed oil 70; English medicine 1,066; Soaps 2,939; Shoes and apparel 361; Hardware and cutlery 11,385; Photo goods 193; Betel leaf 80.

### Employment

According to 1963 figures there were 11,158 registrations (monthly averages) at the Regional Employment Exchange and 1,742 placings against 2,631 vacancies notified. The number of registrations on the live register at the close of 1963 was 87,133. The number of registrations for March '64 was 10,058 and placement during the same period 2,247.

## INDUSTRY

Second Plan provision for industries: Rs. 181·45 lakhs, of which Rs. 117·75 lakhs could only be spent.

A sum of Rs. 1·65 crores has been allocated under the Third Plan for the development of industries in Delhi.

The main industries are: cotton mills; hand and powerloom weaving; hosiery; pottery; flour mills; vegetable oil mills and expellers; paints and varnishes; rubber goods; imitation jewellery; copper and brass utensils; wire netting; sola hats; leather goods, sports goods, tanning and fibre industry.

The total number of registered factories at the end of December 1961 was 1,082.

The number of registered trade unions at the end of 1963 was 415.

Delhi was a great centre of artistic textile fabrics till the end of the Moghul era, and retained some importance till the advent of the modern textile mills. A revival is, however, now taking place under the Handicrafts and Handloom Promotion programmes.

In recent years the handloom industry has grown rapidly owing chiefly to the efforts of the Industries and Co-operative Societies Department, which helped in the promotion of weavers' co-operatives.

In 1959 there were 56 societies and 529 looms. There were 533 weavers and the production in 1959 was estimated at 6,21,500 yards. The target for the Second Plan was 4 lakh yds. a year.

The total number of handlooms in Delhi by 31st March 1963 was 800. By the end of 1959 there were 846 handlooms in Delhi out of which 589 were in working order. The actual number may be in the neighbourhood of 1,000. The capital invested was between Rs. 3 and 4 lakhs. The industry provides livelihood for about 3,000 persons, and the total production is estimated at 5 lakh yds.

The prototype production-cum-training centre at Okhla Industrial Estate, about 5 miles from Delhi was inaugurated on March 2, 1961. This is an Indo-German venture which will manufacture prototypes of machines and machine tools and train about 500 workers every year.

The Co-operative Department has opened emporia in Delhi to help marketing. A dye-house has been set up under the control of the Indian Co-operative Union with an expert dyer-cum-printer attached. The Handloom Sales Depot at Jan Path, New Delhi is a centre of all varieties of handloom cloth.

There is also a very flourishing grain market, serving local needs.

As in all towns, different parts of Delhi specialize in different trades. The area round about Chandni Chowk for instance is the centre for textiles and general merchandise. The trade in copper and brass utensils is located in Chawri Bazar, which in addition has a market for hardware. Khari Bawli is the granary of Delhi with the adjoining streets specializing in condiments, spices, pickles, dry fruit, etc. Lal-Kuan Bazar is noted for building material, while Sadar Bazar deals in wholesale hosiery, glass and china-ware and general merchandise. Silver-ware is retailed in Dariba Kalan, while the bullion market is localized in Chandni Chowk

Almost all the banks have their branches in Connaught Place and Chandni Chowk which are the Chief shopping centres of New Delhi and Delhi respectively.

Tourist traffic has grown into a regular new trade. Almost all the Indian and foreign air companies and travel agencies have offices in New Delhi.

## INDUSTRIAL ESTATES

The Okhla Industrial Estate, seven miles south of Delhi and one of the biggest of its kind in India, was built by the National Small Industries Corporation. It was declared open by the Prime Minister in April 1958.

There are 45 factories in the Estate all humming with activity. Forty more units have already been constructed and allotted to small-scale industrialists.

The items manufactured by the units in the Estate include amplifiers, radio parts, electric motors, room coolers, power presses, automobile accessories, bicycle parts, lathes, drilling machines, machine tools, safety razor blades, insulated wires and household and utility articles.

The Regional Small Industries Service Institute has set up a technical guidance and training centre in the Estate.

Nearly Rs. 16 lakh worth of goods are produced by these units every month. There are now over 1,800 workers in the various factories in the Estate.

The Estate was handed over to the Delhi Administration in April 1959.

A sum of Rs. 33 lakhs has been provided in the Third Plan to complete construction of 45 units at Okhla Industrial Estate. A sum of Rs. 15 lakhs shall be provided for the development of land meant for these 45 industrial units from the Revolving Fund.

Under the third phase of expansion programme of the estate, the construction of 41 factories for the manufacture of sports goods were taken up.

At the instance of the Government of India it has been proposed to construct a small industrial estate in the Pilot Project Area of Alipur. A site near Badli Railway Station has been acquired and construction work started. Seven industrial sheds were constructed at Badli as part of a rural industrial estate to be established at a cost of Rs. 4·5 lakhs. Besides, five more Rural Estates are proposed to be set up in various rural areas of Delhi costing about Rs. 150 lakhs.

## AGRICULTURE

Figures given below are for 1963-64 :

Total land : 365.598 acres; area under forests : 3.497 acres ; area not available for cultivation : 85,241 acres ; other uncultivated land excluding fallow land : 44,820 acres ; fallow land : 16,652 acres; net area sown ; 2,15,388 acres; total irrigated area : 82.696 acres.

Area in acres and production in tonnes respectively of each crop for the year 1963-64 are given below. Figures in brackets show production.

Rice 1,776 (635); Jowar 39,202 (4,284); Bajra 36,922 (9,407); Maize 2,545 (412); Wheat 80.327 (32,000); Barley 7,595 (585); Gram 63.919 (11,000); Sugarcane 8,103 (1,711); Chillies 700 (1,078); Oilseeds 3,234 (163); Cotton 1,250 (213); Potatoes 555 (1,772); Tobacco 288 (257); Fruits 2,711 (N.A.); Vegetables 6,606 (N.A.); Pulses 9,896 (1,362).

The scheme for desilting of Najafgarh drain has been completed and an area of 6,000 acres, previously blocked, has been made available for cultivation.

Important fruits grown in Delhi are bananas, pears, mangoes, pomegranate, lokats, figs, papais, castor-fruit and plums. Efforts are now being made to promote the growing of orchards. A separate Horticultural Department has been set up for this purpose in the Delhi Administration.

The total area under fruits and vegetables during 1962-63 was 3.479 acres and 6,275 acres respectively. Important vegetables grown in Delhi are cauliflower, tomato, peas, potato, radish, brinjal and bhindi.

Delhi now imports most of its fruits. But on large areas—a total of 9,754 acres—in and around the city vegetables are grown.

### Land Reform

The Delhi Land Reforms Act, 1954 came into effect on July 20, 1954. The Land Revenue Act provides for a uniform system of Land Revenue administration. Previously, part of the land was under the Punjabi aws and part under the U.P. laws.

The Act provides for the abolition of proprietary rights and conferment of ownership on all tenants and sub-tenants from whom compensation would be recovered and paid to owners. The rate of compensation varies from 4 to 40 times the land revenue, according to the nature of tenancy. A stay order passed by the High Court was vacated in April 1956 and implementation of the law is now in progress. Over 8,000 tenants of various categories have acquired Bhumidari rights in an area of about 38,000 acres.

The Delhi Land Reforms Act was amended in October 1956 to exclude areas controlled, notified, held, occupied or owned by the Delhi Improvement Trust from the purview of the Act.

The Delhi Land Reforms (Amendment) Act, 1959 removes some difficulties in the working of the Act and includes Improvement Trust areas excluded by the 1956 Act. Out of 306 villages, the work of consolidation has been done in 268 villages. Under the Delhi Panchayat Raj (Amendment) Act, 1959, 215 Gaon Panchayats and 23 Circle Panchayats covering all the 305 villages in Delhi, have been established.

The Delhi Landholders (ceiling) Bill passed in Aug. 1960, fixes the ceiling on land holdings at 30 standard acres for a family of five.

Leases in future have been prohibited except by small owners holding less than eight standard acres and persons suffering from a disability. Future tenants will have a minimum term of five years.

The maximum rent has been fixed at one-fifth of the gross produce.

A ceiling has been placed on future acquisition of land holdings at 30 standard acres.

### Dairy, Poultry

It is estimated that there is one milch animal for every three or four persons. The average yield of a cow and buffalo comes to 2 seers and 4·2 seers respectively.

The annual average daily production of milk is estimated at 7,000 maunds.

*Delhi milk supply :* The Central Dairy at Delhi started functioning in November 1959. About 400 mds. of milk is collected from surrounding villages where milk collection, processing and storage arrangements are set up and automatically bottled and sealed.

When in full operation, the dairy will handle about 12,000 mds. of milk daily. To meet the present requirement 7,000 mds. of milk are needed. At present about 4,500 maunds of milk is distributed daily. Pasteurised whole buffalo and cows' milk in sealed half litre bottles at 62 P. per litre and toned milk, at about half this cost are supplied through 576 booths. It is a State Trading Scheme. The outlay on this during 1959-60 was Rs. 4·39 million and 1960-61 Rs. 29·5 million. The profits were expected to go up from Rs. 65,000 in 1959-60 to 3·26 million rupees in 1960-61. The Scheme now manufactures butter, ghee, milk powder and ice-cream. It was expected to manufacture cheese also.

*Poultry* 1964 : No. of poultry farms 120 ; No. of chicks produced during the year 54,451 ; No. of eggs produced 4,69,600.

Targets for the year for eggs were 3,00,000 and for Chicks, 45,000 respectively.

A disease control unit was contemplated to provide necessary medical facilities for poultry.

## TRANSPORT

Delhi occupies a pivotal point in the network of national railways, highways and airways.

It is one of the biggest railway junctions in the country handling about 23 mail, 30 express trains besides several goods and passenger trains every day.

All the principal inter-State roads of significance converge on Delhi.

It is also linked with important cities and foreign countries by air through its two air ports, Willingdon and Palam.

There are in Delhi 25,629 motor cycles, 4,892 motor rickshaws, 2,016 taxis, 23,724 cars, 1,500 buses and 5,129 trucks. The following figures are for the quarter ending March 1964 : Cycle rickshaws 825, bicycles over 2,25,000, hand carts 5,583, animal-driven carts 1,803, tongas 2,952 and bullock carts 1,799.

Bus transport in the urban area is provided by the Delhi Transport Undertaking of the Delhi Municipal Corporation. There are a few private buses operating in suburban areas. The Transport Service has 880 buses operating on 56 routes. Total distance covered per day : 1,38,000 kilometres.

*General Manager*, J. A. Dave ; *Dy. Genl. Mgr.*, Khurshid Alam Khan ; *Traffic Manager*, A. K. Dutt.

## HEALTH

(Monthly Average 1963)

Birth rate 31·6 ; death rate 7·9 ; infant mortality per thousand live births 76·5.

*Deaths* : Caused by Small-pox 11 ; Dysentery and Diarrhoea 62; Respiratory diseases 351 and Injuries and suicides 50.

Live births 7,557, still births 65.

There are 35 hospitals and 87 dispensaries of the modern system of medicine, two Ayurvedic and Unani hospitals and 15 dispensaries and six Homœopathic dispensaries. The total bed strength is about 5,000.

Some leading hospitals are :

Mrs. Girdhari Lal Maternity Hospital, Circular Road, outside Ajmeri Gate ; Hindu Rao Civil Hospital, The Ridge, Sabzi Mandi ; Infectious Diseases Hospital, Kingsway ; Irwin Hospital, Circular Road ; Jeewan General Hospital, Panchkuin Road ; Lady Hardinge Hospital, Panchkuin Road ; St. Stephen's Missionary Maternity Hospital, Tis Hazari ; Safdarjang Annexe Hospital, New Delhi ; Shroff Charity Eye Hospital, Daryaganj ; Silver Jubilee T. B. Hospital, Kingsway ; Victoria Zenana Hospital, Machhliwalan, Daryaganj ; Willingdon Hospital, Irwin Road and G. B. Pant Hospital, near Lady Irwin Hospital, Circular Road, New Delhi.

Money allotted under the Third Five-Year Plan for medical development schemes : Rs. 1·55 crores.

## EDUCATION

The number of recognised educational institutions increased from 1,508 to 1,581 during 1963-64 ; out of these 206 are Govt. schools and 1,375 run by non-Govt. agencies including local bodies. The total enrolment also showed an increase of 37,688 pupils and the number on roll stood at 6,10,200.

There is one University in Delhi known as Delhi University and three institutions namely Jamia Millia Islamia, Indian School of International Studies and Indian Agricultural Research Institute for higher learning are deemed to be Universities under Section 3 of the University Grants Commission Act. Two novel types of institutions called Janata Colleges one for men and the other for women are being run in Delhi's rural areas to impart community training to the villagers. Literacy percentage in Delhi : 53 (1961).

One engineering college at Kashmere Gate and five polytechnics including one for girls, and seven industrial training institutes have been set up during 1963-64.

The expenditure on education during 1963-64 amounted to Rs. 5,35,04,903 thus showing an increase of Rs. 64,58,480 over the previous year. Education upto Class VIII for students reading at Govt. and aided schools was made free during 1961-62. A television scheme was introduced in Delhi schools and during 1961-62, 152 schools were equipped with television sets.

During 1963-64, 18 new higher secondary schools were opened and 150 additional sections were started in the existing higher secondary schools adding the seating capacity to 15,000 more. The total number of recognised Higher Secondary Schools increased from 325 to 344 and the enrolment stood at 2,42,000.

## COMMUNITY DEVELOPMENT

The village development scheme covers all the 305 villages. A sum of Rs. 31 lakhs was spent during the Second Five Year Plan on the Community Development and Panchayat Raj in the rural areas of Delhi.

The expenditure during Third Plan on Community Development and Panchayat Raj is Rs. 8·612 lakhs upto Dec. 1964 out of an actual allocation of Rs. 12·61 lakhs.

Five development blocks are being run under the Community Development Programme covering the entire rural area of Delhi. The blocks are—Alipur, Najafgarh, Mehrauli, Shahdara and Kanjhawla. The villagers contributed more than Rs. 23 lakhs in cash, kind and labour towards local works such as construction of village schools, panchayat ghars, community centres and pavement of streets during the Second Plan period.

The entire rural area of Delhi is now covered by the Panchayat Raj system. There are about 215 Gaon Sabhas with equal number of Gaon Panchayats. In all about 2,700 representatives of the people were elected as members of Gaon Panchayats and Circle Panchayats in Dec. 1962. Panchayat Raj in rural Delhi was inaugurated by the Union Home Minister on November 8, 1959.

The Community Development Blocks presently comprise 300 villages, a population of 328,968, a total area of 1,500 sq. kilometres.

The total number of co-operative societies on March 31, 1964 stood at 2,186 with a membership of 2,48,458 as against 2,009 societies with a membership of 2,03,345 during the previous year.

## HOUSING

The Govt. of India has approved the scheme for remodelling of Dujana House near Jama Masjid in Delhi. The estimated cost of the scheme is about Rs. 10·90 lakhs of which Rs. 6 lakhs are for construction of two room multistoreyed tenements. This scheme is part of a programme for slum clearance in Delhi.

The Government of India has approved a scheme for construction of 48 two-storeyed blocks of prefabricated buildings, to be located in the Ramakrishnapuram — about 6 miles from the Central Secretariat, for accommodating offices, providing 4·77 lakh square feet of office accommodation, in the Capital. The estimated cost of the buildings is Rs. 81·14 lakhs. The first lot of blocks was expected to be ready by the end of 1962, and all the blocks by the end of the financial year 1963–64.

An area of about 8,000 acres was selected for acquisition and development. After detailed scrutiny, 10 development schemes—six residential and four industrial—covering altogether an area of about 2,000 acres and costing nearly Rs. 8 crores have been approved.

During 1963-64 about 16,000 acres of land has been acquired and taken possession of and a sum of about Rs. 10 crores offered as compensation. Steps were taken to develop 15,500 acres of land for residential and industrial use. An additional area of about 3,500 acres has also been covered by notifications under Section 6 of the Land Acquisition Act.

Three schemes for providing housing loans are currently being implemented by the Delhi Administration for the benefit of low income group, middle income group and the rural people.

Similarly slum clearance and jhuggi jhonpri removal schemes have been prepared for the benefit of slum dwellers.

## DELHI MUNICIPAL CORPORATION

The Delhi Municipal Corporation, replacing all local bodies, except the New Delhi Municipal Committee and the Delhi Cantonment Board and constituted under the Delhi Municipal Corporation Act, 1957, came into being on April 7, 1958. The Corporation is patterned on the Bombay model. It has 86 members, including six aldermen.

The Corporation assumed charge of the responsibilities in regard to medical and public health, primary and basic education, roads, water supply, transport, electric supply, fire services, etc. which were hitherto being discharged by the Delhi Administration. About 4,000 officials who were dealing with these matters in the Delhi Administration were transferred to the Corporation.

The Corporation is now also responsible for the improvement and clearance of slums and katras and removal of jhuggies and jhonpries in the Union Territory of Delhi.

An estimate of the party position including the six aldermen is as follows : Congress 73, Jan Sangh 8, Communists 2, Independents 3.

### Members

The following are the members of the Corporation. The number in the brackets shows the number of the ward the member represents.

*Mayor*, Nur-uddin-Ahmed.

*Deputy Mayor*, H. K. L. Bhagat.

*Members :* H. K. L. Bhagat (1); Ram Lal (2); Gian Chand (3); Brij Lal (4); Pran Nath (5); Des Raj (6); Tulsi Ram (7); Des Raj Chaudhary (8); Sumer Chand (9); Lal Chand (10); Madan Lal (11); Akhlaq Hussain (12); Hakim Mohd. Sharif Khan (13); Ishwar Dass (14); Ram Charan Aggarwal (15) ; Sri Kishan Khanna (16); Vacant (17) ; Girdhari Lal (18); Daroga Mal (19); Abdul Sattar (20); Ram Babu (21); Vasu Dev (22); Sheila Khanna (23); V. P. Nanda (24); Mittar Sain (25); Kalu Ram (26); Narain Singh (27); Sain Dass Lamba (28); Chandu Lal (29); Dalip Singh (30); Tulsi Nath (31); Rattan Singh (32); Krishan Lall (33); Mangat Ram (34); Ganesh Dass (35); Vijay Kumar Malhotra (36); Bal Raj Khanna (37); Dhani Ram (38); Prem Sagar Gupta (39); Laxmi Narain (40); Kaushlya Malik (41); Rattan Lal Sharda (42); Khub Ram Jajoria (43); Devki Nandan (44); Manohar Lal (45); Ganga Persad (46); Dalbir Singh (47); Mansa Ram Shukla (48); Devi Dass (49); Amar Nath Chawla (50); Mushtaq Rai (51); Dhanpat Rai (52); Roshan Lal (53); Bansi Lal (54); Om Perkash (55); Bhiku Ram (56); R. K. Bhardwaj (57); Makhan Lal (58); Radha Kishan (59); Kashmiri Lal (60); Kula Nand (61); Sunder Dass (62); Chuni Lal (63); Pyare Lal (64); Kishori Lal (65); B. D. Wadhwa (66); Kidar Nath (67); Jia Lal Kardam (68); Fateh Singh (69); Mam Chand (70); Ram Dev (71); Karan Singh (72); Ram Singh (73); Raghbir Singh (74); Chander Singh (75); Balbir Singh (76) ; Brahma Nand (77); Kishan Chand (78); Girdhari (79); Prem Singh (80).

*Aldermen :* Nur-u-ddin Ahmed ; Brij Mohan : Smt. Memo Bai ; T. C. Kundrom ; Raghavendra Singh.

### *Officials*

*Commissioner*, Bhagwan Singh, I.A.S.
*Deputy Commissioners*, D. D. Joshi, I.A.S. ; Parmatma Saroop ; N. N. Tondon, I.A.S.
*Health Officer*, Lt. Col. R. R. Rao.
*Chief Engineer, Water*, Chaudhary Balwant Singh.
*Drainage Engineer*, J. D'Cruz.
*Municipal Engineer*, M. M. Patel.
*Education Officer*, D. L. Sharma.
*Chief Accountant*, D. D. Bhatia.
*Chief Fire Officer*, A. B. Advani.
*Chief Auditor*, N. K. Bhatacharya.
*Officiating Director, Urban Community Development*, M. L. Kaul.
*Liaison Officer*, G. D. Rampal.
*Gen. Manager, Electricity Undertaking*, J. M. Raina, I.A.S.
*Secretary*, Hem Raj Sharma.

*Chairmen of Committees*

*Standing Committeee*, Des Raj Chaudhary.
*Electricity Supply Committee*, Amar Nath Chawla.
*Water Supply and Sewage Disposal Committee*, Dr. Roshan Lal.
*Education Committee*, Bansi Lal Chauhan.
*D.T.U.*, I. Vasudev.

**New Delhi Municipal Committee :** A whole-time president for the New Delhi Municipal Committee was appointed in 1959.

Apart from its normal functions, the New Delhi Municipal Committee serves as the electricity distributing agency in its area. There are now 15,200 street lighting points in New Delhi area. Automatic traffic control signals have been installed at the junctions of Janpath, Connaught Circus, Parliament Street which were formerly hand operated.

## EDUCATIONAL INSTITUTIONS

### DELHI UNIVERSITY

**The University of Delhi was established at Delhi in May 1922, to function as unitary teaching and residential university, but it became a Federal University by an Amendment Act No. XXIV of 1943, to the Delhi University Act VIII of 1922. The University Act was further amended by Act V of 1952. The University has now been made a teaching and affiliating University.**

The University confers the following Degrees and Diplomas on students on passing the appropriate examinations :

Degrees : Ph.D. (Arts, Science, Law, Education, Medical Sciences and Social Sciences), M.A., M.Lib. Sc., M.Com., M.Sc., LL.M., B.C.L., LL.B., M.Ed., B.A. (Hons.), B.Ed., B.A. (Pass), B.Sc. (Hons.), B.Sc. (Pass), B.Com., M.Sc. (Home Science) in Rural Community Extension, B.Sc. (Home Science), M. Nursing., B.Sc. (Nursing) Hons., B.Sc. (Elect., Mech., Civil.), Engg. B.Arch., M.B.B.S., M.Sc. in Medical Biochemistry (for non-medical students. M.D. (Physiology, Pharmacology, Bacteriology, Medical Biochemistry, Pathology, Anaesthesia, Paediatrics, Medicine, Obstetrics, and Gynaecology), M.S. (Anatomy, Surgery, Opthalmology, E.N.T.R., Orthopaedics), D.Sc., D.C.L., D.Litt., M. Litt. (Buddhist Studies and Linguistics).

Diplomas : D.T.C.D., Anaesthesia, Child Health, Radiation Med., Otolaryngology, Dermatology, Venercology, Med. Radio Diagnosis, Med. Radio Therapy, Obstetrics & Gynaecology, Dip. Lib. Sc., Dip. in Russian Language, Dip. in Hindi, Urdu, Panjabi, Modern Persian, Bengali, Arabic, Business Management & Industrial Administration, Post M.A. Dip. in Linguistics, Dip. in Hindustani and Karnatak Music, Dip. in French, German and Italian, Dip. in Geography (Eve.).

Certificates : Cert. of Proficiency in (Russian language. Cert. in German, Italian, Spanish, Swahili, Hausa, Tamil, Telugu, Kannada, Malayalam, Marathi, Gujarati, Hindi, Urdu, Bengali, Cert. in Translation (English-Hindi). Post-Diploma Translation Cert. in Russian.

**Medium of instruction : English.**

No. of students (Aug. 1964) : 29,732 (including 11,701 women) ; Income (1963-64) : Rs. 72,44,515 ; Expenditure (1963-64) : Rs. 68,14,601.

*Chancellor*, Dr. Zakir Hussain.
*Pro-Chancellor*, B. P. Sinha.
*Vice-Chancellor*, Dr. C. D. Deshmukh.
*Pro-Vice-Chancellor*, Dr. B. N. Ganguli.
*Registrar*, L. N. Welingkar.

## ASSOCIATIONS, SOCIETIES, ETC.

### AERONAUTICAL SOCIETY OF INDIA

13B, Indraprastha Estate, New Delhi-1.

*President :* R. N. Kathju ; *Vice-Presidents :* P. R. Krishna Rao, Air Vice-Marshal M. S. Chaturvedi, Capt. L. M. Manilal, Capt. K. Vishvanath ; *Honorary Secretary :* S. Ramamritham ; *Honorary Treasurer :* Gp. Capt. K. N. Chawla.

*President :* S. N. Agarwal ; *Vice-Presidents :* B. B. Sarkar (*Sr.*), P. C. Varshnei (*Jr.*) ; *Hony. General Secretary:* H. C. Gupta ; *Secretary :* S. Jaswant Singh Sodhi.

### ALL INDIA HARIJAN SEVAK SANGH

Kingsway, Delhi 9.

Founded by Mahatma Gandhi after his fast in Yeravda Jail in 1932 over the Communal Award.

The object is the eradication of untouchability by truthful and non-violent means. In furtherance of its object, the Sangh seeks to establish contact with caste Hindus and show them that untouchability as it is practised, is repugnant to the fundamental principles of Hinduism. It also seeks to serve Harijans so as to promote their moral, social and material welfare.

*President :* Shrimati Rameshwari Nehru ; *Vice-Presidents :* Viyogi Hari, R. S. Dhotre ; *Secretary :* Jivanlal Jairamdas.

The Sangh spent during the year 1963-64 Rs. 25,50,608·62 on the removal of untouchability, Bhangi Kasht Mukti, and other welfare activities through its 20 State Branches and 150 District Committees. It conducted 113 hostels with 4,921 Harijan and 1,205 Non-Harijan boys and girls besides 3 Industrial training centres, 435 co-operative societies and 141 Balwadis, 'Sanskar Kendras', Ashram Schools and creches. During 1963-64 it secured the opening of 1,394 temples, 1,727 wells and tanks, 1,188 barber saloons, 2,059 hotels and restaurants to Harijans. Where there was opposition it reported to the police 181 cases under the Untouchability (Offences) Act, out of which 10 were convicted, 106 were compromised and the remaining 65 were still pending.

### BHARAT SEWAK SAMAJ
16, 17, Theatre Communications Bldg., Connaught Circus, New Delhi 1.

A national organization, non-political and non-official in character, devoted to the task of economic and social reconstruction of India by mobilising people's participation in the Five Year Plans.

Sponsored by the Planning Commission in 1952, as a result of a recommendation of the National Advisory Committee on Public Co-operation, the Bharat Sevak Samaj has, within a period of thirteen years, grown into a country-wide organisation with branches not only in all the States and in about 300 Districts but also in a number of tehsils, taluks and development blocks.

The Samaj has carried the message of the Plan to the people through about 200 District Information Committees and 3,800 Village Committees, 75 District Information Organisers and an equal number of Plan Information Centres. It conducts seminars, group discussions, symposia at different levels, arranges exhibitions, film shows and cultural programmes to educate people in various aspects of planning and development and to secure their support and participation. Yojana Yatras and Youth Plan Project Camps are also organised. The Samaj organised 11 State level, 4 Regional level, 19 District level and 183 Block level Plan Publicity Seminars and study camps during the year 1964-65. It publishes bulletins in 10 regional languages besides a monthly each in Hindi and English devoted to the aforesaid cause.

The Samaj runs 28 Welfare Extension Projects (Urban) in big industrial towns and cities allotted by the Central Social Welfare Board. The Samaj is also running 38 Night-shelters for the pavement dwellers all over the country. Besides the Samaj runs a large number of pre-primary and Nursery Schools, Women's Craft Centres, Maternity and Child Health Centres, Harijan Welfare Centres, Adult Education Centres for both men and women, ante-natal and post-natal Centres, Ambar Charkha Centres, Milk Centres, Ladies and Children's Clubs, Libraries, Medical aid Centres or dispensaries and Co-operative Societies. With the assistance of the Planning Commission the Samaj also runs 51 urban Lok Karya Kshetras for mobilising public co-operation and participation in socio-economic welfare work in the slums covering 10 States.

The Samaj holds Work Camps as part of its programme of youth activity. The Samaj has been accepted as one of the members of the Co-ordination Committee for International Voluntary Work Camps (UNESCO, 6 Rue Franklin, Paris, 16 France) because of its achievements in the field of organising Work Camps.

The Construction Service of the Samaj is created to bring about honest dealings in construction work to cut down construction costs and to plough back the savings for welfare schemes. The Service ensures fair wage to the labour and in addition provides amenities like medical aid, drinking water, recreation centres, etc.

The Samaj has since organised various construction units and taken up construction of multi-storeyed buildings, aerodromes, barrages and steel structures. The Samaj has also entered the important field of supply of materials like stone ballast, bricks and sand with a view to bringing down rates which have already come down substantially in the Delhi market.

To help slum clearance work, the Samaj helped in the speedy construction of pucca houses to displaced persons in Delhi area. An economic design was produced and construction carried out at Rs. 5·5 per square foot as against Rs. 10·00 per square foot for pucca construction as per standard designs.

The Samaj has undertaken works of the value of over Rs. 18 crores, saving about three crores to the Public Exchequer and contributed substantial sums towards welfare schemes.

The Lok Karya Kshetra scheme is the most important public co-operation programme evolved by the Planning Commission and implemented by the Bharat Sevak Samaj for mobilising manpower and resources of rural people with a view to increasing food production, cottage industries etc., and thereby improve their social and economic conditions.

The Samaj has given very high priority to Health and Sanitation Work and has been carrying out educational propaganda in this respect through Lok Karya Kshetras, Welfare Extension projects, Regional Camp Committees and Students' Labour & Social Service Camps all over the country. Recently the Samaj has taken up Family Planning Work, especially after the population explosion revealed by 1961 Census.

In the year 1962-63 one all India and two regional Family Planning Training Camps were organised and about 140 organisers were trained, who subsequently organised 183 Family Planning Orientation Camps for village leaders, community project staff, school teachers and social workers which were attended by 10,837 persons.

In the year 1963-64 one All India Family Planning Extension-cum-Training Camp was organised and 70 persons were trained who subsequently organised 13 State level Orientation Training Camps and about 700 persons were given orientation training, who subsequently organised 517 family Planning Orientation Camps of 3 days' duration which were attended by about 30,000 persons. In addition to this 23 Half Day Urban Slum Camps of six days' duration have also been organised.

During the year 1964-65, Bharat Sevak Samaj organised 732 Family Planning Orientation Training Camps sanctioned by the Ministry of Health. These Camps were held in rural, urban and slum areas and about 43,200 persons (including 4,120 women) were oriented.

Immediately after the Chinese aggression at India's Northern borders, an organisation called "Non-Official Price Intelligence Service" was sponsored by the Planning Commission of the Government of India with the object of keeping in touch with the consumer's version of the prices for essential commodities, to ensure that the prices did not rise as they did during the last Wars. Following the success achieved by the efforts of this pilot project in Delhi, the Planning Commission decided to enlarge the scope and re-named it National Consumer Service, from the beginning of the year 1964.

The service is working with the collaboration of All-India Voluntary organisations and the leading role is played by the Bharat Sevak Samaj with its branches scattered all over India.

*Chairman :* Brij Krishan Chandiwala ; *Vice-Chairmen :* Swami Harinarayanananda, Radha Raman ; *General Secretary :* Major T. Ramchandra, (*Acting*).

### FEDERATION OF INDIAN CHAMBERS OF COMMERCE AND INDUSTRY

(Estd. 1927)

Federation House, Tansen Marg, New Delhi.

The Federation is recognised by the Central Government as the premier organisation representing commercial and industrial interests in the country. The headquarters of the Federation are situated in New Delhi.

The Federation has on its roll 171 Chambers of Commerce and Trade and Industrial Associations and 358 Associate Members, comprising leading business houses in the country. The Federation, through its constituents, covers almost the whole of the organized Indian industry and trade. It is represented on almost all important Consultative Bodies of Government. The Central Advisory Council of Industries, the Export Advisory Council, Capital Issues Advisory Committee, are some of the important Bodies on which the Federation is represented.

The membership of the Federation is of four classes Ordinary, Honorary, Overseas and Associate.

The Federation issues a bulletin *Fortnightly Review* containing information and comments on current economic events in India and abroad.

The Federation has been instrumental in the establishment of two allied organisations—All India Organization of Industrial Employers and the Indian National Committee of the International Chamber of Commerce.

### INDIAN COUNCIL FOR CULTURAL RELATIONS
Azad Bhavan, Indraprastha Estate, New Delhi 1.

The Council is an autonomous organization entirely financed by the Government of India ; established in April 1950 in order to promote cultural relations with other countries.

The General Assembly of the Council consists of eminent scholars and artists nominated by the President for their distinguished service to the cause of Indian culture, representatives of Parliament, universities and educational, scientific and cultural organizations in India.

The Council brings to India distinguished scholars, scientists, statesmen and artists from other countries for an exchange of views with their Indian counterparts and also to learn something of our way of life. It sponsors visits of Indian scholars to other countries on study and lecture tours ; it establishes Chairs and Lecturerships of Indian studies abroad ; it arranges exhibitions, talks, film shows and lectures in different parts of the country. The Azad Memorial Lectures which the Council has been organizing since 1959 have become an important part of the cultural life of the country, having been delivered by such distinguished scholars as the late Jawaharlal Nehru, Dr. Arnold Toynbee, Lord Attlee, Prof. C. V. Raman, Dr. Walter Hallstein, President Carlos P. Romulo and Dr. Rene Maheu. The Council looks after the welfare of overseas students in India and provides them with extensive facilities. The Council has its own International Students' Houses at Bombay, Calcutta and Delhi and an International Centre at Madras. The publications programme of the Council includes two quarterly review 'Indo-Asian Culture' in English and 'Thaqafatul Hind' in Arabic, one bi-monthly bulletin 'Cultural News from India', one quarterly *News Letter* for Overseas students, a series of books and brochures relating to various aspects of life in India and translation of Indian works into foreign languages.

The Council will also provide the Secretariat for the Jawaharlal Nehru Memorial Award for International understanding recently constituted by the Government of India and the first award was expected to be announced on November 14, 1965.

*President :* M. C. Chagla ; *Vice-Presidents :* Dr. C. D. Deshmukh, S. R. Das ; *Secretary :* Inam Rahman.

### INDIAN COUNCIL OF HUMAN RELATIONS
71, Pandara Road, New Delhi, 14 ; Radha Bazar Lane, Calcutta-1.

### THE INDIAN COUNCIL OF MEDICAL RESEARCH
Medical Enclave, Near Safdarjung Hospital, P.B. 494, New Delhi 16.

The Indian Council of Medical Research was formerly known as the Indian Research Fund Association and was constituted in 1911 by the Government of India with a sum of Rs. 5,00,000 set aside as an endowment.

The control and management of the Council is vested in a Governing Body, the President of which is the Health Minister of the Government of India. This body is assisted in scientific and technical matters by a Scientific Advisory Board of which the Chairman is the Director-General of Health Services. The Board, in its turn, is advised by a number of committees on specific subjects.

The Council annually publishes a report describing the research done by the various enquiries carried out under the auspices of the Council during each calendar year. The Council publishes the *Indian Journal of Medical Research* and its *Memoirs*. In addition, a number of special reports, dealing with important subjects of medical research, are also published from time to time. So far, fifty-two such reports have been published.

The Council maintains the Nutrition Research Laboratories at Hyderabad, which is the premier institution in India entirely devoted to research in nutrition and allied sciences.

Besides financing a large number of enquiries, the Council has set up nutrition research unit at the University College of Science and Technology, Calcutta, a Neuropathological Unit at the Tata Memorial Hospital, Bombay, a Clinical Research Unit and a Haematological Research Unit at the School of Tropical Medicine, Calcutta, a Polio Research Unit at the Grant Medical College, Bombay, a Liver Diseases Research Unit at the S. N. Medical College, Agra, and Industrial Wastes Disposal and Water Pollution Research Units at Lucknow and Patna. A Virus Research Centre has also been set up by the Council at Poona in collaboration with the Rockefeller Foundation of the U.S.A. A Blood Group Reference Centre has been set up in Bombay and a Cholera Research Centre has been set up in Calcutta.

Besides, the Council maintains two Chairs, the Chair of the Professor of Bacteriology and Pathology and the Chair of the Professor of Protozoology at the School of Tropical Medicine, Calcutta.

The Council awards a number of research fellowships to deserving medical and science graduates with a view to training teachers and research workers for medical college staffs and aiding the development of certain departments in medical colleges as post-graduate training centres.

The Council maintains a library at the Central Research Institute, Kasauli. The Council has also established Micro film and Photocopy Service Units at the Central Research Institute, Kasauli, and at the Tata Memorial Hospital, Bombay.

*President :* Dr. Sushila Nayar ; *Chairman, Scientific Advisory Board :* Dr. K. N. Rao ; *Director :* Col. B. L. Taneja.

## INDIAN COUNCIL OF WORLD AFFAIRS

Sapru House, Barakhamba Road, New Delhi 1.

*President :* Hriday Nath Kunzru ; *Treasurer :* Charat Ram ; *Chairman, Research Board :* Asoka Mehta ; *Secretary-General :* S. L. Poplai ; *Research Secy. :* Sisir Gupta ; *Asstt. Secretary :* N. N. Pichai ; *Librarian :* Girja Kumar.

The Council enjoys consultative status with the United Nations Economic and Social Council and UNESCO. A Research Board plans and supervises the Council's research programmes. The Council publishes *India Quarterly* and *Foreign Affairs Reports*. The Council has so far published about 50 monographs and a large number of pamphlets. Apart from occasional publications, the Council publishes two series of biennial volumes entitled *India in World Affairs*. The Council maintains a research library on international affairs, containing about 39,994 volumes, 1,36,476 documents, 1,446 periodicals and 4,22,000 press clippings. It is rapidly building up special collections in foreign languages like Russian, Japanese, etc. Current acquisitions lay special stress upon the countries of Asia. As on 31st December 1964, the Council had 23 branches in most of the leading cities of India and 1,457 members.

## INDIAN INVESTMENT CENTRE

Jeevan Vihar, Parliament Street, New Delhi 1.

The Indian Investment Centre established in February 1961, is a non-profit making semi-Government organisation. Its management is entrusted to a Governing Body composed of 10 prominent representatives of Industry, Finance and Government.

The basic objective of the Centre is to stimulate the flow of foreign private capital, technological skills and know-how into India. With this end in view, the Centre undertakes (*a*) to promote among the capital exporting countries a wider knowledge and understanding of the Indian economy, Government's economic policies and the 'investment climate' of the country, (*b*) to assist Indian entrepreneurs in their efforts to set up joint ventures, (*c*) to help foreign industrial entrepreneurs in concluding collaboration agreements and in securing government approvals.

The Centre has its branch offices in New York at 708 Third Avenue, New York, N. Y. 10017, U.S.A. and in Dusseldorf at Karlstrasse 76, Dusseldorf-4, Federal Republic of Germany. It has made arrangements with Indian Embassies in other capital exporting countries where enquiries emanating from Indian entrepreneurs and those from foreign businessmen receive prompt attention.

The Indian Investment Centre maintains a close liaison with the economic Ministries of the Government of India. It has brought out 7 publications, (*i*) Objects and Functions, (*ii*) Exchange Control, (*iii*) Basic Facts of the Indian Economy, (*iv*) Taxation, (*v*) Company Law, (*vi*) India Welcomes Foreign Investments and (*vii*) Survey of Demand for Measuring Tools, Gauges and Instruments. The Fact Sheets published by the Centre include : Steel Castings, Ball & Roller Bearings, Steel Forgings, High Tension and Low Tension Insulators, Industrial Furnaces, Printing Machinery, Cranes, Malleable Iron Castings, Rolls, Boilers. The monthly *News Letter* giving latest information regarding Government's economic policies, financial conditions and 'investment climate' has been regularly published by the Centre since December 1963.

The Centre has, upto the end of June 1965, processed and forwarded to capital exporting countries 129 industrial proposals from Indian parties seeking collaboration with foreign entrepreneurs. Similarly, the Centre had received nearly 500 enquiries from foreign enterprises interested in establishing joint ventures in India. With the active assistance of the Centre, 107 proposals for setting up joint ventures in India have come to fruition.

## INDIAN NATIONAL TRADE UNION CONGRESS

17, Janpath, New Delhi 1.

Founded in May 1947, the INTUC today is the biggest and most representative trade union organisation in the country. More than 1,900 trade unions with a membership of over 17,50,000 workers from all trades and industries throughout the country are affiliated to it. It has 16 Pradesh Branches and 16 Industrial Federations to co-ordinate the work of trade unions. The INTUC aims at eliminating social, political or economic exploitation of workers, organising the workers under trade unions, securing speedy improvement of conditions of work and life and raising the status of workers in industry and society. The INTUC believes in adopting constitutional and peaceful methods for securing the redressal of grievances of workers according to the Gandhian Ideology.

The INTUC is a founder-member of the International Confederation of Free Trade Unions, which was formed in 1949, at a World Labour Congress held in London. The INTUC also participates in Conferences and Committees convened by the I.L.O. The INTUC is also an "Associate Member" of Indian National Commission for UNESCO.

The INTUC is an independent organisation of workers believing in the aims and objects as laid down in its Constitution. The INTUC has faith in truth and non-violence and believes that industrial disputes should be resolved as far as possible by consultation, negotiation, conciliation, voluntary arbitration or adjudication. If there are Congressmen in the INTUC this is because the ideals of the Congress and the INTUC are identical.

During its 18 years of existence the INTUC has played an important role in championing the just demands of the workers, in resisting threats to their security of employment, in bringing about the progressive reorientation in the economic policy of the Government and in ensuring active co-operation of the workers in realising the national objectives in the economic field. The INTUC is steadily marching towards the goal of establishment of a democratic socialist society.

*President :* Dr. G. S. Melkote, M.P. ; *General Secretary :* G. Ramanujam ; *Treasurer :* A. N. Buch ; *Assistant Secretary :* N. K. Bhatt.

(See also under 'Labour').

## INDIAN NURSING COUNCIL

Kotla Road, Temple Lane, New Delhi.

Statutory body constituted under the Indian Nursing Council Act, 1947, in order to establish a uniform standard of training for nurses, midwives and health visitors.

*President :* Dr. K. N. Rao, Director-General of Health Services ; *Vice-President :* Mrs. A. Gupta, Principal, College of Nursing, New Delhi ; *Member-Secretary :* Miss T. K. Adranvala, Nursing Adviser, Directorate General of Health Services, New Delhi.

## INDIAN PHYTOPATHOLOGICAL SOCIETY

Indian Agricultural Research Institute, New Delhi 12.

*President :* Dr. M. J. Thirumalachar ; *Vice-President :* Dr. K. S. Thind ; *Secretary-Treasurer :* Dr. S. P. Raychaudhuri ; *Joint Secretary :* Dr. M. M. Payak ; *Editor-in-Chief :* Dr. R. Prasada.

## INDIAN RED CROSS SOCIETY

Red Cross Road, New Delhi 1.

*President :* Dr. S. Radhakrishnan (President of the Republic of India). *Chairman, Managing Body :* Lt. (Miss) Sushila Nayar ; *Hon. Treasurer :* S. Ratnam ; *Secretary-General :* Maj. Gen. C. K. Lakshmanan.

*Constitution.*—The Managing Body consists of a Chairman and 27 members, of whom 16 are the Vice-Presidents, elected by the Branch Committees, 6 elected by the Managing Body at its meeting preceding the Annual General Meeting from among the members of the Society, and 5 nominated by the President.

*Junior Red Cross.*—Junior Red Cross which was started in 1926 is an integral part of the Indian Red Cross Society and is its youth section. The movement functions all over India in over 35,379 schools and colleges with a membership of about 42 lakhs and aims at inculcating the ideals of health, service and international fellowship in the younger generation.

*Services To Armed Forces :*—In times of conflict, the Society undertakes various services for the Prisoners of War including repatriation, supply of gift parcels etc.

The Society runs a Red Cross Home in Bangalore well-equipped for 75 patients for giving expert medical aid and nursing care to permanently disabled ex-servicemen. It provides various amenities and comforts including newspapers, magazines and books to patients in all military hospitals. Diversional Therapy is provided to patients in these hospitals by 56 Red Cross Welfare Officers posted at different hospitals.

*After-Care of Ex-Servicemen :*—The Medical After-Care Fund provides financial assistance to ex-servicemen for medical treatment etc. A total of over 10,422 cases have so far been assisted from this Fund since its inception. Grants are also given to deserving ex-servicemen for purchase of typewriters, sewing machines, etc. to enable them to earn their livelihood.

*Bureau of Maternity and Child Welfare :*—The Maternity and Child Welfare Bureau of the Society was established in 1931.

The Bureau administers the Lady Chelmsford League Fund for maternity and child welfare, the Victoria Memorial Scholarships Fund for the training of dais, and the Army Child Welfare Funds. The Bureau also acts as a Central office for information and offers technical assistance.

Under the Five Year Plan its activity has also been extended to the hilly and backward areas of Tehri-Garhwal District and Jaunsar-Bawar Tehsil Chakrata, District Dehra Dun, where two maternity hospitals and a few multipurpose welfare centres are being run with the aid given by the Government.

*Relief Activities :*—Emergency relief forms an important aspect of Red Cross work in India and it comprises two categories : assistance with cash grants, medical and other supplies and provision of trained field workers for first aid, ambulance service, nursing and incidental duties for sudden emergencies.

Two quarterly Journals are published, namely, the Indian Red Cross Journal and the Indian Junior.

*Finances :*—The investments of the Society at the end of 1964 stood at Rs. 1,73,24,200 and the cash balance at Rs. 71,700. From the total income of Rs. 5,89,570 derived from investments of the Society, a sum of Rs. 1,58,160 is distributed under the Act to the State Branches in proportion to their contributions to the Central "OUR DAY" Fund raised in the First World War.

### INDIAN STANDARDS INSTITUTION

**Manak Bhavan, 9, Bahadur Shah Zafar Marg, New Delhi 1.**

*President :* Minister of Industry, Government of India. ; *Vice-Presidents :* J. J. Ghandy, Prabhu V. Mehta ; *Director :* Dr. Lal C. Verman.

The Indian Standards Institution (ISI)—or Bharatiya Manaksanstha—was set up in 1947 by a Resolution of the Government of India.

The aims and objects of the Institution include the preparation of standards, on national and international basis, relating to structures, commodities, materials, practices, operations, promotion of standardization, quality control and simplification in industry and commerce ; co-ordination of efforts of producers and users for the improvement of products, appliances, processes and methods ; provision for the registration of standardization marks applicable to products, commodities, etc. ; and collection and circulation of statistics and other information related to standardization in all its branches.

ISI is the joint venture of Government and Industry and its affairs are administered by a General Council representative of Government departments ; industrial and commercial houses ; professional, technological and scientific organizations ; consumer and purchase bodies ; and the Institution's subscribing members. The day-to-day affairs of the Institution are managed by an Executive Committee(EC).

In the preparation of Indian Standards—specifications, codes of practice, methods of tests, etc.—ISI functions through a large number of technical committees, consisting of scientists, technologists and experts drawn from diverse interests concerned with the subject. These committees are appointed by the eight Divisional Councils which are looking after different industries, namely, Agricultural and Food Products, Building, Chemical, Consumer Products, Engineering, Electrotechnical, Structural and Metals and Textile.

Under the authority vested in it by the ISI Certification Marks Act 1952, the Institution is operating ISI Certification Marks Scheme under which licences are issued by it to manufacturers to mark their products with ISI Certification Mark as a third-party guarantee to the purchaser that the products bearing the mark conform to the requirements laid down in the relevant Indian Standards.

For promotion of international trade, the Institution collaborates closely with International Organization for Standardization and International Electrotechnical Commission, the two international organizations dealing with standardization.

The sources of income of the Institution include (*a*) Central Government grant, (*b*) Membership Subscription from industry and other interested public bodies, (*c*) Sale of ISI publications, and (*d*) Certification Marking fees.

For keeping close liaison and rendering efficient service to industry, trade and commerce in different regions in the country, the Institution has opened its Branch Offices in Calcutta, Bombay, Kanpur and Madras.

*Important Statistics as on 31st March 1965 :*

| | |
|---|---|
| Number of standards published | 2,959 |
| Number of licences issued for ISI Mark | 1,050 |
| Number of products carrying ISI Mark | 266 |
| Number of Subscribing Members | 3,520 |
| Number of standardization committees | 1,486 |
| Committee membership | 17,494 |

### NATIONAL COUNCIL FOR WOMEN'S EDUCATION

Room No. 30, "M" Block Hutments, New Delhi.

### NATIONAL COUNCIL OF APPLIED ECONOMIC RESEARCH

Parisila Bhawan, 11, Indraprasta Estate, New Delhi 1.

The National Council started functioning from 1st August, 1956, as an independent research organisation to study current important economic problems on an objective basis on its own initiative or at the instance of Government, business concerns, associations or individuals and to help in analysing and finding solutions to specific problems in the planning and management of industrial and other undertakings. The Council has been established with the active support and encouragement of the Government of India and the business community and on its Governing Body are represented officials of the Central Government, leading business men and other eminent persons. The Council is largely self-financing. Its sources of income include grants from the Government of India and the Ford Foundation, project fees charged from the sponsors and membership fees. The organisation provides for a broad base of membership including Life, Ordinary and Corporate members.

The Council has already completed 86 studies on behalf of the Ministries of the Govt. of India, the State Governments, and the business community, 78 of which have also been published.

The Council is currently engaged in a number of studies *e.g.* Estimates of State Incomes, Industrial Programming for 4th Plan of Andhra Pradesh, Orissa, Rajasthan and Bihar, Demand Studies for Special Alloy Steel castings, Air Compressors, and Automobile Industry ; Consumer Expenditure Survey in developmental and non-developmental areas, Study of Maintenance Imports, Survey of Kerala and Mysore, Export possibilities of Vegetable oil seeds, Fish and Fish Products, Study of Cropping Pattern, Factors affecting demand for fertilizers, Strategy and approach to the 4th Plan, etc., etc.

There are several publications some of which are : *Contribution of Road Transport to the Public Exchequer, Demand for Energy in India 1960-75, Economically Weak Tea Gardens in North-East India, Foreign Exchange Crisis and the Plan, Managing Agency System, Replacement Cost in Industry, Some Aspects of Economic Growth of Underdeveloped Areas, Taxation and Foreign Investment, Taxation and Private Investment, Techno-Economic Surveys of Bihar, Madhya Pradesh, Orissa, Punjab, W. Bengal, Andhra Pradesh, Maharashtra, Gujarat, Rajasthan, U.P., Goa, Daman, Diu, H. P., Manipur and Tripura, Urban Saving Survey-Method and Techniques, Current Problems of Planned Economy, Energy Production and Consumption in India, Looking Ahead, Long Term Projections of Demand for and supply of Selected Agricultural Commodities in India, Measurement and analysis of Saving Economic Implications of Present Emergency, Indian Economy 1961-63, Contractual Saving in Urban India, Socio-Economic Conditions of Primitive Tribes in Madhya Pradesh, Development for Dandakaranya, Reappraisal of Steel Demand Vol. I & II, Demand of Energy in Eastern India, Foreign Investor and Tax Reforms, Indian Economy 1962-64, Rural Household Saving Survey—A Summary, Strategy for the Fourth Plan ; Growth Without Inflation, Price Policy and Economic Growth ; Demand for energy in S. ### NATIONAL COUNCIL OF EDUCATIONAL RESEARCH AND TRAINING

5, West Patel Nagar, Patel Road, New Delhi 12.

### NATIONAL FEDERATION OF CO-OPERATIVE SUGAR FACTORIES LIMITED

51/1, (First Floor), New Market, Western Extension Area, Karolbagh, New Delhi 5.

The National Federation was set up in Dec. 1960, with the object of co-ordinating and facilitating the working of co-op. sugar factories, State and Zonal Federation and to assist in the promotion of organisation of new co-op. sugar factories.

There are 57 co-op. sugar factories licensed so far, of which 41 were in production in 1962-63, 48 in 1963-64, and 50 in 1964-65. Othersare in various stages of formation and five of these are expected to go into production in 1965-66.

Out of a total licensed capacity of 33·6 lakh tonnes for the sugar industry, the co-op. sector accounts for 8·25 lakh tonnes i.e., nearly 24·5 per cent. Recently the Government of India sanctioned expansion of 22 existing units in the Co-op. Sector accounting for 1·66 lakh tonnes capacity. In 1964-65 season the installed capacity of the co-operative Sector was 7·25 lakh tonnes against 7 lakh tonnes in 1963-64.

Co-op. sugar factories produced in 1962-63, 21·5 per cent and in 1963-64, 23·3 per cent of the total production of sugar in the country. In 1964-65 the Co-op. Sugar Factories produced upto May '65 about 7·60 lakh tonnes of sugar, which is 24·5 per cent of the total production and 30 per cent more than that in 1963-64 and 10 per cent more than their own estimated production.

There are nearly 2·40 lakh members as shareholders in the 57 Co-op. Sugar Factories with a total share contribution of Rs. 2,365·99 lakhs of which Rs. 913·99 lakhs are contributed by the State Governments. The Industrial Finance Corporation of India has sanctioned loans to the 57 co-op. sugar factories to the extent of Rs. 3,699·50 lakhs upto 31st Dec. '64.

The National Federation has undertaken many useful activities during the last four years of its existence and has made its presence felt. It is now recognised as the main spokesman of the Co-op. Sector in the Sugar Industry.

*President:* Prof. D. R. Gadgil, Poona; *Vice-President:* P. S. Rajagopal Naidu, B.Sc., B.L., *Secretary:* A. L. N. Moorthy, M.Sc. Hons. (Tech.), M.I.I.Chem.E., New Delhi.

### NATIONAL PRODUCTIVITY COUNCIL

38, Golf Links, New Delhi 3.

The National Productivity Council was established in 1958 by the Government of India as an autonomous organisation to help increase productivity in every sector of the national economy. It is organised on the ILO tripartite pattern representing Government, employers and workers. As it has grown, it has also taken within its organisation specialised institutions and the Local Productivity Councils, established practically all over the country and working as the spearhead of the Productivity Movement.

During the last eight years that NPC has been working, Productivity consciousness has been created practically throughout the whole structure of industry through training programmes (local and foreign), Productivity Survey and Implementation Service, publication of productivity literature, audio-visual activities, etc. NPC has also organised a Fuel Efficiency Service, centred at Bombay but spreading to other areas either directly or through collaboration with such institutions as the South India Steam Users' Association. A decision in principle has been taken to enter the area of Agriculture with a view to making available to farmers NPC experience in the application of Productivity Techniques.

NPC has 6 Regional Directorates (Ludhiana, Kanpur, Calcutta, Madras, Bangalore and Bombay) covering all the principal industrial areas of the country. NPC Specialists are located at these regional centres and their services are available to Local Productivity Councils, which are themselves autonomous organisations organised on the same tripartite pattern.

*President:* T. N. Singh, Union Minister for Industry; *Chairman:* Dr. P. S. Lokanathan; *Executive Director:* N. K. Bhojwani.
